Contents

Preface ix

1 The Diagonal Argument 1
- 1.1 Counting and Countability . . . 2
- 1.2 Does One Infinite Size Fit All? . . . 4
- 1.3 Cantor's Diagonal Argument . . . 6
- 1.4 Transcendental Numbers . . . 10
- 1.5 Other Uncountability Proofs . . . 12
- 1.6 Rates of Growth . . . 14
- 1.7 The Cardinality of the Continuum . . . 16
- 1.8 Historical Background . . . 19

2 Ordinals 29
- 2.1 Counting Past Infinity . . . 30
- 2.2 The Countable Ordinals . . . 33
- 2.3 The Axiom of Choice . . . 37
- 2.4 The Continuum Hypothesis . . . 40
- 2.5 Induction . . . 42
- 2.6 Cantor Normal Form . . . 46
- 2.7 Goodstein's Theorem . . . 47
- 2.8 Hercules and the Hydra . . . 51
- 2.9 Historical Background . . . 54

3 Computability and Proof 67
- 3.1 Formal Systems . . . 68
- 3.2 Post's Approach to Incompleteness . . . 72
- 3.3 Gödel's First Incompleteness Theorem . . . 75
- 3.4 Gödel's Second Incompleteness Theorem . . . 80
- 3.5 Formalization of Computability . . . 82
- 3.6 The Halting Problem . . . 85
- 3.7 The Entscheidungsproblem . . . 87
- 3.8 Historical Background . . . 89

4 LOGIC 97
4.1 Propositional Logic 98
4.2 A Classical System 100
4.3 A Cut-Free System for Propositional Logic 102
4.4 Happy Endings 105
4.5 Predicate Logic 106
4.6 Completeness, Consistency, Happy Endings 110
4.7 Historical Background 112

5 ARITHMETIC 119
5.1 How Might We Prove Consistency? 120
5.2 Formal Arithmetic 121
5.3 The Systems PA and PA_ω 122
5.4 Embedding PA in PA_ω 124
5.5 Cut Elimination in PA_ω 127
5.6 The Height of This Great Argument 130
5.7 Roads to Infinity 133
5.8 Historical Background 135

6 NATURAL UNPROVABLE SENTENCES 139
6.1 A Generalized Goodstein Theorem 140
6.2 Countable Ordinals via Natural Numbers 141
6.3 From Generalized Goodstein to Well-Ordering 144
6.4 Generalized and Ordinary Goodstein 146
6.5 Provably Computable Functions 147
6.6 Complete Disorder Is Impossible 151
6.7 The Hardest Theorem in Graph Theory 154
6.8 Historical Background 157

7 AXIOMS OF INFINITY 165
7.1 Set Theory without Infinity 165
7.2 Inaccessible Cardinals 168
7.3 The Axiom of Determinacy 170
7.4 Largeness Axioms for Arithmetic 172
7.5 Large Cardinals and Finite Mathematics 173
7.6 Historical Background 177

BIBLIOGRAPHY 183

INDEX 189
