

A. HISTORY	1
1. History of Weather Modification—Horace R. Byers	3
The Period Prior to 1946, 4 Langmuir, Schaefer, and Vonnegut, 9 Project Cirrus, 14 The Weather Bureau Cloud Physics Project, 16 Hawaii and Honduras, 17 More on Project Cirrus, 18 Commercial Seeding, 21 The Australian Experiments, 23 The Painful Search for the “Truth”, 24 The Scientists Look at Their Field, 33 Recent and Ongoing Projects, 37 References, 39	
2. Experience of the Private Sector—Robert D. Elliott	45
Present-Day Cloud Seeding in the Private Sector, 45 Evolution of a Rationale, 51 Interaction with the Federal Government, 70 Interaction with the Public, 80 References, 87	
B. BACKGROUND	91
3. The Meteorological Background for Weather Modification—Morris Neiburger and Helmut K. Weickmann	93
Scales of Weather Phenomena, 93 The Formation of Clouds, 99 The Formation of Precipitation, 103 Size Distribution of Raindrops, 127 Energetics of the Atmosphere, 130 References, 133	
4. Weather Modification Instruments and Their Use—R. E. Ruskin and W. D. Scott	136
Perspective, 136 Priorities in Instrumentation, 138 Instrumentation Platforms, 142 Standard Measurements, 144 Sampling in Clouds, 162 Measurements of Cloud Particles, 165 The Characteristics of Aerosols, 181 Remote Measurements, 189 The Measurement of Electrical Parameters, 192 Aircraft Systems for Delivery of Seeding Agents, 193 Systems Design, 195 Ground-Based Instrumentation, 199 Future of Instrumentation, 199 Acknowledgments, 201 References, 201	

5. Design and Evaluation of Weather Modification Experiments— Glenn W. Brier	206
Design, 207 Analysis, 210 Some Problem Areas, 217 Proposed Direction of Research, 220 Summary and Appraisal, 223 References, 223	
C. PRECIPITATION MANAGEMENT	227
6. Cumulus Clouds and Their Modification—Joanne Simpson and Arnett S. Dennis	229
The Dynamics and Physics of Individual Cumuli, 233 Cumulus Models, 237 Cumulus Groups and Interactions, 240 Design and Evaluation of Cumulus Modification Experiments, 241 Cumulus Modification to Enhance Coales- cence, 242 Modification of Supercooled Cumuli by Artificial Glaciation— Methods and Basic Principles, 245 Seeding Supercooled Cumuli—Static Approach, 246 Dynamic Seeding of Isolated Supercooled Cumuli, 247 Cumulonimbus Mergers, Dynamic Seeding of Many Cumuli Over a Target Area, and Applications, 262 Are There Other Ways Than Seeding to Modify Cumuli? 271 Extended Area and Persistent Effects. Potential Impacts of Cumulus Modification, 274 Outlook, 278 Acknowledgments, 279 References, 279	
7. Weather Modification for Augmenting Orographic Precipitation—Lewis O. Grant and Archie M. Kahan	282
The Requirement and Potential, 282 The Nature of Orographic Clouds, 283 The Physical Basis for Seeding Orographic Clouds, 288 Results of Field Experiments, 294 The Technology for Seeding "Cold" Orographic Clouds, 307 References, 315	
8. The Mitigation of Great Lakes Storms—Helmut K. Weickmann	318
Structure and Properties of Great Lakes Cloud Systems, 318 Summary of Seeding Experiments, 344 Conclusion, 351 References, 353	
9. Fog—Bernard A. Silverman and Alan I. Weinstein	355
Morphology of Fog, 357 Fog Modification Concepts, 362 General Require- ments of Fog Dispersal, 364 Supercooled Fog Dispersal, 365 Warm Fog Dissipation, 369 Ice Fog Elimination, 381 Outlook, 381 References, 382	
D. PROGRAMS IN OTHER COUNTRIES	385
10. Modification of Meteorological Processes—Y. K. Fedorov	387
Early Soviet Weather Modification Efforts, 389 Recent Soviet Work, 391 Changing the Climate, 397 Conclusion, 400 References, 401 Appendix: Annotated Soviet Bibliography, 402	

11. Progress of Hail Suppression Work in the USSR—G. K. Sulakvelidze, B. I. Kiziriya, and V. V. Tsykunov 410

Concept of the Mechanism of Hail Formation, 411 Modes of Intervention in Hail Processes and Some Supplements to Work on Modeling a Hail Cloud, 415 Basic Technological Means for Modification of Hail Processes, 418 Organization and Development of Hail Suppression Operations, 421 Some Special Aspects of Hail Suppression Operations, 423 Assessing the Results of Modification, 424 Conclusion, 428 References, 429

12. Cloud Seeding in Australia—E. J. Smith 432

Experiments with Dry Ice, 432 The Use of Silver Iodide, 434 Silver Iodide Experiments on Single Clouds, 437 Area Experiments, 438 Early Experiments, 438 The Experiment in Tasmania, 442 Operational Cloud Seeding, 443 Assessment of Operations, 444 Cloud Physics Research, 445 Future Experiments, 451 References, 451

13. Rain Stimulation and Cloud Physics in Israel—A. Gagin and J. Neumann 454

Rain Stimulation Experiments in Israel and Israel's Water Potential, 454 Statistical Aspects of the Experiment: Design, Results, and Problems, 458 Cloud Physics Aspects of the Israeli Cloud Seeding Experiment, 468 Acknowledgments, 492 References, 492

E. SEVERE STORMS 495

14. Hurricane Modification—R. Cecil Gentry 497

Structure and Energetics of Hurricanes Related to Modification Experiments, 500 History of Hurricane Modification Experiments, 505 The Stormfury Experiment, 508 Future Prospects, Special Problem Areas, and Plans, 516 Acknowledgments, 519 References, 520

15. Computer Simulation of Hurricane Development and Structure—Stanley L. Rosenthal 522

The Theoretical Problem and a Strategy for Its Solution, 523 A Theory for Hurricane Development, 527 Quantitative Aspects of CISK: The Problem of Cumulus Parameterization, 531 A Survey of Results from Circularly Symmetric Hurricane Models, 532 A Three-Dimensional Model of the Hurricane, 545 The Future, 549 Acknowledgments, 550 References, 550

16. Tornadoes—Robert Davies-Jones and Edwin Kessler 552

Tornado Characteristics, 552 Tornado Climatology, 554 Tornado Prediction, 555 Tornado Warning, 558 Relevant Aspects of Thunderstorm Circulation, 558 Observations, 562 Experimental Models, 577 Mathematical Modeling, 581 Outlook for Modification, 590 References, 591

17. Lightning Modification—George Dawson (Section I), Donald M. Fuquay (Sections II and III), and Heinz W. Kasemir (Sections IV and V) 596

An Introduction to Atmospheric Electricity, 596 Lightning Damage and Lightning Modification Caused by Cloud Seeding, 604 Lightning Suppression by Chaff Seeding and Triggered Lightning, 612 References, 628

F. CLIMATIC CHANGE 631

18. Global Atmospheric Modeling and the Numerical Simulation of Climate—Joseph Smagorinsky 632

Basic Parameters of a Model, 636 The Governing Laws, 638 The Nature of the Energy Source, 644 The Scope of the Atmospheric Response, 648 Conducting Numerical Experiments, 652 Experiments in the Simulation of Climate, 656 Models for Long-Term Prediction, 673 Acknowledgments, 685 References, 685

19. Inadvertent Large-Scale Weather Modification—Lester Machta and Kosta Telegadas 687

Carbon Dioxide, 688 Particles, 700 Cloudiness, 710 Land Usage and Heat, 715 Climatic Prediction, 718 Summary and Conclusions, 722 Acknowledgment, 723 References, 723

20. Inadvertent Atmospheric Modification Through Urbanization—Helmut Landsberg 726

Urban Effects on Radiation and Energy Balance, 727 The Urban Temperature Field, 731 Some Secondary Effects of the Urban Heat Island, 735, The Urban Wind Field, 738 Urban Pollution, 744 Some Meteorological Effects of Urban Pollution, 748 Urban Effects on Precipitation, 752 Conclusions, 759 Acknowledgment, 760 References, 760

G. OTHER PROBLEMS 765

21. Weather Modification Litigation and Statutes—Ray J. Davis 767

The Lawsuits, 767 The State Statutes, 773 The Federal Bills, 779 The Unanswered Questions, 782 References, 786

22. Sociological Aspects of Weather Modification—J. Eugene Haas 787

The Sociological Significance of Weather Modification, 787 Various Perspectives on Weather Modification, 793 Weather Modification and Cultural Lag, 800 Political and Economic Implications, 801 How Shall the Interests of the Unorganized be Protected? 804 How Shall the Interests

of the Minority in a Weather Modification Area be Protected? 806 What
Factors are Associated with Conflict over Planned Weather Modification
Efforts? 808 Acknowledgments, 810 References, 810
