|---|----------|
| INTRODUCTION | 1 |
| 1 Traces | 7 |
| 1.1 Definition and uniqueness of a trace | 7 |
| 1.1.1 Traces and DGAs | 12 |
| 1.1.2 Example: bounded operators | 16 |
| 1.1.3 Matrix algebras | 17 |
| 1.1.4 Example: commutative algebras | 18 |
| 1.1.5 Example: non-commutative torus | 19 |
| 1.1.6 Example: de Rham currents | 19 |
| 1.1.7 Example: smoothing operators | 23 |
| 1.1.8 Example: pseudodifferential operators | 24 |
| 1.2 Characters and (algebraic) K -theory | 28 |
| 1.2.1 Cyclic homology | 29 |
| 1.2.2 $K_0(\mathcal{A})$ | 34 |
| 1.2.2.1 Chern character on $K_0(\mathcal{A})$ | 36 |
| 1.2.2.2 Example: topological even K -theory | 37 |
| 1.2.2.3 Superconnections: Chern–Weil on $K_0(M)$ | 40 |
| 1.3 Trace ideals in $\mathcal{B}(H)$ | 41 |
| 1.3.1 $\mathcal{B}(H)$ has no trace if H is infinite-dimensional, and a unique trace if H is finite-dimensional | 41 |
| 1.3.2 Traces on commutator ideals | 45 |
| 1.3.3 The ideal $\mathcal{F}(H)$ of finite-rank operators has a unique trace | 47 |
| 1.3.4 On the ideal $\mathcal{C}(H)$ of compact operators there is no trace | 49 |
| 1.3.5 Schatten ideals \mathcal{C}_p and the classical trace | 49 |
| 1.3.5.1 \mathcal{C}_1 : trace class operators | 50 |
| 1.3.5.2 Tr on smoothing operators on \mathbb{R}^n | 52 |
| 1.3.5.3 Tr on \mathcal{C}_1 | 54 |
| 1.3.6 Exotic traces | 56 |
| 1.4 Holomorphic functional calculus on a Banach algebra | 57 |
| 1.4.1 Functional integrals | 57 |
| 1.4.1.1 Spectral cut and Agmon angle | 57 |
| 1.4.1.2 Traces on functional integrals | 58 |
| 1.4.1.3 Functional integrals over infinite contours | 60 |
| 1.4.1.4 Functional integrals on $\mathcal{B}(H)$ and trace ideals | 61 |
| 1.4.1.5 Products of functional integrals | 62 |

| | | |
|----------|--|-----|
| 1.4.2 | Complex powers, logarithms, and heat operators | 63 |
| 1.4.2.1 | Integer powers | 63 |
| 1.4.2.2 | Logarithm and complex power functions | 65 |
| 1.4.2.3 | Logarithm and complex power operators | 66 |
| 1.4.2.4 | Dependence on the spectral cut | 67 |
| 1.4.2.5 | Spectral zeta functions on Banach algebras | 70 |
| 1.4.2.6 | Heat operators | 70 |
| 1.4.3 | Functional calculus on the de Rham algebra | 73 |
| 1.4.3.1 | Quillen–Chern–Weil theory | 77 |
| 1.5 | Traces on ψ dos | 83 |
| 1.5.1 | Symbol algebras | 84 |
| 1.5.2 | Classical symbols | 86 |
| 1.5.3 | Pseudodifferential operators (ψ dos) | 87 |
| 1.5.3.1 | Classical ψ dos | 91 |
| 1.5.4 | Unique trace on Ψ^z | 92 |
| 1.5.4.1 | Commutator structure of Ψ^∞ | 93 |
| 1.5.4.2 | Commutator structure of $\Psi^{-\infty}$ | 95 |
| 1.5.5 | Unique quasi-trace on Ψ^{cz_n} | 95 |
| 1.5.6 | Meromorphic extension of TR to Ψ^{z_n} | 97 |
| 1.5.6.1 | Gaugings of ψ dos and meromorphic continuation | 99 |
| 1.5.6.2 | Trace formulae for the Laurent coefficients | 101 |
| 1.5.7 | Example: zeta functions | 104 |
| 1.5.7.1 | Complex power gaugings | 104 |
| 1.5.7.2 | Spectral zeta functions | 106 |
| 1.5.7.3 | Higher Laurent expansion | 108 |
| 1.5.7.4 | Zeta quasi-traces | 109 |
| 1.5.7.5 | Dependence on the choice of principal angle θ | 113 |
| 1.5.7.6 | Resolvent trace expansion | 114 |
| 1.5.7.7 | Heat trace invariants | 115 |
| 1.5.8 | Traces on subalgebras of ψ dos | 117 |
| 1.5.8.1 | Classical L^2 trace | 117 |
| 1.5.8.2 | TR on even–even (odd-class) operators | 118 |
| 1.5.8.3 | Leading symbol traces | 120 |
| 1.5.9 | Suspended traces | 121 |
| 1.5.10 | Traces on families of smoothing operators | 128 |
| 1.5.11 | Traces on geometric families of ψ dos | 131 |
| 1.6 | Notes | 134 |
| 2 | Determinants | 154 |
| 2.1 | Logarithmic representations of semigroups | 154 |
| 2.1.1 | Global logarithms | 154 |
| 2.1.1.1 | Logs pull-back | 156 |

| | | |
|---------|---|-----|
| 2.1.2 | Local logarithms | 156 |
| 2.1.3 | Determinant structures | 157 |
| 2.1.3.1 | Counting log-determinant structures | 159 |
| 2.1.4 | Determinant structures and DGAs | 160 |
| 2.1.5 | Logarithms on categories | 161 |
| 2.2 | Example: Fredholm index | 162 |
| 2.2.1 | Fredholm operators | 162 |
| 2.2.2 | Index as a determinant structure | 163 |
| 2.2.3 | The restricted general linear group $\mathrm{Gl}_{\mathrm{res}, \mathbb{J}}(H)$ | 165 |
| 2.2.4 | Families index | 166 |
| 2.2.4.1 | A logarithm on the category $\mathrm{Cat}_{\mathrm{Fred}}$ | 166 |
| 2.2.4.2 | Index bundle | 167 |
| 2.3 | Universal odd logarithm | 170 |
| 2.3.1 | Universal odd log | 171 |
| 2.3.1.1 | Example: $\mathrm{Gl}_{\mathrm{res}}(H)$ | 178 |
| 2.3.2 | Logs and $K_1(\mathcal{A})$ | 179 |
| 2.3.2.1 | Example: log-holonomy | 179 |
| 2.3.2.2 | Logs on $\mathrm{Gl}_\infty(\mathcal{A})$ | 180 |
| 2.3.2.3 | Odd Chern character on $K_1(\mathcal{A})$ | 181 |
| 2.3.2.4 | $K_{-1}(\mathcal{A})$ and topological odd K -theory | 182 |
| 2.4 | Logarithm structures on a Banach algebra | 186 |
| 2.4.1 | Suspended log | 188 |
| 2.4.2 | Example: classical logarithm | 190 |
| 2.4.3 | The Fredholm-determinant structure | 192 |
| 2.4.3.1 | \det_f and the first odd Chern form | 193 |
| 2.4.3.2 | Spectral zeta function and heat trace formulae | 196 |
| 2.4.3.3 | \det_f and $\mathrm{Gl}_1(I + C_1(H))$ | 197 |
| 2.4.4 | Constructions of the Fredholm determinant | 198 |
| 2.4.4.1 | Combinatorial spectral invariant | 198 |
| 2.4.4.2 | Character of the fundamental representation | 199 |
| 2.4.4.3 | Canonical trivialization of the determinant line | 201 |
| 2.4.4.4 | Determinant line of a Fredholm operator | 202 |
| 2.4.4.5 | Graded Fredholm determinant | 205 |
| 2.4.4.6 | Gaussian and Fermionic integrals | 206 |
| 2.4.4.7 | Determinants of self-adjoint operators | 208 |
| 2.4.5 | Exotic determinants | 209 |
| 2.5 | de Rham determinants | 210 |
| 2.5.1 | Classical local logarithm on $\Omega(M, \mathrm{End}(E))$ | 210 |
| 2.5.2 | Odd log on $C^\infty(M, G)$ | 212 |
| 2.6 | Trace structures on logarithmic ψ dos | 213 |
| 2.6.1 | Log-classical ψ dos | 213 |
| 2.6.1.1 | Log-polyhomogeneous symbols | 213 |
| 2.6.1.2 | Log-classical ψ dos | 216 |
| 2.6.1.3 | Logarithm operator | 216 |

| | | |
|---------|--|-----|
| 2.6.2 | Trace structure of $\Psi^{z,n}$ | 219 |
| 2.6.2.1 | Higher residue traces on $\Psi^{z,n}$ | 220 |
| 2.6.2.2 | Commutator structure of $\Psi^{C,N}$ | 222 |
| 2.6.2.3 | TR on $\Psi^{C\setminus z_n, N}(M, E)$ | 222 |
| 2.6.2.4 | Meromorphic extension of TR to $\Psi^{z,n}$ | 224 |
| 2.6.2.5 | Zeta functions of log-classical ψ dos | 226 |
| 2.6.2.6 | Traces on proper subalgebras of $\Psi^{z,n}$ | 228 |
| 2.6.2.7 | Traces on families of log-classical ψ dos | 229 |
| 2.7 | Determinant structures on classical ψ dos | 229 |
| 2.7.1 | Residue determinant | 230 |
| 2.7.1.1 | Residue determinant and $\zeta(A, 0)$ | 233 |
| 2.7.1.2 | Residue determinant and the index | 234 |
| 2.7.1.3 | A ‘better’ residue determinant structure | 235 |
| 2.7.2 | Leading symbol determinants | 236 |
| 2.7.3 | The ‘order’ determinant structure on Ψ^∞ | 238 |
| 2.7.4 | A uniqueness result | 238 |
| 2.7.5 | Zeta quasi-determinants | 239 |
| 2.7.5.1 | Variation of the ζ -determinant | 244 |
| 2.7.5.2 | Multiplicative anomaly and Polyakov formula | 245 |
| 2.7.6 | Further log-determinant structures on ψ dos | 247 |
| 2.7.6.1 | ψ do determinant structures on trace ideals | 247 |
| 2.7.6.2 | TR determinants on even-even operators | 247 |
| 2.7.6.3 | Index determinant and odd Chern forms | 248 |
| 2.7.6.4 | Suspended determinants and the eta invariant | 250 |
| 2.7.6.5 | Pole structure of $\eta(D, z)$ and η_{sus} | 255 |
| 2.7.6.6 | Determinants on geometric families of ψ dos | 258 |
| 2.8 | Notes | 258 |

| | | |
|----------|---|-----|
| 3 | Computations, transition formulae, and the local index formula | 271 |
| 3.1 | Computations using classical zeta functions | 272 |
| 3.1.1 | Dirac-type operators on the circle | 272 |
| 3.1.1.1 | Relative zeta determinants and formal quotients | 277 |
| 3.1.1.2 | Special values of the Riemann zeta function | 278 |
| 3.1.2 | Laplacians on higher dimensional spheres | 280 |
| 3.1.3 | Laplacian on the torus | 282 |
| 3.2 | Computations on compact quotients | 287 |
| 3.2.1 | Pushing down Schwartz kernels | 287 |
| 3.2.1.1 | Extension to flat Γ -bundles | 289 |
| 3.2.2 | Traces and regularized traces on compact quotients | 290 |
| 3.2.2.1 | Spectral-geometric trace formula | 290 |
| 3.2.2.2 | Selberg–Arthur trace formula | 292 |
| 3.2.2.3 | A regularized spectral-geometric trace formula | 294 |

| | | |
|---------|--|-----|
| 3.2.3 | Spectral-geometric trace formulae on tori: Poisson summation | 295 |
| 3.2.3.1 | Spectral-geometric trace formulae on S^1 | 295 |
| 3.2.3.2 | Variational computation of $\det_{\zeta} D$ on S^1 | 301 |
| 3.2.3.3 | Spectral-geometric heat trace on tori | 303 |
| 3.2.3.4 | Laplacian determinant from the heat trace on S^1 | 304 |
| 3.2.3.5 | Determinant of the Laplacian coupled to a flat bundle on a two-torus | 307 |
| 3.2.3.6 | Regularized $\det \bar{\partial}_{\Sigma}$ on an elliptic curve | 311 |
| 3.2.4 | Computations on higher genus Riemann surfaces | 314 |
| 3.2.4.1 | A Selberg heat trace formula | 314 |
| 3.2.4.2 | Relative Laplacian ζ -determinant on a surface | 315 |
| 3.2.4.3 | Conformal variation of the Laplacian determinant | 316 |
| 3.2.5 | Relative holomorphic torsion on negatively curved manifolds | 319 |
| 3.3 | Computations using the complex powers | 321 |
| 3.3.1 | Complex powers and transition formulae | 321 |
| 3.3.1.1 | Basic properties | 323 |
| 3.3.1.2 | Functional integral computation on S^1 | 325 |
| 3.3.2 | Resolvent trace and zeta trace | 329 |
| 3.3.2.1 | Mellin transform formulae | 330 |
| 3.3.2.2 | Resolvent trace and zeta trace transition formulae | 336 |
| 3.3.3 | Heat trace and zeta trace | 338 |
| 3.3.3.1 | Resolvent trace to heat trace to zeta trace | 339 |
| 3.3.3.2 | General heat–zeta trace transition formulae | 341 |
| 3.3.4 | Relative determinant formulae | 343 |
| 3.3.4.1 | Relative heat kernel regularization | 347 |
| 3.3.4.2 | Multiplicativity property | 348 |
| 3.3.4.3 | Contour integral ζ -determinants on S^1 | 350 |
| 3.4 | Residue determinant computations | 353 |
| 3.4.1 | Relative formulae for $\zeta(A, 0)$ | 354 |
| 3.4.2 | Determinant property on $I + \Psi^{< 0}$ | 356 |
| 3.4.3 | Relative Laplacians | 357 |
| 3.5 | Local Atiyah–Singer index formula | 360 |
| 3.5.1 | Residue determinant and the index | 361 |
| 3.5.2 | Riemann–Roch–Hirzebruch formula | 363 |
| 3.5.2.1 | Local Riemann–Roch formula on a surface | 365 |
| 3.5.3 | An elementary proof of the local Atiyah–Singer index formula | 372 |
| 3.5.3.1 | Statement of the formula | 373 |
