

Contents

1	Introduction	1
1.1	A Short Summary of the Book	1
1.2	A Piece of History	3
1.2.1	Besov-Triebel-Lizorkin Spaces	4
1.2.2	Morrey-Campanato Spaces	4
1.2.3	Spaces Built on Morrey-Campanato Spaces	5
1.2.4	Q Spaces	5
1.3	A Collection of the Function Spaces Appearing in the Book	6
1.3.1	Function Spaces Defined by Derivatives and Differences	6
1.3.2	Function Spaces Defined by Mean Values and Oscillations	8
1.3.3	Function Spaces Defined by Fourier Analytic Tools	10
1.4	A Table of Coincidences	14
1.4.1	Besov-Morrey Spaces	14
1.4.2	Triebel-Lizorkin-Morrey Spaces	15
1.4.3	Morrey-Campanato Spaces	16
1.4.4	Homogeneous Spaces	17
1.5	Notation	17
2	The Spaces $B_{p,q}^{s,\tau}(\mathbb{R}^n)$ and $F_{p,q}^{s,\tau}(\mathbb{R}^n)$	21
2.1	The φ -Transform for $B_{p,q}^{s,\tau}(\mathbb{R}^n)$ and $F_{p,q}^{s,\tau}(\mathbb{R}^n)$	21
2.1.1	The Definition and Some Preliminaries	21
2.1.2	The Calderón Reproducing Formulae and Some Consequences	24
2.1.3	Sequence Spaces	30
2.2	Embeddings	39
2.3	The Fatou Property	48
3	Almost Diagonal Operators and Atomic and Molecular Decompositions	49
3.1	Smooth Atomic and Molecular Decompositions	49
3.2	The Relation of $A_{p,q}^{s,\tau}(\mathbb{R}^n)$ to Besov-Triebel-Lizorkin-Morrey Spaces ..	61

4	Several Equivalent Characterizations	65
4.1	Preparations	65
4.1.1	An Equivalent Definition	65
4.1.2	Several Technical Lemmas on Differences	72
4.1.3	Means of Differences	83
4.2	Characterizations by Wavelets	84
4.2.1	Wavelets and Besov-Triebel-Lizorkin Spaces	85
4.2.2	Estimates of Mean-Values of Differences by Wavelet Coefficients	86
4.2.3	The Wavelet Characterization of $A_{p,q}^{s,\tau}(\mathbb{R}^n)$	96
4.2.4	The Wavelet Characterization of $F_{\infty,q}^{s,\tau}(\mathbb{R}^n)$	100
4.3	Characterizations of $A_{p,q}^{s,\tau}(\mathbb{R}^n)$ by Differences	102
4.3.1	Characterizations of $F_{p,q}^{s,\tau}(\mathbb{R}^n)$ by Differences	102
4.3.2	Characterizations of $B_{p,q}^{s,\tau}(\mathbb{R}^n)$ by Differences	106
4.3.3	The Classes $A_{p,q}^{s,\tau}(\mathbb{R}^n)$ and Their Relations to Q Spaces	108
4.3.4	The Characterization of $F_{\infty,q}^{s,\tau}(\mathbb{R}^n)$ by Differences	110
4.4	Characterizations via Oscillations	111
4.4.1	Preparations	111
4.4.2	Oscillations and Besov-Type Spaces	115
4.4.3	Oscillations and Triebel-Lizorkin-Type Spaces	117
4.4.4	Oscillations and $F_{\infty,q}^s(\mathbb{R}^n)$	118
4.5	The Hedberg-Netrusov Approach to Spaces of Besov-Triebel-Lizorkin Type	119
4.5.1	Some Preliminaries	119
4.5.2	Characterizations by Differences	121
4.5.3	Characterizations by Oscillations	123
4.6	A Characterization of $A_{p,q}^{s,\tau}(\mathbb{R}^n)$ via a Localization of $A_{p,q}^s(\mathbb{R}^n)$	125
4.6.1	A Characterization of $B_{p,q}^{s,\tau}(\mathbb{R}^n)$	126
4.6.2	A Characterization of $F_{p,q}^{s,\tau}(\mathbb{R}^n)$	132
4.6.3	A Characterization of $F_{\infty,q}^s(\mathbb{R}^n)$	134
5	Pseudo-Differential Operators	137
5.1	Pseudo-Differential Operators of Class $\mathcal{S}_{1,1}^\mu(\mathbb{R}^n)$	137
5.2	Composition of Functions in $A_{p,q}^{s,\tau}(\mathbb{R}^n)$	142
6	Key Theorems	147
6.1	Pointwise Multipliers	147
6.1.1	Smooth Functions are Pointwise Multipliers for $A_{p,q}^{s,\tau}(\mathbb{R}^n)$	148
6.1.2	Pointwise Multipliers and Paramultiplication	149
6.1.3	A Characterization of $M(F_{\infty,q}^s(\mathbb{R}^n))$	157
6.1.4	A Characterization of $M(F_{p,q}^s(\mathbb{R}^n))$, $s < n/p$	159
6.2	Diffeomorphisms	160
6.3	Traces	162
6.3.1	Traces of Functions in $A_{p,q}^{s,\tau}(\mathbb{R}^n)$	163
6.3.2	Traces of Functions in $F_{\infty,q}^s(\mathbb{R}^n)$ and Some Consequences	166

- 6.4 Spaces on \mathbb{R}_+^n and Smooth Domains168
 - 6.4.1 Spaces on \mathbb{R}_+^n 168
 - 6.4.2 Spaces on Smooth Domains.....173

- 7 Inhomogeneous Besov-Hausdorff and Triebel-Lizorkin-Hausdorff Spaces**177
 - 7.1 Tent Spaces177
 - 7.2 Besov-Hausdorff Spaces and Triebel-Lizorkin-Hausdorff Spaces199
 - 7.3 A (vmo, h^1) -Type Duality Result237
 - 7.4 Real Interpolation246

- 8 Homogeneous Spaces**251
 - 8.1 The Definition and Some Preliminaries251
 - 8.2 The Wavelet Characterization of $\dot{B}_{p,q}^{s,\tau}(\mathbb{R}^n)$ and $\dot{F}_{p,q}^{s,\tau}(\mathbb{R}^n)$ 255
 - 8.3 The Characterization by Differences of $\dot{B}_{p,q}^{s,\tau}(\mathbb{R}^n)$ and $\dot{F}_{p,q}^{s,\tau}(\mathbb{R}^n)$261
 - 8.4 Homogeneous Besov-Hausdorff and Triebel-Lizorkin-Hausdorff Spaces268
