

Inhalt/Contents

Vorwort	11
Preface	12
1 Bericht und Schlussfolgerungen	13
1.1 Einleitung.	13
1.2 Methodenübergreifende Aspekte.	14
1.3 Methoden.	15
1.4 Schlussfolgerungen und Empfehlungen	22
1.5 Fazit	25
2 Report and Conclusions	26
2.1 Preface	26
2.2 Transdisciplinary Aspects	27
2.3 Methodologies	28
2.4 Conclusions and Recommendations	34
2.5 Concluding Remarks	37
3 Contributions	38
3.1 Visions on Toxicity Testing in the 21st Century: Reflections on a Strategy Document of the US National Research Council <i>Marcel Leist, Thomas Hartung, and Pierluigi Nicotera</i>	38
3.2 Safety Assessment of Botanicals and Botanical Preparations Used as Ingredients in Food Supplements: Testing an European Food Safety Authority-Tiered Approach <i>Gerrit Speijers, Bernard Bottex, Birgit Dusemund et al.</i>	57
3.3 <i>In Silico</i> Toxicology Screening of the Rodent Carcinogenic Potential of Phytochemicals Using Quantitative Structure– Activity Relationship Analysis <i>Luis G. Valerio Jr., Naomi L. Kruhlak, and R. Daniel Benz</i>	78
3.4 Testing Computational Toxicology Models with Phytochemicals <i>Luis G. Valerio Jr., Kirk B. Arvidson, Emily Busta et al.</i>	93
3.5 <i>In Silico</i> Models to Establish Level of Safety Concern in Absence of Sufficient Toxicological Data <i>Benoît Schilter, Manuel Dominguez Estevez, Myriam Coulet et al.</i>	110

3.6	<i>In Silico</i> Methods for Physiologically Based Biokinetic (PBBK) Models Describing Bioactivation and Detoxification of Coumarin and Estragole: Implications for Risk Assessment <i>Ivonne M. C. M. Rietjens, Ans Punt, Benoît Schilter et al.</i>	124
3.7	<i>In Vitro</i> Models for Carcinogenicity Testing – Reality or Fantasy? <i>Pablo Steinberg, Carsten Müller, Kristina Ullmann et al.</i>	149
3.8	Carcinogen Specific Expression Profiling: Prediction of Carcinogenic Potential? <i>Hans-Jürgen Ahr, and Heidrun Ellinger-Ziegelbauer</i>	160
3.9	Safety and Biological Efficacy Testing of Phytochemicals: An Industry Approach <i>Anette Thiel, Jochen Bausch, Mareike Beck et al.</i>	178
3.10	Metabolite Profiling in Rat Plasma as a Potential New Tool for the Assessment of Chemically Induced Toxicity <i>Hennicke Kamp, Roland Buesen, Eric Fabian et al.</i>	189
3.11	Profiling Techniques in Nutrition and Food Research <i>Hannelore Daniel</i>	200
3.12	The Complex Links between Dietary Phytochemicals and Human Health Deciphered by Metabolomics <i>Claudine Manach, Jane Hubert, Rafael Llorach et al.</i>	212
3.13	Anti-Oxidative and Antigenotoxic Properties of Vegetables and Dietary Phytochemicals: The Value of Genomics Biomarkers in Molecular Epidemiology <i>Theo M. C. M. de Kok, Pim de Waard, Lonneke C. Wilms et al.</i>	236
3.14	The Japanese Toxicogenomics Project: Application of Toxicogenomics – Utilizing Toxicogenomics into Drug Safety Screening <i>Takeki Uehara, Atsushi Ono, Toshiyuki Maruyama et al.</i>	254
3.15	Toxicology and Risk Assessment of Coumarin: Focus on Human Data <i>Klaus Abraham, Friederike Wöhrlin, Oliver Lindtner et al.</i>	272
3.16	Risk from Furocoumarins in Food? An Exposure Assessment <i>Dieter Schrenk, Sabine Guth, Nicole Raquet et al.</i>	295
3.17	Transcriptome Analysis in Benefit–Risk Assessment of Micronutrients and Bioactive Food Components <i>Jaap Keijer, Yvonne G. J. van Helden, Annelies Bunschoten et al.</i>	309
3.18	Colorectal and Prostate Cancer: The Role of Candidate Genes in Nutritional Pathways <i>Ulrike Peters</i>	325
3.19	Glucosinolates: DNA Adduct Formation <i>In Vivo</i> and Mutagenicity <i>In Vitro</i> <i>Chimgee Baasanjav Gerber, Wolfram Engst, Simone Florian et al.</i>	333

3.20	Defence Mechanisms against Toxic Phytochemicals in the Diet of Domestic Animals <i>Johanna Fink-Gremmels</i>	343
4	Posters	361
4.1	Coumarin Risk Assessment: Lessons from Human Data <i>Klaus Abraham, Klaus-Erich Appel, and Alfonso Lampen</i>	361
4.2	Coffee and Coffee Compounds are Effective Antioxidants in Human Cells and <i>In Vivo</i> <i>Tamara Bakuradze, Matthias Baum, Gerhard Eisenbrand et al.</i>	364
4.3	Studying Absorption, Distribution, Metabolism, and Excretion of a Complex Extract <i>Mareike Beck, Martine Bruchlen, Volker Elste et al.</i>	369
4.4	Polyphenolic Apple Extracts and their Constituents Modulate DNA Strand Breaks and Oxidation Damage in Human Colon Carcinoma Cells <i>Phillip Bellion, Frank Will, Helmut Dietrich et al.</i>	371
4.5	Comparative Evaluation of Experimental Data on α -Amylase Inhibition by Flavonoids Using Molecular Modelling <i>Lisa M. Bode, Thomas Homann, Harshadrai M. Rawel et al.</i>	376
4.6	Potential Risk of Furan in Foods <i>J. Brück, Dieter Schrenk, U. Schauer et al.</i>	378
4.7	Comparative Study on the Toxicity of Alternariol and Alternariol Monomethyl Ether in Human Tumour Cells of Different Origin <i>Julia Burkart, Markus Fehr, Gudrun Pahlke et al.</i>	379
4.8	A Role for Resveratrol and Curcumine in Sensitization of Glioblastoma Cells to Genotoxic Stress Induced by Alkylating Chemotherapeutics <i>Markus Christmann, N. Berdelle, G. Nagel et al.</i>	381
4.9	BfR Risk Assessment of Alkaloids as Ingredients and Contaminants of Food: Quinine, Opium Alkaloids, and Senecio Pyrrolizidine Alkaloids <i>Birgit Dusemund, Klaus-Erich Appel, and Alfonso Lampen</i>	382
4.10	Elucidation of the Genotoxic Activity of the Alkaloid Ellipticine in Human Cell Lines <i>Eva Frei, Jitka Poljaková, Lucie Bořek-Dohalská et al.</i>	391
4.11	Dietary Supplements and Herbal Medicinal Products – for a Clear Differentiation. Statement of the Society for Phytotherapy (GPT) to the “Article 13 Health Claim List” of the EFSA <i>Frauke Gaedcke, Bernd Eberwein, Olaf Kelber et al.</i>	393

4.12	Assessment of Genotoxicity of Herbal Medicinal Preparations According to the Guideline EMEA/HMPC/107079/2007 – A Model Project of Kooperation Phytopharmaka, Bonn, Germany <i>Frauke Gaedcke, Olaf Kelber, Karin Kraft et al.</i>	403
4.13	Implications for an Adverse Effect of Vitamin C in Photodynamic Therapy <i>Stefanie Grimm, Nicolle Breusing, and Tilman Grune</i>	408
4.14	Using the Nematode <i>Caenorhabditis elegans</i> to Identify Mode of Action of the Flavonoid Myricetin <i>Gregor Grünz, B. Spanier, and Hannelore Daniel</i>	409
4.15	Low-Temperature Plasma – Mild Preservation Technology for Minimal Processed Fresh Food? <i>Franziska Grzegorzewski, O. Schlüter, J. Ehlbeck et al.</i>	410
4.16	Influence of Fumonisin B1 on Gene Expression and Cytokine Production <i>Dorothee C. Hecker, Christian Salzig, and Dieter Schrenk</i>	411
4.17	Effects of Quercetin on the Detoxification of the Food Contaminant Benzo[a]pyrene in the Human Intestinal Caco-2 Cell Model <i>Stefanie Hessel, Andrea John, Albrecht Seidel et al.</i>	412
4.18	Risk Assessment of T-2 and HT-2 Toxin Using Human Cells in Primary Culture <i>Dennis Mulac, Maika Königs, Gerald Schwerdt et al.</i>	420
4.19	Pyrrolizidine Alkaloids in Honey Bee Products <i>Michael Kempf, Till Beuerle, Annika Reinhard et al.</i>	421
4.20	Identification of Molecular Determinants for Cytotoxicity of Isoliquiritigenin from Licorice (<i>Glycyrrhiza glabra</i>) towards Leukemia Cell Lines <i>V. Badireenath Konkimalla, Anne Kramer, Yujie Fu et al.</i>	429
4.21	Functional Effects of Polyphenol Metabolites Produced by Colonic Microbiota in Colon Cells <i>In Vitro</i> <i>Claudia Miene and Michael Glei</i>	430
4.22	Lifelong Exposure to Isoflavones Results in a Reduced Responsivity of the Mammary Gland in Female Rats towards Oestradiol <i>Almut Molzberger, Torsten Hertrampf, Frank Möller et al.</i>	432
4.23	Derivation of Maximum Amounts for the Addition of Functional Ingredients to Foods <i>Sina Tischer, Oliver Lindter, Almut Bauch et al.</i>	433
4.24	Constituents of Ginger Induce Micronuclei in Two Mammalian Cell Systems <i>In Vitro</i> <i>Erika Pfeiffer, Julia S. Dempe, Marina J. Gary et al.</i>	434

4.25	Relative Photomutagenic Potency of Furocoumarins and Limettin <i>Christiane Lohr, Dieter Schrenk, and Nicole Raquet</i>	435
4.26	Degradation of Green Tea Catechins <i>Markus Schantz, Thomas Erk, and Elke Richling</i>	436
4.27	Evaluation of the Cytotoxic Effects of Herbal Homeopathic Extracts in Primary Human Hepatocytes <i>In Vitro</i> <i>Ulrike Sobeck, B. Rüdinger, F. Stintzing et al.</i>	437
4.28	Modulation of Antioxidant Gene Expression by Apple Juice in Rats <i>Bülent Soyalan, J. Minn, Hans-Joachim Schmitz et al.</i>	442
4.29	Predictivity Comparison between Screening Assays for Bacterial Mutagenicity for Natural Compounds: Micro-Ames vs. Ames Fluctuation Method <i>Gerlinde Pappa, Tina Wöhrle, Anette Thiel et al.</i>	449
4.30	Automated <i>In Vitro</i> Micronucleus Testing of Natural Compounds in Correlation with Hydrogen Peroxide <i>Gerlinde Pappa, Tina Wöhrle, Anette Thiel et al.</i>	450
4.31	Permeability of Apple Polyphenols in T84 Cell Model and their Influence on Tight Junctions <i>Hannah Bergmann, Dorothee Rogoll, Wolfgang Scheppach et al.</i>	451
4.32	Influence of Apple Polyphenols on Inflammatory Gene Expression <i>Sven Triebel, Ralph Melcher, Gerhard Erkel et al.</i>	452
4.33	Diethylstilbestrol-Like Effects of Genistein on Gene Expression of Wnt-Signalling Components in the Endometrial Ishikawa Cell Line <i>Jörg Wagner and Leane Lehmann</i>	453
4.34	Effect of Dietary Flavonoids in Different Cell Lines: Comparison of Uptake, Modulation of Oxidative Stress and Cytotoxic Effects <i>Wim Wätjen, Sven Ruhl, Ricarda Rohrig et al.</i>	460
4.35	Risk–Benefit Considerations of Isoflavone Supplements in the Treatment of Menopausal Vasomotor Symptoms <i>Uta Wegewitz, Klaus Richter, A. Jacobs et al.</i>	461
4.36	Effect of Different Catechins on the Growth of HT-29 Cells <i>Stefanie Wiese, Tuba Esatbeyoglu, Peter Winterhalter et al.</i>	463
4.37	Determination of the Isoflavone Content of Soy-Based Infant Formula of the German Market Using a Box-Behnken Experimental Design for Optimizing the Analytical Conditions <i>Stefanie Witte, Hans-Peter Kruse, and Sabine E. Kulling</i>	465

5 Appendix	467
Participants of the Symposium Risk Assessment of Phytochemicals in Food – Novel Approaches	467
Members of the DFG Senate Commission on Food Safety: Mandate 2007–2010	475
