

## TABLE OF CONTENTS

<b>1. Introduction and Background</b>	<b>1</b>
1.1 The logical problem of language acquisition	1
1.2 The Poverty of the Stimulus problem in second language studies	6
1.3 Evidence for generativity in native phonotactics	10
1.4 The nature of the problem: the epistemological status of L2 phonology	17
1.5 Overview of research in L2 phonology	20
1.6 Primary research questions	27
<b>2. Studies in native and learner phonotactic performance</b>	<b>32</b>
2.1 Markedness and the syllable in L2 phonology	33
2.1.1 The MDH and L2 studies of phonology	33
2.1.2 Modeling L2 development in Optimality Theory	40
2.1.3 The notion of <i>wordlikeness</i>	47
2.2 Acquisition by a frequency-sensitive mechanism	49
2.2.1 Probabilistic analyses of phonological competence	51
2.3 Phonotactic intuitions in light of phonological grammar	59
2.4 Summary	65
<b>3. The Learnability of French Syllable Constraints by L1 English Speakers</b>	<b>67</b>
3.1 Preliminaries	67
3.2 Syllable structure constraints in French and English	68
3.2.1 The syllable and moras in phonological theory	68
3.2.2 Prosodic Morphology	70
3.2.3 The maximal syllable in French versus English	73
3.3 Toward a test of morphophonemic learning	79
3.3.1 The use of word transformations	80
3.3.2 Popular French re-suffixation and phonological constraints	82
3.4 Analyses of Re-suffixation Patterning and What is Acquired	93
3.4.1 Deletion vs Insertion	93
3.4.2 Allomorphy and Learnability	94
3.4.3 Cues to the Acquisition of Syllable Constraints in L2 French Input	100
3.5 Frequency inquiries from the Lexique database	105
<b>4. Experimental Design and Methodology</b>	<b>111</b>
4.1 Stimulus Design and Experimental Hypotheses	112
4.1.1 Test of consonant cluster limits, the 'CC' test	112
4.1.2 Sonorancy assimilation at the morpheme boundary, the 'RL' test	117
4.1.3 Continuancy dissimilation, the 'Continuancy' Test	119
4.2 Stimulus Presentation	121
4.2.1 The organization of the test items	121
4.2.2 The questionnaire	124

4.2.3	The English nonce control test	126
4.3	Participants	126
4.4	Statistical Procedures	128
5.	Quantitative Results	131
5.1	Introduction	131
5.2	Results of the CC Test	132
5.2.1	English Nonce Control Test Results	132
5.2.2	French CC Test Pooled Results	135
5.2.3	Item analysis according to type: CCC, CC and CV	137
5.2.4	OBLI Results	138
5.2.5	Individual CC Results	139
5.2.6	CC Confidence Measure Results	142
5.3	Results for the RL test	145
5.3.1	RL Pooled Results	145
5.3.2	Individual RL results	147
5.3.3	Root versus derived RT results	149
5.3.4	RL test confidence	152
5.4	Continuancy test	153
5.4.1	Continuancy Pooled results	153
5.4.2	Individual Continuancy Results	155
5.4.3	Root versus derived Continuancy results	157
5.4.4	Continuancy confidence results	158
5.5	The Three-Suffix Control Measure	159
5.6	Summary	160
6.	Discussion	162
6.1	Modeling the results	163
6.2	The CC Test: On the Depth of L2 Phonological Knowledge	164
6.2.1	CC Test: Learnability Considerations	168
6.2.2	The issues in phonotactic development	172
6.3	The RL Test	173
6.4	The Continuancy Test	178
6.5	The Nature of Individual Grammars	182
6.6	Summary	185
7.	Conclusion	190
7.1	Second Language Acquisition in OT Modeling	191
7.2	A New Approach to Phonological Testing	193
7.3	The Role of UG in L2 Phonology	196
7.4	The Role of Lexical Frequencies in Phonotactic Knowledge	199
7.5	Conclusion	201
	Bibliography	204
	Appendix A : Task Questionnaire for Participants	218
	Appendix B : Exit Questionnaire for Participants	219
	Appendix C : List of Test Items	220
