

CHAPTER 1

**AN INTRODUCTION TO THE PASSIVE MICROWAVE
REMOTE SENSING OF ATMOSPHERES** 1

Michael A. Janssen

1.1	A General Perspective	1
1.2	The Microwave Radiative Transfer Equation	3
1.2.1	Radiative Transfer in a Nonscattering Thermal Medium	4
1.2.2	Specializing to the Microwave Case	6
1.2.3	Microwave Remote Sensing	8
1.2.4	The Significance of the Approximations	9
1.3	Microwave Radiometry	13
1.3.1	Fundamentals	14
1.3.2	Two Common Types of Radiometers	22
1.3.3	About Hardware	25
	References	33

CHAPTER 2

**ABSORPTION OF MICROWAVES BY ATMOSPHERIC
GASES** 37

Philip W. Rosenkranz

2.1	General Expression for Absorption Coefficient	37
2.2	Energy Levels and Line Spectra of Isolated Molecules	39
2.2.1	Born–Oppenheimer Approximation	39
2.2.2	Energy Levels and Wave Functions of a Rigid Rotor	40
2.2.3	Degeneracies Due to Nuclear Spin	44
2.2.4	Selection Rules for Rotational Transitions	44
2.2.5	Line Intensities	45
2.2.6	Rotational Spectrum of Ozone	47

2.2.7	Rotational Spectrum of Water Vapor	48
2.2.8	Rotational Spectrum of Carbon Monoxide	49
2.2.9	Rotational Spectrum of Nitrous Oxide	49
2.2.10	Rotational Spectrum of Chlorine Monoxide	49
2.2.11	Spin-Rotation Spectrum of Oxygen	52
2.2.12	Inversion Spectrum of Ammonia	56
2.3	Thermal (Doppler) Broadening	59
2.4	Pressure Broadening	60
2.4.1	General Discussion	60
2.4.2	Low Pressures (Mesosphere and Stratosphere)	65
2.4.3	Moderate Pressures (Troposphere)	68
2.4.4	High Pressures (Deep Planetary Atmospheres)	72
2.5	Collision-Induced Absorption by Nitrogen and Carbon Dioxide	73
	References	75

APPENDIX TO CHAPTER 2

LINE PARAMETERS FOR SELECTED LINES BELOW 300 GHz	80
References	82

CHAPTER 3

MICROWAVE RADIATIVE TRANSFER IN HYDROMETEORS	91
---	----

A. J. Gasiewski

3.1	Differential Radiative Transfer Equation	92
3.2	Scattering and Absorption by Hydrometeors	93
3.2.1	Scattering and Absorption by Sparse Distributions of Particles	95
3.2.2	Gaseous Absorption in the Troposphere and Lower Stratosphere	97
3.2.3	Planar-Stratified Atmosphere Approximation	99
3.2.4	Monodispersed Spherical Hydrometeor Scattering and Extinction	101
3.2.5	Polydispersed Spherical Hydrometeor Scattering and Extinction	105
3.2.6	Phase-Matrix Approximations	108
3.3	DRTE Solutions: The Forward-Transfer Problem	113
3.3.1	Nonscattering Solution	113
3.3.2	Numerical Quadrature: Nonscattering Solution	115
3.3.3	Iterative Solution for a Scattering Atmosphere	119
3.3.4	Numerical Quadrature: Scattering Solution	122
3.3.5	Eigenanalysis	123

3.4	Numerical Model Applications and Limitations	125
3.4.1	Comparison of Observed and Computed Brightnesses	126
3.4.2	Effects of Phase-Matrix Approximations	127
3.4.3	Frequency Dependence of Brightness Temperatures Over Clouds	130
3.4.4	Retrieval of Precipitation Parameters	133
3.4.5	Sensitivity of Microwave Window Channels to Hydrometeors	136
	References	139

CHAPTER 4

GROUND-BASED MICROWAVE REMOTE SENSING OF METEOROLOGICAL VARIABLES 145

Ed R. Westwater

4.1	Profile Inversion Theory	145
4.1.1	Linearization of the Radiative Transfer Equation	146
4.1.2	Use of the Linearized Radiative Transfer Equation in Profile Retrieval	149
4.1.3	Description of Commonly Used Inversion Techniques	151
4.2	Radiometric Systems Operated by the Wave Propagation Laboratory	157
4.2.1	The Six-Channel Radiometer	157
4.2.2	The Colorado Research Network of Dual-Channel Radiometers	159
4.2.3	The Variable Three-Channel Radiometer	161
4.3	Indirect Temperature Sensing	163
4.3.1	Ground-Based Temperature Sensing	166
4.3.2	Combined Ground- and Satellite-Based Temperature Sensing	169
4.3.3	Use of Radar Measurements of Tropopause Height to Improve Radiometric Temperature Retrievals	173
4.3.4	Temperature Retrieval from Combined Winds and Radiometers	174
4.3.5	Combined Radiometer and RASS Temperature Soundings	177
4.4	Microwave Radiometric Measurements of Water Vapor	179
4.4.1	Measurements of Precipitable Water Vapor	180
4.4.2	Spectra of Precipitable Water Vapor	183
4.4.3	Observations of Precipitable Water Vapor from the Colorado Research Network	184
4.4.4	Measurements of Water Vapor Profiles	186
4.5	Microwave Radiometric Measurements of Cloud Liquid	190
4.5.1	Technique and Examples of Data	190

4.5.2	Applications of Radiometers to Winter Snowpack Augmentation	192
4.5.3	Remote Detection of Aircraft-Icing Conditions	193
4.6	Additional Applications	197
4.6.1	Comparison of Clear-Air Absorption Models	197
4.6.2	Mass-Absorption Coefficients for Water Vapor	197
4.6.3	Observations of Attenuation from Clouds	201
4.6.4	Attenuation Statistics	203
4.6.5	Cloud Liquid and Radiative Transfer	204
4.6.6	Satellite Validation	205
4.7	Concluding Remarks	206
	References	207

CHAPTER 5

TROPOSPHERIC RADIO-PATH DELAY FROM GROUND-BASED MICROWAVE RADIOMETRY	215
--	-----

Gunnar Elgered

5.1	The Delay of Radio Waves Propagating Through the Neutral Atmosphere	216
5.1.1	Definition of the Excess Propagation Path	216
5.1.2	From Refractivity to Delay	219
5.1.3	The Path Delay due to Condensed Water	221
5.2	Wet-Delay Algorithms Used with Microwave Radiometry	224
5.2.1	General Statistical Retrieval Algorithms	226
5.2.2	Modified Statistical Retrieval Algorithm: Linearized Brightness Temperatures	227
5.2.3	Modified Statistical Retrieval Algorithm: Opacities	230
5.3	Expected Accuracy of Wet-Delay Algorithms	231
5.3.1	Simulated WVR Observations	231
5.3.2	Simulated Retrieval Approach	232
5.3.3	Evaluation of Performance	234
5.4	Radiometer Calibration	240
5.5	Verification of the Accuracy of the WVR Technique	243
5.5.1	Side-by-Side WVR Measurements	243
5.5.2	Estimating Wet Delay Using Surface Meteorological Data	243
5.5.3	Measuring with Radiosondes	244
5.5.4	Measuring with a Raman Lidar	245
5.5.5	Measuring with an Infrared Spectral Hygrometer	246
5.5.6	Differential Optical/Radio Measurements	246
5.5.7	Estimation Using Radio-Interferometry Systems	247
5.6	Applications of Water Vapor Radiometry	248
5.6.1	Data for Very-Long-Baseline Interferometry (VLBI)	249

5.6.2	VWR Data Used with the Global Positioning System (GPS)	249
	References	250

CHAPTER 6

REMOTE SENSING OF THE ATMOSPHERE FROM SATELLITES USING MICROWAVE RADIOMETRY 259

Norman C. Grody

6.1	Introduction	260
6.1.1	Atmospheric Remote Sensing and Microwaves	260
6.1.2	Value of Microwave Measurements	262
6.1.3	Satellite Microwave Radiometers	264
6.2	Theoretical Background	273
6.2.1	Brightness Temperature Equation	273
6.2.2	Atmospheric Weighting Functions	276
6.2.3	Weighting Functions for Flight Instruments	278
6.3	Temperature Retrievals	282
6.3.1	Retrieval Approach	282
6.3.2	Surface Emissivity Effects	286
6.3.3	Water Vapor and Cloud Effects	288
6.3.4	Temperature-Retrieval Accuracy	290
6.3.5	Retrieval Accuracy of the SSM/T Sounder	294
6.4	Rainfall and Cloud Liquid Water	295
6.4.1	Emission Measurements	296
6.4.2	Scattering Measurements	300
6.5	Water-Vapor Retrievals	305
6.5.1	Retrieval of Water Vapor Burden	305
6.5.2	Linearized Retrieval Approach	308
	References	311

APPENDICES TO CHAPTER 6 315

6A	Surface Emissivity	315
6A.1	Theoretical Formulation	315
6A.2	Modeling Surface Parameters	316
6A.3	Surface Emissivity Measurements	317
6B	Corrections for Calibration and Modeling Errors	319
6B.1	Calibration Corrections	319
6B.2	Antenna Sidelobe Corrections	321
6B.3	Modeling Corrections	322
6B.4	Calibration and Modeling Correction Parameters	323

6C	Corrections for Surface Emissivity and Elevation	326
6C.1	Emissivity and Elevation Corrections	326
6C.2	Emissivity and Elevation-Correction Parameters	328
6D	Cloud Liquid Water Absorption	332
	References	333

CHAPTER 7

GROUND-BASED MICROWAVE SPECTROSCOPY OF THE EARTH'S STRATOSPHERE AND MESOSPHERE 335

R. Todd Clancy and Duane O. Mulhleman

7.1	Introduction	335
7.1.1	The Middle Atmosphere	335
7.1.2	Microwave Applications	336
7.1.3	Microwave Instrumentation	337
7.1.4	Microwave Transitions	339
7.1.5	Microwave Line Shapes	339
7.1.6	Atmospheric Transmission	340
7.1.7	Microwave Radiative Transfer	342
7.2	Observational Methods	343
7.2.1	Emission Measurements	343
7.2.2	Absorption Observations	347
7.3	Data-Analysis Techniques	349
7.3.1	Microwave Weighting Functions	350
7.3.2	Iterative Inversion Solutions	355
7.3.3	Matrix-Inversion Solutions	356
7.3.4	Constrained Matrix-Inversion Solutions	357
7.4	Middle-Atmosphere Observations	358
7.4.1	O ₃	359
7.4.2	H ₂ O	361
7.4.3	CO	363
7.4.4	ClO	364
7.4.5	N ₂ O and NO	367
7.4.6	HO ₂ , H ₂ O ₂ , and HCN	370
7.4.7	Mesospheric Winds	372
7.4.8	Middle-Atmospheric Temperatures, O ₂ , O ₂ (¹ Δg)	374
7.5	Future Developments	376
	References	377

CHAPTER 8

MICROWAVE LIMB SOUNDING 383

J. W. Waters

8.1	Introduction	383
-----	--------------	-----

8.2	The Need for Measurements	385
8.3	Stratospheric Molecules and Spectroscopy	386
8.4	Geometrical Considerations	400
8.5	Sensitivity Considerations	413
8.6	The UARS MLS Experiment	415
8.7	Future Possibilities	421
	References	430

APPENDICES TO CHAPTER 8

8A	Submillimeter Spectra of Stratospheric Molecules	435
8B	Theoretical Expressions	457
8B.1	Interaction of Radiation and Matter	458
8B.2	Einstein Coefficients	468
8B.3	Electric Dipole Transitions	470
8B.4	Absorption Coefficient and Radiative Transfer	472
8B.5	Rotational Transitions	478
8B.6	JPL Catalog Data	479
8B.7	Useful Approximations	481
8C	FORTTRAN Code for Absorption Coefficients	483
8C.1	ABSX_CLO_204	490
8C.2	QLOG	491
8C.3	ABSX_CLO_MLS	491
	References	495

CHAPTER 9

RETRIEVAL OF ATMOSPHERIC PARAMETERS IN PLANETARY ATMOSPHERES FROM MICROWAVE SPECTROSCOPY	497
--	-----

Duane O. Muhleman and R. Todd Clancy

9.1	Introduction	497
9.2	Observational and Analytical Methods	499
9.3	Observations with Single Telescopes	506
9.3.1	Mars	506
9.3.2	Venus	511
9.3.3	Titan and Io	514
9.4	Observations with Array Telescopes	516
9.4.1	Water Vapor in Mars' Atmosphere	517
9.4.2	Venus CO Abundances	519
9.4.3	Venus Winds	523
9.5	Spectroscopy from Spacecraft	524
	References	532

CHAPTER 10

**PROPERTIES OF THE DEEP ATMOSPHERES OF
THE PLANETS FROM RADIOASTRONOMICAL
OBSERVATIONS** **535**

Samuel Gulkis and Michael A. Janssen

10.1	Introduction	535
10.2	Basic Concepts	537
10.2.1	Disk Temperature and Weighting Functions	537
10.2.2	Model Atmospheres	541
10.3	Venus	542
10.4	The Giant Planets	548
10.4.1	Introduction	548
10.4.2	Jupiter and Saturn	554
10.4.3	Uranus and Neptune	556
10.5	Conclusion	558
	References	558
