

# Contents

<b>1.</b>	<b>What is Desertification?: Definitions and Evolution of the Concept</b> .....	<b>1</b>
1.1	Definitions of Desertification .....	1
1.2	The Evolution of the Concept of Desertification ....	6
1.2.1	The Age of Awareness .....	6
1.2.2	The Age of Wrong Perception or Misconception ....	8
1.2.3	The Age of Doubt .....	9
1.2.4	The Myth of the Encroaching Desert .....	12
1.2.5	The Dawning of the New Realism .....	15
1.3	General Conclusion, Chapter 1 .....	16
<b>2.</b>	<b>“Desertification” or Land Degradation: Location and Dimension in Time, Vulnerability of Soil and Plants in Drylands</b> .....	<b>17</b>
2.1	Introduction .....	17
2.2	Location of “Desertification” or Land Degradation, Threatened Areas and Drought-Prone Regions .....	17
2.3	Dryness Ratio and Drought .....	21
2.3.1	Dryness Ratio .....	21
2.3.2	Drought .....	23
2.3.2.1	Meteorological Drought .....	24
2.3.2.2	Hydrological Drought .....	25
2.3.2.3	Agricultural Drought .....	32
2.4	The Droughts of the Twentieth Century Throughout the World .....	34
2.5	The Vulnerability of Soils in Drylands .....	36
2.6	The Survival of Plants in Dry or Seasonally Dry Ecozones .....	39
2.7	General Conclusion, Chapter 2 .....	41

<b>3.</b>	<b>Dimensions in Space of “Desertification” or Land Degradation: The Degree and Specificity in Each Continent</b> .....	<b>42</b>
3.1	Introduction: Global Dimension in Space of “Desertification” .....	42
3.2	Sub-Saharan Africa: Traditional Extensive Agriculture, Unadapted High Technology, and Land Degradation .....	43
3.2.1	Droughts in the Sahel .....	44
3.2.1.1	Paleo-Droughts and Historical Droughts .....	44
3.2.1.2	20th Century Droughts .....	45
3.2.1.3	Drought and Shifting Isohyets in Eastern Mali. Where Are the Most Severe Effects of Drought? ....	47
3.2.2	The Bioclimatological Ecozones .....	54
3.2.3	Traditional Land Occupation. Potentialities and Agricultural Limits in High Climatic Risk Drylands .	56
3.2.3.1	Hunting .....	57
3.2.3.2	Fishing .....	57
3.2.3.3	Domesticated Stock-Keeping .....	58
3.2.3.4	Agriculture in Sub-Saharan Drylands .....	59
3.2.4	What Are the Risks and How They Can Be Avoided? .....	61
3.2.4.1	In the Sahel .....	61
3.2.4.2	In the Sudanian Zone .....	65
3.2.4.3	The Sudano-Guinean Subzone .....	65
3.2.5	Environmental Difficulties of Development. Disasters: What Disasters? .....	66
3.2.5.1	Overgrazing .....	67
3.2.5.2	Overcropping and Deforestation .....	68
3.2.6	Conclusion .....	69
3.3	Egypt: An Example of the Misapplication of High Technology Leading to Man-Made “Desertification”	70
3.3.1	Causes of Land Degradation .....	70
3.3.2	Processes of Land Degradation .....	71
3.3.2.1	Water Table Rising .....	71
3.3.2.2	Absence of Nile Alluvium Resulting in Wind Erosion .....	71
3.3.2.3	Loss of Nutrients .....	71
3.3.3	Effects of Land Degradation .....	72
3.3.4	Conclusion .....	72
3.4	China: A Sophisticated Traditional Intensive Agriculture Beginning to Be Modified by High Technological Methods and “Desertification” or Land Degradation .....	72

3.4.1	Introduction: The Agricultural Origin of Land Degradation in China .....	72
3.4.2	Classification of the Desertified Areas in China .....	77
3.4.2.1	Deserted Land and Desertified Land in the Arid Ecosystems .....	78
3.4.2.2	A Second Type of Desertified or Degraded Land in China in Semi-Arid and Dry Subhumid Steppes ..	84
3.4.3	The Major Indicators of Degradation .....	86
3.4.3.1	Changes in Topography .....	86
3.4.3.2	Changes in Composition of the Vegetative Cover .....	86
3.4.3.3	Changes in Texture of the Top Soil .....	88
3.4.4	Human Factors Leading to Environmental Change in Semi-Arid and Dry Subhumid Zones in China ...	88
3.4.4.1	Overcultivation and Degradation .....	90
3.4.4.2	Overgrazing and Degradation .....	92
3.4.4.3	Firewood Collection and Degradation .....	94
3.4.4.4	Land Degradation by Misuse of Water Resources ...	94
3.4.4.5	Land Deterioration and Nonrural Human Activities .	96
3.4.5	Conclusion .....	96
3.5	Transition from Traditional Low Technological to High Industrial Agriculture and Land Degradation in the USSR .....	97
3.5.1	Dry Ecozones in the USSR .....	97
3.5.2	Aridity and Other Physical Factors Leading to Land Degradation .....	98
3.5.2.1	The Climatic Factors .....	98
3.5.2.2	Soils .....	102
3.5.2.3	The Vegetation Resources .....	104
3.5.2.4	Water Resources .....	104
3.5.3	Human Activities and Land Degradation .....	106
3.5.3.1	Old Oases .....	107
3.5.3.2	Land Degradation in Desert Rangelands .....	108
3.5.3.3	Ecological Implication of Irrigation in Drylands .....	111
3.5.3.4	Environmental Impact of Industrial Development in Drylands of the USSR .....	117
3.5.4	Aeolian Action and Land Degradation in the Sandy Deserts of the USSR .....	118
3.5.5	Conclusion .....	120
3.6	High Technological Capital-Intensive Pastoralism and Land Degradation or "Desertification" in a Dry Continent: Australia .....	122
3.6.1	Human Causes of Land Degradation in Arid Australia .....	122
3.6.2	Grazing and Other Agricultural Activities in Semi-Arid Australia .....	123

3.6.3	Land Degradation in Irrigated Areas .....	125
3.6.4	Land Degradation in Nonagricultural Areas .....	125
3.6.4.1	Impact of Urban Settlements .....	125
3.6.4.2	Impact of Mining .....	127
3.6.5	Conclusion .....	128
3.7	High Technological Capital-Intensive Agriculture and Soil Degradation or "Desertification" in North America .....	128
3.7.1	Location of Land Degradation in the Drylands of the USA .....	129
3.7.2	The Causes of Land Degradation .....	131
3.7.2.1	Excessive Water Consumption, First Cause of Land Degradation .....	131
3.7.2.2	Overgrazing: Second Cause of Land Degradation ...	132
3.7.2.3	Salinization: Third Cause of Land Degradation ....	136
3.7.2.4	Physical Soil Erosion: Fourth Cause of Land Degradation .....	137
3.7.2.5	Combined Causes and Mechanisms of Land Degradation .....	139
3.7.3	Conclusion .....	145
3.8	General Conclusion, Chapter 3 .....	147
<b>4.</b>	<b>Processes Leading to Soil Degradation and "Desertification" .....</b>	<b>151</b>
4.1	Introduction .....	151
4.2	Physicochemical Process of Degradation .....	153
4.2.1	Potential Modifications and Decay of Soils Structure	153
4.2.2	Leaching .....	154
4.2.2.1	Aspects of Degradation by Leaching in the Upper Horizons of the Soil .....	155
4.2.2.2	Aspects of Degradation by Leaching in the Lower Horizons of the Soil .....	155
4.2.3	Waterlogging .....	156
4.2.4	Salinization and Alkalinization .....	157
4.2.4.1	Processes .....	157
4.2.4.2	Case Studies of Salinization: An Age-Old Irrigation Problem .....	158
4.2.5	Conclusion .....	161
4.3	Physical Processes of Land Degradation: Water Erosion .....	162
4.3.1	Soil Loss .....	162
4.3.2	Deteriorating Mechanisms of Water Action .....	165
4.3.3	Raindrop and Splash Effect .....	165

4.3.4	Runoff Action .....	167
4.3.5	Conclusion .....	169
4.4	<b>Physical Processes of Land Degradation: Wind Erosion; Where Is the Danger?</b> .....	170
4.4.1	What is Wind? .....	171
4.4.2	The Influence of Topography on Wind Conditions ..	172
4.4.3	The Wind Action System .....	174
4.4.3.1	Source Area .....	174
4.4.3.2	Transport Area .....	177
4.4.3.3	Deposit Area and Dune Formation .....	180
4.4.4	The Effects of Wind on Vegetation .....	190
4.4.5	Aeolian Soil Erosion .....	193
4.5	<b>General Conclusion, Chapter 4</b> .....	198
<b>5.</b>	<b>Prevention and Remedies</b> .....	<b>199</b>
5.1	Introduction .....	199
5.2	<b>Possibilities for Overcoming Climatic Risks in Drylands</b> .....	<b>201</b>
5.2.1	Cloud Seeding and Weather Modifications .....	201
5.2.2	Strengthening of Meteorological Services .....	201
5.3	<b>Avoiding the Threat to Vegetation</b> .....	<b>202</b>
5.3.1	Vulnerability of Dryland Vegetation .....	202
5.3.2	How to Obtain Biological Recovery .....	203
5.3.2.1	Natural Recovery .....	203
5.3.2.2	Artificial Recovery .....	204
5.3.3	Solutions to Avoid of Grazing Effects .....	210
5.3.3.1	Carrying Capacity .....	210
5.3.3.2	Mobile Resources for Nomadic Pastoralism .....	211
5.3.3.3	Game Ranching Instead of Cattle .....	212
5.3.3.4	Fodder Harvesting .....	212
5.4	<b>Some Solutions to Improve Drylands Agriculture</b> ...	<b>213</b>
5.4.1	Drought-Adapted Plants .....	213
5.4.2	Introduction of Lesser-Known Plants .....	214
5.4.3	Reclaiming Salty Soils and Water .....	217
5.4.4	Plant Breeding .....	219
5.5	<b>More Integrated Rural Activities for Agriculture Amelioration</b> .....	<b>220</b>
5.5.1	Multicrop Agriculture .....	220
5.5.2	Natural Bushland Exploitation .....	224
5.5.3	<b>Soil Degradation and Rehabilitation of an Agropastoral Land in Tanzania. Hopeful "De-Desertification": Case Study</b> .....	<b>224</b>

5.5.3.1	Degradation .....	224
5.5.3.2	Results of the HADO Project "De-Desertification" in Tanzania .....	227
5.6	Water Conservation Measures .....	228
5.6.1	Introduction .....	228
5.6.2	Difficulties in Obtaining Water .....	229
5.6.2.1	High Technology Solutions: A Mitigated Success ....	229
5.6.2.2	Low Technology Irrigation Systems and Water Conservation Measures .....	232
5.6.2.3	The Basic Requirements of Irrigation .....	232
5.6.2.4	Deep Borewells .....	234
5.6.3	Water Harvesting .....	234
5.6.4	Desalinization Techniques in the Search for Freshwater .....	241
5.6.5	Conclusion .....	243
5.7	Maintaining Soil Quality .....	244
5.7.1	Introduction .....	244
5.7.2	Halting Water Erosion .....	247
5.7.2.1	Control of Sheet Wash and Rillwash .....	247
5.7.2.2	Gully Reclamation .....	249
5.7.3	Control of Damaging Wind Effects .....	249
5.7.3.1	Methods for Preventing Progression of the Barchans	249
5.7.3.2	Control of Seif Dunes .....	251
5.7.3.3	Strategies for the Control and Prevention of Sand Encroachment .....	253
5.7.3.4	Windbreaks, Shelterbelts, and Wind Barriers .....	261
5.7.3.5	Additional Methods of Controlling the Wind .....	268
5.8	Training and Research .....	271
5.8.1	Training .....	271
5.8.1.1	What Is Not Working? .....	271
5.8.1.2	What Can Tradition Bring? .....	272
5.8.2	Research Results .....	272
5.9	General Conclusion, Chapter 5 .....	273
5.9.1	The Specific Solutions for China .....	274
5.9.2	Africa Must Find its Own Specific Remedies .....	276
<b>6.</b>	<b>General Conclusion: The Need for a New Realism ..</b>	<b>278</b>
