

CONTENTS

Preface	v
Introduction: Making Sense of Word Problems: Past, Present, and Future <i>Brian Greer, Lieven Verschaffel, Wim Van Dooren, and Swapna Mukhopadhyay</i>	xi
PART I: THEORETICAL PERSPECTIVES	1
1 Theory of Authentic Task Situations <i>Torulf Palm</i>	3
2 Genre, Simulacra, Impossible Exchange, and The Real: How Postmodern Theory Problematises Word Problems <i>Susan Gerofsky</i>	21
3 “I am not talking about reality”: Word Problems and the Intricacies of Producing Legitimate Text <i>Uwe Gellert and Eva Jablonka</i>	39
Discussion I. On the Problematic of Word Problems – Language and the World we Inhabit <i>Wolff-Michael Roth</i>	55
PART II: SOCIOCULTURAL FACTORS	71
4 Word Problems: Footprints from the History of Mathematics <i>Frank J. Swetz</i>	73
5 Realistic Contexts, Mathematics Assessment, and Social Class: Lessons for Assessment Policy from an English Research Programme <i>Barry Cooper and Tony Harries</i>	93
6 Developing a Criticalmathematical Numeracy through <i>Real</i> Real-life Word Problems <i>Marilyn Frankenstein</i>	111
Discussion II. Can Mathematics Problems Help with the Inequities in the World? <i>Jo Boaler</i>	131

CONTENTS

PART III: PROBING STUDENTS' CONCEPTIONS	141
7 The Relationship Between Posing and Solving Division-with-remainder Problems among Flemish Upper Elementary School Children <i>Lieven Verschaffel, Wim Van Dooren, Limin Chen, and Katrien Stessens</i>	143
8 Realistic Problem Solving in China: Students' Performance, Interventions, and Learning Settings <i>Ziqiang Xin</i>	161
9 Learning to Model: Coordinating Natural Language and Mathematical Operations when Solving Word Problems <i>Roger Säljö, Eva Riesbeck, and Jan Wyndhamn</i>	177
10 The Issue of Reality in Word Problem Solving: Learning from Students' Justifications of "Unrealistic" Solutions to Real Wor(l)d Problems <i>Noriyuki Inoue</i>	195
Discussion III. Research Efforts On Probing Students' Conceptions in Mathematics and in Reality: Structuring Problems, Solving Problems, and Justifying Solutions <i>Shuk-Kwan S. Leung</i>	211
PART IV: PROBING TEACHERS' CONCEPTIONS	225
11 Teachers' Conceptions and Use of Mathematical Contextual Problems in Canada <i>Olive Chapman</i>	227
12 Analysis of the Realistic Nature of Word Problems in Upper Elementary Mathematics Education in Flanders <i>Fien Depaepe, Erik De Corte, and Lieven Verschaffel</i>	245
13 How and Why Secondary Mathematics Teachers Make (or Don't Make) Real-world Connections in Teaching <i>Julie Gainsburg</i>	265
Discussion IV. Teachers' Knowledge and Practices Regarding Contextual Problems and Real World Connections <i>João Pedro da Ponte</i>	283

PART V: CHANGING CLASSROOMS	295
14 Working Towards Teaching Realistic Mathematical Modelling and Problem Posing in Italian Classrooms <i>Cinzia Bonotto</i>	297
15 Stimulating Reflection on Word Problems by Means of Students' Own Productions <i>Christoph Selzer</i>	315
16 Differing Conceptions of Problem Solving in Mathematics Education, Science Education, and Professional Schools <i>Richard Lesh and Elizabeth Caylor</i>	333
Discussion V. The Changing Realities of Classroom Mathematical Problem Solving <i>Lyn D. English</i>	351
