Figures and Tables	ix
Foreword by Edward L. Beach	xi
Preface	xv
1. Overview	1
Philosophical Positions Related to Stress	1
New Perspectives for the Study of Stress	3
2. Theoretical Roots of the ABC Model	7
The Human Environment as a Force Field	7
3. The ABC Model of Stress	13
Classes of Processes Making Up POSR (Patterns of Stress Reactivity)	20
The Psychophysiology of Emotions	21
4. Basic Equations Suggested by the ABC Model	33
5. Classification of Stressors Based on the ABC Model	37
6. Acute and Chronic Effects of Stress	41
Classification of Stress-Related Illnesses by the American Psychiatric Association	43
7. The Assessment of Individual Differences in SCC (Stress Coping Capacity)	47
SCC Estimated from Pain/Discomfort Tolerance Tests	47
SCC Estimated from Simulator Performance	49
SCC Estimated from AR (Adaptive Resources)	49

SCC Estimated from Moderator Variables	55
Experimental Tests for Measuring SCC	58
8. Prevention and Treatment of Stress (POSR)	77
Strategies for the Prevention of POSR	77
Strategies for the Treatment of POSR	97
Brief Description of a Range of IVP's	106
A Do-It-Yourself IVP for POSR Reduction	106
Gadgetry for POSR for the Layperson	119
9. Methodological Innovations for Stress Research	125
Scientific Method and POSR	125
Evaluation of Research Proposals on Stress	127
Factor Analysis and Stress Research	128
The Stair-Stepping Hypothesis	145
Methodology for the SIRO Procedure	147
10. Looking Forward by Looking Backward: The ABC Solution	153
Educational Deficiencies and the ABC Model	153
Creativity and the ABC Model of Stress	157
Leadership Behavior and the ABC Model	163
Drug Abuse and the ABC Model	167
Causes of Wars and the ABC Model	176
11. A Brief Summary	185
Appendix A: PIB (Personal Inventory Barometer)	187
Appendix B: Affective Response Inventory	188
Appendix C: Weybrew Activity Inventory	189
Appendix D: Incomplete Sentences	191
Appendix E: Submariner Frustration Test	193
Appendix F: Submariner Tell-a-Story Test	194
Appendix G: Submariner Stereotype Test	195
Appendix H: Submariner Mirth Response Test	196
Appendix I: Submariner Attitude Questionnaire	197
Appendix J: Stress Research Proposal Evaluation Form	198
Glossary of Stress-Related Terms and Acronyms	199
References	205
Index	213

Figures and Tables

FIGURES

2.1	Human Phenomenal Environment Depicted as a Force Field	8
3.1	ABC Model of Stress	14
3.2	Consequences “C” in ABC Model	18
3.3	The Human Nervous System	22
3.4	The Psychosomatic/Somatopsychic Vicious Circle	29
6.1	Acute and Chronic Effects of Exposure to High-SEP Stressors	42
7.1	Global Trait Rating System	54
7.2	Submarine Crewmember’s Cartoon	69
9.1	Seven Types of Factor Analyses Used in Stress Research	130
9.2	Plot of the Factor Scores for the Eighty-Day Global Circumnavigation of the <i>Triton</i>	137
9.3	Schematic Representation of the Stair-Stepping Hypothesis	146
10.1	MMPI Profiles for the Submariner DA and Control Group and Two Civilian DA Groups	171

TABLES

3.1	Comparison of the Anatomical and Functional Characteristics of the Two Subsystems of the Autonomic Nervous System	24
3.2	Functional Relationships of SNS and PNS Activity to Selected Organs and Body Structures	26

3.3	Components of POSR (Patterns of Stress Reactivity)	28
5.1	Classification of Stressors Based upon the ABC Model	38
8.1	Phases in the Introduction of a Variety of IVP's (Intervention Procedures) for the Treatment of Acute Stress Reactions	99
8.2	IVP's (Intervention Procedures) for POSR	107
9.1	Correlation Matrices and Rotated Factor Loadings for Three Diver-Subjects	134
9.2	Factor Loadings for the Adjectives and Behavioral Statements Rated Daily during the World Circumnavigation of the Submarine <i>Triton</i>	136
9.3	Hypothetical SIRO Data for Two Desert Shield Soldiers	150
