<i>Preface</i>	<i>page</i>	ix
<i>List of tables</i>		xv
<i>List of contributors</i>		xxi
1 <i>Spatial demography: themes, issues and progress</i>		1
ROBERT WOODS AND PHILIP REES		
Part I <i>SPATIAL VARIATIONS IN DEMOGRAPHIC STRUCTURES</i>		5
2 <i>Spatial and temporal patterns</i>		7
ROBERT WOODS		
2.1 Demographic relationships		7
2.2 Methods		9
2.3 Limitations		18
3 <i>The spatial dynamics of the demographic transition in the West</i>		21
ROBERT WOODS		
3.1 Introduction		21
3.2 The transition described		23
3.3 Spatial variations		29
3.4 Transition theory		36
3.5 Can the transition be explained?		39
4 <i>The analysis of regional fertility patterns</i>		45
JOHN COWARD		
4.1 Introduction		45
4.2 Divergence and convergence		47
4.3 The fertility transition in Trinidad and Tobago		54
4.4 Contemporary fertility variations in England and Wales		58
4.5 Conclusion		64

CONTENTS

5	<i>Rising fertility in developing countries</i>	68
	TIM DYSON AND MIKE MURPHY	
5.1	Introduction	68
5.2	The evidence	68
5.3	Describing common fertility trends: analytic approaches	82
5.4	Summary and discussion	92
Part II	<i>MODELLING AND FORECASTING</i>	95
6	<i>Developments in the modelling of spatial populations</i>	97
	PHILIP REES	
6.1	What are the Part II chapters about?	97
6.2	Movement, transition and last residence data	99
6.3	How are the components of change formulated?	101
6.4	The measurement of rates	105
6.5	The use of rates in population models	111
6.6	Should observed rates or models of rates be used?	115
6.7	The individual and the household	116
6.8	The modelling of spatial populations within wider systems	123
6.9	Conclusion	124
7	<i>Choices in the construction of regional population projections</i>	126
	PHILIP REES	
7.1	Introduction	126
7.2	Sources of variation in population projection	129
7.3	Accounting frameworks for population projection	133
7.4	Accounts based models: the ways in which the data are assembled	143
7.5	The ways in which the population system is closed	146
7.6	Research design	148
7.7	A demographic information system for 20 UK zones	149
7.8	The projection experiments	154
7.9	Conclusions	159
8	<i>The analysis and projection of interregional migration in the United Kingdom</i>	160
	JOHN STILLWELL	
8.1	Introduction	160
8.2	Study area zones, data sources and estimation methods	161
8.3	Characteristics of internal migration in the UK	169
8.4	A modelling system	192
8.5	Conclusions	201

CONTENTS

9	<i>Forecasting place-to-place migration with generalized linear models</i>	203
	FRANS WILLEKENS AND NAZLI BAYDAR	
9.1	Introduction	203
9.2	Analysis of the time-series migration data for forecasting purposes	205
9.3	Modelling the components of migration	220
9.4	Forecasting migration	239
9.5	Conclusions	241
10	<i>Demographic processes and household dynamics: a microsimulation approach</i>	245
	MARTIN CLARKE	
10.1	Introduction	245
10.2	Microsimulation: an outline of methodology and a review of practice	247
10.3	The generation of an initial population using synthetic sampling	254
10.4	A microsimulation model of household dynamics	263
10.5	Results of numerical simulations	268
10.6	Concluding comments: present problems and future priorities	272
11	<i>A demographic-economic model of a metropolis</i>	273
	MOSS MADDEN AND PETER BATEY	
11.1	Introduction	273
11.2	An input-output approach to demographic-economic modelling	276
11.3	Methodological developments and empirical applications	278
11.4	The household consumption framework as a forecasting device	286
11.5	Conclusions	295
Part III	<i>RECONSTRUCTION, ESTIMATION AND EVALUATION OF DEMOGRAPHIC PATTERNS</i>	299
12	<i>Demographic estimation: problems, methods and examples</i>	301
	PHILIP REES AND ROBERT WOODS	
12.1	A definition of estimation	302
12.2	The concepts used in defining the population stocks and flows	303

CONTENTS

12.3	The age–time frameworks adopted	305
12.4	The spatial frameworks adopted	312
12.5	The temporal and accounting frameworks adopted	319
12.6	Example 1: external migration flows from a set of United Kingdom zones, 1976–81	323
12.7	Example 2: India's spatial demography	329
12.8	Lessons	341
13	<i>Regional population analysis in developing countries: the creation of a database for Thailand</i>	344
	WIM DOEVE	
13.1	Introduction	344
13.2	Problems of creating a database	346
13.3	The establishment of a benchmark integrated database for Thailand	357
13.4	Discussion	365
14	<i>Assessing the United Nations urbanization projections for the Asian Pacific</i>	367
	JACQUES LEDENT AND ANDREI ROGERS	
14.1	Introduction	367
14.2	Projected population growth and urbanization in the Asian Pacific	367
14.3	The components of growth	371
14.4	Urbanization dynamics	376
14.5	Urbanization and development	380
14.6	Conclusion	388
	<i>Bibliography</i>	390
	<i>Index</i>	410
