	Introduction	1
	<i>Francesco Parisi and Vernon Smith</i>	
PART 1	IRRATIONALITY AND BOUNDED RATIONALITY IN LAW, PSYCHOLOGY, AND ECONOMICS	
<i>Chapter 1</i>	Departures from Rational Choice: With and Without Regret	13
	<i>Robert H. Frank</i>	
<i>Chapter 2</i>	Is the Mind Irrational or Ecologically Rational?	37
	<i>Gerd Gigerenzer</i>	
<i>Chapter 3</i>	Lessons from Neuroeconomics for the Law	68
	<i>Kevin McCabe, Vernon Smith, and Terrence Chorvat</i>	
<i>Chapter 4</i>	Treating Yourself Instrumentally: Internalization, Rationality, and the Law	95
	<i>Robert Cooter</i>	

PART 2	THE ECONOMICS OF IRRATIONAL BEHAVIOR	
<i>Chapter 5</i>	Addiction, Choice, and Irrationality <i>Ole-Jørgen Skog</i>	111
<i>Chapter 6</i>	Revenge and Retaliation <i>Vincy Fon and Francesco Parisi</i>	141
<i>Chapter 7</i>	What Makes Trade Possible? <i>Elizabeth Hoffman, Kevin McCabe, and Vernon Smith</i>	169
<i>Chapter 8</i>	Satisfaction and Learning: An Experimental Game to Measure Happiness <i>Marco Novarese and Salvatore Rizzello</i>	186
<i>Chapter 9</i>	The Market for Laughter <i>F. H. Buckley</i>	208
PART 3	THE JURISPRUDENCE OF IRRATIONAL BEHAVIOR: RETHINKING LAW AS A BEHAVIORAL INSTRUMENT	
<i>Chapter 10</i>	The Jurisprudence of Craziness <i>Stephen J. Morse</i>	225
<i>Chapter 11</i>	On Law Enforcement with Boundedly Rational Actors <i>Christine Jolls</i>	268
<i>Chapter 12</i>	The Biology of Irrationality: Crime and the Contingency of Deterrence <i>Michael E. O'Neill</i>	287
<i>Chapter 13</i>	Analyzing Illicit Drug Markets When Dealers Act with Limited Rationality <i>Jonathan Caulkins and Robert MacCoun</i>	315

<i>Chapter 14</i>	On the Psychology of Punishment <i>Cass R. Sunstein</i>	339
<i>Chapter 15</i>	Some Well-Aged Wines for the “New Norms” Bottles: Implications of Social Psychology for Law and Economics <i>Yuval Feldman and Robert MacCoun</i>	358
PART 4	IRRATIONAL BEHAVIOR AND THE DESIGN OF LAW	
<i>Chapter 16</i>	Human Fallibility and the Forms of Law: The Case of Traffic Safety <i>Thomas S. Ulen</i>	397
<i>Chapter 17</i>	The Free Radicals of Tort <i>Mark F. Grady</i>	425
<i>Chapter 18</i>	Probability Errors: Some Positive and Normative Implications for Tort and Contract Law <i>Eric A. Posner</i>	456
<i>Chapter 19</i>	Threatening an “Irrational” Breach of Contract <i>Oren Bar-Gill and Omri Ben-Shahar</i>	474
<i>Chapter 20</i>	Regulating Irrational Exuberance and Anxiety in Securities Markets <i>Peter H. Huang</i>	501
<i>Chapter 21</i>	In Praise of Investor Irrationality <i>Gregory La Blanc and Jeffrey J. Rachlinski</i>	542
	<i>Index</i>	589

TABLES AND FIGURES

Tables

6.1	Kind-for-kind retaliation	156
6.2	Measure-for-measure retaliation	159
6.3	Comparing retaliation regimes	161
7.1	Experimental design	173
7.2	Low opportunity cost payoff condition, impersonal exchange environment, node (branch) conditional outcome frequencies	178
7.3	Low opportunity cost payoff condition, personal exchange environment, node (branch) conditional outcome frequencies	180
7.4	High opportunity cost payoff condition, personal exchange environment, conditional (unconditional) outcome frequencies	181
7.5	High opportunity cost condition, impersonal exchange environment, conditional (unconditional) outcome frequencies	182
8.1	Distribution of individual values of the correlation between scores and satisfaction in each turn	193
8.2	Mean individual satisfaction attributed by players to different sums and scores in the whole game	194
8.3	Mean value of many indicators in the first part of the experiment by treatment	196

8.4	Main results of a series of regressions with mean satisfaction in the first part as dependent variable (all treatments and treatments 1 and 2)	197
8.5	Mean value of many indicators in the second part of the experiment by treatment	198
8.6	Main results of a series of regressions with mean satisfaction as dependent variable (treatments 1 and 2)	199
8.7	Main results of a series of regressions with mean satisfaction as dependent variable, considering all treatments	200
15.1	Approximate overlap among five different social influence taxonomies	364
18.1	Relationship between optimism and care	461
18.2	Harm-insensitive optimism	465
Figures		
1.1	Job safety choices when relative consumption matters	29
2.1	A fast and frugal decision tree for coronary care unit allocation	48
2.2	Coronary care unit decisions	50
2.3	Forty-eight physicians' estimates of patient's breast cancer chances	54
2.4a, 2.4b	How an efficient representation improves probabilistic reasoning and influences verdicts	57
3.1	Curve of utility function under prospect theory	72
3.2	Visual representation of the trust game	78
4.1	Future preferences of accountant and musician	96
4.2	Opportunities of musician and accountant	97
4.3	Choices by accountant and musician	101
4.4	Pareto self-improvement	104
5.1	Effect of different levels of intake before and after onset of tolerance	115
5.2	Utility of present low and high consumption	120
5.3	Hyperbolic discounting of future rewards	125
5.4	Preference structures for people with different horizons prior to the time of choice	127
7.1	Decision trees for assurance game	172
7.2	Low opportunity cost data	176
7.3	High opportunity cost data	177

9.1	Excessive laughter	220
13.1a	Tree for selling for one <i>year</i> with zero point being not making any money	322
13.1b	Tree for selling for one <i>cycle</i> with zero point being not making any money	322
13.2a	Tree for selling for one <i>year</i> with zero point being selling successfully	326
13.2b	Tree for selling for one <i>cycle</i> with zero point being selling successfully	326
18.1	The standard model	460
18.2	Optimism—too much care	462
18.3	Optimism—too little care	462
18.4	Care as a function of optimism	463
18.5	Care as a function of harm	466
