

Contents

Foreword	v
Preface	vii

1

Temperature

I. The measurement of temperature	1
A. Expansion of solids, liquids or gases	1
B. Change of electrical resistance	2
C. Change in electrical potential	3
D. Radiation from a surface	3
E. Change in resonant frequency	4
F. Chemical temperature integration	4
II. Major sources of error in temperature measurement	4
III. Simple equipment for temperature measurement	6
A. Thermistor temperature meter	6
B. Silicon diode temperature meter	9
C. Thermocouples	10
D. Simple thermocouple indicator	13
E. Temperature probes and leads	14
IV. Testing and calibration of temperature sensors	16

2

Radiation

I. The measurement of radiation	17
A. Solarimeters	18
B. Light meters	20
C. Net radiometers	20
II. Major sources of error in radiation measurement	21
III. Simple equipment for radiation measurement	22
A. Light meters	22
B. Solarimeters	27
C. Net radiometer	31
D. Millivoltmeter for use with thermopile instruments	32
IV. Testing and calibration of radiation instruments	34

3

Humidity

I.	The measurement of humidity	36
A.	The psychrometer	37
B.	Dew-point method	38
C.	Change of physical dimensions	39
D.	Change in concentration of a solution	39
E.	Cobalt thiocyanate paper	40
F.	Changes in electrical properties of materials	40
G.	Infra-red gas analyser	41
H.	Change in resonant frequency of a quartz crystal	41
II.	Major sources of error in humidity measurement	41
III.	Simple equipment for humidity measurement	42
A.	Non-aspirated and whirling psychrometers	42
B.	Dew-point method	43
C.	Miniature electric psychrometer	44
D.	Corbet aqueous solution droplet technique	47
E.	Electrical conductivity of aqueous solution	48
IV.	Calibration and testing of humidity sensors	50

4

Wind

I.	The measurement of wind speed and direction	52
A.	Wind vanes	52
B.	Pressure anemometers	52
C.	Mechanical anemometers	53
D.	Thermoelectric anemometers (thermoanemometers)	54
E.	Sonic anemometers	54
II.	Major sources of error in wind measurement	54
III.	Simple equipment for wind measurement	55
A.	Wind-vane	55
B.	Pitot-tube anemometer	56
C.	Cup anemometer	56
D.	Thermoanemometer	58
IV.	Testing and calibration of anemometers	58

5

Miscellaneous Topics

I.	Control of temperature	60
II.	Control of humidity	62

III. Microbalance	65
IV. Artificial lighting	67
V. Automatic recording and data logging	69

6

Humidity Calculations and Tables

A. Saturation vapour pressure	71
B. Psychrometers	71
C. Dew-point equipment	74
D. Choice of a humidity parameter	74
E. Vapour pressure	78
F. Vapour pressure deficit	78
G. Absolute humidity	81

Appendix: Electronic Circuits and Sources of Supply of Components

I. Electronic components	83
A. Resistors	83
B. Capacitors	85
C. Diodes and transistors	87
D. Integrated-circuit operational amplifier	87
E. Other components and materials	89
II. Tools	91
III. Sources of supply of components and materials	91
