| About the Author | xxix |
| | |
| PART I CREDIT BACKGROUND AND CREDIT DERIVATIVES | 1 |
| | |
| 1 Credit Debt and Other Traditional Credit Instruments | 3 |
| 1.1 Bonds and Loans; Libor Rates and Swaps; 'REPO' and General Collateral Rates | 3 |
| 1.1.1 Bonds and Loans | 3 |
| 1.1.2 BBA Libor and Swaps | 4 |
| 1.1.3 Collateralised Lending and Repo | 4 |
| 1.1.4 Repo as a Credit Derivative | 6 |
| 1.2 Credit Debt Versus 'Risk-Free' Debt | 6 |
| 1.3 Issue Documents, Seniority and the Recovery Process | 6 |
| 1.3.1 Issue Documents and Default | 6 |
| 1.3.2 Claim Amount | 7 |
| 1.3.3 The Recovery Process and Recovery Amount | 8 |
| 1.3.4 Sovereign versus Corporate Debt | 9 |
| 1.4 Valuation, Yield and Spread | 10 |
| 1.5 Buying Risk | 10 |
| 1.6 Marking to Market, Marking to Model and Reserves | 11 |
| 1.7 The 'Credit Crunch' and Correlation | 12 |
| 1.8 Parties Involved in the Credit Markets and Key Terminology | 13 |

| | | |
|----------|---|-----------|
| 2 | Default and Recovery Data; Transition Matrices; Historical Pricing | 15 |
| 2.1 | Recovery: Ultimate and Market-Value-Based Recovery | 15 |
| 2.1.1 | Ultimate Recovery | 15 |
| 2.1.2 | Market Recovery | 16 |
| 2.1.3 | Recovery Rates and Industry Sector | 18 |
| 2.1.4 | Recovery and Default Rates and the Economic Cycle | 18 |
| 2.1.5 | Modelling Recovery Rates | 18 |
| 2.2 | Default Rates: Rating and Other Factors | 21 |
| 2.3 | Transition Matrices | 21 |
| 2.4 | 'Measures' and Transition Matrix-Based Pricing | 22 |
| 2.5 | Spread Jumps and Spread Volatility Derived from Transition Matrices | 26 |
| 2.6 | Adjusting Transition Matrices | 27 |
| | | |
| 3 | Asset Swaps and Asset Swap Spread; z-Spread | 29 |
| 3.1 | 'Par-Par' Asset Swap Contracts | 29 |
| 3.1.1 | Contract Description and Hedging | 29 |
| 3.1.2 | Hedging | 29 |
| 3.1.3 | Default of the Reference Name | 30 |
| 3.2 | Asset Swap Spread | 30 |
| 3.3 | Maturity and z-Spread | 30 |
| 3.4 | Callable Asset Swaps; 'Perfect' Asset Swaps | 32 |
| 3.4.1 | Callable Asset Swaps | 33 |
| 3.4.2 | 'Perfect' Asset Swaps | 33 |
| 3.5 | A Bond Spread Model | 33 |
| | | |
| 4 | Liquidity, the Credit Pyramid and Market Data | 35 |
| 4.1 | Bond Liquidity | 35 |
| 4.2 | The Credit Pyramid | 35 |
| 4.3 | Engineered and Survey Data | 37 |
| 4.3.1 | Survey Data | 37 |
| 4.3.2 | Engineered Data | 38 |
| 4.4 | Spread and Rating | 39 |
| | | |
| 5 | Traditional Counterparty Risk Management | 41 |
| 5.1 | Vetting | 41 |
| 5.2 | Collateralisation and Netting | 41 |
| 5.3 | Additional Counterparty Requirements for Credit Derivative Counterparties | 42 |
| 5.4 | Internal Capital Charge | 42 |
| | | |
| 6 | Credit Portfolios and Portfolio Risk | 43 |
| 6.1 | VaR and counterparty VaR | 43 |
| 6.2 | Distribution of Forward Values of a Credit Bond | 43 |
| 6.3 | Correlation and the Multi-Factor Normal (Gaussian) Distribution | 45 |
| 6.4 | Correlation and the Correlation Matrix | 46 |

| | | |
|--|--|-----------|
| 7 | Introduction to Credit Derivatives | 49 |
| 7.1 | Products and Users | 49 |
| 7.1.1 | 'Traditional' Credit Instruments | 49 |
| 7.1.2 | 'Single Name' Credit Derivatives | 49 |
| 7.1.3 | Credit-Linked Notes | 50 |
| 7.1.4 | Portfolio Credit Derivatives | 50 |
| 7.2 | Market Participants and Market Growth | 51 |
| PART II CREDIT DEFAULT SWAPS AND OTHER SINGLE NAME PRODUCTS | | 55 |
| 8 | Credit Default Swaps; Product Description and Simple Applications | 57 |
| 8.1 | CDS Product Definition | 57 |
| 8.1.1 | Contract Description and Example | 57 |
| 8.1.2 | Market CDS Quotes and Premium Payment | 58 |
| 8.1.3 | Related Products | 59 |
| 8.1.4 | CDS on Loans: LCDS | 60 |
| 8.2 | Documentation | 60 |
| 8.2.1 | ISDA Documentation and Insurance Contract Differences | 60 |
| 8.2.2 | Reference Obligations, 'Markit RED' and CreditIDs | 63 |
| 8.3 | Credit Triggers for Credit Derivatives | 65 |
| 8.3.1 | Credit Events | 65 |
| 8.3.2 | Restructuring | 66 |
| 8.4 | CDS Applications and Elementary Strategies | 67 |
| 8.4.1 | Single Names | 67 |
| 8.4.2 | Sector/Portfolio Trades | 68 |
| 8.4.3 | Income Generation | 69 |
| 8.4.4 | Regulatory Capital Reduction | 70 |
| 8.5 | Counterparty Risk: PFE for CDS | 71 |
| 8.6 | CDS Trading Desk | 71 |
| 8.6.1 | Mechanics of Transacting a CDS Deal | 71 |
| 8.6.2 | Trade Monitoring, Credit Events, Unwinds | 72 |
| 8.6.3 | CDS Desk Interactions and Organisation | 73 |
| 8.7 | CDS Contract and Convention Changes 2009 | 73 |
| 8.7.1 | Credit Derivatives: Review | 73 |
| 8.7.2 | Overview of Recent Changes | 74 |
| 8.7.3 | Contract Changes | 74 |
| 8.7.4 | Convention Changes | 79 |
| 9 | Valuation and Risk: Basic Concepts and the Default and Recovery Model | 81 |
| 9.1 | The Fundamental Credit Arbitrage – Repo Cost | 81 |
| 9.2 | Default and Recovery Model; Claim Amount | 82 |
| 9.2.1 | Claim Amount | 82 |
| 9.2.2 | Recovery Modelling | 83 |
| 9.2.3 | Hazard (Default) Rate Model | 85 |
| 9.2.4 | Choice of Hazard Rate Function/ <i>Interpolation</i> Process | 85 |

| | | |
|-----------|---|------------|
| 9.3 | Deterministic Default Rate Model | 87 |
| 9.3.1 | CDS Valuation | 88 |
| 9.3.2 | Accrued Interest and the Delivery Option | 90 |
| 9.3.3 | CDS Under Constant Hazard Rate | 91 |
| 9.3.4 | Up-front Premiums | 91 |
| 9.3.5 | Bond Valuation | 91 |
| 9.3.6 | Bond Price Under a Constant Hazard Rate | 92 |
| 9.3.7 | Limiting Cases of the Bond Price | 92 |
| 9.3.8 | Risky Zero Coupon Bonds | 93 |
| 9.3.9 | CDS and Bond Sensitivities | 93 |
| 9.4 | Stochastic Default Rate Model; Hazard and Pseudo-Hazard Rates | 94 |
| 9.5 | Calibration to Market Data | 97 |
| 9.5.1 | Calibrating to CDSs and to Bonds | 97 |
| 9.5.2 | Implied Hazard Rates | 98 |
| 9.5.3 | Calibrating to Bonds: Multiple Solutions for the Hazard Rate | 98 |
| 9.5.4 | Calibrating to Bonds: Implied Recovery and Hazard Rates | 98 |
| 9.5.5 | Implied Hazard Rate Curve and No-Arbitrage | 101 |
| 9.5.6 | Syndicated Loans | 101 |
| 9.6 | CDS Data/Sources | 102 |
| 9.6.1 | Survey Data | 102 |
| 9.6.2 | Data Engineering | 104 |
| 9.7 | Model Errors and Tests | 105 |
| 9.7.1 | Recovery Assumption | 105 |
| 9.7.2 | Interest and Hazard Rate Correlation | 106 |
| 9.7.3 | Reference Name and Counterparty Hazard Rate Correlation | 106 |
| 9.7.4 | Interpolation Assumptions, and the Pseudo-Hazard Rate versus Stochastic Hazard Rate | 108 |
| 9.8 | CDS Risk Factors; Reserves and Model Risk | 108 |
| 9.8.1 | Captured and Hidden Risks | 108 |
| 9.8.2 | Limits | 109 |
| 9.8.3 | Reserves against Implementation Errors | 109 |
| 9.8.4 | Model Reserves | 111 |
| 10 | CDS Deal Examples | 113 |
| 10.1 | A CDS Hedged Against Another CDS | 113 |
| 10.1.1 | Cross-Currency Default Swap Pricing and Hedging | 113 |
| 10.1.2 | Back-to-Back Trades, Default Event Hedges and Curve Trades | 118 |
| 10.1.3 | Hedging Both Credit Event and Spread Risk Simultaneously | 120 |
| 10.1.4 | Seniority Mismatch | 122 |
| 10.1.5 | Trade Level Hedging and Book Basis Hedging | 123 |
| 10.2 | Introduction to Bond Hedging | 124 |
| 10.2.1 | Default Event Hedging | 124 |
| 10.2.2 | Spread Hedging | 125 |
| 10.2.3 | Convertible Bonds and Equity Risk | 125 |
| 10.3 | Hedge and Credit Event Examples | 126 |

| | | |
|-----------|--|------------|
| 11 | CDS/Bond Basis Trading | 131 |
| 11.1 | Bond Versus CDS: Liquidity | 131 |
| 11.2 | Bond Repo Cost | 132 |
| 11.3 | Bond Spread Measurement – z-Spread not Asset Swap Spread | 133 |
| 11.4 | Bond Price Impact | 133 |
| 11.5 | Embedded Options in Bonds and Loans | 134 |
| 11.6 | Delivery Option in CDSs | 135 |
| 11.7 | Payoff of Par | 136 |
| 11.8 | Trigger Event Differences | 136 |
| 11.9 | Embedded Repo Option | 137 |
| 11.10 | Putting it All Together | 138 |
| | | |
| 12 | Forward CDS; Back-to-Back CDS, Mark to Market and CDS Unwind | 139 |
| 12.1 | Forward CDS | 139 |
| 12.2 | Mark-to-Market and Back-to-Back CDS | 140 |
| 12.3 | Unwind Calculation; Off-Market Trade Valuation and Hedging | 141 |
| 12.4 | ‘Double-Trigger CDS’ | 142 |
| | | |
| 13 | Credit-Linked Notes | 145 |
| 13.1 | CLN Set-Up; Counterparty or Collateral Risk | 145 |
| 13.2 | Embedded Swaps and Options | 147 |
| 13.3 | Costs | 148 |
| 13.4 | Applications | 148 |
| 13.5 | CLN Pricing | 149 |
| 13.5.1 | Basic Pricing | 149 |
| 13.5.2 | CLN Pricing Model | 149 |
| 13.6 | Capital Guaranteed Note | 150 |
| | | |
| 14 | Digital or ‘Fixed Recovery’ CDS | 155 |
| 14.1 | Product Description | 155 |
| 14.2 | Pricing, Hedging, Valuation and Risk Calculations | 155 |
| 14.2.1 | Simple Pricing | 155 |
| 14.2.2 | Recovery Assumptions | 156 |
| 14.2.3 | Valuation and Hedging | 156 |
| 14.3 | Trigger Event Differences | 157 |
| | | |
| 15 | Spread Options, Callable/Puttable Bonds, Callable Asset Swaps, Callable Default Swaps | 159 |
| 15.1 | Product Definitions | 159 |
| 15.1.1 | Vanilla Spread Options and Variations | 159 |
| 15.1.2 | Related Embedded Products | 160 |
| 15.1.3 | Bond Price Options | 161 |
| 15.1.4 | Applications | 162 |

| | | |
|-----------------|---|------------|
| 15.2 | Model Alternatives and a Stochastic Default Rate Model for Spread Option Pricing | 162 |
| 15.2.1 | Model Approaches | 162 |
| 15.2.2 | Hazard Rate Tree | 163 |
| 15.2.3 | Callable High Yield Bonds | 164 |
| 15.3 | Sensitivities and Hedging | 164 |
| 16 | Total Return Swaps | 167 |
| 16.1 | Product Definition and Examples | 167 |
| 16.2 | Applications | 167 |
| 16.3 | Hedging and Valuation | 168 |
| 16.3.1 | Pricing and Hedging | 168 |
| 16.3.2 | Valuation | 169 |
| 17 | Single Name Book Management | 171 |
| 17.1 | Risk Aggregation | 171 |
| 17.2 | CreditVaR for CDSs | 173 |
| 18 | CDS and Simulation | 175 |
| 18.1 | The Poisson Model and Default Times | 175 |
| 18.2 | Valuation by Monte Carlo Simulation | 175 |
| 18.3 | Sensitivity | 178 |
| PART III | PORTFOLIO PRODUCTS | 181 |
| 19 | Portfolio Product Types | 183 |
| 19.1 | <i>N</i> th-to-Default Baskets | 184 |
| 19.1.1 | First-to-Default Product Definition and Example | 184 |
| 19.1.2 | Documentation and Takeovers | 185 |
| 19.1.3 | Second-(and Higher)-to-Default | 187 |
| 19.1.4 | Applications | 187 |
| 19.2 | 'Synthetic' CDOs | 188 |
| 19.2.1 | Standard Indices: Markit iTraxx and Markit CDX | 188 |
| 19.2.2 | Index Options and Modelling Spread | 192 |
| 19.2.3 | CDO Structures on Standard Indices | 194 |
| 19.2.4 | Bespoke Synthetic CDOs | 195 |
| 19.2.5 | Managed Synthetic CDOs: Compliance Tests (OC and IC Tests; WARF; Diversity Score) and Substitutions | 200 |
| 19.2.6 | CDO Squared | 203 |
| 19.2.7 | Funded (CLN) and Unfunded (CDS) Tranches | 205 |
| 19.2.8 | Relationship to <i>n</i> th-to-Default | 206 |
| 19.2.9 | Applications | 207 |
| 19.2.10 | Portfolio Optimisation | 208 |
| 19.3 | Cashflow CDOs | 210 |
| 19.3.1 | Reference Pools | 211 |
| 19.3.2 | Income and Capital Waterfalls: Reserve Accounts | 211 |

| | | |
|-----------|---|------------|
| 19.3.3 | Funding and SPVs | 213 |
| 19.3.4 | Balance Sheet CDOs | 215 |
| 19.3.5 | Diversification and Risk Reduction Trades; Credit Bank | 218 |
| 19.4 | Credit Securitisations | 220 |
| 19.5 | Rating | 222 |
| 19.6 | Alternative Levered Credit Portfolio Products | 222 |
| 19.6.1 | CPPI | 223 |
| 19.6.2 | CPDO | 224 |
| 19.6.3 | Advantages of Market Value CDS Products | 226 |
| 20 | The Normal Copula and Correlation | 227 |
| 20.1 | Default Time Correlation | 227 |
| 20.1.1 | Generating Correlated Default Times | 227 |
| 20.1.2 | Intuitive Understanding of Default Time Correlation | 227 |
| 20.1.3 | Implications of 100% Default Time Correlation | 229 |
| 20.1.4 | N2D, Zero Correlation Case – Exact Pricing and Hedging Formulas | 230 |
| 20.1.5 | N2D, 100% Correlation – Exact Pricing and Hedging Formulas | 234 |
| 20.1.6 | N2D, Recovery Uncertainty | 235 |
| 20.2 | Normal Copula | 236 |
| 20.2.1 | Generating Correlated Default Times under the Normal Copula | 237 |
| 20.2.2 | Correlation Types: Pairwise, Tag, Tranche/Compound and Base Correlation; Factor Correlation | 238 |
| 20.2.3 | Simulation Pricing | 239 |
| 20.2.4 | Variance Reduction Techniques | 242 |
| 20.2.5 | Semi-Closed Form (SCF) Pricing | 242 |
| 20.3 | Correlation | 244 |
| 20.3.1 | Sources of Correlation | 244 |
| 20.3.2 | Constraints: What Makes a Correlation Matrix? | 245 |
| 20.3.3 | Spread Correlation | 246 |
| 20.3.4 | Asset and Equity Correlation | 247 |
| 20.3.5 | Estimation from Historical Data | 248 |
| 20.3.6 | Factor Analysis and Factor Correlation; Tag Correlation | 248 |
| 20.3.7 | Impact on Hedging of Using Historical or Implied Correlations | 251 |
| 20.3.8 | Implied Correlation | 251 |
| 21 | Correlation in Practice | 253 |
| 21.1 | Tranche Correlation | 253 |
| 21.1.1 | Valuation and Key Features | 253 |
| 21.1.2 | Implied Tranche Correlation | 256 |
| 21.1.3 | CDS Curve Adjustment | 257 |
| 21.1.4 | Bid–Offer Impact | 257 |
| 21.2 | Base Correlation | 257 |
| 21.2.1 | Valuation and Key Features | 258 |
| 21.2.2 | Implied Base Correlation | 259 |
| 21.2.3 | Interpolating Base Correlation | 260 |
| 21.3 | Correlated Recoveries | 261 |

| | | |
|----------------|--|------------|
| 21.4 | Correlation Regime Change and Other Modelling Approaches | 262 |
| 21.4.1 | Stochastic Correlation: Regime Change Models | 262 |
| 21.4.2 | Spread Factor | 263 |
| 22 | Valuation and Hedging | 265 |
| 22.1 | Valuation Examples | 265 |
| 22.1.1 | F2D Baskets | 265 |
| 22.1.2 | CDO Pricing: Change of Correlation | 265 |
| 22.1.3 | CDO Pricing: Change of Tranching | 267 |
| 22.1.4 | CDO Pricing: Change of Underlying | 268 |
| 22.1.5 | CDO Pricing: Change of Maturity | 269 |
| 22.1.6 | Managed CDO: Substitution and Change of Subordination | 269 |
| 22.2 | Sensitivity Calculation and Hedging | 270 |
| 22.2.1 | Dynamic Hedging: Spread Risk | 271 |
| 22.2.2 | Static Hedging: Default Event Risk | 277 |
| 22.2.3 | Correlation Risk | 279 |
| 22.2.4 | Recovery Risk | 280 |
| 22.2.5 | Convexity Risks | 281 |
| 22.3 | Pricing More Complex Structures | 282 |
| 22.3.1 | CDO Squared | 282 |
| 22.3.2 | Cashflow CDOs | 282 |
| 22.4 | Model Errors and Tests; Alternative Models | 284 |
| 22.4.1 | Captured and Hidden Risks | 284 |
| 22.4.2 | Spread Models | 284 |
| 22.4.3 | Reserves | 285 |
| 23 | Alternative Copulas | 289 |
| 23.1 | Student's t -Distribution | 289 |
| 23.2 | Copulas in General | 290 |
| 23.3 | Archimedean Copulas: Clayton, Gumbel | 291 |
| 23.4 | Clayton at $\theta = 0$ and $\theta = \infty$ | 293 |
| 23.5 | Model Risk | 293 |
| 24 | Correlation Portfolio Management | 297 |
| 24.1 | Static and Dynamic Hedges | 297 |
| 24.2 | Correlation Book Management | 298 |
| 24.3 | CreditVaR and CounterpartyVaR | 300 |
| PART IV | DEFAULT SWAPS INCLUDING COUNTERPARTY RISK | 303 |
| 25 | Single Name CDS | 305 |
| 25.1 | Non-Correlated Counterparty | 305 |
| 25.2 | 100% Correlation | 306 |
| 25.3 | Correlated Counterparty: Pricing and Hedging | 308 |
| 25.4 | Choice of Copula | 309 |
| 25.5 | Collateralised Deals and CDS Book Management | 309 |

| | | |
|--|--|------------|
| 26 | Counterparty CDSs | 313 |
| 26.1 | Pricing | 313 |
| 26.2 | Counterparty CDS (CCDS) Book Management | 313 |
| PART V SYSTEMS IMPLEMENTATION AND TESTING | | 317 |
| 27 | Mathematical Model and Systems Validation | 319 |
| 27.1 | Testing Procedures | 319 |
| 27.2 | Implementation and Documentation | 321 |
| 28 | System Implementation | 323 |
| 28.1 | Anatomy of a CDO | 323 |
| 28.1.1 | Reference Pool Data | 323 |
| 28.1.2 | Tranche Data | 324 |
| 28.1.3 | Deal Details | 324 |
| 28.2 | Management | 325 |
| 28.2.1 | What is Happening? | 325 |
| 28.2.2 | What Has Happened? | 326 |
| 28.2.3 | What is Likely to Happen and What is the Worst that can Happen? | 326 |
| 28.2.4 | What Opportunities do I Have? | 327 |
| 28.2.5 | Reporting | 328 |
| 28.2.6 | Limits | 328 |
| 28.3 | Valuation | 329 |
| 28.4 | IT Considerations | 331 |
| 28.4.1 | Why are Credit Derivatives Different? | 331 |
| 28.4.2 | Spreadsheet | 332 |
| 28.4.3 | Software Application | 332 |
| 28.4.4 | Buy versus Build | 333 |
| PART VI THE CREDIT CRISIS | | 335 |
| 29 | Cause and Effect: Credit Derivatives and the Crisis of 2007 | 337 |
| 29.1 | The Credit Markets Pre-Crisis | 337 |
| 29.1.1 | Bank Motivation | 337 |
| 29.1.2 | Fixed Income Investors | 338 |
| 29.1.3 | Risk Traders versus Risk Absorbers | 338 |
| 29.1.4 | Structured Investment Vehicles | 339 |
| 29.1.5 | Market Liquidity | 340 |
| 29.2 | The Events of MID-2007 | 341 |
| 29.2.1 | Sub-prime Mortgages | 341 |
| 29.2.2 | Investor Impact | 342 |
| 29.2.3 | Bank Impact | 343 |
| 29.2.4 | The Failure of Lehman Brothers and the Bailout of AIG | 345 |
| 29.3 | Issues to be Addressed | 346 |
| 29.3.1 | A Different Rating Agency Process | 346 |
| 29.3.2 | Standardised Nomenclature for Credit Ratings | 347 |

| | | |
|--------|--|------------|
| 29.3.3 | Keeping a Percentage of Originated Risk on Balance Sheet | 348 |
| 29.3.4 | Undrawn Credit Facility Capital Charge | 348 |
| 29.3.5 | The Future of CDOs | 349 |
| 29.3.6 | Mitigating the Negative Impact of Mark-to-Market | 349 |
| 29.4 | Market Clearing Mechanisms | 350 |
| 29.4.1 | Central Credit Counterparty | 351 |
| 29.4.2 | Centralised Clearing and Systemic Risk | 351 |
| 29.4.3 | A Dedicated CCP for CDSs Alone | 352 |
| 29.4.4 | Conclusions | 353 |
| | Appendix Markit Credit and Loan Indices | 355 |
| | References | 363 |
| | Index | 365 |
