Pr	Preface		
1	Partitione	d Regression and the Frisch-Waugh-Lovell Theorem	1
	Exercises		
	1.1	Partitioned regression	1
	1.2	The Frisch-Waugh-Lovell theorem	2
	1.3	Residualing the constant	3
	1.4	Adding a dummy variable for the <i>i</i> th observation	3
	1.5	Computing forecasts and forecast standard errors	4
2	The One-	way Error Component Model	9
	2.1 The	One-way Fixed Effects Model	9
	Exercises		
	2.1	One-way fixed effects regression	10
	2.2	OLS and GLS for fixed effects	11
	2.3	Testing for fixed effects	12
		One-way Random Effects Model	. 12
	Exercises		
	2.4	Variance—covariance matrix of the one-way random effects model	13
	2.5	Fuller and Battese (1973) transformation for the one-way random effects model	14
	2.6 2.7	Unbiased estimates of the variance components: the one-way model Feasible unbiased estimates of the variance components: the	15
	2.1	one-way model	16
	2.8	Gasoline demand in the OECD	17
	2.9	System estimation of the one-way model: OLS versus GLS	22
	2.10	GLS is a matrix weighted average of between and within	23
	2.10	Efficiency of GLS compared to within and between estimators	24
	2.11	Maximum likelihood estimation of the random effects model	25
			25
	2.13	Prediction in the one-way random effects model	20

.:	Contonto
/1	Contents

	2.14	Mincer wage equation	27
	2.15	Bounds for s^2 in a one-way random effects model	30
	2.16		31
	mu m	Pinna Communat Model	35
3		way Error Component Model	35
		Two-way Fixed Effects Model	33
	Exercise 3.1	Two-way fixed effects regression	36
	3.2 The	Two-way Random Effects Model	38
	Exercises		
	3.2	Variance-covariance matrix of the two-way random effects model	38
	3.3	Fuller and Battese (1973) transformation for the two-way random	
		effects model	40
	3.4	Unbiased estimates of the variance components: the two-way	40
		model	40

	4.3 Hau Exercises	isman's Test for Correlated Effects	01
		Hausman (1978) test based on a contrast of two estimators	82

		Contents	vii
	4.12	Hausman (1978) test based on an artificial regression	82
	4.13	Three contrasts yield the same Hausman test	85
	4.14	Testing for correlated effects in panels	86
	4.15	Hausman's test as a Gauss-Newton regression	89
	4.16		89
	4.17	Relative efficiency of the between estimator with respect to the	
		within estimator	90
	4.18	Hausman's test using Munnell's data	92
	4.19	-	95
5	Heterosk	edasticity and Serial Correlation	99
		roskedastic Error Component Model	99
	Exercises	Noncountry Component Model	,,,
	5.1	Heteroskedastic individual effects	99
	5.2	An alternative heteroskedastic error component model	100
	5.3	An LM test for heteroskedasticity in a one-way error component	100
		model	102
	5.2 Seri	al Correlation in the Error Component Model	105
	Exercises	ar Correlation in the Error Component Woder	103
	5.4	AR(1) process	105
	5.5	Unbiased estimates of the variance components under the AR(1)	103
		model	107
	5.6		107
	5.7		100
	5.8	MA(1) process	111
	5.9	MA(q) process	112
	5.10	Prediction in the serially correlated error component model	113
	5.11	A joint LM test for serial correlation and random individual effects	117
	5.12	Conditional LM test for serial correlation assuming random	
		individual effects	119
	5.13	An LM test for first-order serial correlation in a fixed effects model	120
	5.14		121
	5.15	Public capital example with first-order serial correlation	123
6	Seemingl	Unrelated Regressions with Error Components	125
	Exercises		
	6.1	Seemingly unrelated regressions with one-way error component	
		disturbances	125
	6.2		107
		SUR model	127
	6.3	Special cases of the SUR model with one-way error component disturbances	127
	6.4		
		disturbances	128
	6.5	• • • • • • • • • • • • • • • • • • • •	
		SUR model	130
			3 34

130		6.6	Special cases of the SUR model with two-way error component	120
7.1 Single Equation Estimation 133 Exercises 7.1 2SLS as a GLS estimator 133 7.2 Within 2SLS and between 2SLS as GLS estimators 134 7.3 Within 2SLS and between 2SLS as GLS estimators 135 7.4 Error component two-stage least squares 135 7.5 Equivalence of several EC2SLS estimators 137 7.6 Hausman test based on FE2SLS vs EC2SLS 139 7.2 System Estimation 143 Exercises 7.7 3SLS as a GLS estimator 143 7.8 Within 3SLS and between 3SLS 144 7.9 Within 3SLS and between 3SLS as GLS estimators 144 7.10 Error component three-stage least squares 146 7.11 Equivalence of several EC3SLS estimators 148 7.12 Special cases of the simultaneous equations model with one-way error component disturbances 149 7.3 Endogenous Effects 151 Exercises 151 7.13 Mundlak's (1978) augmented regression 151 7.14 Hausman and Taylor (1981) estimator 154 7.15 Cornwell and Rupert (1988): Hausman and Taylor application 156 7.16 Serlenga and Shin (2007): gravity models of intra-EU trade 158 <th></th> <th></th> <th>disturbances</th> <th>130</th>			disturbances	130
7.1 Single Equation Estimation 133 Exercises 7.1 2SLS as a GLS estimator 133 7.2 Within 2SLS and between 2SLS as GLS estimators 134 7.3 Within 2SLS and between 2SLS as GLS estimators 135 7.4 Error component two-stage least squares 135 7.5 Equivalence of several EC2SLS estimators 137 7.6 Hausman test based on FE2SLS vs EC2SLS 139 7.2 System Estimation 143 Exercises 143 7.7 3SLS as a GLS estimator 144 7.9 Within 3SLS and between 3SLS 144 7.10 Error component three-stage least squares 146 7.11 Equivalence of several EC3SLS estimators 148 7.12 Special cases of the simultaneous equations model with one-way error component disturbances 148 7.1 Sendogenous Effects 151 Exercises 151 7.13 Mundlak's (1978) augmented regression 151 7.14 Hausman and Taylor (1981) estimator 154 7.15 Cornwell and Rupert (1988): Hausman and Taylor application 156 7.16 Serlenga and Shin (2007): gravity models of intra-EU trade 158 7.16 Cornwell and Trumbull (1994):	7	Simultane	ous Equations with Error Components	133
Exercises 7.1 2SLS as a GLS estimator 133 7.2 Within 2SLS and between 2SLS as GLS estimators 134 7.3 Within 2SLS and between 2SLS as GLS estimators 135 7.4 Error component two-stage least squares 135 7.5 Equivalence of several EC2SLS estimators 137 7.6 Hausman test based on FE2SLS vs EC2SLS 139 7.2 System Estimation 143 Exercises 7.7 3SLS as a GLS estimator 144 7.8 Within 3SLS and between 3SLS 144 7.9 Within 3SLS and between 3SLS as GLS estimators 144 7.10 Error component three-stage least squares 146 7.11 Equivalence of several EC3SLS estimators 148 7.12 Special cases of the simultaneous equations model with one-way error component disturbances 149 7.3 Endogenous Effects 151 Exercises 151 7.13 Mundlak's (1978) augmented regression 151 7.14 Hausman and Taylor (1981) estimator 156 7.15 Cor	-		-	133
7.1 2SLS as a GLS estimator 133 7.2 Within 2SLS and between 2SLS as GLS estimators 134 7.3 Within 2SLS and between 2SLS as GLS estimators 135 7.4 Error component two-stage least squares 135 7.5 Equivalence of several EC2SLS estimators 137 7.6 Hausman test based on FE2SLS vs EC2SLS 139 7.2 System Estimation 143 Exercises 7.7 3SLS as a GLS estimator 144 7.8 Within 3SLS and between 3SLS 144 7.9 Within 3SLS and between 3SLS as GLS estimators 144 7.10 Error component three-stage least squares 146 7.11 Equivalence of several EC3SLS estimators 148 7.12 Special cases of the simultaneous equations model with one-way error component disturbances 149 7.3 Endogenous Effects 151 Exercises 151 7.13 Mundlak's (1978) augmented regression 151 7.14 Hausman and Taylor (1981) estimator 154 7.15 Cornwell and Rupert (1988): Hausman and Taylor application 156 7.16		_	e Equation Estimation	
7.2 Within 2SLS and between 2SLS 134 7.3 Within 2SLS and between 2SLS as GLS estimators 135 7.4 Error component two-stage least squares 135 7.5 Equivalence of several EC2SLS estimators 137 7.6 Hausman test based on FE2SLS vs EC2SLS 139 7.2 System Estimation 143 Exercises 7.7 3SLS as a GLS estimator 144 7.8 Within 3SLS and between 3SLS 144 149 7.9 Within 3SLS and between 3SLS as GLS estimators 144 7.10 Error component three-stage least squares 146 7.11 Equivalence of several EC3SLS estimators 148 7.12 Special cases of the simultaneous equations model with one-way error component disturbances 149 7.3 Endogenous Effects 151 Exercises 7.14 Hausman and Taylor (1981) estimator 154 7.15 Cornwell and Rupert (1988): Hausman and Taylor application 156 7.16 Serlenga and Shin (2007): gravity models of intra-EU trade 158 7.17 Cornwell and Trumbull (1994): crime in North Carolina 162 <td< td=""><td></td><td></td><td>2SLS as a GLS estimator</td><td>133</td></td<>			2SLS as a GLS estimator	133
7.3 Within 2SLS and between 2SLS as GLS estimators 135 7.4 Error component two-stage least squares 135 7.5 Equivalence of several EC2SLS estimators 137 7.6 Hausman test based on FE2SLS vs EC2SLS 139 7.2 System Estimation 143 Exercises 7.7 3SLS as a GLS estimator 144 7.8 Within 3SLS and between 3SLS as GLS estimators 144 7.10 Error component three-stage least squares 146 7.11 Equivalence of several EC3SLS estimators 148 7.12 Special cases of the simultaneous equations model with one-way error component disturbances 149 7.3 Endogenous Effects 151 Exercises 7.13 Mundlak's (1978) augmented regression 151 7.14 Hausman and Taylor (1981) estimator 154 7.15 Cornwell and Rupert (1988): Hausman and Taylor application 156 7.16 Serlenga and Shin (2007): gravity models of intra-EU trade 158 7.17 Cornwell and Trumbull (1994): crime in North Carolina 162 8 <t< td=""><td></td><td></td><td></td><td>134</td></t<>				134
7.4 Error component two-stage least squares 135 7.5 Equivalence of several EC2SLS estimators 137 7.6 Hausman test based on FE2SLS vs EC2SLS 139 7.2 System Estimation 143 Exercises 7.7 3SLS as a GLS estimator 144 7.8 Within 3SLS and between 3SLS 144 7.9 Within 3SLS and between 3SLS as GLS estimators 144 7.10 Error component three-stage least squares 146 7.11 Equivalence of several EC3SLS estimators 148 7.12 Special cases of the simultaneous equations model with one-way error component disturbances 149 7.3 Endogenous Effects 151 Exercises 151 7.13 Mundlak's (1978) augmented regression 151 7.14 Hausman and Taylor (1981) estimator 154 7.15 Cornwell and Rupert (1988): Hausman and Taylor application 156 7.16 Serlenga and Shin (2007): gravity models of intra-EU trade 158 7.17 Cornwell and Trumbull (1994): crime in North Carolina 162				135
7.5 Equivalence of several EC2SLS estimators 7.6 Hausman test based on FE2SLS vs EC2SLS 7.7 System Estimation Exercises 7.7 3SLS as a GLS estimator 7.8 Within 3SLS and between 3SLS 7.9 Within 3SLS and between 3SLS as GLS estimators 7.10 Error component three-stage least squares 7.11 Equivalence of several EC3SLS estimators 7.12 Special cases of the simultaneous equations model with one-way error component disturbances 7.13 Endogenous Effects Exercises 7.13 Mundlak's (1978) augmented regression 7.14 Hausman and Taylor (1981) estimator 7.15 Cornwell and Rupert (1988): Hausman and Taylor application 7.16 Serlenga and Shin (2007): gravity models of intra-EU trade 7.17 Cornwell and Trumbull (1994): crime in North Carolina Bynamic Panels Exercises 8.1 Bias of OLS, FE and RE estimators in a dynamic panel data model 4.2 Anderson and Hsiao (1981) estimator 8.3 Arellano and Bond (1991) estimator 8.4 Sargan's (1958) test of overidentifying restrictions 8.5 Ahn and Schmidt (1995) moment conditions 8.6 Ahn and Schmidt (1995) additional moment conditions 8.7 Arellano and Bond (1991) weak instruments 8.8 Alternative transformations that wipe out the individual effects 8.9 Arellano and Bover (1995) estimator 8.0 Arellano and Bover (1995) estimator 8.0 Arellano and Bover (1995) estimator 8.10 8.2 Arellano and Bover (1995) estimator 8.3 Arellano and Bover (1995) estimator 8.4 Alternative transformations that wipe out the individual effects 8.5 Arellano and Bover (1995) estimator				135
7.6 Hausman test based on FE2SLS vs EC2SLS 139 7.2 System Estimation 143 Exercises 7.7 3SLS as a GLS estimator 143 7.8 Within 3SLS and between 3SLS as GLS estimators 144 7.9 Within 3SLS and between 3SLS as GLS estimators 144 7.10 Error component three-stage least squares 146 7.11 Equivalence of several EC3SLS estimators 148 7.12 Special cases of the simultaneous equations model with one-way error component disturbances 149 7.3 Endogenous Effects 151 Exercises 7.13 Mundlak's (1978) augmented regression 151 7.14 Hausman and Taylor (1981) estimator 154 7.15 Cornwell and Rupert (1988): Hausman and Taylor application 156 7.16 Serlenga and Shin (2007): gravity models of intra-EU trade 158 7.17 Cornwell and Trumbull (1994): crime in North Carolina 162 8 Dynamic Panels 169 Exercises 8.1 Bias of OLS, FE and RE estimators in a dynamic panel data model 169 8.2 Anderson and Hsiao (1981) estimator 170				
Exercises 7.7 3SLS as a GLS estimator 7.8 Within 3SLS and between 3SLS 144 7.9 Within 3SLS and between 3SLS as GLS estimators 144 7.10 Error component three-stage least squares 146 7.11 Equivalence of several EC3SLS estimators 148 7.12 Special cases of the simultaneous equations model with one-way error component disturbances 149 7.3 Endogenous Effects 151 Exercises 7.13 Mundlak's (1978) augmented regression 151 7.14 Hausman and Taylor (1981) estimator 154 7.15 Cornwell and Rupert (1988): Hausman and Taylor application 156 7.16 Serlenga and Shin (2007): gravity models of intra-EU trade 158 7.17 Cornwell and Trumbull (1994): crime in North Carolina 162 8 Dynamic Panels 169 Exercises 8.1 Bias of OLS, FE and RE estimators in a dynamic panel data model 169 8.2 Anderson and Hsiao (1981) estimator 170 8.3 Arellano and Bond (1991) estimator 170 8.4 Sargan's (1958) test of overidentifying restrictions 172 8.5 Ahn and Schmidt (1995) moment conditions 174 8.6 Ahn and Schmidt (1995) moment conditions 175 8.7 Arellano and Bond (1991) weak instruments 176 8.8 Alternative transformations that wipe out the individual effects 177 8.9 Arellano and Bover (1995) estimator 180				139
Exercises 7.7 3SLS as a GLS estimator 143 7.8 Within 3SLS and between 3SLS 144 7.9 Within 3SLS and between 3SLS as GLS estimators 144 7.10 Error component three-stage least squares 146 7.11 Equivalence of several EC3SLS estimators 148 7.12 Special cases of the simultaneous equations model with one-way error component disturbances 149 7.3 Endogenous Effects 151 Exercises 7.13 Mundlak's (1978) augmented regression 151 7.14 Hausman and Taylor (1981) estimator 154 7.15 Cornwell and Rupert (1988): Hausman and Taylor application 156 7.16 Serlenga and Shin (2007): gravity models of intra-EU trade 158 7.17 Cornwell and Trumbull (1994): crime in North Carolina 162 8 Dynamic Panels 169 Exercises 8.1 Bias of OLS, FE and RE estimators in a dynamic panel data model 169 8.2 Anderson and Hsiao (1981) estimator 170 8.3 Arellano and Bond (1991) estimator 170 <t< td=""><td></td><td>7.2 Syste</td><td>em Estimation</td><td>143</td></t<>		7.2 Syste	em Estimation	143
7.8 Within 3SLS and between 3SLS 144 7.9 Within 3SLS and between 3SLS as GLS estimators 144 7.10 Error component three-stage least squares 146 7.11 Equivalence of several EC3SLS estimators 148 7.12 Special cases of the simultaneous equations model with one-way error component disturbances 149 7.3 Endogenous Effects 151 Exercises 7.13 Mundlak's (1978) augmented regression 154 7.14 Hausman and Taylor (1981) estimator 154 7.15 Cornwell and Rupert (1988): Hausman and Taylor application 156 7.16 Serlenga and Shin (2007): gravity models of intra-EU trade 158 7.17 Cornwell and Trumbull (1994): crime in North Carolina 162 8 Dynamic Panels 169 Exercises 8.1 Bias of OLS, FE and RE estimators in a dynamic panel data model 169 8.2 Anderson and Hsiao (1981) estimator 170 8.3 Arellano and Bond (1991) estimator 170 8.4 Sargan's (1958) test of overidentifying restrictions 172 8.5 Ahn and Schmidt (1995) moment conditions 174 8.6 Ahn and Schmidt (1995) additional moment conditions 175 8.7 Arellano and Bond (1991) weak instruments 176 8.8 Alternative transformations that wipe out the individual effects 177 8.9 Arellano and Bover (1995) estimator 180		Exercises		
7.9 Within 3SLS and between 3SLS as GLS estimators 7.10 Error component three-stage least squares 7.11 Equivalence of several EC3SLS estimators 7.12 Special cases of the simultaneous equations model with one-way error component disturbances 7.13 Endogenous Effects 7.14 Hausman and Taylor (1981) estimator 7.15 Cornwell and Rupert (1988): Hausman and Taylor application 7.16 Serlenga and Shin (2007): gravity models of intra-EU trade 7.17 Cornwell and Trumbull (1994): crime in North Carolina 8 Dynamic Panels 8 Dynamic Panels 8 Lisas of OLS, FE and RE estimators in a dynamic panel data model 8.2 Anderson and Hsiao (1981) estimator 8.3 Arellano and Bond (1991) estimator 8.4 Sargan's (1958) test of overidentifying restrictions 8.5 Ahn and Schmidt (1995) moment conditions 8.6 Ahn and Schmidt (1995) additional moment conditions 8.7 Arellano and Bond (1991) weak instruments 8.8 Alternative transformations that wipe out the individual effects 177 8.9 Arellano and Bover (1995) estimator		7.7	3SLS as a GLS estimator	143
7.10 Error component three-stage least squares 7.11 Equivalence of several EC3SLS estimators 7.12 Special cases of the simultaneous equations model with one-way error component disturbances 149 7.3 Endogenous Effects Exercises 7.13 Mundlak's (1978) augmented regression 151 7.14 Hausman and Taylor (1981) estimator 154 7.15 Cornwell and Rupert (1988): Hausman and Taylor application 7.16 Serlenga and Shin (2007): gravity models of intra-EU trade 7.17 Cornwell and Trumbull (1994): crime in North Carolina 162 8 Dynamic Panels Exercises 8.1 Bias of OLS, FE and RE estimators in a dynamic panel data model 8.2 Anderson and Hsiao (1981) estimator 170 8.3 Arellano and Bond (1991) estimator 170 8.4 Sargan's (1958) test of overidentifying restrictions 172 8.5 Ahn and Schmidt (1995) moment conditions 174 8.6 Ahn and Schmidt (1995) additional moment conditions 175 8.7 Arellano and Bond (1991) weak instruments 176 8.8 Alternative transformations that wipe out the individual effects 177 8.9 Arellano and Bover (1995) estimator		7.8	Within 3SLS and between 3SLS	144
7.11 Equivalence of several EC3SLS estimators 7.12 Special cases of the simultaneous equations model with one-way error component disturbances 7.13 Endogenous Effects Exercises 7.13 Mundlak's (1978) augmented regression 7.14 Hausman and Taylor (1981) estimator 7.15 Cornwell and Rupert (1988): Hausman and Taylor application 7.16 Serlenga and Shin (2007): gravity models of intra-EU trade 7.17 Cornwell and Trumbull (1994): crime in North Carolina 8 Dynamic Panels Exercises 8.1 Bias of OLS, FE and RE estimators in a dynamic panel data model 8.2 Anderson and Hsiao (1981) estimator 8.3 Arellano and Bond (1991) estimator 8.4 Sargan's (1958) test of overidentifying restrictions 8.5 Ahn and Schmidt (1995) moment conditions 8.6 Ahn and Schmidt (1995) additional moment conditions 8.7 Arellano and Bond (1991) weak instruments 8.8 Alternative transformations that wipe out the individual effects 8.9 Arellano and Bover (1995) estimator 8.0 Arellano and Bover (1995) estimator 8.0 Arellano and Bover (1995) estimator		7.9	Within 3SLS and between 3SLS as GLS estimators	144
7.12 Special cases of the simultaneous equations model with one-way error component disturbances 7.3 Endogenous Effects Exercises 7.13 Mundlak's (1978) augmented regression 7.14 Hausman and Taylor (1981) estimator 7.15 Cornwell and Rupert (1988): Hausman and Taylor application 7.16 Serlenga and Shin (2007): gravity models of intra-EU trade 7.17 Cornwell and Trumbull (1994): crime in North Carolina 162 8 Dynamic Panels Exercises 8.1 Bias of OLS, FE and RE estimators in a dynamic panel data model 8.2 Anderson and Hsiao (1981) estimator 8.3 Arellano and Bond (1991) estimator 8.4 Sargan's (1958) test of overidentifying restrictions 8.5 Ahn and Schmidt (1995) moment conditions 8.6 Ahn and Schmidt (1995) additional moment conditions 8.7 Arellano and Bond (1991) weak instruments 8.8 Alternative transformations that wipe out the individual effects 8.9 Arellano and Bover (1995) estimator 8.9 Arellano and Bover (1995) estimator		7.10	Error component three-stage least squares	146
rror component disturbances 7.3 Endogenous Effects Exercises 7.13 Mundlak's (1978) augmented regression 7.14 Hausman and Taylor (1981) estimator 7.15 Cornwell and Rupert (1988): Hausman and Taylor application 7.16 Serlenga and Shin (2007): gravity models of intra-EU trade 7.17 Cornwell and Trumbull (1994): crime in North Carolina 8 Dynamic Panels Exercises 8.1 Bias of OLS, FE and RE estimators in a dynamic panel data model 8.2 Anderson and Hsiao (1981) estimator 8.3 Arellano and Bond (1991) estimator 8.4 Sargan's (1958) test of overidentifying restrictions 8.5 Ahn and Schmidt (1995) moment conditions 8.6 Ahn and Schmidt (1995) additional moment conditions 8.7 Arellano and Bond (1991) weak instruments 8.8 Alternative transformations that wipe out the individual effects 8.9 Arellano and Bover (1995) estimator		7.11	Equivalence of several EC3SLS estimators	148
