Preface	1
1 Introduction	3
2 Banks and Bank Runs - An Overview	9
2.1 Banks as Financial Institutions	9
2.2 Bank Runs and Banking Panics	17
3 Decision under Uncertainty and the Role of Information	29
3.1 Individual Decision under Uncertainty	29
3.2 Decision and Information	36
3.3 The Favourableness of Information	40
3.4 Stochastic Structure	55
4 Strategic Uncertainty	57
4.1 Strategic Games	57
4.2 Strategic Equilibrium	59
4.3 Strategic Setup in the Model	61
4.4 Public Signal Games	65
4.5 Private Signal Games	68
4.6 Private Signal Games with Monotone Strategies	71

5	Uncertain Liquidity Preferences: The Basic Model	75
5.1	The General Model Setup	76
5.2	Uninsurable Preference Risk: Autarky	79
5.3	Public Information about Preferences: Optimal Risk-Sharing provided by Markets	83
6	Banks as Financial Intermediaries and the Emergence of Bank Runs	91
6.1	Private Information about Preferences: Banks as Liquidity Insurance	92
6.2	The Emergence of Bank Runs	96
6.3	The Liquidity Insurance Equilibrium	101
6.4	The Bank Run Equilibrium	102
6.5	Fundamental- versus Panic-based Bank Runs	103
6.6	Public Signals and Multiple Equilibria	104
7	Private Signals about Fundamentals: Bank Runs as a Unique Equilibrium	107
7.1	The Economy with Private Signals	108
7.2	Bank Runs as Unique Equilibrium	109
7.3	The Probability of Bank Runs	119
7.4	The Consequences of Bank Runs	120
7.5	Fundamental- versus Panic-based Bank Runs	122
7.6	Appendix	124

8 Measures to Prevent Bank Runs	131
8.1 Suspension of Convertibility	131
8.2 Deposit Insurance	139
9 Summary	147
List of Symbols	151
Bibliography	155
