Preface	ix
1. Introduction	1
1.1. Ordinal Categorical Scales, 1	
1.2. Advantages of Using Ordinal Methods, 2	
1.3. Ordinal Modeling Versus Ordinary Regression Analysis, 4	
1.4. Organization of This Book, 8	
2. Ordinal Probabilities, Scores, and Odds Ratios	9
2.1. Probabilities and Scores for an Ordered Categorical Scale, 9	
2.2. Ordinal Odds Ratios for Contingency Tables, 18	
2.3. Confidence Intervals for Ordinal Association Measures, 26	
2.4. Conditional Association in Three-Way Tables, 35	
2.5. Category Choice for Ordinal Variables, 37	
Chapter Notes, 41	
Exercises, 42	
3. Logistic Regression Models Using Cumulative Logits	44
3.1. Types of Logits for An Ordinal Response, 44	
3.2. Cumulative Logit Models, 46	
3.3. Proportional Odds Models: Properties and Interpretations, 53	
3.4. Fitting and Inference for Cumulative Logit Models, 58	
3.5. Checking Cumulative Logit Models, 67	
3.6. Cumulative Logit Models Without Proportional Odds, 75	
3.7. Connections with Nonparametric Rank Methods, 80	
Chapter Notes, 84	
Exercises, 87	

4. Other Ordinal Logistic Regression Models	88
4.1. Adjacent-Categories Logit Models, 88	
4.2. Continuation-Ratio Logit Models, 96	
4.3. Stereotype Model: Multiplicative Paired-Category Logits, 103	
Chapter Notes, 115	
Exercises, 117	
5. Other Ordinal Multinomial Response Models	118
5.1. Cumulative Link Models, 118	
5.2. Cumulative Probit Models, 122	
5.3. Cumulative Log-Log Links: Proportional Hazards Modeling, 125	
5.4. Modeling Location and Dispersion Effects, 130	
5.5. Ordinal ROC Curve Estimation, 132	
5.6. Mean Response Models, 137	
Chapter Notes, 140	
Exercises, 142	
6. Modeling Ordinal Association Structure	145
6.1. Ordinary Loglinear Modeling, 145	
6.2. Loglinear Model of Linear-by-Linear Association, 147	
6.3. Row or Column Effects Association Models, 154	
6.4. Association Models for Multiway Tables, 160	
6.5. Multiplicative Association and Correlation Models, 167	
6.6. Modeling Global Odds Ratios and Other Associations, 176	
Chapter Notes, 180	
Exercises, 182	
7. Non-Model-Based Analysis of Ordinal Association	184
7.1. Concordance and Discordance Measures of Association, 184	
7.2. Correlation Measures for Contingency Tables, 192	
7.3. Non-Model-Based Inference for Ordinal Association Measures, 194	
7.4. Comparing Singly Ordered Multinomials, 199	
7.5. Order-Restricted Inference with Inequality Constraints, 206	
7.6. Small-Sample Ordinal Tests of Independence, 211	
7.7. Other Rank-Based Statistical Methods for Ordered Categories, 214	
Appendix: Standard Errors for Ordinal Measures, 216	

Chapter Notes, 219	
Exercises, 222	
8. Matched-Pairs Data with Ordered Categories	225
8.1. Comparing Marginal Distributions for Matched Pairs, 226	
8.2. Models Comparing Matched Marginal Distributions, 231	
8.3. Models for The Joint Distribution in A Square Table, 235	
8.4. Comparing Marginal Distributions for Matched Sets, 240	
8.5. Analyzing Rater Agreement on an Ordinal Scale, 247	
8.6. Modeling Ordinal Paired Preferences, 252	
Chapter Notes, 258	
Exercises, 260	
9. Clustered Ordinal Responses: Marginal Models	262
9.1. Marginal Ordinal Modeling with Explanatory Variables, 263	
9.2. Marginal Ordinal Modeling: GEE Methods, 268	
9.3. Transitional Ordinal Modeling, Given the Past, 274	
Chapter Notes, 277	
Exercises, 279	
10. Clustered Ordinal Responses: Random Effects Models	281
10.1. Ordinal Generalized Linear Mixed Models, 282	
10.2. Examples of Ordinal Random Intercept Models, 288	
10.3. Models with Multiple Random Effects, 294	
10.4. Multilevel (Hierarchical) Ordinal Models, 303	
10.5. Comparing Random Effects Models and Marginal Models, 306	
Chapter Notes, 312	
Exercises, 314	
11. Bayesian Inference for Ordinal Response Data	315
11.1. Bayesian Approach to Statistical Inference, 316	
11.2. Estimating Multinomial Parameters, 319	
11.3. Bayesian Ordinal Regression Modeling, 327	
11.4. Bayesian Ordinal Association Modeling, 335	
11.5. Bayesian Ordinal Multivariate Regression Modeling, 339	
11.6. Bayesian Versus Frequentist Approaches to Analyzing Ordinal Data, 341	
Chapter Notes, 342	
Exercises, 344	

Appendix	Software for Analyzing Ordinal Categorical Data	345
Bibliography		359
Example Index		389
