Preface	xvii

## **Part I. Introduction to the theory of externalities, public goods, and club goods**

1	Views on market intervention	3
1.1	Some basic terms and definitions	8
1.2	Scope and importance of externalities, public goods, and club goods	10
1.3	Purposes of the book	13
1.4	Plan of the book	14
2	Equilibrium concepts in public economics	17
2.1	Methodological considerations	17
2.2	Normative aspects	21
2.3	Equilibrium concepts	26
2.4	Local public goods, spillovers, and fiscal equivalence	32
2.5	Clubs and club goods	33
2.6	Policy failures	34

## **Part II. Externalities**

3	Theory of externalities	39
3.1	Externalities as absence of markets	40
3.2	Property rights and externalities	42
3.3	Nonconvexity and externalities	44
3.4	More on transaction costs	49
3.5	Special types of externalities	51
3.6	Externalities and public goods as incentive structures	63
3.7	Concluding remarks	66
4	Externalities, equilibrium, and optimality	68

4.1	Competitive equilibrium, externalities, and inefficiency	69
4.2	Pigouvian taxes and subsidies	72
4.3	Criticisms and modifications of the Pigouvian approach	79
4.4	Equilibrium and optimum quantities compared	82
4.5	Coase's contribution	86
4.6	Conclusions	91
	Appendix: Dual techniques	92
5	Externalities and private information	102
5.1	Simple bargaining processes with private information	103
5.2	Bargaining with self-selection constraints	109
5.3	A demand-revealing scheme	114
5.4	Expected externalities and efficiency	121
5.5	Markets and private information	124
5.6	Concluding remarks	134
	Appendix: Constrained Pareto inefficiency of market equilibrium with hidden information	136

### Part III. Public goods

6	Pure public goods: Nash-Cournot equilibria and Pareto optimality	143
6.1	A simple representation of individual behavior	144
6.2	Nash-Cournot equilibrium	153
6.3	An index of easy riding	159
6.4	An $n$ -person economy	161
6.5	Some comparative statics	163
6.6	Optimal provision with distortionary taxes	171
6.7	Uncertainty and public good provision	179
6.8	A general pure public good model	184
6.9	Concluding remarks	190
	Appendix: Properties of the pure public good model	190
7	Alternative mechanisms for provision of public goods	198
7.1	Pareto-optimal provision of public goods	198
7.2	Lindahl's thought experiment	201
7.3	Majority voting	205
7.4	Mechanism design and public goods	214
7.5	The Clarke-Groves demand-revealing mechanism	221

7.6	The Groves-Ledyard scheme	230
7.7	A Bayes-Nash demand-revealing mechanism	234
7.8	Concluding remarks	237
8	Public goods in general	240
8.1	Public good provision with exclusion	243
8.2	Impure public goods	255
8.3	A model of congestion	272
8.4	Open access resources	277
8.5	Common property resources	283
8.6	Concluding remarks	289
	Appendix: The impure public good model	290
9	Game theory and public goods	300
9.1	Cooperative provision of public goods	302
9.2	Noncooperative binary-choice models: Static two-person games	305
9.3	Binary-choice models: Extensions	312
9.4	Noncooperative continuous-choice models	319
9.5	Subgame perfect equilibrium	321
9.6	Collective action	324
9.7	Concluding remarks	326
10	Departures from Nash-Cournot behavior	327
10.1	Nash equilibrium with contingent contributions	329
10.2	Matching behavior and subsidies	333
10.3	Nonmarket institutions and public goods	335
10.4	Nonzero conjectures and public goods	338

#### **Part IV. Clubs and club goods**

11	Homogeneous clubs and local public goods	347
11.1	A brief history of club theory	351
11.2	A taxonomy of clubs	354
11.3	Clubs: Optimality and equilibrium	355
11.4	The basic model: Homogeneous clubs with fixed utilization rates	356
11.5	A graphic representation	360
11.6	The optimal number of clubs and local public goods	363
11.7	Summary	369
12	Clubs in general	370
12.1	Club viewpoint and the partitioning issue	371

12.2	Homogeneous members: A total-economy viewpoint	372
12.3	Mixed clubs: A total-economy viewpoint	376
12.4	Alternative representations of the total-economy viewpoint	380
12.5	Mixed clubs: The replication issue	382
12.6	Other issues in club theory	385
12.7	Concluding remarks	393
13	Institutional forms and clubs	394
13.1	Competitive market provision	395
13.2	Noncompetitive provision	397
13.3	Government provision of club goods	400
13.4	Transaction costs	402
13.5	Multiproduct clubs	404
13.6	Other institutional considerations	409
13.7	Some examples and concluding remarks	411
14	Game theory and club goods	415
14.1	A cooperative game-theory formulation	417
14.2	Optimum club size and optimum number of clubs	419
14.3	A comparison of the cooperative game and nongame formulations	424
14.4	Noncooperative game theory and clubs: Recent advances	428
14.5	Cooperative game-theoretic formulation and institutional structures	430
14.6	An application: Cost allocation	432
14.7	Concluding remarks	433
15	Uncertainty and the theory of clubs	435
15.1	Participation uncertainty	436
15.2	Utilization uncertainty: Capacity constraint	439
15.3	Effects of risk aversion	447
15.4	Utilization uncertainty: No capacity constraint	448
15.5	Supply-side uncertainty	456
15.6	Concluding remarks	459
16	Intergenerational clubs	461
16.1	The model	463
16.2	The maintenance decision	470
16.3	Myopia and institutional form	472
16.4	Other considerations	476

16.5	Concluding remarks	477
	Appendix: Intergenerational club model	479

**Part V. Applications and future directions**

17	Empirical estimation and public goods	483
17.1	Estimation of demand for private goods versus public goods	484
17.2	Four estimation procedures	487
17.3	Distinguishing among models	494
17.4	Four specific studies	500
17.5	Concluding remarks	505
18	Applications and empirics	506
18.1	Direct evaluation techniques and public goods	506
18.2	Indirect evaluation techniques and public goods	516
18.3	Applications of club theory	523
18.4	Applications of the joint-product model and the pure public good model	529
18.5	Concluding remarks	535
19	Conclusions and directions for future research	536
19.1	Conclusions	537
19.2	Some directions for future research	547
	References	553
	Author index	581
	Subject index	587
