

Contents

1. Non-Technical Overview	11
1.1. Core Concepts	13
1.2. Capitalization Theory	14
1.3. Roadmap and Context	16
1.3.1. Overview: A Bayesian Averaging Approach to Capitalization	16
1.3.2. Overview: Capitalization over Space and Time	17
1.3.3. Overview: Debt Capitalization and Ricardian Equivalence	19
2. A Bayesian Averaging Approach to Capitalization	21
2.1. Introduction	21
2.2. Methodological Issues of BMA	23
2.3. Data and Capitalization Effects in the Literature	26
2.4. Baseline Results	31
2.5. Robustness Issues	39
2.5.1. Comparison of Coefficient Estimates	39
2.5.2. Iterated BMA for Variable Selection	42
2.6. Concluding Remarks	47
3. Capitalization of Fiscal Variables over Space and Time	49
3.1. Introduction	49
3.2. Basic Model	52
3.3. Capitalization Differences over Space	55
3.3.1. Data	55
3.3.2. Analysis of Separate Samples over Space	57
3.3.3. Linear Interaction over Space	62
3.4. Capitalization Differences over Time	65
3.4.1. Linear Interaction over Time	65
3.4.2. Bootstrap Results over Time	69
3.5. Concluding Remarks	71

4. Debt Capitalization and Ricardian Equivalence	73
4.1. Introduction	73
4.2. Related Literature	76
4.3. Debt Capitalization Mechanism and Data	79
4.3.1. Debts and House Prices	79
4.3.2. Characteristics of Swiss Communities and Data	81
4.4. Estimation	85
4.5. Robustness Tests	92
4.6. Concluding Remarks	101
5. Summary, Policy Implications and Further Research	103
5.1. Summary	103
5.2. Policy Implications	105
5.3. Further Research	107
Appendix A: Data Description	110
Appendix B: Further Robustness Tests	116
Bibliography	125
