<i>List of Boxes, Figures and Tables</i>	ix
<i>Preface to the Third Edition</i>	xiii
<i>List of Abbreviations</i>	xvi
1 Comparative Health Policy: An Introduction	1
Health care as public policy	1
Comparative health policy	6
Classifications of health care systems	11
Countries selected for study	17
Types of health care	18
Growing problems in health policy	20
Conclusions	30
2 The Context of Health Care	32
Institutionalist explanations: contrasting political systems	35
Cultural explanations: cultural/historical factors shaping health care	45
Functionalist explanations: population, wealth and economics	57
The context of health care	67
3 Funding, Provision and Governance	69
Comparing funding of health systems	70
Control of funding and pressures for reform	78
Health services and patient choice	83
Welfare mixes in the provision of health care	87
Models of contracting health services	89
Health governance between centre and locality	91
The authority of governments in health policy	94
4 Setting Priorities and Allocating Resources	97
The goals of health policy	97
The government and the marketplace	112
Allocation and rationing: the need to set priorities	118
Rationing and the individual	127
Efforts to control new technologies	132
Trends in priority setting	137

5	The Medical Profession	140
	Who doctors are	142
	Types and settings of medical practice	146
	Reforming medical practice	151
	Paying for medical care	157
	The organization of doctors' interests and access to the policy process	164
	Doctors, the state and health policy	168
6	Beyond the Hospital: Health Care in the Home	170
	Home care statistics	173
	Providing home health care	176
	Funding home health care	182
	The interface between formal and informal care	188
	Policy trends and developments	194
7	Public Health	196
	The individual and public health	200
	Framing a public health policy	201
	Public health responsibility and funding	204
	Health promotion	208
	Homelessness and inadequate housing	226
	Environmental health	227
	Public health: putting the medical model in perspective	231
8	Understanding Health Policy Comparatively	236
	Health systems and explaining health policies	236
	Possibilities and limitations for cross-national learning	243
	Contribution to the comparative study of health policy	249
	<i>Glossary</i>	251
	<i>Guide to Further Reading</i>	255
	<i>Guide to Websites</i>	259
	<i>Bibliography</i>	263
	<i>Index</i>	297

List of Boxes, Figures and Tables

Boxes

1.1	Overuse of resources	5
1.2	Market-driven convergence	9
1.3	A new health care system	13
1.4	The Singapore system: low in public funding, high on individual responsibility	16
1.5	A warning: 'profound consequences' as the EU grows older	22
1.6	The cost of technology	27
1.7	Media campaigns for treatment denied	28
2.1	Australia	36
2.2	Germany	36
2.3	Japan	37
2.4	Netherlands	37
2.5	New Zealand	38
2.6	Singapore	38
2.7	Sweden	39
2.8	Taiwan	39
2.9	UK	40
2.10	USA	40
2.11	Asking for problems?	43
2.12	Health care in the USA	51
2.13	Policies for older people in Sweden	59
2.14	Migrants and the National Health Service in Britain	60
3.1	Medicare in the USA: public insurance in a private system	77
3.2	Liberalization of Medisave use	85
3.3	Welfare mix: mixed meanings and policies	87
4.1	Does more high-technology medicine improve health outcomes?	101
4.2	The politics of co-payments	105
4.3	Distortions in the health care market	114
4.4	How a moral hazard works	115
4.5	Rationing is essential in tax-funded health systems	120
4.6	Medical triage	122
4.7	How much is too much?	130
4.8	Discrimination by age	131
4.9	Lack of systematic assessment	133

4.10	Evidence-based medicine in Australia	135
4.11	IOM recommendations for a National Clinical Effectiveness Assessment Program	135
5.1	Understanding professions	141
5.2	Controlling doctors in Singapore	152
5.3	Professional self-regulation of medical work	153
5.4	Australian Primary Care Collaborative Program (APCCP)	155
5.5	Informal payments to doctors	159
7.1	The growing threat of tuberculosis in Europe	197
7.2	E. coli threats to public health	198
7.3	Decentralized public health in Australia	207
7.4	A failure to emphasize health promotion	211
7.5	A double burden of disease	213
7.6	Britain is the fattest country in Europe	215
7.7	It's not only the weight	216
7.8	Disparities by social class	217
7.9	Fighting obesity in Singapore	218
7.10	Preparing for large patients	220
7.11	Obese people denied some surgical procedures in a bid to cut costs in the NHS	221
7.12	Graphic health warning on cigarette packets	222
7.13	English smoking ban	223
7.14	Scare tactics do work	223
7.15	Alcohol deaths soar in Britain	225
7.16	Homelessness, poor housing and health in Britain	227
7.17	Depletion of the ozone layer	229
7.18	Prevention in Taiwan	232
7.19	Super-clinics in Australia	233

Figures

1.1	Types of health care system by provision and funding	12
1.2	Types of health care systems	17
2.1	Health policy context of developed nations	33
2.2	Institutional power in political systems	41
2.3	The strength of judicial review	42
3.1	Sources of health care funding	79
3.2	Public control of funding and provision of health care	95
4.1	Competing goals of health care	98
4.2	Degree of price rationing	123
5.1	The organization of doctors' interests and access to the policy process	165
6.1	The provision of home health care	177

6.2	Value orientations in informal care and welfare regimes	189
8.1	The goal orientation of actors in health care	246
8.2	Identifying 'best' health systems	247

Tables

1.1	Distribution of health expenditures for the USA by magnitude of expenditures for selected years 1963–1996	4
1.2	Public funding as percentage of health expenditures, 1970–2005, ranked by 2005	16
1.3	Categories of health care	18
1.4	Health expenditure as a percentage of GDP, 1970–2005	20
1.5	Percentage of population aged 65 and over	21
1.6	Share of very old persons (80+) among the elderly, 1960–2040	23
1.7	Percentage of health expenditures and persons aged 65 or more, 2003 and estimated 2020 and 2040	24
2.1	Public satisfaction and percentage of GDP spent on health care	34
2.2	Distribution by type of health political culture	46
2.3	Population characteristics, 2009 (est.)	58
2.4	Ethnic and religious composition	61
2.5	Health indicators by race, USA	62
2.6	GDP per capita, 2008, in US dollars	63
3.1	Per capita expenditure on health care in US dollars, 2005	70
3.2	Changes in health care expenditure as a percentage of GDP	71
3.3	Changes in public expenditure on health care as a percentage of total expenditure on health care	72
3.4	Sources of funding as a percentage of health care expenditure, 2005	73
3.5	Types and settings of health services	83
3.6	Expenditure on medical services as a percentage of health care expenditure, 2005	84
4.1	Supply-side strategies	107
4.2	Forms of rationing medicine	121
4.3	Lifestyle and self-inflicted diseases	128
4.4	Causes of death in the USA, 2000	129
4.5	Substantive and procedural aspects of health policy convergence	138
5.1	Number of practising doctors per 1,000 inhabitants	142
5.2	Female practising doctors, as a percentage of practising doctors, 2005	144

5.3	Number of generalist and specialist doctors per 1,000 inhabitants	145
5.4	Types and settings of medical practice	147
5.5	Types of payment for different types of doctor	158
5.6	The involvement of doctors in systems of pay determinations	163
6.1	Estimated spending on long-term home care (2000) as a percentage of GDP	174
6.2	Population aged 65 and over in different care settings as a percentage of the total population	174
6.3	The growth of institutionalization rates of people aged 65 and over (%)	175
6.4	Number of long-term care beds per 1,000 people	175
6.5	Per capita public expenditure on services for the elderly and disabled (US\$)	176
6.6	Funding home health care	183
7.1	Comparative obesity rates	214
7.2	Smoking rates, men and women (%), ranked by men, 2005	222
7.3	Alcohol consumption, per capita in litres (16 and over)	224
7.4	Total health care expenditure, life expectancy at birth and infant mortality, 2005 (ranked by % GDP)	234
8.1	Health systems and their policies	238
