

CONTENTS

Introduction	vii–xiv	
Notes on the articles	xv–xvi	
Bibliography	xvii–xviii	
Acknowledgements	xix	
THE VERY LONG RUN		
I	Origins and species before and after Darwin <i>Companion to the History of Modern Science</i> , eds. R.C. Olby, G.N. Cantor, J.R.R. Christie and M.J.S. Hodge. London: Routledge, 1990	374–395
II	Canguilhem and the history of biology <i>Revue d'Histoire des Sciences</i> 53. Paris, 2000	65–81
COSMOGONIES AND ONTOLOGIES AFTER BUFFON		
III	Two cosmogonies (theory of the earth and theory of generation) and the unity of Buffon's thought <i>Buffon 88: Actes du colloque international pour le bicentenaire de la morte de Buffon</i> , ed. J. Gayon et al. Paris: Librairie <i>Philosophique Vrin</i> , 1992	241–254
IV	Lamarck's science of living bodies <i>British Journal for the History of Science</i> 5. Chalfont St Giles, 1971	323–352
V	Lamarck's great change of mind <i>Original English version of 'Lamarck: un grand changement de cadre conceptuel'</i> , <i>Nature, Histoire, Société: Essais en homage à Jacques Roger</i> , eds. C. Blanckaert, J-L. Fischer and R. Rey. Paris: Klincksieck, 1995, pp. 227–239	1–11

VI	The history of the earth, life, and man: Whewell and palaeological science <i>William Whewell: A Composite Portrait, eds. M. Fisch and S. Schaffer. Oxford: Clarendon Press, 1991</i>	255–288
VII	The universal gestation of nature: Chambers' <i>Vestiges and Explanations</i> <i>Journal of the History of Biology 5 (1). Cambridge, MA, 1972</i>	127–151
THE STRUCTURE AND CONTENT OF DARWINIAN THEORY SINCE DARWIN		
VIII	The structure and strategy of Darwin's 'long argument' <i>British Journal for the History of Science 10. Chalfont St Giles, 1977</i>	237–246
IX	Darwin's theory and Darwin's argument <i>What The Philosophy of Biology Is: Essays Dedicated to David Hull, ed. M. Ruse. Dordrecht: Kluwer, 1989</i>	163–182
X	Discussion: Darwin's argument in the <i>Origin</i> <i>Philosophy of Science 59. Chicago, IL, 1992</i>	461–464
XI	Knowing about evolution: Darwin and his theory of natural selection <i>Biology and Epistemology, eds. R. Creath and J. Maienschein. Cambridge: Cambridge University Press, 2000</i>	27–47
XII	Generation and the origin of species (1837–1937): a historiographical suggestion <i>British Journal for the History of Science 22. Oxford, 1989</i>	267–281
XIII	Biology and philosophy (including ideology): a study of Fisher and Wright <i>The Founders of Evolutionary Genetics: A Centenary Reappraisal, ed. S. Sarkar. Dordrecht: Kluwer, 1992</i>	231–293
XIV	Natural selection as a causal, empirical, and probabilistic Theory <i>The Probabilistic Revolution, Vol. 2: Ideas in the Sciences, ed. L. Krüger et al. Cambridge, MA: MIT Press, 1987</i>	233–270
