<i>Woodhead Publishing Series in Food Science, Technology and Nutrition</i>	<i>xxi</i>

1 Delivering performance in food supply chains: an introduction	1
<i>C. Mena and G. Stevens, Cranfield University, UK</i>	
1.1 The changing nature of the food supply chain.....	1
1.2 Scale and structure of the global food chain.....	3
1.3 Trends affecting the food supply chain	5
1.4 Structure of the book.....	9
1.5 Concluding remarks	14
1.6 References.....	14

Part I Managing relationships in food supply chains	17
--	-----------

2 Performance measurement in the management of food supply chain relationships	19
<i>A. S. Humphries and L. McComie, SCCI Ltd, UK</i>	
2.1 Introduction.....	19
2.2 Supply chain relationships.....	20
2.3 Measuring relationship performance.....	26
2.4 Weighing up a concept.....	27
2.5 Future trends.....	34
2.6 Sources of further information and advice	35
2.7 References.....	36

3	Living with power imbalance in the food supply chain	37
	<i>M. Hingley, Harper Adams University College, UK, and A. Lindgreen, University of Hull, UK</i>	
3.1	Introduction.....	37
3.2	Role of power	38
3.3	Relationship approach and power issues in agri- food channel relationships	40
3.4	Methodology	42
3.5	Findings.....	44
3.6	Network of relationships.....	48
3.7	Conclusions	53
3.8	Future trends.....	55
3.9	Sources of further information and advice.....	56
3.10	References.....	57
4	Supplier safety assessment in the food supply chain and the role of standards	62
	<i>D. Julien, Cranfield University, UK</i>	
4.1	Introduction.....	62
4.2	Material risk assessment.....	64
4.3	Supplier assessment and management	65
4.4	Hazard Analysis and Critical Control Points (HACCP) overview.....	70
4.5	Supplier audits and performance management.....	71
4.6	Impact of globalisation and need for a global standard	73
4.7	Global Food Safety Initiative (GFSI).....	76
4.8	ISO 22000 – food safety management systems	77
4.9	Conclusion and future trends	81
4.10	References.....	82
5	Understanding innovation in food chains	84
	<i>S. Estrada-Flores, Food Chain Intelligence, Australia</i>	
5.1	Introduction.....	84
5.2	Innovation as a driver of global competitiveness	86
5.3	Changing face of innovation in food production and manufacturing	94
5.4	Contemporary food innovation models	96
5.5	A new model: sustainable co-innovation	103
5.6	Platforms for sustainable co-innovation in the food sector.....	107
5.7	Conclusions and future trends.....	109
5.8	Sources of further information and advice	112
5.9	References.....	113

6 Sales and operations planning for the food supply chain: case study.....	119
<i>O. Yurt, Izmir University of Economics, Turkey, C. Mena and G. Stevens, Cranfield University, UK</i>	
6.1 What is sales and operations planning (S&OP)?.....	119
6.2 Trends in sales and operations planning and best practices	125
6.3 Implementing sales and operations planning	127
6.4 Challenges of sales and operations planning.....	132
6.5 Sales and operations planning in the food and drink industry.....	135
6.6 Summary and conclusions.....	139
6.7 References.....	139
7 Food supply chain planning, auditing and performance analysis.....	141
<i>A. J. Thomas, University of Wales Newport, UK, Y. Wang and A. Potter, Cardiff University, UK</i>	
7.1 Introduction.....	141
7.2 Food supply chain uncertainty.....	143
7.3 Understand, document, simplify and optimise (UDSO)	146
7.4 Quick scan audit methodology (QSAM).....	148
7.5 Application of quick scan audit methodology in the food industry	149
7.6 Optimisation to reduce supply chain uncertainty.....	150
7.7 Concluding remarks	156
7.8 References.....	156
8 Aligning marketing and sourcing strategies for competitive advantage in the food industry.....	158
<i>D. Chicksand, Warwick University, UK, and A. Cox, Newport Consulting, UK and University of San Diego, USA</i>	
8.1 Introduction.....	158
8.2 Literature review and discussion of marketing and sourcing strategies	160
8.3 Creating sustainable business success: development of effective marketing strategies	160
8.4 Creating sustainable business success: development of effective sourcing strategies	164
8.5 Creating sustainable business success: aligning brand and marketing strategies with sourcing strategies	166

8.6	Pioneer Foodservice case: developing a premium branded beef product.....	167
8.7	Conclusion and discussion.....	176
8.8	References.....	180
Part III	Managing processes efficiently and effectively in food supply chains	185
9	Value chain analysis of the UK food sector	187
	<i>K. Zokaei, Cardiff University, UK</i>	
9.1	Introduction.....	187
9.2	From supply chain management to value chain management	189
9.3	Methodology for value chain analysis.....	196
9.4	Conclusions	209
9.5	References.....	210
10	Improving responsiveness in food supply chains	212
	<i>A. Harrison, Cranfield University, UK</i>	
10.1	Introduction.....	212
10.2	The concept of agility	213
10.3	Two supply chains for bacalao.....	215
10.4	Vitacress: the challenge of very short shelf life.....	219
10.5	Conclusions	222
10.6	Acknowledgement.....	224
10.7	References.....	224
11	Reducing product losses in the food supply chain	225
	<i>P. A. Chapman, University of Oxford, UK</i>	
11.1	Describing the shrinkage problem.....	225
11.2	Scale of the problem.....	226
11.3	Strategies for reducing shrinkage.....	233
11.4	Potential benefits	239
11.5	References.....	241
12	Methods for assessing time and cost in a food supply chain.....	243
	<i>S. Templar and C. Mena, Cranfield University, UK</i>	
12.1	Introduction.....	243
12.2	Supply chain time – costing mapping (SCTCM) framework	244
12.3	Using the framework: a case study	249
12.4	Areas of opportunity	260

12.5	Conclusions	262
12.6	Sources of further information and advice	263
12.7	Acknowledgements	263
12.8	References	264
13	Improving food distribution performance through integration and collaboration in the supply chain	265
	<i>C. Stephens, Consultant, UK</i>	
13.1	Introduction.....	265
13.2	Grocery distribution in the UK.....	266
13.3	Improved performance through vertical integration	267
13.4	Improved performance through internal process integration	272
13.5	New technologies.....	274
13.6	Improved performance through cross-channel collaboration	275
13.7	Conclusion.....	279
13.8	Sources of further information and advice.....	280
13.9	References.....	281
Part IV	Maintaining quality and safety in food supply chains.....	283
14	Enhancing consumer confidence in food supply chains.....	285
	<i>M. Garcia Martinez, University of Kent, UK</i>	
14.1	Consumers' risk perception and trust in food chains.....	285
14.2	Impact of food traceability in restoring consumer trust in food chains.....	288
14.3	Consumers and corporate social responsibility in the food chain	289
14.4	Improving communication with consumers.....	291
14.5	Managing food safety in food supply chains	293
14.6	References	296
15	Quality and safety standards in food supply chains	303
	<i>R. Baines, Royal Agricultural College, UK</i>	
15.1	Introduction.....	303
15.2	Private standards and their evolution.....	304
15.3	Comparison of international standards.....	309
15.4	Conclusions	316
15.5	Future trends.....	320
15.6	Sources of further information and advice.....	322
15.7	References	322

16	Developments in quality management systems for food production chains	324
	<i>L. Theuvsen, Georg-August University of Goettingen, Germany</i>	
16.1	Regulatory framework.....	324
16.2	Quality management and the organization of food production chains	327
16.3	Quality-related communication in food production chains.....	329
16.4	Tracking and tracing food products	334
16.5	Total Quality Management in food production chains	337
16.6	Chain uptake of quality management systems.....	339
16.7	Quality management in food production chains: some final remarks	340
16.8	References.....	341
Part V	Using technology effectively in food supply chains	347
17	Role of diagnostic packaging in food supply chain management	349
	<i>D. Hobday, S. P. J. Higson and C. Mena, Cranfield University, UK</i>	
17.1	Introduction.....	349
17.2	Importance of intelligent packaging	353
17.3	Diagnostic packaging: time temperature indicators (TTIs) versus freshness quality indicators (FQIs) and new technologies	357
17.4	The use of radio frequency identification tags (RFID) in future supply chains.....	360
17.5	Conclusions	363
17.6	References	363
18	Advances in the cold chain to improve food safety, food quality and the food supply chain	366
	<i>S. J. James and C. James, Food Refrigeration and Process Engineering Research Centre (FRPERC), UK</i>	
18.1	Introduction: the cold chain.....	366
18.2	Effect of refrigeration on microbiological safety and shelf life.....	367
18.3	Effect of refrigeration on quality.....	368
18.4	Chilling and freezing.....	370
18.5	Storage	373
18.6	Transport.....	373
18.7	Retail display	376
18.8	Energy and the environment.....	379
18.9	Specifying refrigeration systems.....	381

18.10	Conclusions	383
18.11	References	384
19	Simulation modelling for food supply chain redesign.....	387
	<i>J. G. A. J. van der Vorst, Wageningen University, The Netherlands, D-J. van der Zee, University of Groningen, The Netherlands, S-O. Tromp, Wageningen University and Research Centre, The Netherlands</i>	
19.1	Introduction.....	387
19.2	Characteristics of the food supply chain network	389
19.3	Rationale of modelling and simulation in food supply chain design.....	393
19.4	Modelling requirements for food supply chains	396
19.5	Simulation environment	402
19.6	Case study: pineapple supply chain	405
19.7	Conclusions and future trends.....	411
19.8	Sources of further information and advice	412
19.9	Acknowledgements	413
19.10	References	413
20	Adoption of e-business solutions in food supply chains.....	416
	<i>M. Vlachopoulou and A. Matopoulos, University of Macedonia, Greece</i>	
20.1	Introduction.....	416
20.2	Approaching e-business.....	417
20.3	Factors affecting e-business adoption: taking a food chain-based approach	421
20.4	View of the evolution and current state of e-business uptake in the food industry.....	425
20.5	Conclusions and future trends.....	426
20.6	Sources of further information and advice	427
20.7	References	428
21	Radio frequency identification (RFID) as a catalyst for improvements in food supply chain operations	432
	<i>K. Pramadari, A. Karagiannaki, C. Bardaki, Athens University of Economics and Business, Greece</i>	
21.1	Introduction.....	432
21.2	Radio frequency identification technology within supply chain management.....	434
21.3	RFID applications in the food supply chain	439
21.4	Conclusions	450
21.5	Sources of further information and advice	451
21.6	Acknowledgement.....	453
21.7	References	453

Part VI	Delivering food sustainably and responsibly	457
22	Reducing the external costs of food distribution in the UK.....	459
	<i>D. Fisher, AECOM, UK, A. McKinnon, Heriot-Watt University, UK, and A. Palmer, Cranfield University, UK</i>	
22.1	Introduction.....	459
22.2	Estimate of the total external costs of UK food distribution	460
22.3	Identifying and modelling options for reducing external costs.....	461
22.4	The key options	464
22.5	Conclusions	475
22.6	Acknowledgement.....	476
22.7	References	476
23	Fair trade and beyond: voluntary standards and sustainable supply chains	478
	<i>G. Alvarez, Cranfield University, UK</i>	
23.1	Introduction: rise of voluntary standards.....	478
23.2	What are voluntary standards?.....	481
23.3	Typologies of voluntary standards	481
23.4	Overview of the main voluntary standards in the food industry	484
23.5	Trends.....	499
23.6	Corporate strategies.....	503
23.7	Conclusion.....	506
23.8	Acronyms and abbreviations	507
23.9	References.....	508
24	Trends in food supply chain management	511
	<i>M. Bourlakis, Brunel University, UK, and A. Matopoulos, University of Macedonia, Greece</i>	
24.1	Introduction.....	511
24.2	Evolution of the food chain.....	512
24.3	Use of information and communication technology (ICT)-based applications.....	514
24.4	Sustainable food supply chains.....	517
24.5	Conclusions	521
24.6	Sources of further information and advice	524
24.7	References	524
