Preface	xi
Chapter 1. Introduction	1
1.1 Definitions and History	1
1.2 The Erratic Orbits Theorem	3
1.3 Corollaries of the Comet Theorem	4
1.4 The Comet Theorem	7
1.5 Rational Kites	10
1.6 The Arithmetic Graph	12
1.7 The Master Picture Theorem	15
1.8 Remarks on Computation	16
1.9 Organization of the Book	16
PART 1. THE ERRATIC ORBITS THEOREM	17
Chapter 2. The Arithmetic Graph	19
2.1 Polygonal Outer Billiards	19
2.2 Special Orbits	20
2.3 The Return Lemma	21
2.4 The Return Map	25
2.5 The Arithmetic Graph	26
2.6 Low Vertices and Parity	28
2.7 Hausdorff Convergence	30
Chapter 3. The Hexagrid Theorem	33
3.1 The Arithmetic Kite	33
3.2 The Hexagrid Theorem	35
3.3 The Room Lemma	37
3.4 Orbit Excursions	38
Chapter 4. Period Copying	41
4.1 Inferior and Superior Sequences	41
4.2 Strong Sequences	43
Chapter 5. Proof of the Erratic Orbits Theorem	45
5.1 Proof of Statement 1	45
5.2 Proof of Statement 2	49
5.3 Proof of Statement 3	50

PART 2. THE MASTER PICTURE THEOREM	53
Chapter 6. The Master Picture Theorem	55
6.1 Coarse Formulation	55
6.2 The Walls of the Partitions	56
6.3 The Partitions	57
6.4 A Typical Example	59
6.5 A Singular Example	60
6.6 The Reduction Algorithm	62
6.7 The Integral Structure	63
6.8 Calculating with the Polytopes	65
6.9 Computing the Partition	66
Chapter 7. The Pinwheel Lemma	69
7.1 The Main Result	69
7.2 Discussion	71
7.3 Far from the Kite	72
7.4 No Sharps or Flats	73
7.5 Dealing with $4^\circ$	74
7.6 Dealing with $6^\circ$	75
7.7 The Last Cases	76
Chapter 8. The Torus Lemma	77
8.1 The Main Result	77
8.2 Input from the Torus Map	78
8.3 Pairs of Strips	79
8.4 Single-Parameter Proof	81
8.5 Proof in the General Case	83
Chapter 9. The Strip Functions	85
9.1 The Main Result	85
9.2 Continuous Extension	86
9.3 Local Affine Structure	87
9.4 Irrational Quintuples	89
9.5 Verification	90
9.6 An Example Calculation	91
Chapter 10. Proof of the Master Picture Theorem	93
10.1 The Main Argument	93
10.2 The First Four Singular Sets	94
10.3 Symmetry	95
10.4 The Remaining Pieces	96
10.5 Proof of the Second Statement	97
PART 3. ARITHMETIC GRAPH STRUCTURE THEOREMS	99
Chapter 11. Proof of the Embedding Theorem	101
11.1 No Valence 1 Vertices	101
11.2 No Crossings	104

Chapter 12. Extension and Symmetry	107
12.1 Translational Symmetry	107
12.2 A Converse Result	110
12.3 Rotational Symmetry	111
12.4 Near-Bilateral Symmetry	113
Chapter 13. Proof of Hexagrid Theorem I	117
13.1 The Key Result	117
13.2 A Special Case	118
13.3 Planes and Strips	119
13.4 The End of the Proof	120
13.5 A Visual Tour	121
Chapter 14. The Barrier Theorem	125
14.1 The Result	125
14.2 The Image of the Barrier Line	127
14.3 An Example	129
14.4 Bounding the New Crossings	130
14.5 The Other Case	132
Chapter 15. Proof of Hexagrid Theorem II	133
15.1 The Structure of the Doors	133
15.2 Ordinary Crossing Cells	135
15.3 New Maps	136
15.4 Intersection Results	138
15.5 The End of the Proof	141
15.6 The Pattern of Crossing Cells	142
Chapter 16. Proof of the Intersection Lemma	143
16.1 Discussion of the Proof	143
16.2 Covering Parallelograms	144
16.3 Proof of Statement 1	146
16.4 Proof of Statement 2	148
16.5 Proof of Statement 3	149
PART 4. PERIOD-COPYING THEOREMS	151
Chapter 17. Diophantine Approximation	153
17.1 Existence of the Inferior Sequence	153
17.2 Structure of the Inferior Sequence	155
17.3 Existence of the Superior Sequence	158
17.4 The Diophantine Constant	159
17.5 A Structural Result	161
Chapter 18. The Diophantine Lemma	163
18.1 Three Linear Functionals	163
18.2 The Main Result	164
18.3 A Quick Application	165
18.4 Proof of the Diophantine Lemma	166

18.5 Proof of the Agreement Lemma	167
18.6 Proof of the Good Integer Lemma	169
<b>Chapter 19. The Decomposition Theorem</b>	<b>171</b>
19.1 The Main Result	171
19.2 A Comparison	173
19.3 A Crossing Lemma	174
19.4 Most of the Parameters	175
19.5 The Exceptional Cases	178
<b>Chapter 20. Existence of Strong Sequences</b>	<b>181</b>
20.1 Step 1	181
20.2 Step 2	182
20.3 Step 3	183
<b>PART 5. THE COMET THEOREM</b>	<b>185</b>
<b>Chapter 21. Structure of the Inferior and Superior Sequences</b>	<b>187</b>
21.1 The Results	187
21.2 The Growth of Denominators	188
21.3 The Identities	189
<b>Chapter 22. The Fundamental Orbit</b>	<b>193</b>
22.1 Main Results	193
22.2 The Copy and Pivot Theorems	195
22.3 Half of the Result	197
22.4 The Inheritance of Low Vertices	198
22.5 The Other Half of the Result	200
22.6 The Combinatorial Model	201
22.7 The Even Case	203
<b>Chapter 23. The Comet Theorem</b>	<b>205</b>
23.1 Statement 1	205
23.2 The Cantor Set	207
23.3 A Precursor of the Comet Theorem	208
23.4 Convergence of the Fundamental Orbit	209
23.5 An Estimate for the Return Map	210
23.6 Proof of the Comet Precursor Theorem	211
23.7 The Double Identity	213
23.8 Statement 4	216
<b>Chapter 24. Dynamical Consequences</b>	<b>219</b>
24.1 Minimality	219
24.2 Tree Interpretation of the Dynamics	220
24.3 Proper Return Models and Cusped Solenoids	221
24.4 Some Other Equivalence Relations	225
<b>Chapter 25. Geometric Consequences</b>	<b>227</b>
25.1 Periodic Orbits	227

25.2 A Triangle Group	228
25.3 Modularity	229
25.4 Hausdorff Dimension	230
25.5 Quadratic Irrational Parameters	231
25.6 The Dimension Function	234
<b>PART 6. MORE STRUCTURE THEOREMS</b>	<b>237</b>
Chapter 26. Proof of the Copy Theorem	239
26.1 A Formula for the Pivot Points	239
26.2 A Detail from Part 5	241
26.3 Preliminaries	242
26.4 The Good Parameter Lemma	243
26.5 The End of the Proof	247
Chapter 27. Pivot Arcs in the Even Case	249
27.1 Main Results	249
27.2 Another Diophantine Lemma	252
27.3 Copying the Pivot Arc	253
27.4 Proof of the Structure Lemma	254
27.5 The Decrement of a Pivot Arc	257
27.6 An Even Version of the Copy Theorem	257
Chapter 28. Proof of the Pivot Theorem	259
28.1 An Exceptional Case	259
28.2 Discussion of the Proof	260
28.3 Confining the Bump	263
28.4 A Topological Property of Pivot Arcs	264
28.5 Corollaries of the Barrier Theorem	265
28.6 The Minor Components	266
28.7 The Middle Major Components	268
28.8 Even Implies Odd	269
28.9 Even Implies Even	271
Chapter 29. Proof of the Period Theorem	273
29.1 Inheritance of Pivot Arcs	273
29.2 Freezing Numbers	275
29.3 The End of the Proof	276
29.4 A Useful Result	278
Chapter 30. Hovering Components	279
30.1 The Main Result	279
30.2 Traps	280
30.3 Cases 1 and 2	282
30.4 Cases 3 and 4	285
Chapter 31. Proof of the Low Vertex Theorem	287
31.1 Overview	287
31.2 A Makeshift Result	288

31.3 Eliminating Minor Arcs	290
31.4 A Topological Lemma	291
31.5 The End of the Proof	292
Appendix	295
A.1 Structure of Periodic Points	295
A.2 Self-Similarity	297
A.3 General Orbits on Kites	298
A.4 General Quadrilaterals	300
Bibliography	303
Index	305
