Preface	xv
1 Historical Context	1
2 Research on Survivors and Their Families: An Overview	13
3 The Montreal Surveys	31
4 Long-Term Effects on Survivors	51
5 The Second Generation	87
6 The Third Generation	151
7 Summary and Conclusions	163
Appendix A: Coding for Effects of World War II on Respondents' Parents	173
Appendix B: Coding for Sociopolitical Variables—First Generation Study	177
Appendix C: Questions Used to Assess Knowledge of World War II	181
References	183
Index	195
About the Authors	203

Tables

3.1	Community Sample of Survivors and Comparison Groups: Results of Fieldwork	39
3.2	Demographic Characteristics of Survivors and Comparison Groups	40
3.3	Community Sample of Adult Children of Survivors and Comparison Groups: Results of Fieldwork	43
3.4	Demographic Characteristics of Adult Children of Survivors and Comparison Groups	44
3.5	Demographic Characteristics of Clinic Sample of Grandchildren of Survivors and Their Parents	48
4.1	Langner Scores and Visits to the Doctor for Holocaust Survivors and Controls, by Sex	52
4.2	Holocaust Survivors and Comparison Subjects with Positive Responses to Langner Scale Items	55
4.3	Langner Scores for Male Holocaust Survivors and Controls, by Age Group	56
4.4	Percentage of Males in Hiding or Armed Resistance by Questionnaire Item or Variable Chosen to Reflect Active or Passive Coping Style	60

4.5	Percentage of Children of Holocaust Survivors, of Other Immigrant Jews, and of Native-Born Jews Reporting Effects of World War II on Their Parents and Themselves	65
4.6	Reported Percentage of Effects on Parents by Coding Category	67
4.7	Mean Factor Loading of Items Used for Respondents' Ratings of Their Parents' Personalities	74
4.8	Economic Achievement: Comparison of Survivors, Immigrants, and Natives	77
4.9	Standardized Betas: Independent Effects of Being a Holocaust Survivor	78
4.10	Segregation by Respondent Group and by Perceived Level of Anti-Semitism	80
4.11	Level of Perceived Anti-Semitism: Comparison of Survivors, Immigrants, and Natives	82
4.12	Political and Economic Satisfaction: Comparison of Survivors, Immigrants, and Natives	83
4.13	Probability of Emigration within Five Years: Comparison of Survivors, Immigrants, and Natives	85
5.1	Percentage of Specified Responses to Some Measures of the Relationship between Respondents and Their Families	90
5.2	Means and Standard Deviations for Questions Dealing with Marital Relations	100
5.3	Means, Standard Deviations, and Percentages of Subjects Falling Above Cutting Point for PERI by Group and Sex	103
5.4	Reported Percentage of Effects of World War II on COS by Coding Category	108
5.5	Means and Standard Deviations of Personality Factor Scores of Survivor Parents Whose Children Did and Did Not Seek Professional Help for Personal Problems, by Parental Personality Type	116
5.6	Respondents' Education by Group	122
5.7	Respondents' Present Occupation by Group	123
5.8	Fathers' Occupational History by Group	124
5.9	Knowledge of World War II Events, Prominent People, and Concentration Camps	130

5.10	Information-Seeking Behavior	132
5.11	Mean Scores on Information Seeking and Knowledge of Aspects of World War II History Controlled for Perceived Effect on Parental Experiences during World War II	134
5.12	Pearson Correlation Coefficients for Education, Religiosity, and Cognitive Variables	140
5.13	Mean Scores of Sociopolitical Attitudes for Sample Groups and Subgroups Controlled for Perceived Effect of Parental Experiences during World War II	141
5.14	Standardized Betas for Regression Equations	143
5.15	Percentage of Respondents Answering "Yes" to Stouffer Question "If _____ Wanted to Make a Speech in Your Community, Should They Be Allowed to Speak or Not?"	145
6.1	Problem Areas in Index 2 Children Reported by Parents or School	153
6.2	Factor Loadings and Cronbach Alphas for Child Behavior Items: Community Sample	158
6.3	Means and Standard Deviations for Factor Scores of Personality Variables for GCOS and GCON: Community Sample	160
