Chapter 1 Lay and Scientific Theories	1
1.1 Introduction	1
1.2 Differences between “lay” and “scientific” theories	2
(1) Explicitness and formality	3
(2) Coherent and consistent	3
(3) Verification vs falsification	4
(4) Cause and consequence	4
(5) Content vs process	5
(6) Internal (individualistic) vs external (situational)	5
(7) General vs specific	6
(8) Strong vs weak	7
1.3 The study of lay theories of human behaviour	7
(1) The aetiology or development of lay beliefs	8
(2) The relationship between lay beliefs	8
(3) The function of lay beliefs	9
(4) The stability and consistency of lay beliefs	10
(5) The consequences of lay beliefs	10
(6) The changing of lay beliefs	11
(7) The manipulation of lay beliefs	11
(8) The structure of lay beliefs	12
(9) Lay beliefs about social behaviour vs social scientists’ beliefs about lay behaviour	12
1.4 Some definitional distinctions	13
1.5 How does one measure, assess or investigate lay theories?	16
(1) Self-report	17
(2) Test data	18
(3) Observing behaviour	19
1.6 Conclusion	19
Chapter 2 Common Sense and Human Nature	22
2.1 Introduction	22
2.2 Common sense	24
2.3 Human nature	33
2.4 Two approaches to understanding lay theories (world views, cognitive systems)	38
(1) Content	38
(2) Process	40
2.5 Information gathering and hypothesis testing	42
2.6 Conclusion	46
Chapter 3 Lay Theories in Psychology	47
3.1 Introduction	47
3.2 Knowledge of psychological principles	50
3.3 Changes over time	56
3.4 Personality and individual differences	61
3.5 Intelligence	65
3.6 Conclusion	71

Chapter 4 Lay Theories in Psychiatry	73
4.1 Introduction	73
4.2 Attitudes to, and concepts of, mental health	74
4.3 Attributions for addiction	78
(1) Alcoholism	79
(2) Nicotine	85
4.4 Explanations for depression	89
4.5 Explanations for neuroticism	93
4.6 The attribution of cure	97
4.7 Conclusion	103
Chapter 5 Lay Theories in Medicine	105
5.1 Introduction	105
5.2 Cultural determinants of health beliefs	107
(1) Anatomy and physiology	108
(2) Food, diet and nutrition	108
(3) Pain and discomfort	109
(4) Pharmacology	109
5.3 Health beliefs	110
5.4 Doctor-patient communication	113
5.5 Specific beliefs	117
(1) Health locus of control	117
(2) Just world beliefs and victims of illness	118
5.6 Lay theories of specific illnesses	119
(1) Obesity	119
(2) Diabetes	120
(3) Alzheimer's disease	121
(4) Lung cancer	122
5.7 Conclusion	123
Chapter 6 Lay Theories in Economics	125
6.1 Introduction	125
6.2 Developmental studies	128
6.3 Studies on adult economic beliefs	130
(1) Explaining the causes of unemployment	130
(2) Explanations for poverty	136
(3) Explanations for wealth	141
(4) Explanations for inflation	145
6.4 Conclusion	148
Chapter 7 Lay Theories in Statistics	150
7.1 Introduction	150
7.2 The failure of intuition	151
(1) Representativeness	152
(2) Availability	153
(3) Adjustment and anchoring	153
7.3 Lay psychometrics	154
7.4 Gambling	159
7.5 Limitations and artefacts of the current research	162
(1) Information presentation vs search	163
(2) The context of calculation	163
(3) The role of experience	164
7.6 Conclusion	164

Chapter 8 Lay Theories in Law	166
8.1 Introduction	166
8.2 Attribution theory	167
8.3 Lay theories of delinquency and deviance	170
8.4 Theories of justice	174
(1) Equity theory	174
(2) Justice motives	175
(3) Ethical ideologies	176
8.5 Attitudes to punishment	177
8.6 Legal reasoning	180
8.7 Fear of crime	181
8.8 Is there a criminal type?	185
8.9 The police, the public and crime	186
8.10 Conclusion	187
Chapter 9 Lay Theories in Education	189
9.1 Introduction	189
9.2 Common sense	192
9.3 Divergent perspectives	193
9.4 Teacher expectations: fulfilling prophesies and confirming theories	196
9.5 Parents' beliefs	200
9.6 Pupils' perceptions and expectations	202
9.7 Beliefs about the causes of success and failure	204
9.8 Conclusion	205
Chapter 10 Conclusion	207
10.1 Introduction	207
10.2 A terminological note	209
10.3 Common sense	211
10.4 Constructionism and ethnomethodology	212
10.5 Current research concerns	213
(1) Everyday knowledge of particular issues	214
(2) The structure of implicit taxonomies	214
(3) Information search and lay-hypothesis testing	215
(4) Self-other discrepancies	215
(5) The taxonomisation of explanations	215
10.6 Amateurs, hobbyists and avocational scientists	216
10.7 The lay psychometrician	217
10.8 Lay theories and memory	217
10.9 Errors in lay thinking: the art of doubt	218
(1) The Barnum effect	218
(2) Bogus psychologists and their techniques	219
10.10 The self-presentation of lay theories	221
10.11 The communication of scientific information to non-scientists	223
10.12 Selling and marketing pet theories	223
10.13 Choosing, using and formulating theories	226
