1 Social markings in cognitive operations <i>Paola de Paolis, Willem Doise and Gabriel Mugny</i>	
1 Outline of the chapter	1
1.1 A brief look back to Durkheim	1
1.2 From Durkheim to experimental social psychology	3
1.3 Recent empirical research	6
2 The concept of social marking	10
3 The experimental study of social marking	13
4 Hierarchy and social marking	18
5 The classroom paradigm	26
6 Conclusion	42
Bibliography	43
2 The social representations of mental illness in children and adults <i>Annamaria Silvana de Rosa</i>	
Introduction	47
1 Historical and theoretical sources for the study of the social representations of 'mental illness'	51
1.1 The polymorphism of the social representations of 'madness' in history	51
1.2 The monster and madness in collective imaginings and in the social representations of children and adults	55
2 The dynamic structure of the 'representational field' of madness	92
3 Outline of six years of research on social representations of 'madmen' and 'madness'	97

3 Social identity and conformity: a theory of referent informational influence	
<i>Michael A. Hogg and John C. Turner</i>	
1 Introduction	139
2 Traditional research and theory	140
3 Limitations of the traditional model	143
4 Social identity and referent informational influence	148
5 Direct tests of referent informational influence theory	155
5.1 The Asch paradigm experiments	156
5.1.1 Experiment 1	157
5.1.2 Experiment 2	162
5.1.3 Experiment 3	165
5.1.4 Experiment 4	167
5.2 Group polarization	169
5.3 Collective behaviour	174
6 Conclusions	176
Acknowledgements	177

4 Administrative obedience as a social phenomenon	
<i>Wim H. J. Meeus and Quinten A. W. Raaijmakers</i>	
Introduction	183
1 The obedience conflict in Milgram's experiments	183
1.1 The obedience paradigm in Milgram's experiments	184
1.1.1 The X-Y-Z structure	184
1.1.2 The experimental procedure	184
1.1.3 Commentary	187
1.2 The dilemmas of obedience versus disobedience: a process analysis	189
1.2.1 Prior to the test: absence of conflict	189
1.2.2 During the test: the conflict	190
1.2.3 The structural dimensions of the obedience conflict	192
2 Holcamp's critique of psychological experiments as applied to Milgram's paradigm	195
3 The paradigm of administrative obedience	198

3.1	Experimental design	198
3.2	General procedure	199
3.3	Method	200
3.4	Results of the baseline condition	205
3.5	The dilemma of administrative obedience	206
3.5.1	Prior to the test: a latent conflict	206
3.5.2	During the test: a manifest conflict	207
3.6	A situational variation: 'Experimenter Absent'	213
3.6.1	Results	214
4	Positional variations: the effect of a partial elimination of experimental reduction	214
4.1	Positional variation 1: 'Manipulated Subjection'	214
4.1.1	Method	215
4.1.2	Results	216
4.2	Positional variation 2: 'Staff of Personnel Departments as Subjects'	217
4.2.1	Method	218
4.2.2	Results	218
4.3	Positional variation 3: 'Two Peers Rebel'	219
4.3.1	Method	219
4.3.2	Results	221
4.4	Positional variation 4: 'Advance Information'	222
4.4.1	Method	223
4.4.2	Results	224
5	Conclusions and discussion	225
	Notes	229
	References	229
5	Social representation and professionalization of psychologists	
	<i>A. Palmonari, M. L. Pombeni and B. Zani</i>	
1	Profession and professionalization	231
2	The pre-professional phase (1948–68)	232
2.1	The starting points	232
2.2	Diffusion	233
3	Pre-institutional professionalization phase (1968–79)	235
3.1	Contestation of status quo	235
3.2	Different models of psychologist: an effervescent milieu	240
3.3	Two faces of professionalization	245

3.4	Dialectics between social representations and institutional demands	251
4	Institutional aspects of professionalization	253
4.1	Present day normative set-up	253
4.2	The professionalism of the psychologist in the local services	254
4.3	University: a social representation of researcher	257
4.3.1	Research areas in psychology	258
4.3.2	Psychology and other disciplines	260
4.3.3	Image of the 'research' and the researcher's profile	261
5	Conclusion	266
	Notes	268
	References	269
6	A social and cognitive approach to economic representations	
	<i>Pierre Vergès</i>	
1	Social representation is a form of knowledge	271
2	A series of questions which will make people express their economic representations	274
2.1	How different elements of a representation are selected and put into a hierarchical form	275
2.2	The organization of a representation	279
2.3	What explanation can we suggest for the analysis of selection and organization?	285
3	An argumentative analysis of economic representations	288
3.1	Coming back to the determination of economic representations	289
3.2	A method of argumentative analysis connected to our hypotheses	291
3.3	Representation as a cognitive and social object	297
4	Economic representations: there are still many questions about them	301
4.1	Has our research been useful for economics teachers?	301
4.2	Research prospects	302
	Notes	304
	References	304
7	On the relationship between representations of theories in psychology and ordinary language	
	<i>Gün R. Semin</i>	
1	Introduction	307
