| List of Figures | xiii |
| List of Tables | xvii |
| Introduction | xix |
| 1. Measuring Welfare Changes—A Brief Overview | 1 |
| 1.1. Measuring Welfare Changes using Price–Quantity Comparisons | 3 |
| 1.1.1. Welfare Changes for Single Consumers | 4 |
| 1.1.2. Welfare Changes for Many Consumers | 8 |
| 1.2. Measuring Welfare Changes using Demand Schedules | 17 |
| 1.2.1. Welfare Changes for Single Consumers | 17 |
| 1.2.2. Welfare Changes for Many Consumers | 26 |
| 1.3. Application: Measuring the Social Deadweight Losses from Distorting Taxation | 31 |
| 1.3.1. Measuring the Welfare Costs from Multiple Commodity Taxes | 34 |
| 1.4. Summary and Conclusions | 38 |
| 2. Conventional Shadow Prices | 42 |
| 2.1. A General Equilibrium Model of a Tax-distorted Economy | 46 |
| 2.1.1. A Conventional Welfare Equation | 50 |
| 2.2. Conventional (Harberger) Shadow Prices | 52 |
| 2.2.1. Welfare Effects in Related Markets | 54 |
| 2.2.2. Efficiency Effects | 54 |
| 2.2.3. Income Effects and the Shadow Value of Government Revenue | 56 |
| 2.3. Project Evaluation | 63 |
| 2.4. Concluding Remarks | 64 |
| 3. Distributional Effects | 68 |
| 3.1. A Conventional Welfare Equation with Distributional Effects | 70 |
| 3.2. Measuring Distributional Effects—The Dréze–Stern Approach | 72 |
| 3.2.1. Shadow Prices | 72 |
| 3.2.2. Efficiency Effects | 73 |
| 3.3. Identifying Pareto Improvements—The Bruce–Harris–Diewert Approach | 73 |
| 3.3.1. Income Effects and the Shadow Value of Government Revenue | 74 |
| 3.3.2. The Welfare Effects from a Lump-sum Redistribution of Income | 76 |

| | | |
|--------|---|-----|
| 3.4. | Project Evaluation | 77 |
| 3.5. | Concluding Remarks | 77 |
| 4. | Non-tax Distortions in Markets | 82 |
| 4.1. | Price Controls | 83 |
| 4.1.1. | Price Ceilings | 84 |
| 4.1.2. | Price Floors and the Shadow Wage | 86 |
| 4.2. | Production Quota | 96 |
| 4.3. | Non-Competitive Behaviour | 98 |
| 4.4. | Externalities | 100 |
| 4.5. | Concluding Remarks | 105 |
| 5. | International Trade | 109 |
| 5.1. | Conventional Harberger Shadow Prices of Fully Traded Goods | 112 |
| 5.2. | The Shadow Exchange Rate | 113 |
| 5.2.1. | The Traditional Formula for the Shadow Exchange Rate | 113 |
| 5.2.2. | Fixed versus Flexible Exchange Rates—and the Choice of Numeraire | 115 |
| 5.3. | Compensated Shadow Prices and the Choice of Numeraire | 117 |
| 5.4. | The Little–Mirrlees (1969) Result | 120 |
| 5.5. | The Twin Deficits | 121 |
| 5.6. | Quota Protection | 122 |
| 5.6.1. | The Shadow Value of Import Quota | 123 |
| 5.6.2. | The Shadow Prices of Quota Protected Goods | 125 |
| 5.7. | Home-price Consumption Schemes | 126 |
| 5.8. | The Effective Rate of Protection | 129 |
| 5.9. | The Domestic Resource Cost Ratio | 132 |
| 5.10. | Concluding Remarks | 134 |
| 6. | Revised Shadow Prices | 139 |
| 6.1. | Determinants of the Changes in Tax Inefficiency | 143 |
| 6.2. | Efficiency Effects | 145 |
| 6.2.1. | Determinants of the Compensated Changes in Tax Inefficiency | 148 |
| 6.3. | Income Effects and the Revised Shadow Value of Government Revenue | 151 |
| 6.4. | Project Evaluation | 152 |
| 6.5. | Concluding Remarks | 153 |
| 7. | The Marginal Social Cost of Public Funds | 156 |
| 7.1. | Conventional Cost–Benefit Analysis and the MCF | 157 |
| 7.2. | Separating the Income and Substitution Effects in the MCF | 162 |
| 7.2.1. | Efficiency Effects | 162 |
| 7.2.2. | Income Effects | 164 |

List of Figures

| | | |
|-------|--|----|
| 1.1. | A competitive equilibrium | 1 |
| 1.2. | Ranking consumption bundles | 4 |
| 1.3. | Ranking consumption bundles using quantity indices | 5 |
| 1.4. | Welfare changes using quantity indices | 6 |
| 1.5. | Relating changes in surplus to changes in activity | 7 |
| 1.6. | Ranking equilibrium outcomes | 9 |
| 1.7. | Ranking consumption bundles using quantity indices | 10 |
| 1.8. | Welfare comparisons using compensation tests | 10 |
| 1.9. | The Kaldor criterion | 11 |
| 1.10. | The Hicks' criterion | 12 |
| 1.11. | Contradictions using Kaldor–Hicks tests | 13 |
| 1.12. | A Scitovsky test contradiction | 13 |
| 1.13. | An importable good k | 15 |
| 1.14. | A non-traded input—labour (n) | 15 |
| 1.15. | Changes in ordinary consumer surplus for multiple price changes | 19 |
| 1.16. | Homothetic preferences and constant λ | 21 |
| 1.17. | Quasi-linear preferences and constant λ | 22 |
| 1.18. | Tax inefficiency with perfect complements | 24 |
| 1.19. | The compensating variation | 26 |
| 1.20. | The equivalent variation | 27 |
| 1.21. | The Boadway paradox | 29 |
| 1.22. | CVs for multiple price changes | 31 |
| 1.23. | The welfare cost of taxation | 32 |
| 1.24. | The welfare cost of taxation | 33 |
| 1.25. | Measuring the DWLs for multiple taxes | 34 |
| 1.26. | Summing MDWLs | 36 |
| 1.27. | Summing MDWLs in the presence of an existing tax | 36 |
| 1.28. | Comparing the DWL measures | 37 |
| 2.1. | The shadow price of a non-traded good | 43 |
| 2.2. | The welfare loss from introducing a commodity tax on good 1 | 48 |
| 2.3. | The welfare gain from endowing another unit of good 1 on the economy | 49 |
| 2.4. | The shadow price of good k | 53 |
| 2.5. | Related market effects | 54 |
| 2.6. | The compensated shadow price | 56 |
| 2.7. | The shadow value of government revenue | 60 |
| 2.8. | Constant producer prices | 61 |
| 2.9. | Variable producer prices | 62 |
| 3.1. | The shadow price of good k | 69 |
| 3.2. | Lump-sum transfers for dz_k | 75 |

| | | |
|-------|---|-----|
| 4.1. | A price cap | 84 |
| 4.2. | The shadow price with a price cap | 85 |
| 4.3. | Cross-effects from raising the tax on another good (d) | 87 |
| 4.4. | The shadow wage | 88 |
| 4.5. | The shadow wage | 89 |
| 4.6. | Cross-market effects in the labour market | 90 |
| 4.7. | The Harris–Todaro model | 91 |
| 4.8. | The shadow wage in a two sector model | 93 |
| 4.9. | The shadow wage rate with differential employment costs | 94 |
| 4.10. | The shadow wage and tax differentials | 95 |
| 4.11. | The shadow price with volume quota on production | 97 |
| 4.12. | A single-price monopolist | 99 |
| 4.13. | Cross-effects in a monopoly market | 100 |
| 4.14. | A single-price monopsonist | 100 |
| 4.15. | A negative production externality | 102 |
| 4.16. | A positive consumption externality | 104 |
| 5.1. | An importable good k | 111 |
| 5.2. | The shadow exchange rate | 115 |
| 5.3. | Foreign exchange as numeraire | 118 |
| 5.4. | Good 0 as numeraire | 119 |
| 5.5. | Compensated welfare changes with different numeraire goods | 120 |
| 5.6. | The shadow value of volume quota | 124 |
| 5.7. | The shadow value of value quota | 124 |
| 5.8. | The shadow price of an importable good protected by volume quota | 126 |
| 5.9. | A home-price consumption scheme | 127 |
| 5.10. | The shadow price of output with a home-price consumption scheme | 128 |
| 5.11. | The shadow price of project input with a home-price consumption scheme | 128 |
| 5.12. | Cross-market effects and home-price consumption schemes | 129 |
| 5.13. | Non-traded input (s) | 132 |
| 6.1. | The revised shadow price of good k —in full equilibrium | 141 |
| 6.2. | An endogenous fall in public sector profit | 143 |
| 6.3. | The shadow price with an ad valorem tax | 144 |
| 6.4. | The compensated revised shadow price of good k | 146 |
| 6.5. | The compensated shadow price with no initial public production | 148 |
| 6.6. | An ad valorem tax | 149 |
| 6.7. | A negative production externality | 150 |
| 6.8. | A (non-excludable) public good | 150 |
| 7.1. | The conventional MCF | 158 |
| 7.2. | The revised shadow price of good k —without initial public production | 160 |
| 7.3. | The revised shadow price of good k —with initial public production | 161 |
| 7.4. | The revised compensated shadow price of good k —and the MCF | 164 |
| 7.5. | The income effects for dt_d | 166 |
| 7.6. | The shadow value of government revenue | 172 |
| 7.7. | The revised shadow price of good k with distributional effects | 174 |

List of Figures

xv

| | | |
|-------|--|-----|
| 7.8. | Income with a progressive tax | 179 |
| 8.1. | The social discount rate | 191 |
| 9.1. | The shadow price with CRS production | 219 |
| 9.2. | Shadow prices with a 100% profits tax and Ramsey optimal taxes | 221 |
| 10.1. | The conventional shadow price of a public good | 237 |
| 10.2. | The conventional Samuelson condition | 238 |
| 10.3. | The conventional shadow price of a public good | 240 |
| 10.4. | The revised shadow wage rate | 243 |
| 10.5. | The Samuelson condition with a minimum wage | 245 |
| 10.6. | Conventional Lindahl prices | 250 |
| 10.7. | Lindahl prices with welfare effects in related markets | 251 |

List of Tables

| | | |
|------|---|-----|
| 1.1. | Different measures of the welfare cost | 33 |
| 2.1. | The exogenous policy variables | 51 |
| 5.1. | The ERP for an importable good | 131 |
| 6.1. | The exogenous policy variables | 140 |
| 7.1. | Comparing the welfare decompositions of the MCF | 167 |
| 7.2. | Estimates of the MCF for wage taxes | 169 |
| 7.3. | Empirical estimates of the MCF | 171 |
| 7.4. | Lump-sum taxation | 173 |
| 8.1. | Marginal taxes rates on corporate income | 202 |
| 8.2. | Security returns after personal tax | 203 |
| 8.3. | Security returns with corporate tax imputation | 205 |
| 9.1. | Shadow prices and producer prices | 223 |
