# Contents

**Lists of figures and tables xi**

**Preface xiii**

**Acknowledgements xv**

**Abbreviations and technical terms xvii**

**1 Introduction 1**

**2 21st-century libraries 5**
Recent library developments 5
Planning for now and the future 8
Planning for leaner times 13
Common elements of new library buildings 14

**3 Developing a business case 19**
Content 19
Information sources 21
Ensuring success 21
Risk analysis 24

**4 Project management 27**
Definition 27
Stages in a project 29
Management of risk 31
Balance of cost, quality and time 32
Time management 32
Project management techniques 34
Managing change 35
Managing the process – key issues 38

**5 The design/project team 43**
Team roles 43
Strong leadership 51
Team activities 52

**6 Selecting an architect 57**
General guidelines 58
Design competition 64
Criteria for architectural selection 65
Identifying the services needed 66
Project specification 67
Procurement processes 69

**7 Partnership and community engagement 73**
Partnership approaches 73
Funding opportunities 74
Consultation 75
Community engagement 76
Dual-use libraries 80

**8 The design brief 85**
Functions of the brief 85
Core elements 86
Outcome-based approach 87
Stages of development 88
Statement of aims 89
The outline brief 90
The detailed brief 92
Flexibility and adaptability 94
Amending the brief 94

**9 Design quality 97**
Urban design 97
Life expectancy of different functions of the building 98
Site selection 99
Building design 101
Environmental considerations 106
Security 108
Interior design 108
Ambience 110
Fixtures and fittings 110
Book stacks 112

ICT facilities 113
Study tables 114
Floor coverings 115
Maintenance 115

**10 Space planning and access 117**
Common adjacencies 119
Space requirements 121
Population and use data 123
Types of space 126
Design for accessibility 128
The Disability Discrimination Act 1995 129
The physical environment 129
Impact 131
Kits of parts 131

**11 Occupancy and post-occupancy evaluation 137**
Handover 137
Moving in 138
Evaluation 139
Monitoring energy consumption 141

**12 Building libraries for the future – a summary 143**

**Bibliography and further reading 147**
Texts 147
Websites 155

**Appendices 159**
Appendix 1 Glossary (including common terms used within the construction/building environment) 161
Appendix 2 Ambience – discussion checklist for librarians and architects 179
Appendix 3 Top ten tips 183
Appendix 4 Space adjacencies diagram 185

**Index 187**
