

Contents

1 Preliminaries	1
1.1 NEC Groups and Their Signatures	1
1.2 Normal Subgroups of NEC Groups	6
1.3 Centralizers of Reflections.....	8
1.4 Uniformization and Automorphism Groups of Riemann and Klein Surfaces	11
1.4.1 Maximal NEC Groups	13
1.4.2 Teichmüller Spaces	14
1.5 Symmetric Riemann Surfaces	15
1.5.1 Algebraic Conditions	18
2 On the Number of Conjugacy Classes of Symmetries of Riemann Surfaces	21
2.1 Conjugacy Classes of Involutions in 2-Groups	21
2.2 Symmetries with Non-Empty Set of Fixed Points	23
2.3 Symmetries with Empty Set of Fixed Points	29
2.4 Symmetries of Surfaces Admitting a Fixed Point Free Symmetry	31
3 Counting Ovals of Symmetries of Riemann Surfaces	33
3.1 Enumeration of Ovals of Symmetries at Large	33
3.2 Total Number of Ovals of Non-Conjugate Symmetries	34
3.3 Total Number of Ovals of all Symmetries of a Riemann Surface.....	41
3.4 Total Number of Ovals of a Couple of Symmetries	55
4 Symmetry Types of Some Families of Riemann Surfaces	65
4.1 Symmetry Type of the Riemann Sphere	65
4.2 Symmetry Types of Tori	68
4.2.1 Symmetric Tori	73
4.3 Symmetry Types of Hyperelliptic Riemann Surfaces	82
4.3.1 A Geometric Method	85
4.3.2 An Example	87

5	Symmetry Types of Riemann Surfaces with a Large Group of Automorphisms	91
5.1	Some General Results	91
5.2	Symmetry Types of Macbeath–Singerman Surfaces	95
5.3	Symmetry Types of Accola–Maclachlan and Kulkarni Surfaces	110
5.3.1	Number of Ovals of the Symmetries	110
5.3.2	Separating Character of the Symmetries	120
5.4	Algebraic Formulae for the Symmetries	125
6	Appendix	145
6.1	Compact Riemann Surfaces Without Symmetries	145
