

# Contents

Preface .....	xi
<b>1 Semantic Roles .....</b>	<b>1</b>
1.1 Introduction .....	1
1.2 Linguistic Background .....	2
1.3 More Elaborated Frameworks .....	7
1.3.1 Lexical Conceptual Structures	7
1.3.2 Proto-Roles	9
1.3.3 Levin's <i>Verb Classes and Alternations</i>	14
1.3.4 Frame Semantics	18
<b>2 Available Lexical Resources .....</b>	<b>21</b>
2.1 FrameNet .....	21
2.2 VerbNet .....	22
2.3 PropBank .....	24
2.3.1 Limitations to a Verb-Specific Approach	26
2.4 Semlink .....	27
2.4.1 Hierarchy of Thematic Roles	28
2.5 Summary .....	28
<b>3 Machine Learning for Semantic Role Labeling .....</b>	<b>31</b>
3.1 Identification and Classification .....	31
3.2 Features Used for Classification .....	33
3.2.1 Phrase Type	33
3.2.2 Governing Category	35
3.2.3 Parse Tree Path	35
3.2.4 Position	39

3.2.5	Voice	40
3.2.6	Head Word	40
3.2.7	Subcategorization	41
3.2.8	Argument Set	41
3.2.9	Features Introduced in Later Systems	41
3.3	Choice of Machine Learning Method	43
3.3.1	Feature Combinations	43
3.4	Joint Inference	44
3.4.1	Reranking	44
3.4.2	Viterbi Search	45
3.4.3	Integer Linear Programming	45
3.5	Impact of Parsing	46
3.5.1	Integrated Parsing and SRL	46
3.5.2	Choice of Syntactic Representation	47
3.5.3	Combining Parsers	48
3.6	Evaluation	49
3.7	Genre	50
3.8	Choice of Resources and Combination of Resources	50
3.9	Unsupervised and Partially Supervised Approaches	51
<b>4</b>	<b>A Cross-Lingual Perspective</b>	<b>53</b>
4.1	Semantic Role Projection	56
4.2	Semantic Role Alignment	59
4.3	Language-(In)Dependent Semantic Role Labeling	61
4.3.1	The Chinese PropBank	62
4.3.2	Semantic Role Labeling for Verbs	63
4.3.3	Semantic Role Labeling for Nouns	70
4.3.4	Summary	75

5 **Summary** ..... 77

**Bibliography** ..... 79

**Authors' Biographies** ..... 91
