

Contents

- Preface..... xi**

- 1 Our Hunger for Energy 1**
- 1.1 Energy Supply – Yesterday and Today 2
 - 1.1.1 From the French Revolution to the Early 20th Century 2
 - 1.1.2 The Era of Black Gold 4
 - 1.1.3 Natural Gas – the Newest Fossil Energy Source 7
 - 1.1.4 Nuclear Power – Split Energy 9
 - 1.1.5 The Century of Fossil Energy 12
- 1.2 Energy Needs – Who Needs What, Where and How Much? 13
- 1.3 ‘Anyway’ Energy..... 16
- 1.4 Energy Supplies – Wealth Forever 19
- 1.5 The End of Fission 21
- 1.6 Oil Prices Today – Politics, Supply and Demand 22

- 2 The Climate Before the Collapse? 24**
- 2.1 It Is Getting Warm – Climate Changes Today 24
 - 2.1.1 The Ice is Slowly Melting 24
 - 2.1.2 Natural Catastrophes Occur More Frequently 26
- 2.2 The Guilty Parties – Causes of Climate Change 29
 - 2.2.1 The Greenhouse Effect 29
 - 2.2.2 The Prime Suspect: Carbon Dioxide..... 30
 - 2.2.3 Other Culprits 34
- 2.3 Outlook and Recommendations – What Lies Ahead? 37
 - 2.3.1 Will It be Bitterly Cold in Europe?..... 39
 - 2.3.2 Recommendations for Effective Climate Protection..... 42
- 2.4 Difficult Birth – Politics and Climate Change..... 42
 - 2.4.1 German Climate Policy..... 42
 - 2.4.2 International Climate Policy 44
- 2.5 Self-Help Climate Protection 46

3	From Wasting Energy to Saving Energy and Reducing Carbon Dioxide.....	47
3.1	Less Efficient – Energy Use and Waste Today	47
3.2	Personal Energy Needs – Easily Saved at Home.....	50
3.2.1	Domestic Electricity – Money Wasted.....	50
3.2.2	Heat – Surviving the Winter with Almost No Heating.....	54
3.2.3	Transport – Getting Somewhere Using Less Energy.....	58
3.3	Industry and Co – Everyone Else is to Blame	61
3.4	The Personal Carbon Dioxide Record	62
3.4.1	Emissions Caused Directly by One’s Own Activities	62
3.4.2	Indirectly Caused Emissions	63
3.4.3	Total Emissions.....	65
3.5	The Sale of Ecological Indulgences.....	67
4	Carbon-Free Energy – Vision or Utopia?	70
4.1	Options for Carbon-Free Energy Supply.....	70
4.1.1	Efficient Power Plants – More Power with Less Carbon Dioxide.....	70
4.1.2	Carbon Dioxide Sequestering – Away with Carbon Dioxide.....	72
4.1.3	Nuclear Energy – Squeaky Clean.....	74
4.1.4	Combined Heat and Power – Using Fuel Twice	75
4.1.5	Saving Energy – Achieving More with Less	76
4.2	Renewable Energy Sources – No End to What is Available.....	77
4.3	Options for Protecting the Climate	79
4.3.1	Down with Primary Energy Needs.....	79
4.3.2	Electricity Generation Totally Without Nuclear and Fossil Power Plants.....	81
4.3.3	Insulation and Renewable Energies to Provide Heat	82
4.3.4	Increasing Efficiency and New Concepts for Traffic.....	83
4.4	Reliable Supply Using Renewable Energies	84
5	Photovoltaics – Energy from Sand	87
5.1	Structure and Function	88
5.1.1	Electrons, Holes and Space-Charge Regions	88
5.1.2	Efficiency, Characteristics and MPP	90
5.2	Production of Solar Cells – from Sand to Cell.....	92
5.2.1	Silicon Solar Cells – Electricity from Sand.....	92
5.2.2	From Cell to Module	94
5.2.3	Thin Film Solar Cells	95
5.3	Photovoltaic Systems – Networks and Islands.....	96
5.3.1	Sun Islands.....	96
5.3.2	Sun in the Grid	99
5.4	Planning and Design.....	103
5.4.1	Planned on the Grid.....	103
5.4.2	Planned Islands.....	107

5.5	Economics.....	109
5.5.1	What Does It Cost?.....	109
5.5.2	Incentive Schemes	111
5.6	Ecology	112
5.7	Photovoltaic Markets	113
5.8	Outlook and Development Potential.....	114
6	Solar Thermal Systems – Year-Round Heating from the Sun ...	116
6.1	Structure and Functionality	118
6.2	Solar Collectors – Collecting the Sun.....	120
6.2.1	Swimming Pool Absorbers	120
6.2.2	Flat-Plate Collectors	121
6.2.3	Air-Based Collectors.....	122
6.2.4	Vacuum-Tube Collectors.....	123
6.3	Solar Thermal Systems	125
6.3.1	Hot Water from the Sun.....	125
6.3.2	Heating with the Sun.....	128
6.3.3	Solar Communities	130
6.3.4	Cooling with the Sun	130
6.3.5	Swimming with the Sun.....	131
6.3.6	Cooking with the Sun.....	133
6.4	Planning and Design	133
6.4.1	Solar Thermal Heating of Domestic Hot Water.....	134
6.4.2	Solar Thermal Heating as Support Heating	136
6.5	Economics	138
6.6	Ecology	139
6.7	Solar Thermal Markets	140
6.8	Outlook and Development Potential.....	142
7	Solar Power Plants – Even More Energy from the Sun.....	144
7.1	Concentration on the Sun	145
7.2	Solar Power Plants.....	147
7.2.1	Parabolic Trough Power Plants.....	147
7.2.2	Solar Tower Power Plants	150
7.2.3	Dish-Stirling Power Plants.....	153
7.2.4	Solar Chimney Power Plants	153
7.2.5	Concentrating Photovoltaic Power Plants.....	155
7.2.6	Solar Chemistry	155
7.3	Planning and Design.....	156
7.3.1	Concentrating Solar Thermal Power Plants.....	157
7.3.2	Solar Chimney Power Plants	158
7.3.3	Concentrating Photovoltaic Power Plants.....	158
7.4	Economics.....	158
7.5	Ecology	160
7.6	Solar Power Plant Markets	161
7.7	Outlook and Development Potential.....	162

8	Wind Power Systems – Electricity from Thin Air	165
8.1	Gone with the Wind – Where the Wind Comes From.....	166
8.2	Utilizing Wind.....	168
8.3	Installations and Parks.....	173
	8.3.1 Wind Chargers.....	173
	8.3.2 Grid-Connected Wind Turbines.....	174
	8.3.3 Wind Farms.....	178
	8.3.4 Offshore Wind Farms.....	179
8.4	Planning and Design.....	182
8.5	Economics.....	184
8.6	Ecology.....	187
8.7	Wind Power Markets.....	188
8.8	Outlook and Development Potential.....	189
9	Hydropower Plants – Wet Energy	191
9.1	Tapping into the Water Cycle.....	192
9.2	Water Turbines.....	194
9.3	Hydropower Plants.....	197
	9.3.1 Run-of-River Power Plants.....	197
	9.3.2 Storage Power Plants.....	198
	9.3.3 Pumped-Storage Power Plants.....	200
	9.3.4 Tidal Power Plants.....	201
	9.3.5 Wave Power Plants.....	202
	9.3.6 Ocean Current Power Plants.....	203
9.4	Planning and Design.....	204
9.5	Economics.....	206
9.6	Ecology.....	206
9.7	Hydropower Markets.....	207
9.8	Outlook and Development Potential.....	209
10	Geothermal Energy – Power from the Deep	210
10.1	Tapping into the Earth’s Heat.....	210
10.2	Geothermal Heat and Power Plants.....	215
	10.2.1 Geothermal Heat Plants.....	215
	10.2.2 Geothermal Power Plants.....	216
	10.2.3 Geothermal HDR Power Plants.....	218
10.3	Planning and Design.....	219
10.4	Economics.....	220
10.5	Ecology.....	220
10.6	Geothermal Markets.....	221
10.7	Outlook and Development Potential.....	222
11	Heat Pumps – from Cold to Hot	223
11.1	Heat Sources for Low-Temperature Heat.....	223
11.2	Working Principle of Heat Pumps.....	226

11.2.1	Compression Heat Pumps.....	226
11.2.2	Absorption Heat Pumps and Adsorption Heat Pumps.....	227
11.3	Planning and Design.....	228
11.4	Economics.....	232
11.5	Ecology.....	233
11.6	Heat Pump Markets.....	235
11.7	Outlook and Development Potential.....	236
12	Biomass – Energy from Nature	237
12.1	Origins and Use of Biomass.....	238
12.2	Biomass Heating.....	241
12.2.1	Wood as a Fuel	241
12.2.2	Fireplaces and Closed Woodburning Stoves	245
12.2.3	Firewood Boilers.....	245
12.2.4	Wood Pellet Heating.....	246
12.3	Biomass Heat and Power Plants.....	248
12.4	Biofuels.....	250
12.4.1	Bio-oil	251
12.4.2	Biodiesel	251
12.4.3	Bioethanol.....	252
12.4.4	BtL Fuels	253
12.4.5	Biogas.....	254
12.5	Planning and Design.....	255
12.5.1	Firewood Boilers.....	256
12.5.2	Wood Pellet Heating	256
12.6	Economics.....	259
12.7	Ecology.....	260
12.7.1	Solid Fuels.....	260
12.7.2	Biofuels.....	262
12.8	Biomass Markets	263
12.9	Outlook and Development Potential.....	264
13	The Hydrogen Industry and Fuel Cells.....	265
13.1	Hydrogen as an Energy Source	266
13.1.1	Production of Hydrogen	267
13.1.2	Storage and Transport of Hydrogen	269
13.2	Fuel Cells: Bearers of Hope.....	270
13.3	Economics.....	272
13.4	Ecology	273
13.5	Markets, Outlook and Development Potential	274
14	Sunny Prospects – Examples of Sustainable Energy Supply	276
14.1	Climate-Compatible Living	276
14.1.1	Carbon-Neutral Standard Prefabricated Houses	277

Contents

14.1.2 Plus-Energy Solar House..... 278
14.1.3 Plus-Energy Housing Estate 279
14.1.4 Heating Only with the Sun..... 279
14.1.5 Zero Heating Costs after Redevelopment 280
14.2 Working and Producing in Compatibility with the Climate 281
14.2.1 Offices and Shops in Solar Ship..... 281
14.2.2 Zero-Emissions Factory..... 282
14.2.3 Carbon-Free Heavy Equipment Factory..... 283
14.3 Climate-Compatible Driving 284
14.3.1 Waste Gas-Free Electropower..... 284
14.3.2 Travelling around the World in a Solar Mobile 285
14.3.3 Across Australia in Thirty-Three Hours..... 286
14.3.4 Game over CO₂!..... 287
14.4 Climate-Compatible Travel by Water or Air 288
14.4.1 Modern Shipping 288
14.4.2 Solar Ferry on Lake Constance..... 289
14.4.3 World Altitude Record with a Solar Aeroplane 290
14.4.4 Flying around the World in a Solar Plane..... 291
14.4.5 Flying for Solar Kitchens 292
14.5 Carbon-Free Electricity for an Island..... 293
14.6 All's Well that Ends Well..... 294

Appendix 296
A.1 Energy Units and Prefixes 296
A.2 Geographic Coordinates of Energy Power Plants 297
