

## Analytic Table of Contents

Introduction: How to build a house for the social mind

Two Premises, a brief genealogy of the history of teleo-mechanism and the biological vernacular PAGE 8

Two premises Page 8

A brief genealogy of the teleomechanist program Page 13

Chapter One: Finding building the blocks for a house of the mind

Kant and the possibility of the sciences of life, mind, and communication PAGE 37

Kant, the Unity of Reason, and the Dualism Regulative/Constitutive Page 39

The Discursivity of Concepts, the sensus community

and problems of the Kantian Enterprise Page 45

The contingency of We Page 50

The Task of Reason and the Communicative Community

Humanity: Wie ist Metaphysik als Naturanlage moeglich? Page 54

Space Page 57

Transcendental logic Page 58

Sensus Communis: The Critique of Reason Page 66

The Legacy of the Critical Project: Communication, political

judgment and the community of spectators Page 77

Kant's Theory of Truth Page 80

Kant's assembling of the prerequisites for the

teleomechanic program Page 101

Chapter Two: Scaffoldings and foundations for building a social house of the mind

Lotze on the transcendence of the boundaries of the microcosms  
of life and Max Weber's Logic of Science PAGE 105

On Lotze's Influence in General: Wechselwirkung, values,  
and mechanism as an idealtyp versus mechanistic science Page 105

Lotze's Dialogue of Faculties Page 117

Lotze on interlocution: Meaning, Sense and references  
with others Page 126

Foundations: Max Weber's Logic of Science Page 137

Weber's Logic of Science in Practice:

Psychophysik der Arbeit Page 139

Wissenschaftslehre as a method Page 145

Roscher Emanationism Page 146

Knies Page 154

Chapter Three: Cornerstones

Early American Pragmatism, William James,  
and the evolution of the (social) mind PAGE 170

Emerson and the evasion of philosophy in American pragmatism	Page 170
Emerson and equilibrium	Page 182
Emerson, the American scholar and Structure of social action	Page 186
William James	Page 191
Equilibrium from Emerson to James	Page 198
James' debt to Lotze	Page 203

#### Chapter Four: A house for the social mind

Talcott Parsons' biological vernacular, the languages of the social sciences, and communication as a problem and solution.	PAGE 221
Talcott Parsons: Student, Translator and biologist	Page 221
Early Talcott Parsons' Kantian Style of Reasoning	Page 242
Social Ethics and Sociology 6	Page 250
Henderson, AGIL, the medical study, equilibrium and the early lectures	Page 267
The Medical Study	Page 287
Towards a common language	Page 301
A late appreciation of Jaspers	Page 317
The media theory	Page 331
Parsons, behavioral science, and international relations	Page 351

#### Chapter Five: Furnishings

Parsons and his interlocutors: Durkheim, Jaspers, and Barnard	PAGE 357
Chester Barnard and the functions of the executive	Page 357
Concepts and Sources in Toennies, Simmel, Weber, and Durkheim	Page 375
Clinical context, Pluralism, and the biological vernacular	Page 423
Kant or Husserl in the Weberian thought of Jaspers	Page 425
"Medicine or Philosophy" vs. clinical philosophy	Page 428
The concepts of science	Page 428
Fact and Tatsache	Page 431
Four Reality Spheres	Page 433
Science, Action, and contingency	Page 435
The clinical practice	Page 437
Afterword: instead of an answer or conclusion: a reopening	Page 441

Bibliography	Page 446 to 484
