<b>List of Tables</b>	<i>xv</i>
<b>Introduction</b>	<i>xvii</i>
<b>1. Mental Demand as a Factor in Stressful Conditions</b>	<b>1</b>
The Mental Demands of Stress	<i>1</i>
Demands Imposed by Simple Threats	<i>3</i>
Mental Activity in the Recognition of Threat	<i>5</i>
The Reading of Context	<i>8</i>
Anticipatory Responses	<i>10</i>
The Demands of Action	<i>11</i>
The Recall of Information on Threats	<i>16</i>
Sources of Internal Information: Worry Work	<i>18</i>
<b>2. The Basis of Personal Control</b>	<b>20</b>
The Psychological Importance of Personal Control	<i>20</i>
The Psychological Basis of Control	<i>21</i>
Experiments on the Effects of Perceived Control	<i>21</i>
Contingency as the Basis for Control	<i>25</i>
Cognitive Models of the Assessment of Control	<i>30</i>

<b>3. Life-Stress Conditions and Control</b>	<b>33</b>
Introduction	33
Internally Derived Threats and Loss of Control	33
Discrepancy in Plans	33
Common Denominators of Stressful Situations	38
Conflict	38
Interruption	43
Change	46
Helplessness and Responsibility	51
Control as a Factor in Life Stresses	54
The Cognitive Basis of Control	54
Control Assessment in Stress	58
<b>4. A Composite Model of the Effects of Stress</b>	<b>59</b>
Introduction	59
The Modes of Influence of Stressful Conditions	61
Pain and Arousal	61
Problem-Solving Demand	63
Stimulation Levels and Arousal	64
Arousal and Performance	64
Control and Catecholamine Balance	70
Distraction and the Attentional Demands of Data	71
Information Processing Demands	74
Information Processing Constraints and Capacity	74
Mental Load and the Concept of Capacity	76
Loss and Distortion of Data	82
Data Masking	82
Information Deprivation	85
Task Monotony	86
Features of the Composite Model	88
<b>5. Situational Determinants of the Effects of Stress</b>	<b>89</b>
Introduction	89
Situational Determinants of Performance in Stress	90
Task Factors	90
Task Complexity as a Determinant of Impact	90
Task Appropriateness	92
Task Requirements	93
Concurrent State	94
Biological States	94

Psychological States	109
Duration and Performance	116
The Operation of Situational Factors in the Composite Model	117
The Locus of Action of Operational Modes	119

## 6. Stress and Plan Running 120

Introduction	120
The Microstructure of Performance Efficiency: Errors and Blocks	121
Central Decision and the Speed/Accuracy Trade-off	121
Timing of Decision and Speed/Accuracy Microstructure	124
Stress and Degraded Evidence	129
Error Types and Criterion Placement	129
Error and Slowness within the Context of Plans	131
Error Detection and the Origin of Errors	131
Daily Lapses	134
Stress and Fundamental Planning Failures	136
Lapses and the Detection of Lapses in Daily Life	136
Stressful Conditions and Planning Operations	142
The Capture of Existing Inefficiencies	144
Running State and Performance on Complex Tasks	144
Running State, Performance Competence, and Control	147
Evidence for the Assessment of Control	147
Stress, Error Detection, and Control	148

## 7. Stress and Plan Ingredients 152

Introduction	152
Economy of Effort	153
Cognitive Economies	154
Efficient Allocation of Energy and Information Resources	155
Economies and the Reduction of Effective Demand	155
Stress and Strategy	156
Plan Ingredients in Stressful Conditions	158
Changes in Attention Deployment	159
Attentional Selectivity on Multisource Tasks	160
Explanations of Attentional Selectivity	164
Changes in Learning and Memory	166
Intentional Learning	166
Incidental Learning	167
Stress and Memory Efficiency	167

Stress and the Data Base for Perception of Control	171
Objective Changes in the Locus of Control	171
Changes in the Perception of Control in Stress	173
Attention, Memory, and the Perception of Control	173
Pessimistic "Generator Bias" in Stress	174
Basic Premises of the Stress/Performance Relationship	182

## **8. Loss of Control in Stress**      184

Introduction	184
The Implementation of Stress Loops	184
Primary Feedback Loops	184
Secondary Feedback Loops	186
The "Illusion of Control"	187
The Rules of Optimism	190
Tertiary Feedback Loops	196
Total Incompetence and Crisis	198
Crisis and Models of Mental Disorder	198
Crisis and Different Aspects of Control	200

## **9. Control Decisions and Vulnerability**      203

Introduction	203
Predisposing and Precipitating Factors and Risk	204
Difficulties in Definition	204
The Effect of Immediate Stress	206
Crisis Theory and the Role of Precipitants	209
Predisposing Factors and Vulnerability	210
Early Loss	210
Circumstantial Factors	212
Risk Factors and Crisis	214
Mediating Links	214
Behavioral Links	214
Biological Links	215
Vulnerability as an Aspect of Decision Making	215
Control Ideology	218
The Principles of the Hierarchical Control Model	219
The Representation of Life Events in Decision	221

<b>10. Decisions, Attributions, and Disorders</b>	<i>224</i>
Illogical Decision Processes in Stress	<i>224</i>
Optimism in Normals	<i>228</i>
Pessimism in Depressed Individuals	<i>228</i>
Work Stress and Decision Processes	<i>235</i>
Different Levels and Functions of Control	<i>235</i>
The Ameliorating Role of Independent Variables	<i>236</i>
Social Support	<i>236</i>
External Leisure Activities	<i>238</i>
Rewards	<i>238</i>
Patterns of Outcome in Stress Scenarios	<i>239</i>
“The Struggle for Control”	<i>240</i>
Loss of Control	<i>242</i>
Control by Avoidance	<i>246</i>
<b>Final Summary</b>	<i>247</i>
<b>References</b>	<i>249</i>
<b>Author Index</b>	<i>272</i>
<b>Subject Index</b>	<i>282</i>
