Preface . . . . .	xix
<b>Chapter 1. The Derivatives . . . . .</b>	<b>1</b>
<b>1.1. Elementary Functions . . . . .</b>	<b>1</b>
1.1.1. General formulas . . . . .	1
1.1.2. Algebraic functions . . . . .	1
1.1.3. The exponential function . . . . .	4
1.1.4. Hyperbolic functions . . . . .	6
1.1.5. Trigonometric functions . . . . .	7
1.1.6. The logarithmic function . . . . .	12
1.1.7. Inverse trigonometric functions . . . . .	13
<b>1.2. The Hurwitz Zeta Function <math>\zeta(\nu, z)</math> . . . . .</b>	<b>15</b>
1.2.1. Derivatives with respect to the argument . . . . .	15
1.2.2. Derivatives with respect to the parameter . . . . .	15
<b>1.3. The Exponential Integral <math>Ei(z)</math> . . . . .</b>	<b>16</b>
1.3.1. Derivatives with respect to the argument . . . . .	16
<b>1.4. The Sine <math>si(z)</math> and Cosine <math>ci(z)</math> Integrals. . . . .</b>	<b>17</b>
1.4.1. Derivatives with respect to the argument . . . . .	17
<b>1.5. The Error Functions <math>erf(z)</math> and <math>erfc(z)</math> . . . . .</b>	<b>18</b>
1.5.1. Derivatives with respect to the argument . . . . .	18
<b>1.6. The Fresnel Integrals <math>S(z)</math> and <math>C(z)</math>. . . . .</b>	<b>20</b>
1.6.1. Derivatives with respect to the argument . . . . .	20
<b>1.7. The Generalized Fresnel Integrals <math>S(z, \nu)</math> and <math>C(z, \nu)</math> . . . . .</b>	<b>20</b>
1.7.1. Derivatives with respect to the argument . . . . .	20
<b>1.8. The Incomplete Gamma Functions <math>\gamma(\nu, z)</math> and <math>\Gamma(\nu, z)</math> . . . . .</b>	<b>21</b>
1.8.1. Derivatives with respect to the argument . . . . .	21
1.8.2. Derivatives with respect to the parameter . . . . .	22
<b>1.9. The Parabolic Cylinder Function <math>D_\nu(z)</math> . . . . .</b>	<b>22</b>
1.9.1. Derivatives with respect to the argument . . . . .	22
1.9.2. Derivatives with respect to the order . . . . .	24

1.10. The Bessel Function $J_\nu(z)$ . . . . .	25
1.10.1. Derivatives with respect to the argument . . . . .	25
1.10.2. Derivatives with respect to the order . . . . .	28
1.11. The Bessel Function $Y_\nu(z)$ . . . . .	29
1.11.1. Derivatives with respect to the argument . . . . .	29
1.11.2. Derivatives with respect to the order . . . . .	31
1.12. The Hankel Functions $H_\nu^{(1)}(z)$ and $H_\nu^{(2)}(z)$ . . . . .	31
1.12.1. Derivatives with respect to the argument . . . . .	31
1.12.2. Derivatives with respect to the order . . . . .	32
1.13. The Modified Bessel Function $I_\nu(z)$ . . . . .	32
1.13.1. Derivatives with respect to the argument . . . . .	32
1.13.2. Derivatives with respect to the order . . . . .	35
1.14. The Macdonald Function $K_\nu(z)$ . . . . .	36
1.14.1. Derivatives with respect to the argument . . . . .	36
1.14.2. Derivatives with respect to the order . . . . .	40
1.15. The Struve Functions $H_\nu(z)$ and $L_\nu(z)$ . . . . .	41
1.15.1. Derivatives with respect to the argument . . . . .	41
1.15.2. Derivatives with respect to the order . . . . .	42
1.16. The Anger $J_\nu(z)$ and Weber $E_\nu(z)$ Functions . . . . .	45
1.16.1. Derivatives with respect to the argument . . . . .	45
1.16.2. Derivatives with respect to the order . . . . .	47
1.17. The Kelvin Functions $\text{ber}_\nu(z)$ , $\text{bei}_\nu(z)$ , $\text{ker}_\nu(z)$ and $\text{kei}_\nu(z)$ . . . . .	48
1.17.1. Derivatives with respect to the argument . . . . .	48
1.17.2. Derivatives with respect to the order . . . . .	51
1.18. The Legendre Polynomials $P_n(z)$ . . . . .	56
1.18.1. Derivatives with respect to the argument . . . . .	56
1.19. The Chebyshev Polynomials $T_n(z)$ and $U_n(z)$ . . . . .	59
1.19.1. Derivatives with respect to the argument . . . . .	59
1.20. The Hermite Polynomials $H_n(z)$ . . . . .	62
1.20.1. Derivatives with respect to the argument . . . . .	62
1.21. The Laguerre Polynomials $L_n^\lambda(z)$ . . . . .	63
1.21.1. Derivatives with respect to the argument . . . . .	63
1.21.2. Derivatives with respect to the parameter . . . . .	64
1.22. The Gegenbauer Polynomials $C_n^\lambda(z)$ . . . . .	64
1.22.1. Derivatives with respect to the argument . . . . .	64
1.22.2. Derivatives with respect to the parameter . . . . .	66
1.23. The Jacobi Polynomials $P_n^{(\rho, \sigma)}(z)$ . . . . .	66
1.23.1. Derivatives with respect to the argument . . . . .	66
1.23.2. Derivatives with respect to parameters . . . . .	69

1.24.	The Complete Elliptic Integrals $K(z)$ , $E(z)$ and $D(z)$ . . . . .	69
1.24.1.	Derivatives with respect to the argument . . . . .	69
1.25.	The Legendre Function $P_\nu^\mu(z)$ . . . . .	70
1.25.1.	Derivatives with respect to the argument . . . . .	70
1.25.2.	Derivatives with respect to parameters . . . . .	71
1.26.	The Kummer Confluent Hypergeometric Function ${}_1F_1(a; b; z)$ . . . . .	73
1.26.1.	Derivatives with respect to the argument . . . . .	73
1.26.2.	Derivatives with respect to parameters . . . . .	75
1.27.	The Tricomi Confluent Hypergeometric Function $\Psi(a; b; z)$ . . . . .	76
1.27.1.	Derivatives with respect to the argument . . . . .	76
1.27.2.	Derivatives with respect to parameters . . . . .	77
1.28.	The Whittaker Functions $M_{\mu, \nu}(z)$ and $W_{\mu, \nu}(z)$ . . . . .	80
1.28.1.	Derivatives with respect to the argument . . . . .	80
1.29.	The Gauss Hypergeometric Function ${}_2F_1(a, b; c; z)$ . . . . .	80
1.29.1.	Derivatives with respect to the argument . . . . .	80
1.29.2.	Derivatives with respect to parameters . . . . .	85
1.30.	The Generalized Hypergeometric Function ${}_pF_q((a_p); (b_q); z)$ . . . . .	86
1.30.1.	Derivatives with respect to the argument . . . . .	86
1.30.2.	Derivatives with respect to parameters . . . . .	87
 Chapter 2. Limits . . . . .		 95
2.1.	Special Functions . . . . .	95
2.1.1.	The Bessel functions $J_\nu(z)$ , $Y_\nu(z)$ , $I_\nu(z)$ and $K_\nu(z)$ . . . . .	95
2.1.2.	The Struve functions $\mathbf{H}_\nu(z)$ and $\mathbf{L}_\nu(z)$ . . . . .	95
2.1.3.	The Kelvin functions $\text{ber}_\nu(z)$ , $\text{bei}_\nu(z)$ , $\text{ker}_\nu(z)$ and $\text{kei}_\nu(z)$ . . . . .	95
2.1.4.	The Legendre polynomials $P_n(z)$ . . . . .	96
2.1.5.	The Chebyshev polynomials $T_n(z)$ and $U_n(z)$ . . . . .	96
2.1.6.	The Hermite polynomials $H_n(z)$ . . . . .	97
2.1.7.	The Laguerre polynomials $L_n^\lambda(z)$ . . . . .	97
2.1.8.	The Gegenbauer polynomials $C_n^\lambda(z)$ . . . . .	98
2.1.9.	The Jacobi polynomials $P_n^{(\rho, \sigma)}(z)$ . . . . .	98
2.1.10.	Hypergeometric functions. . . . .	99
 Chapter 3. Indefinite Integrals. . . . .		 101
3.1.	Elementary Functions . . . . .	101
3.1.1.	The logarithmic function . . . . .	101
3.2.	Special Functions . . . . .	102
3.2.1.	The Bessel functions $J_\nu(x)$ , $Y_\nu(x)$ , $I_\nu(x)$ and $K_\nu(x)$ . . . . .	102

3.2.2.	The Struve functions $H_\nu(z)$ and $L_\nu(z)$ . . . . .	105
3.2.3.	The Airy functions $Ai(z)$ and $Bi(z)$ . . . . .	105
3.2.4.	Various functions . . . . .	109
<b>Chapter 4. Definite Integrals</b> . . . . .		111
4.1.	<b>Elementary Functions</b> . . . . .	111
4.1.1.	Algebraic functions . . . . .	111
4.1.2.	The exponential function . . . . .	116
4.1.3.	Hyperbolic functions . . . . .	117
4.1.4.	Trigonometric functions . . . . .	121
4.1.5.	The logarithmic function . . . . .	132
4.1.6.	Inverse trigonometric functions . . . . .	155
4.2.	<b>The Dilogarithm <math>Li_2(z)</math></b> . . . . .	178
4.2.1.	Integrals containing $Li_2(z)$ and algebraic functions . . . . .	178
4.2.2.	Integrals containing $Li_2(z)$ and trigonometric functions . . . . .	179
4.2.3.	Integrals containing $Li_2(z)$ and the logarithmic function . . . . .	180
4.2.4.	Integrals containing $Li_2(z)$ and inverse trigonometric functions . . . . .	180
4.3.	<b>The Sine <math>Si(z)</math> and Cosine <math>ci(z)</math> Integrals</b> . . . . .	181
4.3.1.	Integrals containing $Si(z)$ and algebraic functions. . . . .	181
4.3.2.	Integrals containing $Si(z)$ and trigonometric functions. . . . .	181
4.3.3.	Integrals containing $Si(z)$ and the logarithmic function . . . . .	183
4.3.4.	Integrals containing $Si(z)$ and inverse trigonometric functions . . . . .	183
4.3.5.	Integrals containing products of $Si(z)$ and $ci(z)$ . . . . .	184
4.4.	<b>The Error Functions <math>erf(z)</math>, <math>erfi(z)</math> and <math>erfc(z)</math></b> . . . . .	184
4.4.1.	Integrals containing $erf(z)$ and algebraic functions . . . . .	184
4.4.2.	Integrals containing $erf(z)$ , $erfc(z)$ and the exponential function . . . . .	185
4.4.3.	Integrals containing $erf(z)$ and trigonometric functions . . . . .	186
4.4.4.	Integrals containing $erf(z)$ and the logarithmic function . . . . .	187
4.4.5.	Integrals containing $erf(z)$ , $erfi(z)$ and inverse trigonometric functions . . . . .	187
4.4.6.	Integrals containing products of $erf(z)$ , $erfc(z)$ and $erfi(z)$ . . . . .	188
4.5.	<b>The Fresnel Integrals <math>S(z)</math> and <math>C(z)</math></b> . . . . .	189
4.5.1.	Integrals containing $S(z)$ and algebraic functions . . . . .	189
4.5.2.	Integrals containing $S(z)$ and trigonometric functions . . . . .	190
4.5.3.	Integrals containing $S(z)$ and the logarithmic function . . . . .	191
4.5.4.	Integrals containing $C(z)$ and algebraic functions . . . . .	191
4.5.5.	Integrals containing $C(z)$ and trigonometric functions . . . . .	191
4.5.6.	Integrals containing $C(z)$ and the logarithmic function . . . . .	192
4.6.	<b>The Incomplete Gamma Function <math>\gamma(\nu, z)</math></b> . . . . .	192
4.6.1.	Integrals containing $\gamma(\nu, z)$ and algebraic functions. . . . .	192
4.6.2.	Integrals containing $\gamma(\nu, z)$ and the exponential function . . . . .	193
4.6.3.	Integrals containing $\gamma(\nu, z)$ and trigonometric functions . . . . .	193

4.6.4.	Integrals containing $\gamma(\nu, z)$ and the logarithmic function . . . . .	195
4.6.5.	Integrals containing $\gamma(\nu, z)$ , $\operatorname{erf}(z)$ and $\operatorname{erfi}(z)$ . . . . .	195
4.6.6.	Integrals containing products of $\gamma(\nu, z)$ . . . . .	195
4.7.	<b>The Bessel Function <math>J_\nu(z)</math></b> . . . . .	196
4.7.1.	Integrals containing $J_\nu(z)$ and algebraic functions . . . . .	196
4.7.2.	Integrals containing $J_\nu(z)$ and the exponential function. . . . .	197
4.7.3.	Integrals containing $J_\nu(z)$ and trigonometric functions . . . . .	197
4.7.4.	Integrals containing $J_\nu(z)$ and the logarithmic function. . . . .	199
4.7.5.	Integrals containing $J_\nu(z)$ and inverse trigonometric functions . . . . .	199
4.7.6.	Integrals containing $J_\nu(z)$ , $\operatorname{Si}(z)$ and $\operatorname{ci}(z)$ . . . . .	200
4.7.7.	Integrals containing products of $J_\nu(z)$ . . . . .	201
4.8.	<b>The Bessel Function <math>Y_\nu(z)</math></b> . . . . .	204
4.8.1.	Integrals containing $Y_\nu(z)$ and algebraic functions . . . . .	204
4.8.2.	Integrals containing $Y_\nu(z)$ and $J_\nu(z)$ . . . . .	204
4.9.	<b>The Modified Bessel Function <math>I_\nu(z)</math></b> . . . . .	205
4.9.1.	Integrals containing $I_\nu(z)$ and algebraic functions. . . . .	205
4.9.2.	Integrals containing $I_\nu(z)$ and the exponential function. . . . .	206
4.9.3.	Integrals containing $I_\nu(z)$ and trigonometric functions. . . . .	208
4.9.4.	Integrals containing $I_\nu(z)$ and the logarithmic function . . . . .	210
4.9.5.	Integrals containing $I_\nu(z)$ and inverse trigonometric functions . . . . .	211
4.9.6.	Integrals containing $I_\nu(z)$ and special functions . . . . .	212
4.9.7.	Integrals containing products of $I_\nu(z)$ . . . . .	213
4.10.	<b>The Macdonald Function <math>K_\nu(z)</math></b> . . . . .	216
4.10.1.	Integrals containing $K_\nu(z)$ , $J_\nu(z)$ , $Y_\nu(z)$ and $I_\nu(z)$ . . . . .	216
4.10.2.	Integrals containing products of $K_\nu(z)$ . . . . .	216
4.11.	<b>The Struve Functions <math>H_\nu(z)</math> and <math>L_\nu(z)</math></b> . . . . .	217
4.11.1.	Integrals containing $H_\nu(z)$ , $L_\nu(z)$ and algebraic functions . . . . .	217
4.11.2.	Integrals containing $H_\nu(z)$ and hyperbolic functions . . . . .	219
4.11.3.	Integrals containing $H_\nu(z)$ , $L_\nu(z)$ and trigonometric functions . . . . .	219
4.11.4.	Integrals containing $H_\nu(z)$ , $L_\nu(z)$ and the logarithmic function. . . . .	220
4.11.5.	Integrals containing $H_\nu(z)$ , $L_\nu(z)$ and inverse trigonometric functions . . . . .	221
4.12.	<b>The Kelvin Functions <math>\operatorname{ber}_\nu(z)</math>, <math>\operatorname{bei}_\nu(z)</math>, <math>\operatorname{ker}_\nu(z)</math> and <math>\operatorname{kei}_\nu(z)</math></b> . . . . .	221
4.12.1.	Integrals containing $\operatorname{ber}_\nu(z)$ , $\operatorname{bei}_\nu(z)$ , $\operatorname{ker}_\nu(z)$ , $\operatorname{kei}_\nu(z)$ and algebraic functions . . . . .	221
4.13.	<b>The Airy Functions <math>\operatorname{Ai}(z)</math> and <math>\operatorname{Bi}(z)</math></b> . . . . .	222
4.13.1.	Integrals containing products of $\operatorname{Ai}(z)$ and $\operatorname{Bi}(z)$ . . . . .	222
4.14.	<b>The Legendre Polynomials <math>P_n(z)</math></b> . . . . .	223
4.14.1.	Integrals containing $P_n(z)$ and algebraic functions . . . . .	223
4.14.2.	Integrals containing $P_n(z)$ and trigonometric functions . . . . .	226
4.14.3.	Integrals containing $P_n(z)$ and the logarithmic function. . . . .	231

4.14.4. Integrals containing $P_n(z)$ , $J_\nu(z)$ , $I_\nu(z)$ and $K_\nu(z)$ . . . . .	232
4.14.5. Integrals containing products of $P_n(z)$ . . . . .	232
<b>4.15. The Chebyshev Polynomials <math>T_n(z)</math></b> . . . . .	<b>234</b>
4.15.1. Integrals containing $T_n(z)$ and algebraic functions . . . . .	234
4.15.2. Integrals containing $T_n(z)$ and trigonometric functions . . . . .	236
4.15.3. Integrals containing $T_n(z)$ and special functions. . . . .	241
<b>4.16. The Chebyshev Polynomials <math>U_n(z)</math></b> . . . . .	<b>241</b>
4.16.1. Integrals containing $U_n(z)$ and algebraic functions . . . . .	241
4.16.2. Integrals containing $U_n(z)$ and trigonometric functions . . . . .	242
4.16.3. Integrals containing $U_n(z)$ and $K_\nu(z)$ . . . . .	246
4.16.4. Integrals containing products of $U_n(z)$ . . . . .	246
<b>4.17. The Hermite Polynomials <math>H_n(z)</math></b> . . . . .	<b>247</b>
4.17.1. Integrals containing $H_n(z)$ and algebraic functions . . . . .	247
4.17.2. Integrals containing $H_n(z)$ and the exponential function . . . . .	248
4.17.3. Integrals containing $H_n(z)$ and trigonometric functions . . . . .	249
4.17.4. Integrals containing $H_n(z)$ , erf ( $z$ ) and erfc ( $z$ ) . . . . .	251
4.17.5. Integrals containing $H_n(z)$ and $K_\nu(z)$ . . . . .	251
4.17.6. Integrals containing products of $H_n(z)$ . . . . .	252
<b>4.18. The Laguerre Polynomials <math>L_n^\lambda(z)</math></b> . . . . .	<b>254</b>
4.18.1. Integrals containing $L_n^\lambda(z)$ and algebraic functions . . . . .	254
4.18.2. Integrals containing $L_n^\lambda(z)$ and trigonometric functions . . . . .	255
4.18.3. Integrals containing $L_n^\lambda(z)$ and erfc ( $z$ ) . . . . .	256
4.18.4. Integrals containing products of $L_n^\lambda(z)$ . . . . .	256
<b>4.19. The Gegenbauer Polynomials <math>C_n^\lambda(z)</math></b> . . . . .	<b>257</b>
4.19.1. Integrals containing $C_n^\lambda(z)$ and algebraic functions . . . . .	257
4.19.2. Integrals containing $C_n^\lambda(z)$ and trigonometric functions . . . . .	257
4.19.3. Integrals containing products of $C_n^\lambda(z)$ . . . . .	261
<b>4.20. The Jacobi Polynomials <math>P_n^{(\rho,\sigma)}(z)</math></b> . . . . .	<b>262</b>
4.20.1. Integrals containing $P_n^{(\rho,\sigma)}(z)$ and algebraic functions . . . . .	262
4.20.2. Integrals containing $P_n^{(\rho,\sigma)}(z)$ and trigonometric functions . . . . .	263
4.20.3. Integrals containing $P_n^{(\rho,\sigma)}(z)$ and $J_\nu(z)$ . . . . .	263
4.20.4. Integrals containing products of $P_n^{(\rho,\sigma)}(z)$ . . . . .	264
<b>4.21. The Complete Elliptic Integral <math>K(z)</math></b> . . . . .	<b>265</b>
4.21.1. Integrals containing $K(z)$ and algebraic functions. . . . .	265
4.21.2. Integrals containing $K(z)$ , the exponential, hyperbolic and trigonometric functions . . . . .	267
4.21.3. Integrals containing $K(z)$ and the logarithmic function . . . . .	268
4.21.4. Integrals containing $K(z)$ and inverse trigonometric functions . . . . .	271
4.21.5. Integrals containing $K(z)$ and $\text{Li}_2(z)$ . . . . .	274

4.21.6.	Integrals containing $K(z)$ , $\text{shi}(z)$ and $\text{Si}(z)$ . . . . .	274
4.21.7.	Integrals containing $K(z)$ and $\text{erf}(z)$ . . . . .	275
4.21.8.	Integrals containing $K(z)$ , $S(z)$ and $C(z)$ . . . . .	275
4.21.9.	Integrals containing $K(z)$ and $\gamma(\nu, z)$ . . . . .	275
4.21.10.	Integrals containing $K(z)$ , $J_\nu(z)$ and $I_\nu(z)$ . . . . .	276
4.21.11.	Integrals containing $K(z)$ , $H_\nu(z)$ and $L_\nu(z)$ . . . . .	277
4.21.12.	Integrals containing $K(z)$ and $L_n^\lambda(z)$ . . . . .	278
4.21.13.	Integrals containing products of $K(z)$ . . . . .	278
<b>4.22.</b>	<b>The Complete Elliptic Integral <math>E(z)</math>.</b> . . . . .	<b>279</b>
4.22.1.	Integrals containing $E(z)$ and algebraic functions . . . . .	279
4.22.2.	Integrals containing $E(z)$ , the exponential, hyperbolic and trigonometric functions . . . . .	283
4.22.3.	Integrals containing $E(z)$ and the logarithmic function . . . . .	286
4.22.4.	Integrals containing $E(z)$ and inverse trigonometric functions. . . . .	289
4.22.5.	Integrals containing $E(z)$ and $\text{Li}_2(z)$ . . . . .	292
4.22.6.	Integrals containing $E(z)$ , $\text{shi}(z)$ and $\text{Si}(z)$ . . . . .	293
4.22.7.	Integrals containing $E(z)$ and $\text{erf}(z)$ . . . . .	293
4.22.8.	Integrals containing $E(z)$ , $S(z)$ and $C(z)$ . . . . .	293
4.22.9.	Integrals containing $E(z)$ and $\gamma(\nu, z)$ . . . . .	294
4.22.10.	Integrals containing $E(z)$ , $J_\nu(z)$ and $I_\nu(z)$ . . . . .	294
4.22.11.	Integrals containing $E(z)$ , $H_\nu(z)$ and $L_\nu(z)$ . . . . .	296
4.22.12.	Integrals containing $E(z)$ and $L_n^\lambda(z)$ . . . . .	296
4.22.13.	Integrals containing products of $E(z)$ and $K(z)$ . . . . .	296
4.22.14.	Integrals containing products of $E(z)$ . . . . .	299
<b>4.23.</b>	<b>The Complete Elliptic Integral <math>D(z)</math>.</b> . . . . .	<b>300</b>
4.23.1.	Integrals containing $D(z)$ and elementary functions . . . . .	300
4.23.2.	Integrals containing products of $D(z)$ , $K(z)$ and $E(z)$ . . . . .	302
<b>4.24.</b>	<b>The Generalized Hypergeometric Function <math>{}_pF_q((a_p); (b_q); z)</math></b> . . . . .	<b>303</b>
4.24.1.	Integrals containing ${}_pF_q((a_p); (b_q); z)$ and algebraic functions. . . . .	303
4.24.2.	Integrals containing ${}_pF_q((a_p); (b_q); z)$ and trigonometric functions. . . . .	304
4.24.3.	Integrals containing ${}_pF_q((a_p); (b_q); z)$ and the logarithmic function . . . . .	306
4.24.4.	Integrals containing ${}_pF_q((a_p); (b_q); z)$ , $K(z)$ and $E(z)$ . . . . .	306
4.24.5.	Integrals containing products of ${}_pF_q((a_p); (b_q); z)$ . . . . .	306
<b>Chapter 5. Finite Sums.</b> . . . . .		<b>309</b>
<b>5.1.</b>	<b>The Psi Function <math>\psi(z)</math></b> . . . . .	<b>309</b>
5.1.1.	Sums containing $\psi(k+a)$ . . . . .	309
5.1.2.	Sums containing products of $\psi(k+a)$ . . . . .	311
5.1.3.	Sums containing $\psi'(k+a, z)$ . . . . .	311

5.2.	The Incomplete Gamma Functions $\gamma(\nu, z)$ and $\Gamma(\nu, z)$ . . . . .	312
5.2.1.	Sums containing $\gamma(nk + \nu, z)$ . . . . .	312
5.2.2.	Sums containing products of $\gamma(\nu \pm k, z)$ . . . . .	313
5.2.3.	Sums containing $\Gamma(\nu \pm k, z)$ . . . . .	313
5.3.	The Bessel Function $J_\nu(z)$ . . . . .	314
5.3.1.	Sums containing $J_{\nu \pm nk}(z)$ . . . . .	314
5.3.2.	Sums containing products of $J_{\nu \pm nk}(z)$ . . . . .	314
5.4.	The Modified Bessel Function $I_\nu(z)$ . . . . .	315
5.4.1.	Sums containing $I_{\nu \pm nk}(z)$ . . . . .	315
5.4.2.	Sums containing products of $J_{\nu \pm nk}(z)$ and $I_{\nu \pm nk}(z)$ . . . . .	315
5.4.3.	Sums containing products of $I_{\nu \pm nk}(z)$ . . . . .	317
5.5.	The Macdonald Function $K_\nu(z)$ . . . . .	318
5.5.1.	Sums containing $K_{\nu \pm nk}(z)$ . . . . .	318
5.5.2.	Sums containing $K_{\nu \pm nk}(z)$ and special functions . . . . .	318
5.5.3.	Sums containing products of $K_{\nu \pm nk}(z)$ . . . . .	319
5.6.	The Struve Functions $H_\nu(z)$ and $L_\nu(z)$ . . . . .	319
5.6.1.	Sums containing $H_{k+\nu}(z)$ and $L_{k+\nu}(z)$ . . . . .	319
5.7.	The Legendre Polynomials $P_n(z)$ . . . . .	320
5.7.1.	Sums containing $P_{m \pm nk}(z)$ . . . . .	320
5.7.2.	Sums containing $P_n(z)$ and special functions . . . . .	325
5.7.3.	Sums containing products of $P_{m \pm nk}(z)$ . . . . .	325
5.7.4.	Sums containing $P_m(\varphi(k, z))$ . . . . .	326
5.7.5.	Sums containing $P_k(\varphi(k, z))$ . . . . .	328
5.7.6.	Sums containing products of $P_m(\varphi(k, z))$ . . . . .	328
5.8.	The Chebyshev Polynomials $T_n(z)$ and $U_n(z)$ . . . . .	329
5.8.1.	Sums containing $T_{m+nk}(z)$ . . . . .	329
5.8.2.	Sums containing products of $T_{m+nk}(z)$ . . . . .	331
5.8.3.	Sums containing $T_n(\varphi(k, z))$ . . . . .	331
5.8.4.	Sums containing $U_{m+nk}(z)$ . . . . .	332
5.8.5.	Sums containing products of $U_n(z)$ . . . . .	335
5.8.6.	Sums containing $U_n(\varphi(k, z))$ . . . . .	335
5.9.	The Hermite Polynomials $H_n(z)$ . . . . .	337
5.9.1.	Sums containing $H_{m \pm nk}(z)$ . . . . .	337
5.9.2.	Sums containing $H_{m \pm nk}(z)$ and special functions . . . . .	340
5.9.3.	Sums containing products of $H_{m \pm nk}(z)$ . . . . .	341
5.9.4.	Sums containing $H_n(\varphi(k, z))$ . . . . .	342
5.9.5.	Sums containing $H_{m \pm nk}(\varphi(k, z))$ . . . . .	343
5.9.6.	Sums containing products of $H_{m \pm nk}(\varphi(k, z))$ . . . . .	344
5.10.	The Laguerre Polynomials $L_n^\lambda(z)$ . . . . .	344
5.10.1.	Sums containing $L_m^{\lambda \pm nk}(z)$ . . . . .	344

5.10.2.	Sums containing $L_{m \pm nk}^\lambda(z)$ . . . . .	346
5.10.3.	Sums containing $L_{m \pm pk}^{\lambda \pm nk}(z)$ . . . . .	348
5.10.4.	Sums containing $L_{m \pm pk}^{\lambda \pm nk}(z)$ and special functions . . . . .	355
5.10.5.	Sums containing products of $L_{m \pm pk}^{\lambda \pm nk}(z)$ . . . . .	357
5.10.6.	Sums containing $L_{m \pm pk}^{\lambda \pm nk}(\varphi(k, z))$ . . . . .	359
5.10.7.	Sums containing $L_{m \pm pk}^{\lambda \pm nk}(\varphi(k, z))$ and special functions . . . . .	361
5.10.8.	Sums containing products of $L_{m \pm pk}^{\lambda \pm nk}(\varphi(k, z))$ . . . . .	362
<b>5.11.</b>	<b>The Gegenbauer Polynomials <math>C_n^\lambda(z)</math></b> . . . . .	<b>363</b>
5.11.1.	Sums containing $C_m^{\lambda \pm nk}(z)$ . . . . .	363
5.11.2.	Sums containing $C_{m \pm pk}^\lambda(z)$ . . . . .	365
5.11.3.	Sums containing $C_{m \pm pk}^{\lambda \pm nk}(z)$ . . . . .	365
5.11.4.	Sums containing $C_{m \pm pk}^{\lambda \pm nk}(z)$ and special functions . . . . .	373
5.11.5.	Sums containing products of $C_{m \pm pk}^{\lambda \pm nk}(z)$ . . . . .	378
5.11.6.	Sums containing $C_{mk+n}^{\lambda k+\mu}(\varphi(k, z))$ . . . . .	381
5.11.7.	Sums containing $C_{mk+n}^{\lambda k+\mu}(\varphi(k, z))$ and special functions . . . . .	388
5.11.8.	Sums containing products of $C_{mk+n}^{\lambda k+\mu}(\varphi(k, z))$ . . . . .	390
<b>5.12.</b>	<b>The Jacobi Polynomials <math>P_n^{(\rho, \sigma)}(z)</math></b> . . . . .	<b>391</b>
5.12.1.	Sums containing $P_m^{(\rho \pm pk, \sigma \pm qk)}(z)$ . . . . .	391
5.12.2.	Sums containing $P_{m \pm nk}^{(\rho \pm pk, \sigma \pm qk)}(z)$ . . . . .	392
5.12.3.	Sums containing $P_{n \pm mk}^{(\rho \pm pk, \sigma \pm qk)}(z)$ and special functions . . . . .	402
5.12.4.	Sums containing products of $P_{m \pm nk}^{(\rho \pm pk, \sigma \pm qk)}(z)$ . . . . .	405
5.12.5.	Sums containing $P_{m \pm nk}^{(\rho \pm pk, \sigma \pm qk)}(\varphi(k, z))$ . . . . .	405
5.12.6.	Sums containing $P_{n \pm mk}^{(\rho \pm pk, \sigma \pm qk)}(\varphi(k, z))$ and special functions . . . . .	408

<b>8.1. The Hypergeometric Functions</b> . . . . .	563
8.1.1. The Gauss hypergeometric function ${}_2F_1(a, b; c; z)$ . . . . .	563
8.1.2. The hypergeometric function ${}_3F_2(a_1, a_2, a_3; b_1, b_2; z)$ . . . . .	589
8.1.3. The hypergeometric function ${}_4F_3(a_1, a_2, a_3, a_4; b_1, b_2, b_3; z)$ . . . . .	601
8.1.4. The hypergeometric function ${}_5F_4((a_1, \dots, a_5); (b_1, \dots, b_4); z)$ . . . . .	612
8.1.5. The hypergeometric function ${}_6F_5(a_1, \dots, a_6; b_1, \dots, b_5; z)$ . . . . .	618
8.1.6. The hypergeometric function ${}_7F_6(a_1, \dots, a_7; b_1, \dots, b_6; z)$ . . . . .	619
8.1.7. The hypergeometric function ${}_8F_7(a_1, \dots, a_8; b_1, \dots, b_7; z)$ . . . . .	621
8.1.8. The hypergeometric function ${}_{10}F_9(a_1, \dots, a_{10}; b_1, \dots, b_9; z)$ . . . . .	621
8.1.9. The Kummer confluent hypergeometric function ${}_1F_1(a; b; z)$ . . . . .	622
8.1.10. The Tricomi confluent hypergeometric function $\Psi(a; b; z)$ . . . . .	623
8.1.11. The hypergeometric function ${}_1F_2(a_1; b_1, b_2; z)$ . . . . .	625
8.1.12. The hypergeometric function ${}_2F_2(a_1, a_2; b_1, b_2; z)$ . . . . .	629
8.1.13. The hypergeometric function ${}_2F_3(a_1, a_2; b_1, b_2, b_3; z)$ . . . . .	629
8.1.14. The hypergeometric function ${}_3F_0(a_1, a_2, a_3; z)$ . . . . .	631
8.1.15. The hypergeometric function ${}_5F_0(a_1, a_2, \dots, a_5; z)$ . . . . .	631
8.1.16. The hypergeometric function ${}_4F_1(a_1, \dots, a_4; b_1; z)$ . . . . .	631

8.1.17. The hypergeometric function ${}_6F_1(a_1, \dots, a_6; b_1; z)$ . . . . .	632
8.1.18. The hypergeometric function ${}_8F_3(a_1, \dots, a_8; b_1, b_2, b_3; z)$ . . . . .	632
8.1.19. The hypergeometric function ${}_0F_3(b_1, b_2, b_3; z)$ . . . . .	633
8.1.20. The hypergeometric function ${}_0F_7(b_1, \dots, b_7; z)$ . . . . .	634
8.1.21. The hypergeometric function ${}_2F_5(a_1, a_2; b_1, \dots, b_5; z)$ . . . . .	635
8.1.22. The hypergeometric function ${}_4F_7(a_1, \dots, a_4; b_1, \dots, b_7; z)$ . . . . .	636
8.1.23. The generalized hypergeometric function ${}_pF_q((a_p); (b_q); z)$ . . . . .	637
<b>8.2. The Meijer Function <math>G_{p,q}^{m,n} \left( z \left  \begin{matrix} (a_p) \\ (b_q) \end{matrix} \right. \right)</math></b> . . . . .	<b>638</b>
8.2.1. General formulas . . . . .	638
8.2.2. Various Meijer G functions . . . . .	639
<b>8.3. Representation in Terms of Hypergeometric Functions</b> . . . .	<b>652</b>
8.3.1. Elementary functions. . . . .	652
8.3.2. Special functions. . . . .	655
