

# Contents

<b>Preface</b>	<b>xi</b>
<b>1 BASIC COMBINATORICS AND PROBABILITY</b>	<b>1</b>
1.1 <i>Basic counting principles</i>	1
1.2 <i>Recurrence relations</i>	9
1.3 <i>Finite differences</i>	11
1.4 <i>Discrete probability</i>	16
1.5 <i>Inclusion and exclusion principle</i>	26
1.6 <i>Distributions and moments of random variables</i>	40
1.7 <i>Generating functions</i>	55
1.8 <i>Reference notes</i>	60
1.9 <i>Exercises and complements</i>	61
<b>2 STIRLING NUMBERS</b>	<b>73</b>
2.1 <i>Introduction</i>	73
2.2 <i>Definitions and generating functions</i>	74
2.3 <i>Explicit expressions and recurrence relations</i>	85
2.4 <i>Generalized factorial coefficients</i>	96
	<b>vii</b>

2.5	<i>Enumeration of partitions by subsets and permutations by cycles</i>	108
2.6	<i>Reference notes</i>	113
2.7	<i>Exercises and complements</i>	115
<b>3</b>	<b>GENERALIZED STIRLING AND LAH NUMBERS</b>	<b>121</b>
3.1	<i>Introduction</i>	121
3.2	<i>Associated Stirling numbers</i>	122
3.3	<i>Associated generalized factorial coefficients</i>	129
3.4	<i>Universal generating functions</i>	134
3.5	<i>Generalized Stirling numbers</i>	139
3.6	<i>Generalized Lah numbers</i>	146
3.7	<i>Reference notes</i>	150
3.8	<i>Exercises and complements</i>	151
<b>4</b>	<b>OCCUPANCY DISTRIBUTIONS</b>	<b>159</b>
4.1	<i>Introduction</i>	159
4.2	<i>A random occupancy model</i>	160
4.3	<i>Occupancy distributions</i>	164
4.4	<i>Particular occupancy distributions</i>	170
4.4.1	<i>Classical occupancy distribution</i>	170
4.4.2	<i>Restricted occupancy distribution</i>	173
4.4.3	<i>Pseudo-contagious occupancy distribution</i>	177
4.4.4	<i>Restricted Bose-Einstein occupancy distribution</i>	179
4.5	<i>Statistical applications</i>	182
4.6	<i>A general random occupancy model</i>	191
4.7	<i>Reference notes</i>	202
4.8	<i>Exercises and complements</i>	204
<b>5</b>	<b>SEQUENTIAL OCCUPANCY DISTRIBUTIONS</b>	<b>215</b>
5.1	<i>Introduction</i>	215
5.2	<i>A sequential random occupancy model</i>	216
5.3	<i>Sequential occupancy distributions</i>	221

5.4	<i>Particular sequential occupancy distributions</i>	225
5.4.1	<i>Sequential classical occupancy distributions</i>	225
5.4.2	<i>Sequential restricted occupancy distributions</i>	230
5.4.3	<i>Sequential pseudo-contagious occupancy distributions</i>	233
5.5	<i>Statistical applications</i>	236
5.6	<i>A reduced sequential occupancy model</i>	241
5.7	<i>Reference notes</i>	244
5.8	<i>Exercises and complements</i>	245
<b>6</b>	<b>CONVOLUTIONS OF TRUNCATED DISTRIBUTIONS</b>	<b>251</b>
6.1	<i>Introduction</i>	251
6.2	<i>Zero truncated discrete distributions</i>	252
6.3	<i>Some particular convolutions</i>	258
6.3.1	<i>Zero truncated Poisson distribution</i>	258
6.3.2	<i>Logarithmic distribution</i>	258
6.3.3	<i>Zero truncated binomial distribution</i>	260
6.3.4	<i>Zero truncated negative binomial distribution</i>	261
6.4	<i>General truncated discrete distributions</i>	262
6.5	<i>Statistical applications</i>	266
6.5.1	<i>Zero truncated power series distribution</i>	266
6.5.2	<i>Left truncated power series distribution</i>	270
6.6	<i>Reference notes</i>	275
6.7	<i>Exercises and complements</i>	276
<b>7</b>	<b>COMPOUND AND MIXTURE DISTRIBUTIONS</b>	<b>281</b>
7.1	<i>Introduction</i>	281
7.2	<i>Compound discrete distributions</i>	282
7.3	<i>Mixture discrete distributions</i>	285
7.4	<i>Particular compounding distributions</i>	287
7.4.1	<i>Poisson compounding distribution</i>	287
7.4.2	<i>Binomial compounding distribution</i>	290
7.4.3	<i>Negative binomial compounding distribution</i>	292
7.4.4	<i>Logarithmic compounding distribution</i>	294

7.5	<i>Compound Poisson distributions</i>	296
7.5.1	<i>Hermite distribution</i>	297
7.5.2	<i>Generalized Hermite distribution</i>	300
7.5.3	<i>Pólya-Aeppli distribution</i>	302
7.5.4	<i>Poisson distribution of order <math>k</math></i>	304
7.6	<i>Compound logarithmic distributions</i>	307
7.6.1	<i>Chebyshev distribution of the first kind</i>	308
7.6.2	<i>Logarithmic distribution of order <math>k</math></i>	310
7.7	<i>Compound negative binomial distributions</i>	312
7.7.1	<i>Chebyshev distribution of the second kind</i>	313
7.7.2	<i>Gegenbauer distribution</i>	315
7.7.3	<i>Geometric distribution of order <math>k</math></i>	317
7.8	<i>Partition polynomials and compound distributions</i>	318
7.9	<i>Reference notes</i>	327
7.10	<i>Exercises and complements</i>	330
<b>Appendix HINTS AND ANSWERS TO EXERCISES</b>		<b>343</b>
