
Contents

Preface	v
Mirror Duality via G_2 and $Spin(7)$ Manifolds <i>Selman Akbulut and Sema Salur</i>	1
2-Gerbes and 2-Tate Spaces <i>Sergey Arkhipov and Kobi Kremnizer</i>	23
The Geometry of Partial Order on Contact Transformations of Pre-Quantization Manifolds <i>Gabi Ben Simon</i>	37
Towards Quantum Cohomology of Real Varieties <i>Özgür Ceyhan</i>	65
Weyl Modules and Opers without Monodromy <i>Edward Frenkel and Dennis Gaitsgory</i>	101
Differentiable Operads, the Kuranishi Correspondence, and Foundations of Topological Field Theories Based on Pseudo-Holomorphic Curves <i>Kenji Fukaya</i>	123
Notes on the Self-Reducibility of the Weil Representation and Higher-Dimensional Quantum Chaos <i>Shamgar Gurevich and Ronny Hadani</i>	201
Notes on Canonical Quantization of Symplectic Vector Spaces over Finite Fields <i>Shamgar Gurevich and Ronny Hadani</i>	233

Noncommutative Geometry in the Framework of Differential Graded Categories

Snigdhayan Mahanta 253

Multiplicative Renormalization and Hopf Algebras

Walter D. van Suijlekom..... 277
