<b>Introduction</b> .....	xi
<b>Chapter 1 Aerosol Physical Attributes</b> .....	1
1.1 Introduction .....	1
1.2 Brownian motion .....	1
1.3 Electrical gradient .....	2
1.4 Gravitational field .....	4
1.5 Inertial forces .....	8
1.6 Electromagnetic radiation .....	12
1.7 Particle refractive index and particle density .....	13
1.8 Thermal gradients .....	14
1.9 Hygroscopicity and humidity .....	14
1.10 Conclusions .....	22
References .....	22
<b>Chapter 2 Laboratory Techniques</b> .....	24
2.1 Introduction .....	24
2.2 Strain of microorganism .....	25
2.3 Growth of microorganisms .....	26
2.4 Aerosol generation .....	27
2.5 Aerosol particle size .....	28
2.6 Spray fluids .....	30
2.7 Aerosol storage .....	31
2.8 Aerosol collection .....	34
2.9 Collecting fluids .....	37
2.10 Rehumidification .....	41
2.11 Viability assay and tracers .....	42
2.12 Infectivity assay .....	45
2.13 Conclusions .....	46
References .....	46
<b>Chapter 3 Aerosol Samplers</b> .....	50
3.1 Introduction .....	50
3.2 Efficiency of sampling .....	50
3.3 Isokinetic sampling .....	52

3.4	Stagnation point sampling .....	55
3.5	Impingers .....	55
3.6	Impactors .....	59
3.7	Stacked sieve samplers .....	65
3.8	Centrifugal samplers .....	66
3.9	Electrostatic samplers .....	69
3.10	Thermal precipitators .....	71
3.11	Filters .....	72
3.12	Sequential and tape samplers .....	73
3.13	High volume samplers .....	74
3.14	Calibration methods .....	75
3.15	Conclusions .....	76
	References .....	77
<b>Chapter 4</b>	<b>Aerosol Monitoring Methods .....</b>	<b>80</b>
4.1	Introduction .....	80
4.2	Physical methods .....	80
4.3	Microbiological methods .....	85
4.4	Conclusions .....	86
	References .....	87
<b>Chapter 5</b>	<b>Aerosol Particle Sizing .....</b>	<b>88</b>
5.1	Introduction .....	88
5.2	Aerosol dispersity .....	88
5.3	Definition of size .....	89
5.4	Particle size distributions .....	90
5.5	Inertial classification .....	95
5.6	Microscopic and image analysis .....	100
5.7	Real time particle sizers and counters .....	103
5.8	Particle sizes of inhaled particles .....	106
5.9	Conclusions .....	106
	References .....	107
<b>Chapter 6</b>	<b>Biohazard Control: Containment, Ventilation and Isolation</b>	<b>108</b>
6.1	Introduction .....	108
6.2	Air purification .....	112
6.2.1	Purification processes .....	112
6.2.2	Air sterilization processes .....	118
6.3	Containment .....	120
6.3.1	Laboratory systems .....	120
6.3.2	Testing safety cabinets .....	124
6.3.3	Aerosol holding chambers .....	126
6.3.4	Rooms and buildings .....	126
6.3.5	Animal holding facilities .....	127
6.4	Air curtains and douches .....	127

6.5	Transmission in hospitals .....	128
6.6	Ventilation systems .....	130
6.7	Isolation systems .....	131
6.8	Conclusions .....	133
	References .....	134
<b>Chapter 7</b>	<b>Field Techniques .....</b>	<b>138</b>
7.1	Introduction .....	138
7.2	Agricultural aerosols .....	138
7.3	Field aerosol sampling and sizing techniques .....	140
7.4	Conclusions .....	141
	References .....	141
<b>Chapter 8</b>	<b>Aerial Transport .....</b>	<b>143</b>
8.1	Introduction .....	143
8.2	Air movements indoors .....	143
8.3	Atmospheric layers .....	143
8.4	Air movements outdoors .....	143
8.5	Theoretical models .....	148
8.6	Comparisons between practice and theory .....	152
8.7	Conclusions .....	154
	References .....	154
<b>Chapter 9</b>	<b>Take-off and Landing .....</b>	<b>157</b>
9.1	Introduction .....	157
9.2	Take-off processes .....	157
9.2.1	Talking, coughing and sneezing .....	157
9.2.2	Dispersal from surfaces .....	158
9.3	Landing on surfaces .....	159
9.4	Respiratory system .....	160
9.4.1	Regions .....	160
9.4.2	Cells and tissues .....	163
9.5	Inhalation and deposition .....	164
9.6	Respiratory tract clearance .....	167
9.7	Conclusions .....	169
	References .....	170
<b>Chapter 10</b>	<b>Relative Humidity and Temperature .....</b>	<b>172</b>
10.1	Introduction .....	172
10.2	Phages .....	172
10.3	Viruses .....	177
10.4	Bacteria .....	180
10.5	Biochemical studies with bacteria .....	189
10.6	Other microorganisms .....	193
10.7	Kinetic model .....	194

10.8	Temperature .....	198
10.9	Conclusions .....	199
	References .....	201
<b>Chapter 11</b>	<b>Oxygen .....</b>	<b>206</b>
11.1	Introduction .....	206
11.2	Biochemical studies .....	207
11.3	Kinetic models .....	210
11.4	Free radicals .....	214
11.5	Conclusions .....	217
	References .....	217
<b>Chapter 12</b>	<b>The Open Air Factor .....</b>	<b>218</b>
12.1	Introduction .....	218
12.2	Kinetic model .....	222
12.3	Nature of OAF .....	226
12.4	Causes of death .....	227
12.5	Conclusions .....	228
	References .....	229
<b>Chapter 13</b>	<b>Other Environmental Parameters .....</b>	<b>230</b>
13.1	Introduction .....	230
13.2	Air movements .....	230
13.3	Pressure fluctuations .....	231
13.4	Air ions .....	232
13.5	Radiation .....	232
13.6	Pollutants .....	234
13.7	Conclusions .....	235
	References .....	235
<b>Chapter 14</b>	<b>Repair .....</b>	<b>238</b>
14.1	Introduction .....	238
14.2	Repair of surface structures .....	238
14.3	Repair of transport activity .....	240
14.4	Repair of radiation damage .....	241
14.5	Repair-deficient mutants .....	242
14.6	Effects due to repair .....	242
14.7	Conclusions .....	242
	References .....	242
<b>Chapter 15</b>	<b>Infectivity .....</b>	<b>244</b>
15.1	Introduction .....	244
15.2	Aerosol particle size and host susceptibility .....	244
15.3	Virulence .....	247
15.4	Natural resistance .....	248

15.5	Immunological factors .....	248
15.6	Respiratory immunization .....	249
15.7	Microbial survival in animals .....	250
15.8	Experimental pathogenicity .....	250
15.9	Conclusions .....	251
	References .....	252
<b>Chapter 16</b>	<b>Catastrophe Theory .....</b>	<b>255</b>
16.1	Introduction .....	255
16.2	Catastrophe theory and denaturation kinetics .....	259
16.3	Catastrophe theory applied to analysis of the role of temperature .....	262
16.4	Catastrophe theory and more complex denaturation kinetics .....	270
16.5	Catastrophe theory and oxygen-induced loss of viability .....	271
16.6	Catastrophe theory and OAF-induced loss of viability .....	271
16.7	Catastrophe theory and repair .....	272
16.8	Conclusions .....	273
	References .....	274
<b>Chapter 17</b>	<b>The Aerobiological Pathway in Practice .....</b>	<b>275</b>
17.1	Introduction .....	275
17.2	Human health .....	275
17.3	Animal and crop disease .....	276
17.4	Microbiology .....	276
17.5	Microbial contamination .....	277
17.6	Genetic engineering .....	278
17.7	Biological control of insects and pests .....	278
17.8	Conclusions .....	279
	<b>Glossary of terms .....</b>	<b>280</b>
	<b>Index .....</b>	<b>285</b>
