CONTENTS

Chapter 1 Introduction 1

1.1 What is Statistics? 2

1.2 Types of Statistics 2

Case Study 1–1 2008 U.S. Patent Leaders 3

Case Study 1–2 TV Commercials and Holiday Shopping 4

1.3 Population Versus Sample 5

Case Study 1–3 On Road, It's "Do As I Say, Not As I Do" 7

1.4 Basic Terms 8

1.5 Types of Variables 10

1.6 Cross-Section Versus Time-Series Data 13

1.7 Sources of Data 14

1.8 Summation Notation 15

Uses and Misuses/Glossary/Supplementary Exercises/Self-Review Test/Mini-Project/
Technology Instruction/Technology Assignments

Chapter 2 Organizing and Graphing Data 27

2.1 Raw Data 28

2.2 Organizing and Graphing Qualitative Data 28

Case Study 2–1 Career Choices for High School Students 31

Case Study 2–2 In or Out in 30 Minutes 32

2.3 Organizing and Graphing Quantitative Data 35

Case Study 2–3 Morning Grooming 40

2.4 Shapes of Histograms 44

2.5 Cumulative Frequency Distributions 51

2.6 Stem-and-Leaf Displays 54

2.7 Dotplots 58

Uses and Misuses/Glossary/Supplementary Exercises/Advanced Exercises/Self-Review Test/
Mini-Projects/Decide for Yourself/Technology Instruction/Technology Assignments

Chapter 3 Numerical Descriptive Measures 79

3.1 Measures of Central Tendency for Ungrouped Data 80

Case Study 3–1 Average Attendance at Baseball Games 83

Case Study 3–2 The Gender Pay Gap 85

3.2 Measures of Dispersion for Ungrouped Data 92

3.3 Mean, Variance, and Standard Deviation for Grouped Data 98

3.4 Use of Standard Deviation 105

Case Study 3–3 Here Comes the SD 108

3.5 Measures of Position 110

3.6 Box-and-Whisker Plot 115

Uses and Misuses/Glossary/Supplementary Exercises/Advanced Exercises/Appendix 3.1/Self-Review Test/Mini-Projects/Decide for Yourself/Technology Instruction/Technology Assignments

Chapter 4 Probability 137

4.1 Experiment, Outcomes, and Sample Space 138

4.2 Calculating Probability 143

4.3 Counting Rule 149

4.4 Marginal and Conditional Probabilities 150

Case Study 4–1 Rolling Stops 153

4.5 Mutually Exclusive Events 154

4.6 Independent Versus Dependent Events 155

4.7 Complementary Events 156

4.8 Intersection of Events and the Multiplication Rule 161

Case Study 4–2 Baseball Players have "Slumps" and "Streaks" 167

4.9 Union of Events and the Addition Rule 171

Uses and Misuses/Glossary/Supplementary Exercises/Advanced Exercises/Self-Review Test/Mini-Projects/Decide for Yourself/Technology Instruction/Technology Assignments

Chapter 5 Discrete Random Variables and Their Probability Distributions 191

5.1 Random Variables 192

5.2 Probability Distribution of a Discrete Random Variable 194

5.3 Mean of a Discrete Random Variable 201

5.4 Standard Deviation of a Discrete Random Variable 202

Case Study 5–1 Aces High Instant Lottery Game—20th Edition 203

5.5 Factorials, Combinations, and Permutations 208

Case Study 5–2 Playing Lotto 212

5.6 The Binomial Probability Distribution 214

5.7 The Hypergeometric Probability Distribution 226

5.8 The Poisson Probability Distribution 230

Case Study 5–3 Ask Mr. Statistics 233

Case Study 5–4 Living and Dying in the USA 235

Uses and Misuses/Glossary/Supplementary Exercises/Advanced Exercises/Self-Review Test/Mini-Projects/Decide for Yourself/Technology Instruction/Technology Assignments

Chapter 6 Continuous Random Variables and the Normal Distribution 250

6.1 Continuous Probability Distribution 251

6.2 The Normal Distribution 254

Case Study 6–1 Distribution of Time Taken to Run a Road Race 255

6.3 The Standard Normal Distribution 259

6.4 Standardizing a Normal Distribution 267

6.5 Applications of the Normal Distribution 273

6.6 Determining the z and x Values When an Area Under the Normal Distribution Curve is Known 278

6.7 The Normal Approximation to the Binomial Distribution 283

Uses and Misuses/Glossary/Supplementary Exercises/Advanced Exercises/Self-Review Test/Mini-Projects/Decide for Yourself/Technology Instruction/Technology Assignments

Chapter 7 Sampling Distributions 300

7.1 Population and Sampling Distributions 301

7.2 Sampling and Nonsampling Errors 303

7.3 Mean and Standard Deviation of $\bar{x}$ 306

7.4 Shape of the Sampling Distribution of $\bar{x}$ 310

7.5 Applications of the Sampling Distribution of $\bar{x}$ 316

7.6 Population and Sample Proportions 321

7.7 Mean, Standard Deviation, and Shape of the Sampling Distribution of $\hat{p}$ 323

7.8 Applications of the Sampling Distribution of $\hat{p}$ 328

Uses and Misuses/Glossary/Supplementary Exercises/Advanced Exercises/Self-Review Test/Mini-Projects/Decide for Yourself/Technology Instruction/Technology Assignments

Chapter 8 Estimation of the Mean and Proportion 340

8.1 Estimation: An Introduction 341

8.2 Point and Interval Estimates 342

8.3 Estimation of a Population Mean: σ Known 344

Case Study 8–1 Raising a Child 349

8.4 Estimation of a Population Mean: σ Not Known 354

8.5 Estimation of a Population Proportion: Large Samples 362

Case Study 8–2 Which Sound Is the Most Frustrating to Hear? 365

Uses and Misuses/Glossary/Supplementary Exercises/Advanced Exercises/Self-Review Test/Mini-Projects/Decide for Yourself/Technology Instruction/Technology Assignments

Chapter 9 Hypothesis Tests About the Mean and Proportion 381

9.1 Hypothesis Tests: An Introduction 382

9.2 Hypothesis Tests About μ: σ Known 390

Case Study 9–1 How Crashes Affect Auto Premiums 399

9.3 Hypothesis Tests About μ: σ Not Known 404

9.4 Hypothesis Tests About a Population Proportion: Large Samples 414

Case Study 9–2 Favorite Seat in the Plane 420

Uses and Misuses/Glossary/Supplementary Exercises/Advanced Exercises/Self-Review Test/Mini-Projects/
Decide for Yourself/Technology Instruction/Technology Assignments

Chapter 10 Estimation and Hypothesis Testing: Two Populations 439

10.1 Inferences About the Difference Between Two Population Means for Independent Samples: σ_1 and σ_2 Known 440

10.2 Inferences About the Difference Between Two Population Means for Independent Samples: σ_1 and σ_2 Unknown but Equal 447

Case Study 10–1 Average Compensation for Accountants 454

10.3 Inferences About the Difference Between Two Population Means for Independent Samples: σ_1 and σ_2 Unknown and Unequal 457

10.4 Inferences About the Difference Between Two Population Means for Paired Samples 464

10.5 Inferences About the Difference Between Two Population Proportions for Large and Independent Samples 473

Case Study 10–2 Is Vacation Important? 478

Uses and Misuses/Glossary/Supplementary Exercises/Advanced Exercises/Self-Review Test/Mini-Projects/
Decide for Yourself/Technology Instruction/Technology Assignments

Chapter 11 Chi-Square Tests 498

11.1 The Chi-Square Distribution 499

11.2 A Goodness-of-Fit Test 502

Case Study 11–1 What Is Your Favorite Season? 508

11.3 Contingency Tables 511

11.4 A Test of Independence or Homogeneity 511

11.5 Inferences About the Population Variance 523

Uses and Misuses/Glossary/Supplementary Exercises/Advanced Exercises/Self-Review Test/Mini-Projects/
Decide for Yourself/Technology Instruction/Technology Assignments

Chapter 12 Analysis of Variance 541

12.1 The *F* Distribution 542

12.2 One-Way Analysis of Variance 544

Uses and Misuses/Glossary/Supplementary Exercises/Advanced Exercises/Self-Review Test/Mini-Projects/
Decide for Yourself/Technology Instruction/Technology Assignments

Chapter 13 Simple Linear Regression 564

13.1 Simple Linear Regression Model 565

13.2 Simple Linear Regression Analysis 567

Case Study 13–1 Regression of Heights and Weights of NBA Players 574

13.3 Standard Deviation of Random Errors 581

13.4 Coefficient of Determination 582

13.5 Inferences About *B* 587

13.6 Linear Correlation 592

13.7 Regression Analysis: A Complete Example 599
13.8 Using the Regression Model 606
13.9 Cautions in Using Regression 609
Uses and Misuses/Glossary/Supplementary Exercises/Advanced Exercises/Self-Review Test/Mini-Projects/
Decide for Yourself/Technology Instruction/Technology Assignments

Chapter 14 Multiple Regression

This chapter is not included in this text but is available for download on the Web site at www.wiley.com/go/global/mann.
14.1 Multiple Regression Analysis
14.2 Assumptions of the Multiple Regression Model
14.3 Standard Deviation of Errors
14.4 Coefficient of Multiple Determination
14.5 Computer Solutions of Multiple Regression
Uses and Misuses/Glossary/Self-Review Test/Mini-Projects/Decide for Yourself

Chapter 15 Nonparametric Methods

This chapter is not included in this text but is available for download on the Web site at www.wiley.com/go/global/mann.
15.1 The Sign Test
15.2 The Wilcoxon Signed-Rank Test for Two Dependent Samples
15.3 The Wilcoxon Rank Sum Test for Two Independent Samples
15.4 The Kruskal-Wallis Test
15.5 The Spearman Rho Rank Correlation Coefficient Test
15.6 The Runs Test for Randomness
Uses and Misuses/Glossary/Supplementary Exercises/Advanced Exercises/Self-Review Test/Mini-Projects/
Decide for Yourself/Technology Instruction/Technology Assignments

Appendix A Sample Surveys, Sampling Techniques, and Design of Experiments A1

A.1 Sources of Data A1
A.1.1 Internal Sources A1
A.1.2 External Sources A2
A.1.3 Surveys and Experiments A2
Case Study A–1 Is It a Simple Question? A3
A.2 Sample Surveys and Sampling Techniques A4
A.2.1 Why Sample? A4
A.2.2 Random and Nonrandom Samples A4
A.2.3 Sampling and Nonsampling Errors A5
A.2.4 Random Sampling Techniques A8
A.3 Design of Experiments A9
Case Study A–2 Do Antibacterial Soaps Work? A13
Exercises / Advanced Exercises / Glossary

Appendix B Explanation of Data Sets B1

Data Set I: City Data B1
Data Set II: Data on States B2
Data Set III: NBA Data B2
Data Set IV: Manchester (Connecticut) Road Race Data B3
Data Set V: Sample of 500 Observations Selected from Data Set IV B3
Data Set VI: Data on Movies B3
Data Set VII: Standard & Poor's 100 Index Data B4
Data Set VIII: McDonald's Data B4

Appendix C Statistical Tables C1

I Table of Binomial Probabilities C2
II Values of $e^{-\lambda}$ C11
III Table of Poisson Probabilities C13
IV Standard Normal Distribution Table C19
V The *t* Distribution Table C21
VI Chi-Square Distribution Table C23
VII The *F* Distribution Table C24

Tables VIII through XII along with Chapters 14 and 15 are available on the Web site of this text.

VIII Critical Values of *X* for the Sign Test
IX Critical Values of *T* for the Wilcoxon Signed-Rank Test
X Critical Values of *T* for the Wilcoxon Rank Sum Test
XI Critical Values for the Spearman Rho Rank Correlation Coefficient Test
XII Critical Values for a Two-Tailed Runs Test with $\alpha = .05$

Answers to Selected Odd Numbered Exercises and Self-Review Tests are available on the Web site: www.wiley.com/go/global/mann.
