Contents

	Preface		xi
1	The General Interpolation and Approximation Problem		3
	1.1	Notation and Terminology	4
	1.2	Semi-Normed and Normed Spaces	5
	1.3	The Abstract Interpolation Problem	12
		1.3.1 Interpolation with Polynomials and Real Parameters	13
		1.3.2 Divided Differences	16
		1.3.3 Error Estimates for Polynomial Interpolation	19
		1.3.4 Runge's Example	20
	1.4	The Abstract Approximation Problem	21
		1.4.1 Metric Spaces	21
		1.4.2 Approximation Methods	23
		1.4.3 Existence and Uniqueness of a Best Approximation	25
		1.4.4 Pre-Hilbert Spaces	27
		1.4.5 Approximation in Pre-Hilbert Spaces	29
		1.4.6 Order of Approximation	31
		1.4.7 The Weierstrass Approximation Theorem	33
		1.4.8 Approximation by Step Functions	36
		1.4.9 Moduli of Continuity and Smoothness	37
		Exercises	39

2 Splines 44
2.1 Definitions 45
2.2 A Basis for $S^k(X_n)$ 46
2.3 B-Splines 47
2.3.1 Properties of B-Splines 49
2.3.2 The Basis Property of B-Splines 53
2.3.3 Derivatives and Integrals of B-Splines 56
2.4 Cardinal B-Splines 57
2.5 The Fourier Transform of Cardinal B-Splines 60
2.6 Cardinal Spline Interpolation 64
2.7 Repeated Knots 67
2.7.1 Properties of the Spaces Π_ξ^k 68
2.7.2 Basis for Π_ξ^k 68
2.8 Hermite Splines 74
2.9 Interpolation with Splines 75
2.9.1 Preliminaries 75
2.9.2 Error Estimates for Spline Interpolation 78
2.10 Approximation with Splines 90
2.11 L^2-Approximation with Splines 93
2.12 Exponential Splines 95
2.12.1 Polynomial Splines and Distributional Derivatives 95
2.12.2 Linear Differential Operators and Exponential Splines 99
2.12.3 Exponential B-Splines 105
2.13 $\mathcal{L}$-Splines 112
2.14 Wavelets and Splines 113
Exercises 119

3 Interpolation in $\mathbb{R}^s$, $s > 1$ 124
3.1 Multivariate Polynomial Interpolation 124
3.2 Spline Interpolation in $\mathbb{R}^s$ 127
3.3 Tensor Products of B-Splines 130
3.3.1 The Construction of Tensor-Product B-Splines 131
3.3.2 Shortcomings of the Tensor Product Approach 133
3.4 Kergin Interpolation 134
Exercises 139

4 Fractals 141
4.1 Definitions 142
4.1.1 Topological Dimension in $\mathbb{R}^n$ 143
4.1.2 The Hausdorff and Box Dimension in $\mathbb{R}^n$ 144
4.2 Iterated Function Systems 149
4.3 Approximation and the Collage Theorem 154

	4.4	Dimensions of Fractal Sets	156
		4.4.1 The Theoretical Computation of Dimension	157
		4.4.2 The Numerical Computation of Dimension	158
	4.5	The Code Space of an IFS	160
	4.6	Fractal Transformations	164
	4.7	Fractal Measures	167
		4.7.1 Measures	167
		4.7.2 IFSs with Probabilities and Fractal Measures	171
		Exercises	177
5	Fractal Functions		182
	5.1	Some Examples of Nowhere Differentiable Functions	183
	5.2	Fractal Interpolation Functions	184
	5.3	Polynomial Fractal Functions	190
	5.4	Bases of Fractal Functions	194
	5.5	The Box Dimension of Affine Fractal Functions	200
	5.6	Code Space and Fractal Functions	207
	5.7	Continuous Functions as Special Cases of Fractal Functions	208
	5.8	Fractal Functions of Class C^k	212
	5.9	Construction of Fractal Functions of Class C^k from Splines	214
	5.10	Fractal B-Splines	220
	5.11	Approximation with Fractal Functions	221
	5.12	Indefinite Integrals of Fractal Functions	223
	5.13	Fourier Transform of Fractal Functions	226
	5.14	Wavelets and Fractal Functions	228
	5.15	Fractal Functions and Function Spaces	232
		Exercises	236
6	Fractal Surfaces		239
	6.1	Tensor Product Fractal Surfaces	240
	6.2	Affine Fractal Surfaces in $\mathbb{R}^2$	242
	6.3	The Box Dimension of Affine Fractal Surfaces	250
	6.4	Hölder Continuity of Affine Fractal Functions	254
	6.5	Bilinear Fractal Surfaces in $\mathbb{R}^2$	255
	6.6	Fractal Surfaces Arising from Quadratic Forms	260
	6.7	Smooth Fractal Surfaces via Indefinite Integrals	262
		Exercises	265
7	Superfractals		266
	7.1	1-Variable Fractal Sets	267
	7.2	1-Variable Fractal Measures	272

7.3 V-Variable Fractal Sets and Fractal Measures 273
7.3.1 V-Variable Fractal Sets 274
7.3.2 V-Variable Fractal Measures 276
7.4 Graph Theory and Random Fractals 278
7.4.1 Code Trees 278
7.4.2 Random Fractal Sets and Random Fractal Measures 281
Exercises 287

8 Superfractal Functions 289
8.1 Preliminaries 290
8.2 V-Variable Fractal Interpolation 292
Exercises 300

Bibliography 302

Nomenclature 310
