PREFACE v

I. FOURIER SERIES 1

1. Principles of Linear Systems—A Review 1
2. Periodic Signals 7
3. The Exponential Fourier Series 14
4. The Response of a Linear System to a Periodic Input 20
5. Quadratic Relationships 26
6. Modulation and Multiplication 29
7. Biographical Note 32

Bibliography 33

Problems 34

II. THE FOURIER TRANSFORM 37

1. The Transform and Some of its Properties 37
2. The Convolution Theorem 49
3. Measure of Signal Bandwidth and Duration 58
4. Modulation 63
   a) The Complex Envelope 63
   b) Bandwidth and Duration of Narrowband Signals 68
   c) Bandpass Filters 70
5. Bandlimited Signals and the Sampling Theorem 73
6. Numerical Calculation of Fourier Transforms 80
   a) Fourier Coefficients 80
   b) The Fast Fourier Transform 83
   c The Numerical Fourier Transform and Aliasing 85

Bibliography 92

Problems 93

III. STATE VARIABLES **99**

1. The State-Space Description of a System 99
a) State Variables in Networks 99
b) The Standard Form of the State Equations and Their Solution 105
c) Converting Differential Equations to State Equations 111
2. The State Equations of a Network 116
3. State Dynamics of a Time-Invariant Linear System 123
Bibliography 139
Problems 140

IV. STABILITY AND FEEDBACK CONTROL SYSTEMS **145**

1. The Routh-Hurwitz Criterion 145
2. Feedback Control 149
a) The Stick Balancer 149
b) Proportional Control 153
c) Proportional-plus-Derivative Control 155
d) The Effect of Disturbances 160
e) Proportional-plus-Derivative-plus-Integral Control 161
3. Root Loci 163
a) The Algebraic Problem 163
b) Root Loci for the Stick Balancer Control 167
c) Asymptotes 171
d) Real-Axis Portion of Root Locus 173
e) Angles of Departure and Arrival 173
f) Crossings of the Imaginary Axis 175
g) Break-away Points 176
h) The Rules Summarized 180
i) An Example 181
j) An Analogy with Electrostatic Fields 186
4. The Nyquist Criterion 186
Bibliography 204
Problems 205

V. Z-TRANSFORMS **212**

1. Sampled-Data Systems 212
2. Finite-Order Filters 216
3. The Delta-Response of a Finite-Order Filter 224
4. The Zero-Input Response 233
5. The Total Response 235
6. Some Further Properties of the z-Transform 239
Bibliography 243
Problems 244
Index 248
