

Contents

List of Figures	xi
List of Tables	xiii
Preface	xv
Acknowledgments	xvii
Chapter One	
The World Food Problem and Technology Transfer	1
The Problem: The Food Crisis	1
World Population Growth	2
World Food Supplies	2
Famine and Chronic Food Shortages	6
Food from the Sea	8
The Research Plan	10
Selection of Developing Countries for Technology Transfer	13
Population Analysis of Selected Samples	16
Summary	17
References	18

Chapter Two	
The Current Role of Aquaculture: Potential for Species Transfer	19
Introduction	19
The Extent and Distribution of World Aquaculture	20
Aquaculture Species	24
Potential Role of Aquaculture as a Source of World Protein	25
Species Selection for the Simulation Study	27
References	32
Chapter Three	
The Nature of Aquaculture Enterprises and Selected Models	35
The Nature of General Production Activity	35
The Factors Responsible for Low Levels of Aquaculture Production	35
Typical Aquaculture Operations	36
The Economic Aspects of Aquaculture Enterprises	38
Model Enterprises Selected for Transfer	40
Appendix 3-A: Sources: Simulation Data on Factor Input Parameters for Modeled Enterprises	47
Other References	48
Chapter Four	
1970 National Protein Supplies and Costs	49
Introduction	49
Net Food Supply Variables	50
Food Price Variables	51
Prices of the Factors of Production	52
Initial Aquaculture Cost Models	56
Cost of Protein by Type	58
Appendix 4-A: Food Price Data for Latin America	69
Appendix 4-B: Factor Price Data by Country	73
Appendix 4-C: Prices of other Production Inputs	79
References	68

Chapter Five	
Aquaculture Technology Transfer: A Simulation Model	83
Bioeconomic Model	83
Adjustments to Gross Cost per Unit of Protein	86
Demand and Other Factors	88
The Estimation of Potential Production, Employment and Foreign Exchange from Aquaculture	89
Summary	89
References	89
Appendix 5-A: Environmental Acceptability (<i>E</i>) for Fourteen Aquaculture Enterprises by Country	91
Chapter Six	
The Transfer of Aquaculture Technology: Simulation Results	95
Introduction	95
A Systems Framework: The Decision Matrices	95
Combined Species Score: Decision Rules for the Feasibility of Transfer	103
The Results of the Decision Analysis	109
The Export Potential for Aquaculture Species	113
Conclusions	115
References	117
Appendix 6-A: Unadjusted Costs of Protein per Kilogram by Sector by Country (<i>c'</i>)	119
Appendix 6-B: Adjusted Costs of Protein by Sector by Country (<i>c''</i>): Code A	127
Appendix 6-C: Technology Acceptance Indicators	133
Chapter Seven	
Land Suitability, Production, Employment and Foreign Exchange Earnings	137
Land Suitability for Inland and Coastal Aquaculture Production	137
Tentative Production and Employment Implications	139

Foreign Exchange Earnings	144
The Small Farmer and the Income Distribution	144
Conclusions	145

Chapter Eight

Conclusions and Future Research Needs	147
--	------------

Main Findings	147
Future Research Needs: Recommendations	150
Epilogue	151

**Annotated Biological Bibliography for
Aquaculture**

	153
Introduction to the Bibliography	153
Carp	153
Catfish	163
Tilapia	169
Mullet	173
Milkfish	174
Eels	176
Yellowtail	177
Shrimp	177
Oysters	191
Mussels	208
Seaweed	209
Freshwater Prawns	209
Trout	210
Crustaceans	216
Mollusks	217
Fish—General References	220

Economics Bibliography by Species 249

Carp	249
Yellowtail	249
Eel	249
Oysters	249
Shrimp	250
Seaweed	251

Trout	251
Catfish	252
Salmon	255
Crayfish	256
Miscellaneous Fish and Other Works	256

Index	263
