## Contents

Prefac	e	ix
Ackno	wledgments	xii
About	the Author	xii
Chapt	er 1 Optimization	1
1.1	Quadratic Minimization	1
1.2	Nonlinear Optimization	8
1.3	Extreme Points	12
1.4	Computer Results	15
1.5	Exercises	18
Chapte	er 2 The Efficient Frontier	21
2.1	The Efficient Frontier	21
2.2	Computer Programs	33
2.3	Exercises	36
Chapter 3 The Capital Asset Pricing Model		41
3.1	The Capital Market Line	41
3.2	The Security Market Line	51
3.3	Computer Programs	54
3.4	Exercises	58
Chapte	er 4 Sharpe Ratios and Implied Risk Free Returns	59
4.1	Direct Derivation	60
4.2	Optimization Derivation	66

Appendix		215
9.4	Exercises	213
9.3	Computer Results	211
9.2	Kinks and Sharpe Ratios	199
9.1	Sharpe Ratios under Constraints	191
Chapter 9 Sharpe Ratios under Constraints, and Kinks		
0.0		105
8.3	Exercises	189
8.2	Computer Results	105
Chapt 8.1	er 8 Determination of the Entire Efficient Frontier The Entire Efficient Frontier	1 <b>65</b>
Chapt	an 8 Determination of the Entire Efficient Evention	165
7.4	Exercises	163
7.3	Computer Results	159
7.2	The General Case	151
7.1	Linear Inequality Constraints: An Example	140
Chapter 7 Portfolio Optimization with Constraints		139
0.0		190
$\begin{array}{c} 6.2 \\ 6.3 \end{array}$	Computer Programs     Exercises	$127 \\ 136$
6.1	QPSolver: A QP Solution Algorithm	108
-	er 6 A QP Solution Algorithm	
<b>CI</b> 14	C A OD Calation Alexandria	107
5.5	Exercises	103
5.4	Optimality Conditions for QPs	96
5.3	The Geometry of Quadratic Functions	92
5.2	Geometry of QP Optimality Conditions	86
5.1	The Geometry of QPs	81
Chapter 5 Quadratic Programming Geometry		
4.5	Exercises	10
4.4	Computer Programs	75 78
		75
4.3	Free Problem Solutions	73
