| <b>3 Capacitance Spectroscopy on Self-Assembled Quantum Dots .....</b>  | <b>51</b>  |
| Andreas Schramm, Christiane Konetzni,<br>and Wolfgang Hansen  |            |
| 3.1 Introduction .....  | 51         |
| 3.2 Experimental Techniques .....   | 52         |
| 3.2.1 Deep Level Transient Spectroscopy .....   | 52         |
| 3.2.2 Capacitance Voltage Spectroscopy<br>on Schottky Diodes .....  | 56         |
| 3.3 Experimental Results.....   | 57         |
| 3.3.1 Capacitance Spectroscopy on Quantum-Dot<br>Schottky Diodes .....  | 57         |
| 3.3.2 Deep Level Transient Spectroscopy<br>on Quantum-Dot Schottky Diodes .....   | 59         |
| 3.3.3 Evaluation of Quantum-Dot Shell Energies<br>in the Thermally Assisted Tunneling Model .....                                     | 62         |
| 3.3.4 DLTS Experiments in Magnetic Fields .....   | 67         |
| 3.3.5 Advanced Time-Resolved Capacitance<br>Spectroscopy Methods: Tunneling-DLTS,<br>Constant-Capacitance DLTS and Reverse-DLTS ..... | 69         |
| 3.3.6 Alternative Capacitance Spectroscopy Methods .....  | 72         |
| 3.4 Conclusion and Outlook .....  | 73         |
| References.....   | 75         |
| <b>4 The Different Faces of Coulomb Interaction in Transport<br/>Through Quantum Dot Systems .....</b>                                | <b>79</b>  |
| Benjamin Baxevanis, Daniel Becker, Johann Gutjahr,<br>Peter Moraczewski, and Daniela Pfankuche  |            |
| 4.1 Introduction .....  | 79         |
| 4.2 Transport Through Quantum Dot Systems.....  | 80         |
| 4.3 Electronic Structure of Quantum Dots .....  | 83         |
| 4.3.1 Circular Quantum Dots.....  | 83         |
| 4.3.2 Elliptical Quantum Dots.....  | 85         |
| 4.3.3 Quantum Rings .....   | 87         |
| 4.3.4 Magnetically Doped Quantum Dots .....   | 89         |
| 4.3.5 Correlations Beyond Hund's Rule .....   | 93         |
| 4.4 Transport Beyond Spectroscopy .....   | 95         |
| 4.5 Outlook .....   | 97         |
| References.....   | 99         |
| <b>5 Far-Infrared Spectroscopy of Low-Dimensional<br/>Electron Systems.....</b>   | <b>103</b> |
| Detlef Heitmann and Can-Ming Hu   |            |
| 5.1 Introduction.....   | 103        |
| 5.2 Experimental FIR Spectroscopic Techniques .....   | 104        |

|          |   |            |

| 5.3      | Preparation of Arrays of Quantum Materials .....  | 106        |
| 5.4      | Theoretical Models.....   | 108        |
| 5.5      | Far-infrared Transmission Experiments .....   | 112        |
| 5.6      | FIR Photoconductivity Spectroscopy.....   | 119        |
| 5.7      | Summary.....  | 135        |
|          | References .....  | 136        |
| <b>6</b> | <b>Electronic Raman Spectroscopy of Quantum Dots .....</b>                                      | <b>139</b> |
|          | Tobias Kipp, Christian Schüller, and Detlef Heitmann  |            |
| 6.1      | Introduction .....  | 139        |
| 6.2      | Fabrication of Charged Quantum Dots .....   | 141        |
| 6.3      | Electronic States in Quantum Dots .....   | 142        |
| 6.4      | Raman Experiments on Etched GaAs–AlGaAs QDs .....   | 145        |
| 6.4.1    | QDs with Many Electrons .....   | 145        |
| 6.4.2    | QDs with Only Few Electrons .....   | 149        |
| 6.5      | Raman Experiments on Self-Assembled In(Ga)As QDs .....  | 150        |
| 6.5.1    | QDs with a Fixed Number of Electrons, $N_e \approx 6\text{--}7$ .....                           | 150        |
| 6.5.2    | QDs with a Tunable Number of Electrons,<br>$N_e = 2\text{...}6$ .....                           | 151        |
| 6.5.3    | Comparison to Calculated Resonant Raman<br>Spectra for $N_e = 2\text{...}6$ .....               | 154        |
| 6.5.4    | QDs with $N_e = 2$ Electrons: Artificial He Atoms .....   | 156        |
| 6.6      | Summary .....   | 160        |
|          | References .....  | 162        |
| <b>7</b> | <b>Light Confinement in Microtubes .....</b>  | <b>165</b> |
|          | Tobias Kipp, Christian Strelow, and Detlef Heitmann   |            |
| 7.1      | Introduction .....  | 165        |
| 7.2      | Fabrication .....   | 167        |
| 7.3      | Experimental Setup .....  | 168        |
| 7.4      | Microtubes with Unstructured Rolling Edges.....   | 168        |
| 7.5      | Influence of the Rolling Edges on the Emission Properties .....                                 | 171        |
| 7.6      | Controlled Three-Dimensional Confinement<br>by Structured Rolling Edges .....                   | 173        |
| 7.7      | Conclusion and Outlook .....  | 180        |
|          | References .....  | 181        |
| <b>8</b> | <b>Scanning Tunneling Spectroscopy of Semiconductor<br/>Quantum Dots and Nanocrystals .....</b> | <b>183</b> |
|          | Giuseppe Maruccio and Roland Wiesendanger   |            |
| 8.1      | Introduction .....  | 183        |
| 8.2      | Electronic Structure and Single-Particle Wavefunctions .....                                    | 184        |
| 8.3      | Electron Transport Through Quantum Dots and Nanocrystals.....                                   | 187        |
