Preface	xiii	
Part I.	Asset Pricing Theory	1
1 Consumption-Based Model and Overview		3
1.1 Basic Pricing Equation		4
1.2 Marginal Rate of Substitution/Stochastic Discount Factor		6
1.3 Prices, Payoffs, and Notation		8
1.4 Classic Issues in Finance		10
1.5 Discount Factors in Continuous Time		25
Problems		31
2 Applying the Basic Model		35
2.1 Assumptions and Applicability		35
2.2 General Equilibrium		37
2.3 Consumption-Based Model in Practice		41
2.4 Alternative Asset Pricing Models: Overview		43
Problems		45
3 Contingent Claims Markets		49
3.1 Contingent Claims		49
3.2 Risk-Neutral Probabilities		51
3.3 Investors Again		53
3.4 Risk Sharing		54
3.5 State Diagram and Price Function		56
4 The Discount Factor		61
4.1 Law of One Price and Existence of a Discount Factor		62
4.2 No Arbitrage and Positive Discount Factors		67

4.3	An Alternative Formula, and x^* in Continuous Time	72
	Problems	75
5	Mean-Variance Frontier and Beta Representations	77
5.1	Expected Return-Beta Representations	78
5.2	Mean-Variance Frontier: Intuition and Lagrangian Characterization	81
5.3	An Orthogonal Characterization of the Mean-Variance Frontier	84
5.4	Spanning the Mean-Variance Frontier	88
5.5	A Compilation of Properties of R^* , R^{**} , and x^*	89
5.6	Mean-Variance Frontiers for Discount Factors: The Hansen–Jagannathan Bounds	92
	Problems	97
6	Relation between Discount Factors, Betas, and Mean-Variance Frontiers	99
6.1	From Discount Factors to Beta Representations	100
6.2	From Mean-Variance Frontier to a Discount Factor and Beta Representation	103
6.3	Factor Models and Discount Factors	106
6.4	Discount Factors and Beta Models to Mean-Variance Frontier	110
6.5	Three Risk-Free Rate Analogues	111
6.6	Mean-Variance Special Cases with No Risk-Free Rate	117
	Problems	120
7	Implications of Existence and Equivalence Theorems	121
8	Conditioning Information	131
8.1	Scaled Payoffs	132
8.2	Sufficiency of Adding Scaled Returns	134
8.3	Conditional and Unconditional Models	136
8.4	Scaled Factors: A Partial Solution	144
8.5	Summary	145
	Problems	146
9	Factor Pricing Models	149
9.1	Capital Asset Pricing Model (CAPM)	152
9.2	Intertemporal Capital Asset Pricing Model (ICAPM)	165
9.3	Comments on the CAPM and ICAPM	167
9.4	Arbitrage Pricing Theory (APT)	173

9.5	APT vs. ICAPM	182
	Problems	183
Part II.	Estimating and Evaluating Asset Pricing Models	185
10	GMM in Explicit Discount Factor Models	189
10.1	The Recipe	190
10.2	Interpreting the GMM Procedure	192
10.3	Applying GMM	196
11	GMM: General Formulas and Applications	201
11.1	General GMM Formulas	202
11.2	Testing Moments	206
11.3	Standard Errors of Anything by Delta Method	207
11.4	Using GMM for Regressions	207
11.5	Prespecified Weighting Matrices and Moment Conditions	210
11.6	Estimating on One Group of Moments, Testing on Another	218
11.7	Estimating the Spectral Density Matrix	219
	Problems	227
12	Regression-Based Tests of Linear Factor Models	229
12.1	Time-Series Regressions	230
12.2	Cross-Sectional Regressions	235
12.3	Fama–MacBeth Procedure	245
	Problems	251
13	GMM for Linear Factor Models in Discount Factor Form	253
13.1	GMM on the Pricing Errors Gives a Cross-Sectional Regression	253
13.2	The Case of Excess Returns	256
13.3	Horse Races	259
13.4	Testing for Priced Factors: Lambdas or b 's?	260
13.5	Mean-Variance Frontier and Performance Evaluation	262
13.6	Testing for Characteristics	264
	Problems	265
14	Maximum Likelihood	267
14.1	Maximum Likelihood	268
14.2	ML is GMM on the Scores	270
14.3	When Factors Are Returns, ML Prescribes a Time-Series Regression	272

14.4	When Factors Are Not Excess Returns, ML Prescribes a Cross-Sectional Regression	275
	Problems	277
15	Time-Series, Cross-Section, and GMM/DF Tests of Linear Factor Models	279
15.1	Three Approaches to the CAPM in Size Portfolios	280
15.2	Monte Carlo and Bootstrap	286
16	Which Method?	293
Part III.	Bonds and Options	309
17	Option Pricing	313
17.1	Background	313
17.2	Black–Scholes Formula	320
	Problems	326
18	Option Pricing without Perfect Replication	327
18.1	On the Edges of Arbitrage	327
18.2	One-Period Good-Deal Bounds	329
18.3	Multiple Periods and Continuous Time	336
18.4	Extensions, Other Approaches, and Bibliography	345
	Problems	347
19	Term Structure of Interest Rates	349
19.1	Definitions and Notation	349
19.2	Yield Curve and Expectations Hypothesis	355
19.3	Term Structure Models—A Discrete-Time Introduction	357
19.4	Continuous-Time Term Structure Models	362
19.5	Three Linear Term Structure Models	368
19.6	Bibliography and Comments	379
	Problems	382
Part IV.	Empirical Survey	385
20	Expected Returns in the Time Series and Cross Section	389
20.1	Time-Series Predictability	391
20.2	The Cross Section: CAPM and Multifactor Models	435
20.3	Summary and Interpretation	449
	Problems	453

21 Equity Premium Puzzle and Consumption-Based Models **455**

- 21.1 Equity Premium Puzzles 456
- 21.2 New Models 465
- 21.3 Bibliography 481
- Problems 485

Part V. Appendix 487

Appendix. Continuous Time 489

- A.1 Brownian Motion 489
- A.2 Diffusion Model 491
- A.3 Ito’s Lemma 494
- Problems 495
