

Research Methodology for Sport and Exercise Science

A Comprehensive Introduction for Study and Research

Preface to the 2nd Edition	11
Introduction	15
(H. Haag, Kiel, Germany)	
A Foundation for a Comprehensive Approach To Research Methodology	17
B Sport and Exercise Science: Disciplines and Main Topics as Expression of an Academic Discipline Representing a Unique and Integrated Concept	19
(b1) Sport and Exercise Science: Disciplines (Examples)	21
(b2) Sport and Exercise Science: Main Topics (Examples)	22
C Intentions of the Book on Research Methodology for Sport and Exercise Science	23
D Structure of the Book – An Overview on the Concept of Research Methodology for Sport and Exercise Science	25
I Philosophical Foundations of Science and Research	27
II Research Methods	28
III Research Designs	30
IV Techniques of Data Collection	32
V Techniques of Data Analysis	34
VI Transfer from Research Results (Theory) to Practice	35
References	36

Part I Philosophical Foundations of Science and Research

39

1 Concept of Science	41
(H. Haag, Kiel, Germany)	
1.1 Basic Considerations	44
1.1.1 Explanation of the Terminology	44
1.1.2 Recent Historical Development of Science	46
1.1.3 Functions of Science	48
1.1.4 Social-Ethical Perspective of Science	61
1.1.5 Practice-Science-Theory-Syllabus-Practice Cycle	64

1.2 Theories of Cognition (Examples)	65
1.2.1 Hermeneutics	67
1.2.2 Theoretical Framework for Words as Database	72
1.2.3 Empiricism	81
1.2.4 Phenomenology	83
1.3 Scientific Theories (Examples)	85
1.3.1 Subjective Idealism	85
1.3.2 Dialectic Materialism	86
1.3.3 Critical Theory	87
1.3.4 Critical Rationalism	87
1.3.5 Logical Empiricism	88
1.3.6 Positivism	89
1.3.7 New Age Philosophy	89
Summary – References	91
2 Concept of Research (H. Haag, Kiel, Germany)	101
2.1 Basic Terminology	103
2.2 Functions of Research	105
2.3 Dimensions of Research	107
2.3.1 Primary Research	108
2.3.2 Evaluation Research	108
2.3.3 Scientific Consulting Based on Research	108
2.4 Research Process	109
2.4.1 Discovery	109
2.4.2 Realization	110
2.4.3 Application	110
2.5 Research Paradigms	111
2.5.1 Inductive-Deductive	111
2.5.2 Naturalistic-Rationalistic	112
2.5.3 Case Study-Representative Study	114
2.5.4 Cross-Sectional-Longitudinal	115
2.5.5 Basic-Applied	116

2.6 Quantitative-Qualitative: A Questionable Research Alternative	117
2.7 A Model of Research Methodology (MRM) for Sport and Exercise Science	119
Summary – References	123

Part II Research Methods **127**

3 Descriptive Methods	130
(H. Haag, Kiel, Germany)	
3.1 The Term 'Description'	132
3.2 Research Design Issues for Descriptive Methods	133
3.2.1 Situational Research Design Factors	133
3.2.2 Basic Patterns of Descriptive Research	139
3.3 Examples for Descriptive Methods	144
3.3.1 Historical Research	144
3.3.2 Philosophical Research	145
3.3.3 Intercultural-Comparative Research	149
3.3.4 Ethnographical Research	150
Summary – References	153
4 Correlational Methods	157
(W. Duquet † & J. Borms, Brussel, Belgium)	
4.1 The Terms 'Correlation' and 'Correlational Research'	159
4.1.1 Correlation	159
4.1.2 Correlational Research	161
4.2 Research Design Issues for Correlational Methods	163
4.2.1 Examples of Correlational Designs	163
4.2.2 Purposes of Correlational Designs	164
4.3 Examples for Correlational Methods	169
4.3.1 Parametric Correlations	169
4.3.2 Non-Parametric Correlations	174

4.4 Additional Aspects of the Correlational Method	185
4.4.1 Uses of Correlational Methods	185
4.4.2 Advantages of Correlational Methods	186
4.4.3 Limitations of Correlational Methods	187
Summary – References	192
5 Experimental Methods	194
(J. Twisk, Amsterdam, Netherlands)	
5.1 Introduction	196
5.2 Research Designs for Experimental Methods	197
5.2.1 Pre-test + Post-test Design	197
5.2.2 Pre-test + Post-test + Post-test Design	198
5.2.3 One-within + One-between Design	199
5.2.4 Solomon Four Groups Design	204
5.2.5 One-within + One-between Design with more than Two Groups	205
5.2.6 Factorial Design	206
5.2.7 Cross-over Design	208
5.3 Analysis of Experimental Studies	209
5.3.1 Introduction	209
5.3.2 Example: Effect of a New Heavy Intensity Intervention Program	210
5.3.3 Example: Effect of a New Physical Activity Enhance- ment Program	212
5.4 Problems in Experimental Studies	215
5.4.1 Drop-outs	215
5.4.2 Intention to Treat Analysis	217
5.4.3 Blindness	219
Summary – References	220

6 Library Research, the Web, and Information Technology	226
(G. Ghent, Calgary, Canada)	
6.1 Introduction	228
6.2 Starting Points	228
6.3 Your Library and The Library's Online Catalogue (OPAC)	230
6.4 Reference Sources, Annual Review Publications, Manuals and Handbooks	231
6.4.1 Specialized Encyclopedias and Dictionaries	231
6.4.2 Other Resources to Consult	233
6.5 Online Indexing/Abstracting Services: How to Find Periodical Articles and Current Research	235
6.5.1 Performing Searches in a Key Database	237
6.5.2 Other Important Abstracting/Indexing Services	244
6.6 Resources in Other Libraries	248
6.7 Internet Resources	249
6.8 Search Engines	250
6.9 Website Directories and Portals	251
6.10 Key Academic and Association Websites	253
6.11 Listservs	253
6.12 Future	254
6.13 Notes and Bibliographic References	255
Summary – References	257
7 Theoretical and Practical Planning of the Research Process	258
(M. Holzweg & H. Haag, Kiel, Germany)	
7.1 Formulation of Basic Assumptions or/and Hypotheses	259
7.1.1 Basic Assumptions	261
7.1.2 Hypotheses	262
7.2 Selection and Definition of Variables	263

7.3	Decision on Appropriate Hermeneutical or/and Empirical Concepts	265
7.3.1	Hermeneutics (Data Coded in Words)	266
7.3.2	Statistics (Measurement) (Data Coded in Numbers)	267
7.4	Plausibility and Validity of Research Results	268
7.5	Sampling Procedures	269
7.5.1	Sampling in Regard to Word-Based Data	270
7.5.2	Sampling in Regard to Number-Based Data	270
7.6	Comments on Data Collection Techniques	273
7.7	Comments on Data Analysis Techniques	275
7.8	Realization of a Pilot Study	276
7.9	Relating Results to Basic Assumptions or/and Hypotheses	277
7.10	Various Forms of Reporting Research Results	278
Summary – References		279

Part IV Techniques of Data Collection **281**

8	Concepts and Procedures for Collecting Word-Based Data	283
(H. Haag, Kiel, Germany)		
8.1	Fundamentals of Word-Based Data Collection Techniques	285
8.2	Concepts of Collecting Word-Based Data	286
8.2.1	Observing	286
8.2.2	Questioning	291
8.2.3	Content-Collecting	297
8.3	Procedures of Collecting Word-Based Data	302
8.3.1	Formulation of Basic Assumptions	304
8.3.2	Types and Sampling of Documents	306
8.3.3	Category Development	310
8.3.4	Definition of Variables	315
Summary – References		319

9 Concepts and Procedures for Collecting Number-Based Data	324
(H. Haag, Kiel, Germany)	
9.1 Fundamentals for Number-Based Data Collection Techniques	325
9.2 Concepts of Collecting Number-Based Data	327
9.2.1 Measurement Theory	329
9.2.2 Scaling Theory	331
9.2.3 Test Theory	335
9.3 Procedures for Collecting Number-Based Data	342
Summary – References	346
<hr/>	
<i>Part V Techniques of Data Analysis</i>	349
<hr/>	
10 Non-Numerical Strategies of Data Analysis (Hermeneutics)	352
(H. Haag, Kiel, Germany)	
10.1 Hermeneutics in the Research Process	354
10.2 Standard Functions of Hermeneutics in a Broad Sense	355
10.2.1 Review of Literature	355
10.2.2 Interpretation of (Data) Results	356
10.3 Content (Data) Collection – Treatment – Analysis Link	357
10.4 Basic Paradigms of Reasoning	358
10.4.1 Analytical and Synthetical Reasoning	358
10.4.2 Abstract and Concrete Reasoning	360
10.4.3 Genetic and Systematic Reasoning	362
10.5 Theoretical and Logical Strategies	363
10.5.1 Information Sharing	364
10.5.2 Systematizing	365
10.5.3 Summarizing	367
10.5.4 Comparing	368
10.5.5 Interpreting	370

10.5.6	Explaining	372
10.5.7	Justifying	374
10.5.8	Proving	376
Summary – References		379
11	Computer-Aided Qualitative Research: A User’s Perspective	383
	(A. Lamont-Mills, Toowoomba, Australia)	
11.1	Introduction	384
11.2	Quantitative Data Analysis Software: A Variety of Programs	385
11.2.1	Text Retrievers	385
11.2.2	Text Base Managers	386
11.2.3	Code-and-Retrieve Programs	387
11.2.4	Code-Based Theory-Builders	387
11.2.5	Conceptual Network-Builders	388
11.3	A Word of Warning – Computers and Qualitative Data Analysis	388
11.4	NUD* IST 6: The Logic and the Structure	390
11.4.1	The Document System: How to Manage Mountains of Raw Data	391
11.4.2	The Index System: Thinking about Mountains of Raw Data	392
11.5	An Example – The Construction of Gender and Gender Identity in Elite Australian Sports	396
11.6	Limitations and Concerns	397
Summary – References		400
12	Numerical Strategies of Data Analysis (Statistics)	403
	(D. Kluka, Miami Shores & P. Love, Grambling, USA)	
12.1	Statistics in the Research Process	405
12.1.1	Meaning of Performance Curves	405
12.1.2	Basic Statistics: Their Use in Human Action Research	406
12.2	Descriptive Statistics	408
12.2.1	Frequency Distribution	408
12.2.2	Measure of Central Tendency	408

12.2.3 Correlation	411
12.3 Inferential Statistics	413
12.3.1 Sampling	413
12.3.2 Statistical Tests	414
Summary – References	422

<i>Part VI Transfer from Research Results (Theory) to Practice</i>	425
<hr/>	
13 Theory-Practice and Practice-Theory Relationship	427
(H. Haag, Kiel, Germany & G. Tenenbaum, Gainesville, USA)	
13.1 Model for Theory-Practice and Practice-Theory Linkage	428
13.2 Theory-Guided Research and Practice-Guided Research	430
13.2.1 Theory-Guided Research	430
13.2.2 Practice-Guided Research	432
13.2.3 Integrated Model	433
13.3 Examples from Other Fields for Bridging the Practitioner-Scientist Gap	439
13.4 A Comprehensive Approach in Relation to Major Issues of Sport and Exercise Science	440
13.4.1 Disciplines	441
13.4.2 Main Topics	443
