<i>Preface to the Revised Edition</i>	xii
<i>Preface</i>	xv
<i>Acknowledgments</i>	xxi

## **BOOK I: The discovery of stress**

<b>1. Precursors of the stress concept</b>	<b>3</b>
<i>What is stress? Pónos—the toil of disease. “Homeostasis”—the staying power of the body.</i>	
<b>2. My first glimpse of stress</b>	<b>15</b>
<i>How to question Nature. Great hopes. Great disappointment.</i>	
<b>3. The birth of the G.A.S.</b>	<b>29</b>
<i>The first publication on the stress syndrome. A word about discovery. The search for a name.</i>	

## **BOOK II: The dissection of stress**

<b>4. Blueprint for dissection</b>	<b>57</b>
<i>The facts. Abstractions and definitions. Materials and techniques.</i>	
<b>5. Dissecting a biologic mechanism</b>	<b>97</b>
<i>Interrelations in the endocrine system. Basic mechanisms of stress reactions. The essence of the stress response.</i>	
<b>6. Stress and inflammation</b>	<b>129</b>
<i>Forms of inflammation. The structure of inflammation. The purpose of inflammation. The regulation of inflammation: relations between the L.A.S. and the G.A.S.</i>	
<b>7. Synoptic view of the whole stress mechanism</b>	<b>145</b>

- 8. The nature of adaptation** 159  
*Adaptation is always a concentration of effort at the site of demand. Implications of the spatial concept of adaptation.*

### ***BOOK III: The diseases of adaptation***

- 9. The signs of danger** 171  
*Medical symptoms. Self-observable signs.*

- 10. Diseases of the kidney, the heart,  
and the blood vessels** 179  
*The chickens: disease caused by corticoids. Pituitary hormones can produce renal and cardiovascular diseases. The role of the adrenals in the spontaneous renal and cardiovascular diseases of man. Metacorticoid hypertension. Eclampsia. The sudden heart attack.*

- 11. Inflammatory diseases** 213  
*The inflammatory pouch test. The anti-inflammatory hormones. The proinflammatory hormones. Effect of general stress on a local disease condition. Focal infection can cause generalized disease. The experimental arthritis tests. Rheumatic and rheumatoid diseases of man. Inflammatory diseases of the skin and the eyes. Infectious diseases. Allergic and hypersensitivity diseases.*

- 12. Other diseases** 247  
*Nervous and mental diseases. Sexual derangements. Digestive diseases. Metabolic diseases. Cancer. Diseases of resistance in general. Malformations and aging.*

- 13. "When scientists disagree"** 277  
*On scientific debate. Debates about the stress concept.*

### ***BOOK IV: Sketch for a unified theory***

- 14. The search for unification** 313  
*The value of unification. Stress and the relativity of disease.*

- 15. Unification through the stress  
concept** 329

*Stress and adaptation. Stress and growth. Stress and specificity. The structural unit of life: the cell. The functional unit of life: the reacton. Analysis and synthesis of cellular disease. Possibilities and limitations of the reacton hypothesis. The continued importance of in vivo research.*

## 16. Apologia for teleologic thought in biology and medicine 355

*What do we mean by "understanding" something? Purposeful causation. Recapitulation and conclusions.*

### *BOOK V: Implications and applications*

## 17. The stressors of daily life 369

*Occupation. Climate and environment.*

## 18. Medical implications of the stress concept 397

*Stress as a common denominator of biologic activity. Basic tenets for a new type of medicine.*

## 19. Psychosomatic implications 405

*To know thyself and be thyself. Dissect your troubles. Soma-topsyche vs. psychosomatic. On being keyed up. How to tune down. Stress as an equalizer of activities. The stress quotient. The importance of deviation. Innate vitality must find an outlet. How to sleep.*

## 20. Philosophic implications 427

*Facing the demands of life: defense, offense, wear and tear. To die of old age. The origin of individuality. The need for self-expression. What are man's ultimate aims? Greatness and excellence. The philosophy of gratitude. The principle of altruistic egoism. Success formula?*

## 21. The road ahead 457

## Glossary 463

## Annotated References 475

## Index 499
