

<b>1. Historical Introduction: Oceanography of the General Circulation to the Middle of the Twentieth Century .....</b>	<b>1</b>
<i>Bruce A. Warren</i>	
<b>2. Reminiscences of MODE .....</b>	<b>15</b>
<i>Francis Bretherton</i>	
<b>3. Modeling Ocean Circulation: 1960–1990, the Weather Bureau, and Princeton.....</b>	<b>29</b>
<i>Kirk Bryan</i>	
<b>4. Contributions to Global Ocean Observations .....</b>	<b>45</b>
<i>Russ E. Davis</i>	
<b>5. On Reconciling Oceanic and Atmospheric Estimates of Surface Heat Fluxes—and on Validating Greenhouse Models.....</b>	<b>67</b>
<i>J. S. Godfrey</i>	
<b>6. El Niño and Ocean Observations: A Personal History.....</b>	<b>79</b>
<i>Michael J. McPhaden</i>	
<b>7. Reflections of an Equatorial Oceanographer.....</b>	<b>101</b>
<i>Dennis Wilson Moore</i>	
<b>8. Ocean Acoustic Tomography: From a Stormy Start to an Uncertain Future .....</b>	<b>119</b>
<i>Walter Munk</i>	

## Contents

<b>9. A History of Thermocline Theory</b> .....	<b>139</b>
<i>Joseph Pedlosky</i>	
<b>10. Sextant to Satellite: The Education of a Land-Based Oceanographer</b> .....	<b>153</b>
<i>S. George Philander</i>	
<b>11. Some Advances and Retreats in the Study of Ocean Circulation since 1935</b> .....	<b>165</b>
<i>Joseph L. Reid</i>	
<b>12. Towards the World Ocean Circulation Experiment and a Bit of Aftermath</b> .....	<b>181</b>
<i>Carl Wunsch</i>	
<b>13. Interview with Klaus Wyrtki, 25 February 1999</b> .....	<b>203</b>
<i>Hans von Storch, Jürgen Sündermann, and Lorenz Magaard</i>	
<b>Index</b> .....	<b>239</b>
