ONE SOCIAL PSYCHOLOGY: WHAT, WHY, AND HOW / 1

DEFINING SOCIAL PSYCHOLOGY / 6
THE HISTORY OF SOCIAL PSYCHOLOGY / 9

METHODS OF SOCIAL PSYCHOLOGY / 15

The Case History / 17 The Survey / 18 The Experiment / 20

THE ADVANTAGES OF EXPERIMENTS / 27

ISSUES OF CONCERN IN EXPERIMENTATION / 28

THE PSYCHOLOGY OF THE SUBJECT AND EXPERIMENTER / 30

THE FIELD EXPERIMENT / 34

Choosing a Method / 36

BEYOND REASONABLE DOUBT: STATISTICAL SIGNIFICANCE / 37

QUESTIONS OF ETHICS / 38

TWO SOCIAL COGNITION / 45

SOCIAL COGNITION: MAKING SENSE OF PEOPLE / 50 MAKING ATTRIBUTIONS: UNDERSTANDING WHY / 51

The Theory of Correspondent Inferences / 51 Kelley's Model of Causal Attribution / 56 Attributions for Success and Failure / 59

MAKING BIASED ATTRIBUTIONS:

MISUNDERSTANDING WHY / 62

The Correspondence Bias / 63 The Saliency Bias / 65 Defensive Attribution / 67

THE IMPACT OF SCHEMATA: USING WHAT WE KNOW / 69
Schemata about Individuals / 70 Schemata about Groups / 73

PERSON MEMORY AND SOCIAL INFERENCE / 75

Person Memory: Recalling Social Behavior / 75 Social Inference: Making Judgments about People / 78

ORDER EFFECTS IN PERSON PERCEPTION: "THE FIRST TIME EVER I SAW YOUR FACE" / 83

Primacy Effects: The Importance of First Impressions / 83 Primacy in Success and Failure / 86 Other Explanations of Primacy / 87 Some Evidence for Recency / 88

SOME CONSEQUENCES OF FORMING IMPRESSIONS: THE SELF-FULFILLING PROPHECY / 89

THREE SELF-PERCEPTION / 97

SELF-PERCEPTION / 101

SOCIAL INTERACTION AND SELF-CONCEPTION / 101

Reflected Appraisal / 101 Social Comparison / 103 Role Internalization: The Case of Gender Expectations / 108

SELF-ATTRIBUTION / 112

Self-Perception Theory / 114 Overjustification: Killing a Good Thing / 117 The Attribution of Emotions / 119 Attributions for Outcomes and Feelings of Control / 124 Attributions to Self and Others: The Actor-Observer Bias / 129

APPLYING SELF-ATTRIBUTION: MISATTRIBUTION THERAPY / 131

BIASES IN SELF-PERCEPTION: THE TOTALITARIAN EGO / 136
Egocentricity: Self as the Focus of Knowledge and Attribution / 137
Beneffectance: The Self-Serving Bias / 138 Cognitive Conservatism:
Resisting Changes in Thinking / 141

SELF-SCHEMATA: KNOWLEDGE ABOUT OURSELVES / 143

FOUR THE SELF IN SOCIAL INTERACTION / 149

THE SELF AND INTERPERSONAL BEHAVIOR / 153
THE PRESENTATION OF SELF IN EVERYDAY LIFE / 153

Goffman's Dramaturgical Approach / 153 Audience Pleasing, Self-Construction, and Situated Identities / 155 Self-Presentation and the Self-Concept / 156

POWER AND INGRATIATION / 157

Impression Management Theory / 157 Strategic Self-Presentation Theory / 157

THE PSYCHOLOGY OF SELF-HANDICAPPING / 166 Self-Handicapping: Discounting Failure / 166 Individual

Differences in Self-Handicapping / 167

SELF-AWARENESS / 168

Self-Awareness and Comparing to Standards / 167 Escaping from

Self-Awareness / 170 Matching to Standards / 171 A Self-Attention Perspective on Group Behavior / 172 The Effects of

Public Self-Consciousness / 173

SELF-MONITORING / 175

NONVERBAL COMMUNICATION / 177 Some Elements of Nonverbal Communication / 178 Deception and

Detection / 181 Gender Differences in Nonverbal

Communication / 183

CLASSIFICATIONS OF INTERPERSONAL BEHAVIORS

AND STYLES / 185

FIVE ATTITUDE AND ATTITUDE CHANGE / 195

DEFINING THE ATTITUDE / 199

SELF-DISCLOSURE / 188

MEASURING ATTITUDES / 200

Helping the Pencil: The Bogus Pipeline / 200 Physiological Recordings / 202

GROWING UP WITH ATTITUDES / 203

The Parents: Getting There First with the Most / 204 Expanding

Horizons: The Influence of Reference Groups / 207 The Influence

of Reference Groups on Sex, Childbearing, and Drugs / 210 FORMING ATTITUDES BY BALANCE / 212

THE CONDITIONING OF ATTITUDES / 215 Operant or Instrumental Conditioning / 215 Attitudes by

Association: Classical Conditioning / 216

PERSUASION: THE PSYCHOLOGY OF ATTITUDE

CHANGE / 219 AN OVERARCHING VIEW: THE E.L.M. / 220

THE COMMUNICATOR: ATTITUDE CHANGE BY THE PERIPHERAL ROUTE / 222

Credibility / 223 "I'm Not a Doctor, But I Play One on TV:

Incredible Credibility / 223 Credibility over Time: The Sleeper Effect / 224

THE COMMUNICATION: FACTORS AFFECTING CENTRAL AND

Creating an Image: Appeals to Emotions / 232 Feeling Good / 234 Feeling Bad: The Arousal of Fear / 235 Central Processing:

Organizing the Communication / 237 Television, Radio, and Print: The Effect of Mode of Communication / 243 "For Reasons of

National Security . . . ": Censorship / 246

PERIPHERAL PERSUASION / 231

"TO WHOM? . . . ": CHARACTERISTICS OF THE TARGET / 247

The Attitudes of the Audience / 247 Wets and Drys in Oklahoma: Assimilation and Contrast of Attitudes / 247 Discrepancy from the

Opinion of the Audience / 249 Committing the Audience: Making It Public / 251 Taking Action: The Foot-in-the-Door / 251 The

Door-in-the-Face / 253 The Low Ball / 255 The Sneak Attack:

Resistance Due to Forewarning / 256 The Medical Model: Resistance Due to Inoculation / 256

THE FUTURE OF ATTITUDE RESEARCH: WHERE WE ARE GOING / 259

SIX ACTION AND ATTITUDES / 265

ON THE CONSISTENCY OF ATTITUDES AND BEHAVIORS / 269

Three Generations of Questions: Is, When, and How / 271 The Third Generation: Asking How / 277

BEHAVIOR LEADS TO ATTITUDES / 279 THE THEORY OF COGNITIVE DISSONANCE / 280

Cognitive Irrelevance / 280 Consonance / 280 Dissonance / 280 Inside the Head / 281 The Magnitude of Dissonance / 281 Reducing the Tension / 282 Paradigms Used in Studying the Effects

of Dissonant Cognitions / 283 The Arousal Properties of Dissonance / 309

SOME IMPLICATIONS OF DISSONANCE AND AROUSAL: ON THE EFFECT OF ALCOHOL AND OTHER AGENTS / 312 Revisions and Alternatives to Dissonance / 315 Conclusions:

Dissonance Theory / 317 PSYCHOLOGICAL REACTANCE / 317

An Individual Difference Variable: Coronary-Prone Behavior / 322

SEVEN INTERPERSONAL ATTRACTION / 327

ATTRACTION: A WORKING DEFINITION / 330

A COGNITIVE VIEW: BETTER TO BE BALANCED / 331

A REWARD MODEL OF ATTRACTION / 333 Loving That Pleasant Feeling / 333 The Exchange of Rewards:

A Concern with Equity / 335 Long-Term Relationships / 335

SIMILARITY AND ATTRACTION: I'LL LIKE YOU IF YOU'RE LIKE ME / 339

The Basic Paradigm / 339 The Importance of Similarity / 340 The Generality of Similarity: Similar on What? / 340 Setting the Limits of Similarity and Attraction / 341

THE RECIPROCATION OF LIKING: I'LL BE LIKE YOU IF YOU LIKE ME / 344

Ingratiation: A Special Case / 345

Explaining the Effect of Propinquity: Rewards, Expectations, and

The Role of Self-Monitoring / 359

INSULTING AND CLUMSY / 362

BREAKING UP: IS IT HARD TO DO? / 380

WHEN RELATIONSHIPS GO SOUR: REACTING TO

THE MEANING OF ALTRUISTIC BEHAVIOR / 394

IN WHAT SITUATIONS DO PEOPLE HELP? / 412

Familiarity / 350

ON LOVE / 368

EIGHT

Relationship / 376 LONELINESS / 378

DISSATISFACTION / 381

RESPONSIBILITY / 398

A FAMILY QUARREL? / 400

WHY DO PEOPLE HELP? / 409 WHOM DO PEOPLE HELP? / 411

Those We Like / 411

PROPINQUITY BREEDS ATTRACTION—SOMETIMES / 348

PHYSICAL ATTRACTIVENESS AND LIKING / 354

The Jury Is Out / 355 Why Does Physical Attractiveness Lead to Liking? / 357 For Whom Is Physical Attractiveness Most Important?

To Insult Is Divine / 362 Clumsiness Is Attractive: The Pratfall / 365

HOW TO WIN FRIENDS AND INFLUENCE PEOPLE BY BEING

The Feeling of Love / 370 The Nature of Love and Long-Term Relationships / 372 Romeo and Juliet: Alive, Well, and Temporary / 375 The Rise and Fall of Love: Stages of a Love

JEALOUSY: REACTING TO THREAT TO A RELATIONSHIP / 383

PSYCHOLOGY OF ALTRUISM AND AGGRESSION / 387

BYSTANDER INTERVENTION AND THE DECISION TREE / 394 WHY DOESN'T THE BYSTANDER INTERVENE? DIFFUSING

WHY DON'T PEOPLE HELP? AN ANALYSIS OF THE COSTS / 402 Testing the Costs Model / 403 Expanding the Costs Model / 407

When We Are Rewarded / 412 When We Feel Good / 412 When Someone Else Does / 415 When Time Permits / 415 When Making the Attribution of Altruism / 418 When Norms Direct Us To / 419

PROSOCIAL AND ANTISOCIAL BEHAVIOR: THE

INTERPRETING THE SITUATION: A NEED FOR HELP OR

REACTIONS OF THE RECIPIENTS: DO THEY ALWAYS LOVE THE HELPER? / 419

Equity Theory: Is It as Equal to Give as to Receive? / 421 Social Exchange Theories: Helping Is Power / 421 Recipients' Reactions:

A Postscript / 421

ANTISOCIAL BEHAVIOR: AGGRESSION / 422

WHAT IS AGGRESSION? / 422

INSTINCT THEORIES: AGGRESSION FROM WITHIN / 424

Biological Theories of Aggression / 426

FRUSTRATION-AGGRESSION THEORY / 427 Frustration / 427 Aggression / 427

THEORY OF AGGRESSION CUES / 431

EROTICA, VIOLENT PORNOGRAPHY, AND GENERAL AROUSAL / 433

Reducing Violence by Misattribution / 435 Drugs and

Aggression / 437 UNDERSTANDING ACTUAL AGGRESSION / 438

SOCIAL LEARNING THEORY / 439

Learning to Aggress: Reinforcement / 439 Modeling / 440 Performing Aggression / 441 Reducing Aggression / 442

VIOLENT TELEVISION AND AGGRESSION / 443 WHAT CAN WE CONCLUDE? / 448

PREJUDICE AND DISCRIMINATION: WHAT AND WHY? / 449 Displaced Aggression / 450 Perceived Threat / 452 Personality / 452 Group Categorization / 454 Sociocultural Learning / 456

THE CONSEQUENCES OF PREJUDICE / 458

NINE INTERPERSONAL AND INTERGROUP CONFLICT / 465

DEFINING CONFLICT / 470

TYPES OF INTERPERSONAL CONFLICT / 471

Prisoner's Dilemma / 471 Social Traps / 473

THE ESCALATING PATH OF CONFLICT / 476 THE USE OF THREAT / 478

THE CONCERN WITH APPEARANCE: SAVING FACE / 482 CONFLICT IN THE EYE OF THE BEHOLDER: PERCEPTIONS

OF THE OTHER / 485

TRUST AND DISTRUST / 488 COMMUNICATION / 491

RESOLVING CONFLICT / 493

Correctly Perceiving the Conflict / 494 Reducing Conflict by

```
Reducing Threat / 495 Negotiation and Bargaining / 496 The Pattern of Concessions / 498 Using Time as an Ally / 499
```

DEPERSONALIZING CONFLICT: THE USE OF NORMS / 499
THE IMPORTANCE OF PROCEDURE / 502

THE OTHER SIDE OF THE COIN: THE VALUE OF CONFLICT / 513

A Situational Approach to Leadership / 538 Interactionist

DEVIATION AND RESISTANCE TO SOCIAL INFLUENCE / 569

WITH A LITTLE HELP FROM FRIENDS: COALITION FORMATION / 505

SOME SPECIAL CONSIDERATIONS OF INTERGROUP

CONFLICT / 506

The Basis for Intergroup Conflict / 507

THE RESOLUTION OF INTERGROUP CONFLICT / 509 Contact / 510 Helping / 511 Cooperation and Interdependence / 512

TEN SOCIAL INFLUENCE / 519

TEN SOCIAL INFLOENCE / 5.

THE SCOPE OF SOCIAL INFLUENCE / 523

RESPONSES TO SOCIAL INFLUENCE / 523 SOCIAL POWER / 524

Types of Power and Their Use / 524 Sex Differences in the Use of Power / 529

LEADERSHIP / 531

Leadership Behavior / 531 What Makes a Leader? / 533 The "Great Person" Theory of Leadership / 534 The Zeitgeist Theory:

Theories / 541 The Effective Leader / 541 Democratic versus Autocratic Styles of Leadership / 541 The Contingency Theory of Leadership / 544

OBEDIENCE / 547

CONFORMITY / 553
Why Conform? / 553 Studying Conformity: The Conformity
Paradigm / 556 The Asch Paradigm / 557 Factors Affecting

Paradigm / 556 The Asch Paradigm / 557 Factors Affecting Conformity / 560 SOCIAL IMPACT THEORY / 567

_

ELEVEN GROUP DYNAMICS / 577

WHAT IS A GROUP? / 581
THE STRUCTURE OF GROUPS / 583
Norms / 584 Roles / 586
GROUP PRODUCTIVITY / 588

TASK TYPE AND PERFORMANCE / 591

Disjunctive Tasks / 592 Conjunctive Tasks / 592 Additive Tasks / 593 Discretionary Tasks / 593

GROUP CHARACTERISTICS AND PRODUCTIVITY / 594

Group Size / 595 Cohesiveness / 596 Communication and Communication Networks / 598

GROUP DECISION MAKING / 600

Groupthink / 601 Decisions of Juries / 604 Minority Influence on

Decisions / 606

THE GROUP'S EFFECT ON THE INDIVIDUAL / 608 The Influence of Groups on Self-Identity / 608 The Influence of Groups on Perceptions and Evaluations / 610

THE INFLUENCE OF THE GROUP ON PRODUCT

EVALUATION / 614

GROUP INFLUENCE ON INDIVIDUAL PERFORMANCE / 615 Social Facilitation / 615 Social Loafing / 619

THE INFLUENCE OF GROUPS ON INDIVIDUAL DECISIONS / 622 GROUP POLARIZATION / 624 DEINDIVIDUATION: GETTING LOST IN THE GROUP / 628

TWELVE THE ENVIRONMENT / 637

ENVIRONMENTAL PSYCHOLOGY: WHAT IS IT AND WHY STUDY IT? / 641

PEOPLE AND THEIR ENVIRONMENT: A HISTORICAL PERSPECTIVE / 642

STUDYING THE ENVIRONMENT: SOME UNIFYING CONCEPTS / 645

SPATIAL FEATURES OF THE ENVIRONMENT / 648 Personal Space / 648 Factors Affecting Personal Space / 652

Reactions to Invasions of Personal Space / 655

WHY PERSONAL SPACE? / 657 TERRITORIALITY / 660

Types of Territory / 660 The Functions of Territory / 663 Establishing and Protecting Territory / 667

DENSITY AND CROWDING / 670

Density and Behavior / 671 Crowding / 673 Summing It Up / 678

NONSPATIAL ENVIRONMENTAL VARIABLES / 678

Noise / 678 Weather: Focus on Heat / 684

ARCHITECTURE AND DESIGN / 687

Rooms / 688 Offices / 689

BUILDINGS AND INSTITUTIONS / 691

Designing Space for the Mentally Retarded / 693 Designing the Dormitory / 695

THE CITY / 696

PERCEIVING OUR ENVIRONMENT / 699

GLOSSARY / 707

REFERENCES / 719

AUTHOR INDEX / i

SUBJECT INDEX / xiii

LIST OF FIGURES

1-1	Social psychology and its relatives	10
2-1	Comparison of statements describing and later	
	attributed to groups in Hamilton & Clifford's study	
	of stereotyping	81
2-2	Gains in total IQ for children in first and second grades	90
3-1	Conditions of Schachter and Singer experiment	121
3-2	Sample items from an early version of Rotter's test of	
	internal-external locus of control	125
3-3	Testing the perceptual explanation for the actor-	
	observer effect	132
3-4	Reported speed of falling asleep as a function of	
	misattribution to a pill	134
4-1	The controllability-leakage continuum	182
4-2	Leary Interpersonal Behavior Classification System	186
5-1	Major facial muscles and recording sites for electrode	-04
	placement	204
5-2	Stimulus figures used in study of preexisting categories	206
5-3	Balanced and imbalanced triadic relationships	213
5-4	Balance theory representation of Bennington students'	
	attitudes toward Franklin Roosevelt	214
5–5	The classical conditioning paradigm	218
5-6	Immediate and long-term effects of communicators	
	with low and high credibility	224
5–7	Immediate and delayed attitude change with and with-	
	out reinstatement of the communicator's credibility	226
5-8	Interactive effect of involvement and source expertise	
_	on postcommunication attitudes	228
5-9	A balance theory look at a person's (P) attitude toward	
	Pepsi-Cola	232
5-10	Effects of eating while reading on the persuasiveness	
	of various messages	235
5–11	Inverted-U relationship between fear and opinion	
	change	238

5-12	2 Opinion change as a function of credibility and the	
-	extent of discrepancy (theoretical and observed	
	curves)	250
5-13	3 The proportion of subjects agreeing to a second request	
	as a function of the time delay and the size of the	
	initial request	254
5-14	1 1 "	
	persuasion process that underlies the chapter's	
	analysis of the directive aspects of attitude change	260
6-1	A diagram of the Theory of Reasoned Action	278
6–2	Attitude change following induced compliance	286
6–3	Mean attitudes toward police actions	287
6-4	Changes of attitudes toward speaker ban as a function	
	of choice and incentive	291
6–5	Mean ratings of enjoyableness	294
6-6	The effort justification sequence	298
6-7	The degree of confidence in winning before and after	
	placing bet	306
6–8	Attitude change following induced compliance as a	
	function of choice and alleged pill side effects	311
6-9	Postattitudes by condition and drinking habits	314
7–1	Balance theory representation of relationships in	
	Shakespeare's Romeo and Juliet	332
7–2	Mean rating scale attraction scores in Dickoff study	347
7–3	Relationship between functional distance and liking	349
7-4	Four conditions of Aronson and Linder's study of the	
	sequence of evaluative comments	364
7–5	Selected examples of love-scale and liking-scale items	369
7–6	Love and friendship	374
7–7	Close friends and lovers compared	376-77
8–1	Decision tree analysis of intervention in an emergency	396
8–2	Correcting a stranger as a function of threat	405
8-3	Percentages of subjects helping in the experimental	
	conditions	408
8-4	Results of Batson et al.'s (1983) study comparing	
	empathic versus distressed feelings and ease of	
	victim's escape on the probability of giving help	411
8–5	The frequency and type of helping after being	
	positively or negatively reinforced	413
8-6	Mean shock intensity as a function of sex of victim,	
	film, and anger	435
8-7	Mean shock intensity as a function of noise and anger	436
8-8	Mean change scores for interpersonal aggression	446

8-9	General aggression index	448
9-1	Road map in the trucking game	479
10-1	The elements of leadership	542
10-2	The effect of different leadership styles on	
	aggressiveness in a group	543
10-3	The effect of the proximity of the "victim" on the	
	average shock delivered	551
10-4	The convergence of judgments of the autokinetic	
	movement in two groups	557
10-5	Stimulus material used by Asch in early conformity	
	research	559
10-6	Examples of difficult (a) and easy (b) line-judging	
	tasks	561
10-7	Errors made by critical subjects to conform with	
	unanimous majorities of different size	562
11–1	Four types of communication networks	600
11–2	Sound pressure as a function of size of pseudogroup	
	and identifiability: Experiment 2	621
12–1	A three-dimensional view of the shape of personal	
	space	653
12–2	Mean interaction distances of male and female dyads	
	at six grade levels	654
12–3	The relation between eye contact and distances for	
	different combinations of confederates and	
	subjects	659
12-4	The appearance of a home can influence its chances	
	of being burglarized (nonburglarized; burglarized)	668
12–5	Systolic and diastolic blood pressure as a function of	
	school noise level and duration of exposure for	
10 (cross-sectional third grade replication study	680
12-6	Percentages of subjects offering help as a function of	(01
10 17	noise level and need of victim	681
12–7	Mean intensity of shock delivered by subjects as a	40 0
40.0	function of noise condition and anger arousal	682
12-8	Aggressive crime ratio as a function of maximum	605
10.0	ambient temperatures	685
12-9	Theoretical relationship between negative affect and	(0)
12-10	aggression	686
12-10	Overview of major quantitative results from the	CO4
10 11	institutional design study	694
12–11	Floor plan of (a) a corridor-style dormitory and (b) a	606
12-12	suite-style dormitory	696 700
14-14	A hierarchy of environmental spaces	700

LIST OF TABLES

1-1	Reactions of people to various social situations	9
1-2	Relationship of fear to the affiliative tendency	27
2-1	Summary of conditions in experiment on behavior and	
	role conformity	55
2-2	Classification scheme for the perceived determinants of	
	achievement behavior	61
2-3	Attribution of attitudes to speech writer	64
4-1	Private self-consciousness and public self-consciousness	173
4-2	Sample items measuring self-monitoring	176
4-3	Bales's twenty-seven types	187
4-4	Sample items from Jourard's Self-Disclosure	
	Questionnaire	190
5-1	Means of conditioned attitude scores in "neutral	
	stimulus" rating	219
5-2	Effect of illustrated talk on conformity to dental hygiene	
	recommendations	236
5–3	Conditions and findings of study on primacy and	
	recency effects	243
5-4	Opinion change as a function of mode of presentation	
	and message difficulty	246
5–5	Beliefs after both immunization and exposure to strong	
	counterarguments	259
6-1	Proportions of participants volunteering for extra	
	sessions: Investigation 2	274
6–2	Correlations between selected attitudinal variables and	
	behavior	275
6-3	Changes in the evaluations of the target person	293
6-4	Mean attitudes toward increasing the size of the freshman	
	class	296
6-5	Means of the sum of ratings for the different experimental	
	conditions	298
6-6	Weight changes in weight control experiment	201
	(in pounds)	301
		xxiii

the attractiveness of items 7-1 Subjects' ratings of the general quality of the essay in each experimental condition 7-2 Mean sentence assigned, in years (n = 20 per cell) 7-3 Reasons for choosing a dating partner: Investigation 1 7-4 Mean liking of the confederate in each condition 7-5 Mean attraction scores of the interviewee 7-6 Average love and liking scores for dating partners and same-sex friends 7-7 The development of closeness in relationships 8-1 Effect of group sizes on the likelihood and the speed of response 7-7 The frequency of believing that the fight was real in study 8-2 The frequency of believing that the fight was real in study 8-3 Predicted model responses of moderately aroused observer as a joint function of costs of direct help and costs of no help to victim 8-4 Mean ratings of both white and black actors' behaviors by both white and black subjects 9-1 A zero-sum, or pure conflict situation 9-2 Matrix representation of the prisoner's dilemma 473 9-3 Payoffs in the Deutsch and Krauss trucking game 480 9-4 The prisoner's dilemma game used in the study of competitive and cooperative individuals 9-5 Expectations of the players 9-6 Percentage of cooperative responses 9-7 Mean joint payoffs (Acme plus Bolt) per trial in modified trucking game 9-8 Mean final price for automobile 10-1 Percentage attributing each basis of power to the spouse as a function of the domain of power 10-2 Mean conformity 10-2 Mean conformity 10-2 Mean conformity 10-2 Representation of the deindividuation process 629 11-2 Representation of the deindividuation process 629 12-1 Mean speed for the removal of litter 630 10-2 Effective temperature (°F) at 0 percent humidity as a function of actual temperature and humidity 681 10-1 Effective temperature (°F) at 0 percent humidity 10-1 Effective temperature (°F) at 0 percent humidity	6-7	The reduction of postdecision dissonance by changing	204
each experimental condition 7-2 Mean sentence assigned, in years (n = 20 per cell) 7-3 Reasons for choosing a dating partner: Investigation 1 7-4 Mean liking of the confederate in each condition 365 7-5 Mean attraction scores of the interviewee 367 7-6 Average love and liking scores for dating partners and same-sex friends 7-7 The development of closeness in relationships 8-1 Effect of group sizes on the likelihood and the speed of response 8-2 The frequency of believing that the fight was real in study 8-3 Predicted model responses of moderately aroused observer as a joint function of costs of direct help and costs of no help to victim 8-4 Mean ratings of both white and black actors' behaviors by both white and black subjects 9-1 A zero-sum, or pure conflict situation 403 8-3 Payoffs in the Deutsch and Krauss trucking game 404 The prisoner's dilemma game used in the study of competitive and cooperative individuals 9-4 The prisoner's dilemma game used in the study of competitive and cooperative individuals 9-5 Expectations of the players 9-6 Percentage of cooperative responses 9-7 Mean joint payoffs (Acme plus Bolt) per trial in modified trucking game 9-8 Mean final price for automobile 10-1 Percentage attributing each basis of power to the spouse as a function of the domain of power 500 10-2 Mean conformity 504 10-1 Representation of the deindividuation process 10-2 Mean conformity 505 10-2 Mean conformity 506 10-1 Mean speed for the removal of litter 607 10-2 Effectiveness of markers in protecting territory 608 10-3 Mean ratings of crowding 10-4 Effective temperature (°F) at 0 percent humidity as a function of actual temperature and humidity		· ·	304
7-2 Mean sentence assigned, in years (n = 20 per cell) 358 7-3 Reasons for choosing a dating partner: Investigation 1 362 7-4 Mean liking of the confederate in each condition 365 7-5 Mean attraction scores of the interviewee 367 7-6 Average love and liking scores for dating partners and same-sex friends 369 7-7 The development of closeness in relationships 378 8-1 Effect of group sizes on the likelihood and the speed of response 400 8-2 The frequency of believing that the fight was real in study 8-3 Predicted model responses of moderately aroused observer as a joint function of costs of direct help and costs of no help to victim 403 8-4 Mean ratings of both white and black actors' behaviors by both white and black subjects 9-1 A zero-sum, or pure conflict situation 9-2 Matrix representation of the prisoner's dilemma 473 9-3 Payoffs in the Deutsch and Krauss trucking game 480 9-4 The prisoner's dilemma game used in the study of competitive and cooperative individuals 487 9-5 Expectations of the players 9-6 Percentage of cooperative responses 9-7 Mean joint payoffs (Acme plus Bolt) per trial in modified trucking game 9-8 Mean final price for automobile 10-1 Percentage attributing each basis of power to the spouse as a function of the domain of power 10-2 Mean conformity 10-2 Mean conformity 10-2 Mean conformity 10-2 Mean speed for the removal of litter 10-3 Mean speed for the removal of litter 10-4 Effective temperature (°F) at 0 percent humidity as a function of actual temperature and humidity 12-4 Effective temperature and humidity	7-1		254
7-3 Reasons for choosing a dating partner: Investigation 1 7-4 Mean liking of the confederate in each condition 7-5 Mean attraction scores of the interviewee 7-6 Average love and liking scores for dating partners and same-sex friends 7-7 The development of closeness in relationships 8-1 Effect of group sizes on the likelihood and the speed of response 8-2 The frequency of believing that the fight was real in study 8-3 Predicted model responses of moderately aroused observer as a joint function of costs of direct help and costs of no help to victim 8-4 Mean ratings of both white and black actors' behaviors by both white and black subjects 9-1 A zero-sum, or pure conflict situation 9-2 Matrix representation of the prisoner's dilemma 9-3 Payoffs in the Deutsch and Krauss trucking game 9-4 The prisoner's dilemma game used in the study of competitive and cooperative individuals 9-5 Expectations of the players 9-6 Percentage of cooperative responses 9-7 Mean joint payoffs (Acme plus Bolt) per trial in modified trucking game 9-8 Mean final price for automobile 10-1 Percentage attributing each basis of power to the spouse as a function of the domain of power 10-2 Mean conformity 10-2 Mean conformity 10-3 Mean speed for the removal of litter 10-4 Representation of the deindividuation process 11-2 Representation of the removal of litter 12-3 Mean ratings of crowding 12-4 Effective temperature (°F) at 0 percent humidity as a function of actual temperature and humidity 12-4 Effective temperature and humidity			
7-4 Mean liking of the confederate in each condition 7-5 Mean attraction scores of the interviewee 7-6 Average love and liking scores for dating partners and same-sex friends 7-7 The development of closeness in relationships 8-1 Effect of group sizes on the likelihood and the speed of response 8-2 The frequency of believing that the fight was real in study 8-3 Predicted model responses of moderately aroused observer as a joint function of costs of direct help and costs of no help to victim 8-4 Mean ratings of both white and black actors' behaviors by both white and black subjects 9-1 A zero-sum, or pure conflict situation 9-2 Matrix representation of the prisoner's dilemma 9-3 Payoffs in the Deutsch and Krauss trucking game 9-4 The prisoner's dilemma game used in the study of competitive and cooperative individuals 9-5 Expectations of the players 9-6 Percentage of cooperative responses 9-7 Mean joint payoffs (Acme plus Bolt) per trial in modified trucking game 9-8 Mean final price for automobile 10-1 Percentage attributing each basis of power to the spouse as a function of the domain of power 10-2 Mean conformity 10-2 Mean conformity 10-3 Mean speed for the removal of litter 10-4 Mean speed for the removal of litter 10-5 Effective temperature (°F) at 0 percent humidity as function of actual temperature and humidity			
7-5 Mean attraction scores of the interviewee 367 7-6 Average love and liking scores for dating partners and same-sex friends 369 7-7 The development of closeness in relationships 378 8-1 Effect of group sizes on the likelihood and the speed of response 400 8-2 The frequency of believing that the fight was real in study 402 8-3 Predicted model responses of moderately aroused observer as a joint function of costs of direct help and costs of no help to victim 403 8-4 Mean ratings of both white and black actors' behaviors by both white and black subjects 459 9-1 A zero-sum, or pure conflict situation 471 9-2 Matrix representation of the prisoner's dilemma 473 9-3 Payoffs in the Deutsch and Krauss trucking game 480 9-4 The prisoner's dilemma game used in the study of competitive and cooperative individuals 487 9-5 Expectations of the players 487 9-6 Percentage of cooperative responses 488 9-7 Mean joint payoffs (Acme plus Bolt) per trial in modified trucking game 493 9-8 Mean final price for automobile 498 10-1 Percentage attributing each basis of power to the spouse as a function of the domain of power 530 10-2 Mean conformity 564 11-1 Other choice dilemmas 625 11-2 Representation of the deindividuation process 629 12-1 Mean speed for the removal of litter 663 12-2 Effectiveness of markers in protecting territory 668 12-3 Mean ratings of crowding 676 12-4 Effective temperature (°F) at 0 percent humidity as a function of actual temperature and humidity 688			
7-6 Average love and liking scores for dating partners and same-sex friends 7-7 The development of closeness in relationships 8-1 Effect of group sizes on the likelihood and the speed of response 8-2 The frequency of believing that the fight was real in study 8-3 Predicted model responses of moderately aroused observer as a joint function of costs of direct help and costs of no help to victim 8-4 Mean ratings of both white and black actors' behaviors by both white and black subjects 9-1 A zero-sum, or pure conflict situation 9-2 Matrix representation of the prisoner's dilemma 9-3 Payoffs in the Deutsch and Krauss trucking game 9-4 The prisoner's dilemma game used in the study of competitive and cooperative individuals 9-5 Expectations of the players 9-6 Percentage of cooperative responses 9-7 Mean joint payoffs (Acme plus Bolt) per trial in modified trucking game 9-8 Mean final price for automobile 10-1 Percentage attributing each basis of power to the spouse as a function of the domain of power 10-2 Mean conformity 10-2 Mean conformity 11-1 Other choice dilemmas 10-2 Effective ness of markers in protecting territory 10-3 Mean speed for the removal of litter 11-4 Effective temperature (°F) at 0 percent humidity as a function of actual temperature and humidity 10-1 Effective temperature (°F) at 0 percent humidity as a function of actual temperature and humidity			
same-sex friends 369 7-7 The development of closeness in relationships 378 8-1 Effect of group sizes on the likelihood and the speed of response 400 8-2 The frequency of believing that the fight was real in study 402 8-3 Predicted model responses of moderately aroused observer as a joint function of costs of direct help and costs of no help to victim 403 8-4 Mean ratings of both white and black actors' behaviors by both white and black subjects 459 9-1 A zero-sum, or pure conflict situation 471 9-2 Matrix representation of the prisoner's dilemma 473 9-3 Payoffs in the Deutsch and Krauss trucking game 480 9-4 The prisoner's dilemma game used in the study of competitive and cooperative individuals 487 9-5 Expectations of the players 487 9-6 Percentage of cooperative responses 488 9-7 Mean joint payoffs (Acme plus Bolt) per trial in modified trucking game 493 9-8 Mean final price for automobile 498 10-1 Percentage attributing each basis of power to the spouse as a function of the domain of power 530 10-2 Mean conformity 564 11-1 Other choice dilemmas 625 11-2 Representation of the deindividuation process 629 12-1 Mean speed for the removal of litter 663 12-2 Effectiveness of markers in protecting territory 668 12-3 Mean ratings of crowding 676 12-4 Effective temperature (°F) at 0 percent humidity as a function of actual temperature and humidity 688			307
7-7 The development of closeness in relationships 8-1 Effect of group sizes on the likelihood and the speed of response 8-2 The frequency of believing that the fight was real in study 8-3 Predicted model responses of moderately aroused observer as a joint function of costs of direct help and costs of no help to victim 8-4 Mean ratings of both white and black actors' behaviors by both white and black subjects 9-1 A zero-sum, or pure conflict situation 9-2 Matrix representation of the prisoner's dilemma 9-3 Payoffs in the Deutsch and Krauss trucking game 9-4 The prisoner's dilemma game used in the study of competitive and cooperative individuals 9-5 Expectations of the players 9-6 Percentage of cooperative responses 9-7 Mean joint payoffs (Acme plus Bolt) per trial in modified trucking game 9-8 Mean final price for automobile 10-1 Percentage attributing each basis of power to the spouse as a function of the domain of power 10-2 Mean conformity 10-2 Mean conformity 10-2 Mean speed for the removal of litter 11-1 Other choice dilemmas 12-2 Effectiveness of markers in protecting territory 12-3 Mean ratings of crowding 12-4 Effective temperature (°F) at 0 percent humidity as a function of actual temperature and humidity 10-1 Effective temperature (°F) at 0 percent humidity	7-6	0 0.	260
8-1 Effect of group sizes on the likelihood and the speed of response 400 8-2 The frequency of believing that the fight was real in study 402 8-3 Predicted model responses of moderately aroused observer as a joint function of costs of direct help and costs of no help to victim 403 8-4 Mean ratings of both white and black actors' behaviors by both white and black subjects 459 9-1 A zero-sum, or pure conflict situation 471 9-2 Matrix representation of the prisoner's dilemma 473 9-3 Payoffs in the Deutsch and Krauss trucking game 480 9-4 The prisoner's dilemma game used in the study of competitive and cooperative individuals 487 9-5 Expectations of the players 487 9-6 Percentage of cooperative responses 488 9-7 Mean joint payoffs (Acme plus Bolt) per trial in modified trucking game 493 9-8 Mean final price for automobile 498 10-1 Percentage attributing each basis of power to the spouse as a function of the domain of power 530 10-2 Mean conformity 564 11-1 Other choice dilemmas 625 11-2 Representation of the deindividuation process 629 12-1 Mean speed for the removal of litter 663 12-2 Effectiveness of markers in protecting territory 668 12-3 Mean ratings of crowding 676 12-4 Effective temperature (°F) at 0 percent humidity as a function of actual temperature and humidity 688	77		
response 400 8-2 The frequency of believing that the fight was real in study 402 8-3 Predicted model responses of moderately aroused observer as a joint function of costs of direct help and costs of no help to victim 403 8-4 Mean ratings of both white and black actors' behaviors by both white and black subjects 459 9-1 A zero-sum, or pure conflict situation 471 9-2 Matrix representation of the prisoner's dilemma 473 9-3 Payoffs in the Deutsch and Krauss trucking game 480 9-4 The prisoner's dilemma game used in the study of competitive and cooperative individuals 487 9-5 Expectations of the players 487 9-6 Percentage of cooperative responses 488 9-7 Mean joint payoffs (Acme plus Bolt) per trial in modified trucking game 493 9-8 Mean final price for automobile 498 10-1 Percentage attributing each basis of power to the spouse as a function of the domain of power 530 10-2 Mean conformity 564 11-1 Other choice dilemmas 625 11-2 Representation of the deindividuation process 629 12-1 Mean speed for the removal of litter 663 12-2 Effectiveness of markers in protecting territory 668 12-3 Mean ratings of crowding 676 12-4 Effective temperature (°F) at 0 percent humidity as a function of actual temperature and humidity 688			370
8-2 The frequency of believing that the fight was real in study 8-3 Predicted model responses of moderately aroused observer as a joint function of costs of direct help and costs of no help to victim 8-4 Mean ratings of both white and black actors' behaviors by both white and black subjects 9-1 A zero-sum, or pure conflict situation 9-2 Matrix representation of the prisoner's dilemma 9-3 Payoffs in the Deutsch and Krauss trucking game 9-4 The prisoner's dilemma game used in the study of competitive and cooperative individuals 9-5 Expectations of the players 9-6 Percentage of cooperative responses 9-7 Mean joint payoffs (Acme plus Bolt) per trial in modified trucking game 9-8 Mean final price for automobile 10-1 Percentage attributing each basis of power to the spouse as a function of the domain of power 10-2 Mean conformity 10-2 Mean conformity 504 11-1 Other choice dilemmas 12-2 Effectiveness of markers in protecting territory 668 12-3 Mean ratings of crowding 12-4 Effective temperature (°F) at 0 percent humidity 688	9-1		400
8-3 Predicted model responses of moderately aroused observer as a joint function of costs of direct help and costs of no help to victim 8-4 Mean ratings of both white and black actors' behaviors by both white and black subjects 9-1 A zero-sum, or pure conflict situation 9-2 Matrix representation of the prisoner's dilemma 9-3 Payoffs in the Deutsch and Krauss trucking game 9-4 The prisoner's dilemma game used in the study of competitive and cooperative individuals 9-5 Expectations of the players 9-6 Percentage of cooperative responses 9-7 Mean joint payoffs (Acme plus Bolt) per trial in modified trucking game 9-8 Mean final price for automobile 10-1 Percentage attributing each basis of power to the spouse as a function of the domain of power 10-2 Mean conformity 10-2 Mean conformity 564 11-1 Other choice dilemmas 10-2 Representation of the deindividuation process 12-1 Mean speed for the removal of litter 663 12-2 Effectiveness of markers in protecting territory 668 12-3 Mean ratings of crowding 676 12-4 Effective temperature (°F) at 0 percent humidity as a function of actual temperature and humidity	0 1		
observer as a joint function of costs of direct help and costs of no help to victim 8-4 Mean ratings of both white and black actors' behaviors by both white and black subjects 9-1 A zero-sum, or pure conflict situation 9-2 Matrix representation of the prisoner's dilemma 9-3 Payoffs in the Deutsch and Krauss trucking game 9-4 The prisoner's dilemma game used in the study of competitive and cooperative individuals 9-5 Expectations of the players 9-6 Percentage of cooperative responses 9-7 Mean joint payoffs (Acme plus Bolt) per trial in modified trucking game 9-8 Mean final price for automobile 10-1 Percentage attributing each basis of power to the spouse as a function of the domain of power 10-2 Mean conformity 10-2 Mean conformity 564 11-1 Other choice dilemmas 11-2 Representation of the deindividuation process 12-1 Mean speed for the removal of litter 663 12-2 Effectiveness of markers in protecting territory 668 12-3 Mean ratings of crowding 12-4 Effective temperature (°F) at 0 percent humidity as a function of actual temperature and humidity 688			402
costs of no help to victim 8-4 Mean ratings of both white and black actors' behaviors by both white and black subjects 9-1 A zero-sum, or pure conflict situation 9-2 Matrix representation of the prisoner's dilemma 9-3 Payoffs in the Deutsch and Krauss trucking game 9-4 The prisoner's dilemma game used in the study of competitive and cooperative individuals 9-5 Expectations of the players 9-6 Percentage of cooperative responses 9-7 Mean joint payoffs (Acme plus Bolt) per trial in modified trucking game 9-8 Mean final price for automobile 10-1 Percentage attributing each basis of power to the spouse as a function of the domain of power 10-2 Mean conformity 10-2 Mean conformity 564 11-1 Other choice dilemmas 10-2 Representation of the deindividuation process 11-2 Representation of the deindividuation process 12-3 Mean ratings of crowding 12-4 Effective temperature (°F) at 0 percent humidity as a function of actual temperature and humidity 688	o-3		
8-4 Mean ratings of both white and black actors' behaviors by both white and black subjects 459 9-1 A zero-sum, or pure conflict situation 471 9-2 Matrix representation of the prisoner's dilemma 473 9-3 Payoffs in the Deutsch and Krauss trucking game 480 9-4 The prisoner's dilemma game used in the study of competitive and cooperative individuals 487 9-5 Expectations of the players 487 9-6 Percentage of cooperative responses 488 9-7 Mean joint payoffs (Acme plus Bolt) per trial in modified trucking game 493 9-8 Mean final price for automobile 498 10-1 Percentage attributing each basis of power to the spouse as a function of the domain of power 530 10-2 Mean conformity 564 11-1 Other choice dilemmas 625 11-2 Representation of the deindividuation process 629 12-1 Mean speed for the removal of litter 663 12-2 Effectiveness of markers in protecting territory 668 12-3 Mean ratings of crowding 676 12-4 Effective temperature (°F) at 0 percent humidity as a function of actual temperature and humidity 688		,	402
by both white and black subjects 9-1 A zero-sum, or pure conflict situation 9-2 Matrix representation of the prisoner's dilemma 9-3 Payoffs in the Deutsch and Krauss trucking game 9-4 The prisoner's dilemma game used in the study of	0.4		403
9-1 A zero-sum, or pure conflict situation 9-2 Matrix representation of the prisoner's dilemma 9-3 Payoffs in the Deutsch and Krauss trucking game 9-4 The prisoner's dilemma game used in the study of competitive and cooperative individuals 9-5 Expectations of the players 9-6 Percentage of cooperative responses 9-7 Mean joint payoffs (Acme plus Bolt) per trial in modified trucking game 9-8 Mean final price for automobile 10-1 Percentage attributing each basis of power to the spouse as a function of the domain of power 10-2 Mean conformity 10-2 Mean conformity 10-1 Other choice dilemmas 11-2 Representation of the deindividuation process 11-2 Representation of the deindividuation process 12-1 Mean speed for the removal of litter 12-2 Effectiveness of markers in protecting territory 12-3 Mean ratings of crowding 12-4 Effective temperature (°F) at 0 percent humidity as a function of actual temperature and humidity 1471 1480 1571 1572 1573 1574 1575 1575 1575 1575 1575 1575 1575	8-4		450
9-2 Matrix representation of the prisoner's dilemma 473 9-3 Payoffs in the Deutsch and Krauss trucking game 480 9-4 The prisoner's dilemma game used in the study of competitive and cooperative individuals 487 9-5 Expectations of the players 487 9-6 Percentage of cooperative responses 488 9-7 Mean joint payoffs (Acme plus Bolt) per trial in modified trucking game 493 9-8 Mean final price for automobile 498 10-1 Percentage attributing each basis of power to the spouse as a function of the domain of power 530 10-2 Mean conformity 564 11-1 Other choice dilemmas 625 11-2 Representation of the deindividuation process 629 12-1 Mean speed for the removal of litter 663 12-2 Effectiveness of markers in protecting territory 668 12-3 Mean ratings of crowding 676 12-4 Effective temperature (°F) at 0 percent humidity as a function of actual temperature and humidity 688	0.1		
9-3 Payoffs in the Deutsch and Krauss trucking game 9-4 The prisoner's dilemma game used in the study of competitive and cooperative individuals 9-5 Expectations of the players 9-6 Percentage of cooperative responses 9-7 Mean joint payoffs (Acme plus Bolt) per trial in modified trucking game 9-8 Mean final price for automobile 10-1 Percentage attributing each basis of power to the spouse as a function of the domain of power 10-2 Mean conformity 10-2 Mean conformity 11-1 Other choice dilemmas 11-2 Representation of the deindividuation process 11-2 Representation of the deindividuation process 12-1 Mean speed for the removal of litter 12-2 Effectiveness of markers in protecting territory 12-3 Mean ratings of crowding 12-4 Effective temperature (°F) at 0 percent humidity as a function of actual temperature and humidity 1800 1801 1807 1807 1807 1807 1807 1807			
9-4 The prisoner's dilemma game used in the study of competitive and cooperative individuals 9-5 Expectations of the players 9-6 Percentage of cooperative responses 9-7 Mean joint payoffs (Acme plus Bolt) per trial in modified trucking game 9-8 Mean final price for automobile 10-1 Percentage attributing each basis of power to the spouse as a function of the domain of power 530 10-2 Mean conformity 564 11-1 Other choice dilemmas 625 11-2 Representation of the deindividuation process 629 12-1 Mean speed for the removal of litter 663 12-2 Effectiveness of markers in protecting territory 668 12-3 Mean ratings of crowding 676 12-4 Effective temperature (°F) at 0 percent humidity as a function of actual temperature and humidity			
competitive and cooperative individuals 9-5 Expectations of the players 9-6 Percentage of cooperative responses 9-7 Mean joint payoffs (Acme plus Bolt) per trial in modified trucking game 9-8 Mean final price for automobile 10-1 Percentage attributing each basis of power to the spouse as a function of the domain of power 10-2 Mean conformity 10-2 Mean conformity 564 11-1 Other choice dilemmas 625 11-2 Representation of the deindividuation process 629 12-1 Mean speed for the removal of litter 663 12-2 Effectiveness of markers in protecting territory 668 12-3 Mean ratings of crowding 676 12-4 Effective temperature (°F) at 0 percent humidity as a function of actual temperature and humidity 688			400
9-5 Expectations of the players 487 9-6 Percentage of cooperative responses 488 9-7 Mean joint payoffs (Acme plus Bolt) per trial in modified trucking game 493 9-8 Mean final price for automobile 498 10-1 Percentage attributing each basis of power to the spouse as a function of the domain of power 530 10-2 Mean conformity 564 11-1 Other choice dilemmas 625 11-2 Representation of the deindividuation process 629 12-1 Mean speed for the removal of litter 663 12-2 Effectiveness of markers in protecting territory 668 12-3 Mean ratings of crowding 676 12-4 Effective temperature (°F) at 0 percent humidity as a function of actual temperature and humidity 688	9-4		407
9-6 Percentage of cooperative responses 488 9-7 Mean joint payoffs (Acme plus Bolt) per trial in modified trucking game 493 9-8 Mean final price for automobile 498 10-1 Percentage attributing each basis of power to the spouse as a function of the domain of power 530 10-2 Mean conformity 564 11-1 Other choice dilemmas 625 11-2 Representation of the deindividuation process 629 12-1 Mean speed for the removal of litter 663 12-2 Effectiveness of markers in protecting territory 668 12-3 Mean ratings of crowding 676 12-4 Effective temperature (°F) at 0 percent humidity as a function of actual temperature and humidity 688	0.5		
9-7 Mean joint payoffs (Acme plus Bolt) per trial in modified trucking game 493 9-8 Mean final price for automobile 498 10-1 Percentage attributing each basis of power to the spouse as a function of the domain of power 530 10-2 Mean conformity 564 11-1 Other choice dilemmas 625 11-2 Representation of the deindividuation process 629 12-1 Mean speed for the removal of litter 663 12-2 Effectiveness of markers in protecting territory 668 12-3 Mean ratings of crowding 676 12-4 Effective temperature (°F) at 0 percent humidity as a function of actual temperature and humidity 688			
modified trucking game 493 9-8 Mean final price for automobile 498 10-1 Percentage attributing each basis of power to the spouse as a function of the domain of power 530 10-2 Mean conformity 564 11-1 Other choice dilemmas 625 11-2 Representation of the deindividuation process 629 12-1 Mean speed for the removal of litter 663 12-2 Effectiveness of markers in protecting territory 668 12-3 Mean ratings of crowding 676 12-4 Effective temperature (°F) at 0 percent humidity as a function of actual temperature and humidity 688			400
9-8 Mean final price for automobile 10-1 Percentage attributing each basis of power to the spouse as a function of the domain of power 10-2 Mean conformity 10-1 Other choice dilemmas 11-2 Representation of the deindividuation process 11-2 Representation of the deindividuation process 12-1 Mean speed for the removal of litter 12-2 Effectiveness of markers in protecting territory 12-3 Mean ratings of crowding 12-4 Effective temperature (°F) at 0 percent humidity as a function of actual temperature and humidity 1498 1509 1509 1509 1509 1509 1509 1509 1509	9-1		402
10–1 Percentage attributing each basis of power to the spouse as a function of the domain of power 530 10–2 Mean conformity 564 11–1 Other choice dilemmas 625 11–2 Representation of the deindividuation process 629 12–1 Mean speed for the removal of litter 663 12–2 Effectiveness of markers in protecting territory 668 12–3 Mean ratings of crowding 676 12–4 Effective temperature (°F) at 0 percent humidity as a function of actual temperature and humidity 688	0.0		
as a function of the domain of power 530 10-2 Mean conformity 564 11-1 Other choice dilemmas 625 11-2 Representation of the deindividuation process 629 12-1 Mean speed for the removal of litter 663 12-2 Effectiveness of markers in protecting territory 668 12-3 Mean ratings of crowding 676 12-4 Effective temperature (°F) at 0 percent humidity as a function of actual temperature and humidity 688	-		490
10-2 Mean conformity 564 11-1 Other choice dilemmas 625 11-2 Representation of the deindividuation process 629 12-1 Mean speed for the removal of litter 663 12-2 Effectiveness of markers in protecting territory 668 12-3 Mean ratings of crowding 676 12-4 Effective temperature (°F) at 0 percent humidity as a function of actual temperature and humidity 688	10-1		530
