<i>List of figures</i>	xi
<i>List of tables</i>	xiii
<i>Acknowledgments</i>	xvi
<b>Prologue</b>	<b>1</b>
<b>PART I</b>	
<b>Box-office champions, chaotic dynamics and herding</b>	<b>7</b>
<b>1 The market for motion pictures: rank, revenue and survival</b>	<b>11</b>
1.1 <i>Introduction</i>	11
1.2 <i>The motion picture exhibition market</i>	12
1.3 <i>Evolutionary survival tournaments</i>	14
1.4 <i>The Variety data</i>	15
1.5 <i>The survival model</i>	18
1.6 <i>Empirical results</i>	19
1.7 <i>Conclusions</i>	26
<b>2 Bose–Einstein dynamics and adaptive contracting in the motion picture industry</b>	<b>28</b>
2.1 <i>Introduction</i>	28
2.2 <i>The mechanics of supply</i>	29
2.3 <i>Demand discovery and distributional dynamics</i>	32
2.4 <i>Empirical box-office revenue distributions</i>	37
2.5 <i>Explaining the industry</i>	44
2.6 <i>Conclusions</i>	46
<b>3 Quality evaluations and the breakdown of statistical herding in the dynamics of box-office revenue</b>	<b>48</b>
3.1 <i>Introduction</i>	48
3.2 <i>Information and demand dynamics</i>	49
3.3 <i>The model</i>	51

- 3.4 *Estimates* 52
- 3.5 *The stable Paretian model* 56
- 3.6 *Bifurcation at phase transitions* 57
- 3.7 *Discussion of results* 60
- 3.8 *Conclusions* 62

## PART II

**“Wild” uncertainty, tough decisions and false beliefs** 65

- 4 **Uncertainty in the movie industry: can star power reduce the terror of the box office?** 71
  - 4.1 *Introduction* 71
  - 4.2 *Related literature* 72
  - 4.3 *Modeling star power* 73
  - 4.4 *The movie data* 77
  - 4.5 *Estimation results* 84
  - 4.6 *Choosing among movie projects* 96
  - 4.7 *Conclusions* 98
- 5 **Does Hollywood make too many R-rated movies?: risk, stochastic dominance and the illusion of expectation** 99
  - 5.1 *Introduction* 99
  - 5.2 *Motion picture production by ratings* 101
  - 5.3 *Choosing among uncertain movie projects* 103
  - 5.4 *Ranking by success rates* 108
  - 5.5 *Ranking by stochastic dominance* 110
  - 5.6 *Conclusions* 120
- 6 **Big budgets, big openings and legs: analysis of the blockbuster strategy** 122
  - 6.1 *Introduction* 122
  - 6.2 *The blockbuster and the information cascade* 123
  - 6.3 *Movie industry data and summary statistics* 125
  - 6.4 *A structural model of box-office outcomes* 129
  - 6.5 *Conclusions* 137

## PART III

**Judges, lawyers and the movies** 139

- 7 **Motion picture antitrust: the *Paramount* cases revisited** 143
  - 7.1 *The essential economics of motion pictures* 145
  - 7.2 *The feature motion picture* 151

7.3	<i>Integration and licensing</i>	154
7.4	<i>The courts' analyses</i>	166
7.5	<i>Paramount's effects</i>	170
7.6	<i>Conclusions</i>	174
<b>8</b>	<b>Was the antitrust action that broke up the movie studios good for the movies?: evidence from the stock market</b>	<b>176</b>
8.1	<i>Introduction</i>	176
8.2	<i>The studio system</i>	178
8.3	<i>The Paramount litigation</i>	178
8.4	<i>Stock prices</i>	181
8.5	<i>The feasibility of a motion picture cartel</i>	186
8.6	<i>Winners and losers</i>	188
8.7	<i>Conclusions</i>	189
<b>9</b>	<b>Stochastic market structure: concentration measures and motion picture antitrust</b>	<b>190</b>
9.1	<i>Introduction</i>	190
9.2	<i>Market power: theory and policy</i>	191
9.3	<i>Concentration in United States v. Paramount Pictures</i>	193
9.4	<i>Instability of concentration and shares</i>	194
9.5	<i>Turnover of the leading firms</i>	200
9.6	<i>Standard models do not apply to motion pictures</i>	202
9.7	<i>The probability distribution of the HHI</i>	204
9.8	<i>Conclusions</i>	206
<b>PART IV</b>		
	<b>A business of extremes</b>	<b>207</b>
<b>10</b>	<b>Motion picture profit, the stable Paretian hypothesis and the curse of the superstar</b>	<b>211</b>
10.1	<i>Introduction</i>	211
10.2	<i>The stable hypothesis</i>	213
10.3	<i>Motion picture profit</i>	214
10.4	<i>The stable distribution</i>	216
10.5	<i>Stable estimation and diagnostics</i>	217
10.6	<i>Probability under the stable model</i>	219
10.7	<i>"Nobody knows"</i>	220
10.8	<i>Conditional stable analysis and superstars</i>	221
10.9	<i>Sample average and expected value</i>	223
10.10	<i>The curse of the superstar</i>	225
10.11	<i>Success breeds success</i>	226

10.12	<i>Cost momentum and the angel's nightmare</i>	227
10.13	<i>Stable distribution and contracting</i>	228
10.14	<i>Conclusions</i>	230
<b>11</b>	<b>Contracting with stars when “nobody knows anything”</b>	<b>231</b>
11.1	<i>Introduction</i>	231
11.2	<i>On becoming a superstar</i>	232
11.3	<i>Artists and kurtosis</i>	235
11.4	<i>Career expectations and opportunities</i>	238
11.5	<i>Luck or talent?</i>	239
11.6	<i>Competing for stars</i>	243
11.7	<i>Artist contracts</i>	245
11.8	<i>Pay when you do know</i>	246
11.9	<i>Director contracts</i>	251
11.10	<i>Conclusions</i>	254
<b>12</b>	<b>How extreme uncertainty shapes the movie business</b>	<b>255</b>
12.1	<i>Introduction</i>	255
12.2	<i>Complex systems</i>	256
12.3	<i>Universality</i>	258
12.4	<i>Deep order</i>	259
12.5	<i>Complexity and the stable Paretian distribution</i>	265
	<b>Epilogue: can you manage a business when “nobody knows anything”?</b>	<b>267</b>
	<i>Probabilities</i>	268
	<i>Inside and outside the studio</i>	268
	<i>Risk and decision bias</i>	269
	<i>Narrow framing and sure things</i>	270
	<i>Financing movies</i>	271
	<i>Causality and Kim Basinger</i>	273
	<i>A skeptical attitude</i>	275
	<i>Notes</i>	276
	<i>Bibliography</i>	298
	<i>Index</i>	305

# Figures

1.1	Births and deaths by week	18
1.2	Motion picture survivor function	20
1.3	Motion picture hazard rate function	21
1.4	Box-office revenue and rank	24
2.1	Patterns of film runs	30
2.2	Lorenz curves: distribution of revenues over movies and studios	38
2.3	Pareto distribution of cumulative revenues over movies	39
2.4	Distribution of revenues by week of run	42
3.1	Marginal revenue impact of prior revenue on subsequent revenue throughout the run	55
3.2	Bifurcation of revenue mapping into hit and non-hit paths	58
3.3	Coefficient of variation by week of run	59
3.4	Weekly differences between hit and non-hit movies of mean cumulative revenues	59
4.1	Cumulative probability for movies with and without stars	76
4.2	The continuation function for movies with stars	76
4.3	Wide releases: hits, bombs and sequels	78
4.4	Narrow releases: growth, death and legs	79
4.5	Gross profit versus budget	82
4.6	Pareto rank distribution by year	85
4.7	Asymptotic Pareto law for box-office gross	89
4.8	Asymptotic Pareto law for profits	96
5.1	Moving average gross over number of films	105
5.2	Moving average variance about the mean over number of films	105
5.3	Normal and stable Paretian distributions of revenue	106
5.4	Rank Pareto distribution of revenue	107
5.5	Survival probabilities of budgets by rating	114
5.6	Empirical distribution of return by rating	116
5.7	Fitted Pareto distribution of return by rating	118
6.1	Scatter plot of box-office revenues and budgets	130
6.2	Box-office gross versus budget by genre	131
6.3	Box-office gross versus budget by rating	131
9.1	Kernel density of market shares	195

9.2	Aggregate market share of the top six distributors (CR6) by week	197
9.3	The HHI by week	198
9.4	Mean number of screens versus rank	198
9.5	Mean revenue versus rank	198
9.6	Market share of rank-1 films by week	199
9.7	Weekly market shares of top firms	199
9.8	Market shares by week of 115 films on <i>Variety's Top-50</i> list	200
10.1	Empirical and fitted density functions of absolute profit	215
10.2	Probability plot of stable distribution fit of the data	218
10.3	QQ-plot of stable distribution fit of the data	218
10.4	Expanded upper tails of profit density functions	220
10.5	Stable density functions of profit of non-star and star movies	221
10.6	Expanded upper tails of stable density functions of profit of non-star and star movies	222
10.7	Time series of average cumulative profit	224
11.1	Number of movies made by directors	236
11.2	Number of movies made by actors	236
11.3	Probability comparison among actors, directors and chance	240
11.4	Gross, cumulative gross, pay and cumulative pay by year	248
11.5	Paretian upper tail of gross revenue	249
11.6	Fees and participation pay by year	250
11.7	Cumulative probability of pay	251

# Tables

1.1	Summary statistics of <i>Variety</i> 's box-office sample	16
1.2	Distribution of highest rank and length of run	17
1.3	Accelerated life model for censored Weibull regression estimates and controlling for the date of release	23
1.4	Distribution of box-office revenue and rank	25
1.5	Decline in revenue with one unit decline in rank	25
2.1	Estimates of the rank–revenue relationship	40
2.2	Testing log-normality of box-office revenues	41
2.3	Testing log–log normality of box-office revenues	43
3.1	Impact of past revenues on future revenues: hit movies	53
3.2	Impact of past revenues on future revenues: non-hit movies	54
3.3	Implied values of the Paretian tail coefficient	56
3.4	Week-to-week revenue correlations	60
3.5	Mean and standard deviation of weekly revenues by week of run	61
3.6	Correlation of week 1 and cumulative revenues by life length	61
4.1	Screen statistics by number of weeks survived	80
4.2	Weekly box-office gross relative to total gross	80
4.3	Box-office revenue quantiles by rating, genre and stars	81
4.4	Gross rate of return quantiles by rating, genre and stars	83
4.5	The Pareto rank distribution for movies	86
4.6	The Pareto rank distribution of movies by year	87
4.7	Regressions of screens at weeks 1, 5 and 10	88
4.8	Estimating the probability of a hit	91
4.9	Stars with statistically significant impact on the hit probability	93
4.10	Profit regressions	94
4.11	Significant individual stars in the profit regression	95
5.1	Tabulation of all movies by rating, star presence and year	102
5.2	Percentage of movies featuring stars by rating and budget	102
5.3	Box-office revenues, budgets and returns	103
5.4	Tabulation of revenue hits. Tabulation of movies with box-office gross >\$50 million	108

5.5	Success rate for revenue hits. Movies with box-office gross >\$50 million	109
5.6	Tabulation of returns hits. Movies with box-office gross/budget >3	109
5.7	Success rate for returns hits. Movies with box-office gross/budget >3	110
5.8	Estimated Pareto exponents for revenues by rating	112
5.9	Estimated Pareto exponents for returns by rating	117
5.10	Estimated Pareto exponents for returns by rating for high-grossing films	117
5.11	Estimated Pareto exponents for profits	119
5.12	Estimated Pareto exponents for losses	119
6.1	Tabulation of all movies by genre, rating and stars	126
6.2	Box-office revenues and budgets by rating, genre and stars	127
6.3	Tabulation of revenue hits. Tabulation of movies with box-office gross >\$50 million	128
6.4	Success rate for revenue hits. Success rate for movies with box-office gross >\$50 million	129
6.5	Box-Cox transform of box-office revenue	132
6.6	Box-office revenue regressions	133
6.7	Stars with significant box-office revenue impact	136
8.1	Vertical structures and contracts used by motion picture distributors	177
8.2	Chronology of events by year in the <i>United States v. Paramount</i> litigation	179
8.3	Market model regression coefficients for defendants and one non-defendant for the District Court decision <i>United States v. Paramount</i> : decision dated June 11, 1946	183
8.4	Market model regression coefficients for defendants and one non-defendant for the District Court decision <i>United States v. Paramount</i> : decision dated December 31, 1946	183
8.5	Market model regression coefficients for defendants and one non-defendant for the Supreme Court decision <i>United States v. Paramount</i> : decision dated May 3, 1948	184
8.6	Market model regression coefficients for defendants and one non-defendant for the District Court decision <i>United States v. Paramount</i> : decision dated July 5, 1949	185
8.7	Two-day abnormal returns and abnormal equity value change on the 1948 Supreme Court decision	186
9.1	Summary statistics of market shares	195
9.2	Distributor market shares in 1996–97	196
9.3	Market shares of major distributors, 1990–95	196
9.4	Market shares and tail weights ( $\alpha$ ) by distributor	197
9.5	Transition matrix: probability of transition in rank by rank	201

9.6	Estimates of tail weight $\alpha$ for the probability distribution of market shares	206
10.1	Statistical properties of motion picture profit	215
10.2	Maximum likelihood parameter estimates	217
10.3	Upper and lower tail probabilities	223
10.4	Expected, average and most probable profit	223
11.1	Top grossing actors	233
11.2	Top grossing directors	234
11.3	Summary statistics of movies acted	237
11.4	Summary statistics of movies directed	237
11.5	Probability of making $n$ movies	241
11.6	Probability of making more movies conditional on having made $n$ movies	242
11.7	Statistics of director pay	247
11.8	Estimate of $\alpha$ coefficient value for gross revenue	248
11.9	Estimate of $\alpha$ coefficient value for director pay	249
11.10	Regression of director pay and domestic box-office gross revenue	250
11.11	Motion picture domestic box-office revenue	253
11.12	Motion picture domestic box-office revenue for high budget movies $\geq$ \$90 million	253
