

# Contents

<b>1 Introduction and Preliminaries on Biometrics and Forensics Systems</b> .....	1
1.1 Introduction .....	1
1.2 Definition of Biometrics .....	1
1.2.1 Biometric Characteristics .....	2
1.2.2 Biometric Modalities .....	2
1.3 Recognition/Verification/Watch-List .....	5
1.3.1 Verification: Am I Who I Claim to Be? .....	5
1.3.2 Recognition: Who Am I? .....	5
1.3.3 The Watch-List: Are You Looking for Me? .....	6
1.4 Steps of a Typical Biometric Recognition Application .....	6
1.4.1 Biometric Data Localisation .....	6
1.4.2 Normalisation and Pre-processing .....	7
1.4.3 Feature Extraction .....	8
1.4.4 Matching .....	9
1.4.5 Databases .....	9
1.5 Summary .....	9
References .....	10
<b>2 Data Representation and Analysis</b> .....	11
2.1 Introduction .....	11
2.2 Data Acquisition .....	12
2.2.1 Sensor Module .....	13
2.2.2 Data Storage .....	14
2.3 Feature Extraction .....	15
2.4 Matcher .....	16
2.5 System Testing .....	17
2.6 Performance Evaluation .....	17
2.7 Conclusion .....	18
References .....	19
<b>3 Improving Face Recognition Using Directional Faces</b> .....	21
3.1 Introduction .....	21

3.2	Face Recognition Basics . . . . .	22
3.2.1	Recognition/Verification . . . . .	22
3.2.2	Steps of a Typical Face Recognition Application . . . . .	23
3.3	Previous Work . . . . .	26
3.3.1	Principal Component Analysis (PCA) . . . . .	26
3.3.2	Independent Component Analysis (ICA) . . . . .	27
3.3.3	Linear Discriminant Analysis (LDA) . . . . .	28
3.3.4	Subspace Discriminant Analysis (SDA) . . . . .	29
3.4	Face Recognition Using Filter Banks . . . . .	31
3.4.1	Gabor Filter Bank . . . . .	31
3.4.2	Directional Filter Bank: A Review . . . . .	33
3.5	Proposed Method and Results Analysis . . . . .	37
3.5.1	Proposed Method . . . . .	37
3.5.2	PCA . . . . .	38
3.5.3	ICA . . . . .	39
3.5.4	LDA . . . . .	41
3.5.5	SDA . . . . .	41
3.5.6	FERET Database Results . . . . .	43
3.6	Conclusion . . . . .	45
	References . . . . .	45
<b>4</b>	<b>Recent Advances in Iris Recognition: A Multiscale Approach . . . . .</b>	<b>49</b>
4.1	Introduction . . . . .	49
4.2	Related Work: A Review . . . . .	51
4.3	Iris Localisation . . . . .	52
4.3.1	Background . . . . .	52
4.3.2	Iris Segmentation . . . . .	52
4.3.3	Existing Methods for Iris Localisation . . . . .	53
4.4	Proposed Method for Iris Localisation . . . . .	55
4.4.1	Motivation . . . . .	55
4.4.2	The Multiscale Method . . . . .	57
4.4.3	Results and Analysis . . . . .	65
4.5	Texture Analysis and Feature Extraction . . . . .	67
4.5.1	Wavelet Maxima Components . . . . .	68
4.5.2	Special Gabor Filter Bank . . . . .	68
4.5.3	Proposed Method . . . . .	70
4.6	Matching . . . . .	71
4.7	Experimental Results and Analysis . . . . .	72
4.7.1	Database . . . . .	72
4.7.2	Combined Multiresolution Feature Extraction Techniques . . . . .	72
4.7.3	Template Computation . . . . .	73
4.7.4	Comparison with Existing Methods . . . . .	73
4.8	Discussion and Future Work . . . . .	74
4.9	Conclusion . . . . .	75
	References . . . . .	75
